Leonard further commented, "The recently announced distribution agreement with Ortho Diagnostic Systems, Inc. (ODSI), a wholly owned subsidiary of Johnson & Johnson, for Cambridge's Recombigen(R) HIV-1 EIA test and the ongoing ODSI distribution agreement for BTRL's FDA-approved Western blot confirmatory test for HIV-1, brings together the technologies of both CBCX and BTRL; and when coupled with the marketing strengths of ODSI, will result in a dominant market position in the HIV diagnostics marketplace. The ability of Cambridge, through its recently announced manufacturing facility in Ireland, to manufacture and distribute products overseas, will enable the company to more efficiently supply its overseas distributors as well as gain a more rapid entry into the European Common Market and a strong position in EC-92."

Cambridge BioScience Corporation is a leader in recombinant technology, which it utilizes in the development and production of antigens, adjuvants and monoclonal antibodies as the basis for its lines of diagnostics, vaccines, and therapeutics for human and veterinary use.

#90205p8242 07/24/1990 ~PR Newswire

SAN JOSE, CA (JULY 24) PR NEWSWIRE - The Optical Products Division of the Sony Corporation of America has announced its new generation of CD-ROM drives, a write-once CD-ROM system, and two PC cards for developing and implementing CD-ROM XA applications.

The four new CD-ROM drives are: CDU-541 internal drive with an embedded SCSI-II (rev. 10) controller and 64 KB ring buffer: CDU-531 internal drive with a Sony bus controller and 8 KB ring buffer; CDU-6211 external drive with embedded SCSI-11 (rev. 10) controller and 64 KB ring buffer; and CDU-6201 external drive with Sony bus controller and 8 KB ring buffer.

The CDU-541 and CDU-6211 are the first CD-ROM drives to support SCSI-II (Small Computer Standard Interface), rev. 10 protocols. The embedded SCSI controller provides a burst transfer rate of 1.5 MB/second, and its 64 KB ring buffer allows the drive to read the data continuously with no latency for sequential reading.

The new generation CD-ROM drives deliver better performance at a lower cost than earlier generation models. All four drives have a high speed average access time of 0.38 seconds, a 25 percent improvement over the previous drives. Performance and reliability are further enhanced by realtime error correction using Sony's newly developed error correction LSI. Also, the new drives are engineered to minimize problems caused by dust, and the lens of each drive's optical pick-up is cleaned automatically every time the caddy is loaded or ejected.

The ability to play audio CDs is a standard feature of the new CD- ROM drives. Further, all of the drives can be mounted either horizontally or vertically, and they have new slimmer 5-1/4" profile.

The CD-ROM drives are designed for use by OEMs, VARs, systems integrators, Fortune 500 companies, government users, and educational institutions. All four new models will be available in the Fall, 1990. Consumer models based upon the same technology will be announced by the end of 1990.

The new Sony CD Write-Once System uses a write-once, read many (WORM) process to encode data permanently on a special CD-ROM disc. The system is designed for CD-ROM prototyping, formatting of data as part of the mastering process used by Sony's Digital Audio Disc corporation (DADC) for replicating CD-ROMs, direct publication of small quantities of 100 percent CD-ROM compatible discs, and the secure publication of sensitive data.

Finally, in a related development, Sony announced the appointment of Olaf Olafsson as vice president of the Optical Products Division. Also, Olafsson announced the appointments of senior managers in the division: Robert Headrick, general manager of Recorded Media; Richard Green, marketing manager for Rewritable Optical Products; and Alan C. Sund, marketing manager for CD-ROM hardware.

#90205p8248 07/24/1990 ~PR Newswire

GUILDERLAND, NY (JULY 24) PR NEWSWIRE - Intermagnetics General Corporation (NASDAQ: INMA) today reported net sales for the fourth quarter ended May 27, 1990, of $15,023,000, an increase of 25 percent over the $11,975,000 in the corresponding quarter a year ago. Net earnings were $393,000, or 6 cents per share, compared to $419,000, or 6 cents per share last year.

For the full fiscal year ended May 27, 1990, net sales were $46,624,000 compared to $42,295,000 in the previous fiscal year. Net income was $836,000, or 13 cents per share, compared to $1,689,000, or 26 cents per

share, in the prior fiscal year.

In announcing the results, Carl H. Rosner, chairman and president, stated, "The fourth-quarter results, which accounted for nearly half the year's earnings, reflect increasing production rates of our newest model of Magnetic Resonance Imaging (MRI) magnets used in medical diagnostic systems. In addition, the quarter includes higher revenues from externally funded development programs, which are becoming a larger portion of our business. These programs are important to the company, because they provide funds that allow us to explore new applications of our technologies and significantly supplement our internally funded research and development expenditures."

Commenting on fiscal 1990 results, Rosner stated, "Sales increased 10 percent and reached a record high for IGC; however, net income declined. During the year, we incurred extra costs associated with start-up problems and delays in scaling up production of our new MRI magnet. In addition, special inspection of superconducting wire necessary to ensure high quality standards, and associated rework costs, contributed to higher costs. Profit improvements in the fourth quarter, compared to prior quarters, were not as great as hoped for. Yet, significant overall progress is nevertheless being made, as is evident by the strong fourth-quarter shipments." He concluded by stating, "Our backlog of orders is nearly 50 percent higher than a year ago, providing a very healthy base for further improvement and growth in fiscal 1991."

IGC is a leading manufacturer of superconducting wire, and superconducting magnet systems, especially those used in MRI medical diagnostic systems. The company also produces cryogenic equipment, permanent magnet systems, and material separation devices.

IRVINE, CA (JULY 24) PR NEWSWIRE - Aerotest Inc., a rapidly expanding aviation service company, today announced formation of the Mojave Division integrating the company's transport maintenance and aircraft development activities at Mojave.

In making the announcement, the firm's president, Iain Glendinning, said that all of Aerotest's operations at Mojave will now report to Ron Neal as president of the division. Neal previously served as vice president-development at Mojave.

In the past year, Aerotest has implemented large aircraft maintenance activities under the direction of Dick Horn, vice president-transport maintenance, and employment has increased by over 400 persons. During that time, the company also constructed and commenced operations in a new 125,000 square foot complex capable of enclosing multiple aircraft, including B747's. As part of the complex, Aerotest developed the necessary infrastructure for Mojave to become a free standing division within the company.

In addition to the Mojave Division, Aerotest provides business aircraft maintenance and completion services through its Jet Center subsidiary at Van Nuys, and avionic engineering services at multiple locations through its Aerotronics subsidiary.

ANDOVER, MA (JULY 24) PR NEWSWIRE - Andover Bancorp, Inc. (NASDAQ: ANDB) today announced its operating results for the six months and second quarter ended June 30, 1990. The Bancorp's assets have grown to $694 million at June 30, 1990 compared to $661 million at June 30, 1989. Its capital to assets ratio now stands at 13.7 percent.

Andover Bancorp's net income, for the six month period ended June 30, 1990 totalled $848,000 or 21 cents per share, compared to $2,989,000 or 64 cents per share for the six months of 1989. Included in net income are net gains, before the effect of taxes, on the sales of securities and loans amounting to $286,000 for the 1990 period, compared to $375,000 for the corresponding period in 1989.

The net loss for the quarter ended June 30, 1989 totalled $277,000 or 7 cents per share, compared to a net income of $1,210,000 or 26 cents per share for the same period in 1989. The net loss included a net gain, before the effect of taxes, on the sales of securities and loans amounting to $349,000 in the second quarter of 1990, compared to a net gain of $570,000 in the second quarter of 1989. The net loss reflected a quarterly loan loss provision of $2.6 million.

As of June 30, 1990, the bank's non-performing assets totalled $39.1 million, compared with $29.8 million as of March 31, 1990, and $27.6 million as of Dec. 31, 1989. Net charge-offs for the quarter ended June 30, 1990 were $2.5 million compared with $104,000 for the second quarter of 1989. For the six months ended June 30, 1990, net charge-offs were $3 million compared to $191,000 in the corresponding six months of 1989.

Andover Bancorp, Inc. also announced that its board of directors has declared a quarterly dividend of 10 cents per share. The dividend will be payble Sept. 7, 1990 to shareholders of record at the close of business on Aug. 10, 1990. This quarterly dividend compares to 20 cents per share in the prior quarter.

Robert M. Henderson, chairman of the board and chief executive officer, stated that "The board of directors of Andover Bancorp considers this quarter's provision for possible loan losses and the reduction of this quarterly dividend to be financially prudent managment decisions. These decisions are the result of the continuing downturn of the New England real estate market, which has elevevated the levels of non-performing assets and the costs associated with dealing with these assets. Although we regret reducing the second quarter dividend from 20 cents per share to 10 cents per share, we believe that this is a prudent action."

Andover Bancorp, Inc. is the parent bank holding company of Andover Bank. Andover Bank is a Massachusetts chartered savings bank organized in 1834 and headquartered in Andover, Mass. approximately 25 miles north of downtown Boston. The bank operates branch banking offices in West Andover Lawrence, Methuen, North Andover and Tewksbury, Mass.

ATLANTA (JULY 24) PR NEWSWIRE - The Kroger Co. announced today that Paul M. Smith has been named president of the company's Atlanta Marketing Area retail operations.

Smith was vice president of the Atlanta KMA (Kroger Marketing Area) which operates 118 Kroger Food Stores in Georgia, Alabama, and South Carolina.

Kroger President and Chief Executive Officer, Joseph A. Pichler, said the change in title recognized the substantially increased authority and responsibility placed in the hands of KMA executives through the decentralization of Kroger's retail operations.

Cited for achieving Kroger's business goals, Smith was also recognized for directing the Atlanta division's 16,000 employees into meaningful community involvement. The Atlanta Community Food Bank, the American Red Cross, Hurricane Hugo victims, the Salvation Army and others have all been the beneficiaries of the Atlanta KMA's support during Smith's five years as its vice president.

Smith serves on the board of directors of Scottish Rite Hospital and Big Brothers/Big Sisters. He has also stimulated Kroger employee support for Adopt-a-School, Henrietta Engleston Hospital, MDA, Georgia Special Olympics and Earning for Learning, which gives schools free computers.

"Our policy of helping children through Kroger's community involvement was instituted by Paul Smith and because of this Atlanta has become a better place to live. We are truly proud of him and the entire Atlanta KMA," according to a Kroger spokesperson.

Smith earned a bachelor's degree in food distribution from Western Michigan University. He joined Kroger in 1964 and has held a variety of positions with the company. He became vice preisent of the Atlanta Marketing area in 1985.

LOUISVILLE, KY (JULY 24) PR NEWSWIRE - Glenmore Distilleries Company (AMEX: GDS.B) announced that, effective today, it has placed $35,000,000 of its 10.63 percent Senior Notes due June 30, 2000, and has executed a new $70,000,000 Revolving Credit Agreement with a syndicate of banks. Both borrowing arrangements are unsecured.

The Senior Notes were placed directly with a group of insurance companies, and the proceeds were used to repay existing indebtedness. The First Boston Corporation acted as agent for Glenmore in this transaction.

The $70,000,000 Revolving Credit Agreement replaces an existing $75,000,000 credit facility with the same group of banks and expires on October 31, 1993. The new bank credit is split into two portions: a $30,000,000 line of credit for working capital purposes; and a $40,000,000 line available for possible acquisitions. Citizens Fidelity Bank and Trust

Company of Louisville, Ky. serves as the agent bank.

Glenmore's products include: Kentucky Tavern, Yellowstone, Mellow Mash and Ezra Brooks Bourbons; Fleischmann's Gin; Skol and Fleischmann's Vodkas; Scoresby and Inver House Scotches; the Boston line of Cordials and Liquers; Canadian LTD; Old Thompson and Fleischmann's Preferred Blended Whiskies; Amaretto di Amore; Felipe II Imported Brandy; El Toro Tequila; Elduris Icelandic Vodka; and Chi-Chi's Margaritas, among others.

#90205p8267 07/24/1990 ~PR Newswire

MINNETONKA, MN (JULY 24) PR NEWSWIRE - Tonka Corp. (NYSE: TKA) today reported a net loss of $19.0 million, or $1.30 per share, on revenues of $146.3 million for the second quarter ended June 30, 1990, compared with net earnings of $100,000, or 2 cents a share, on revenues of $189.4 million for the same quarter last year. Tonka's shares outstanding were 14.6 million for second-quarter 1990, compared with 7.9 million shares outstanding for the second quarter of 1989.

For the first half of 1990, the company reported a net loss of $29.3 million, or $2.01 per share, on revenues of $282.2 million, compared with a net loss of $6.0 million, or 76 cents per share, on revenues of $351.6 million for the first half of 1989.

The company had said earlier that it expected to report a significant loss on lower revenues in the second quarter. The company said its year-to-year comparisons were adversely affected by expected declines in its maturing Ghostbusters line and the discontinued Sega video game line, and because of disappointing early retail sales of certain promotional products. From a divisional standpoint, second-quarter revenue gains at Parker Brothers and Tonka International only partially offset declines at Kenner and Tonka Products.

"We are clearly disappointed by our results in the first half," stated Chairman and CEO Stephen G. Shank. "We continue to expect a profitable second half, reflecting normal seasonality in the toy business and the fact that our international business historically generates a higher proportion of its revenues in the second half and we expect shipments of new products to be more significant during that period." The company again indicated that it is uncertain whether second-half results will be sufficient to offset the first-half deficit, and there is a real

possibility that Tonka will not be profitable for the year.

"We are pleased that early retail results from Kenner's new Batman line are excellent across the board," Shank stated, adding that if current retail trends continue, Batman could become a "significant contributor" to the company's revenues in the second half. Shank also said the company is "very encouraged" by early retail sales of Kenner's Baby Alive doll and preliminary test-market results of Tonka Products' new line of stuffed toys called Wrestling Buddies.

Tonka Corp., headquartered in Minnetonka, is the nation's third largest toy company. The company's operating divisions include Kenner Products, based in Cincinnati; Parker Brothers, based in Beverly, Mass.; and Tonka Products and Tonka International, based in Minnetonka.

MINNEAPOLIS (JULY 24) PR NEWSWIRE - Lynn A. Griswold, RN, ANP, has been promoted to the position of vice president - Nursing for In Home Health Inc., effective Aug. 1. This new position is responsible for assuring that the clinical nursing functions performed in the branches meet Standards of Nursing Practice and the company's operating policies and procedures. This includes compliance with federal/state licensure/certification requirements, and assuring that the administration of infusion therapy and other high-tech services follow established nursing protocol.

Griswold joined In Home Health Inc. in 1988 as the extended hours manager in the Phoenix, Ariz. branch. She became the general manager of that branch in March 1989. While general manager, the Phoenix branch more than doubled in revenue and is currently the company's largest operation. She was instrumental in developing and implementing the home IV and blood transfusion programs for the company.

Griswold has a BS in nursing from Montana State University and received

her Adult Nursing Practitioner certificate from the University of Arizona in 1987. She is a member of the American Association of Primary Care Providers, The American Nursing Association, the National Intravenous Therapy Association and serves on the board of directors for the Alzheimers Disease and Related Disorders Association.

In Home Health Inc. provides quality home health care to people of all ages in their own homes. Home health care is currently a $12 billion industry in the United States and is expected to grow to $30 billion by the mid 1990s.

NORFOLK, VA (JULY 24) PR NEWSWIRE - The Federal Reserve Board has approved the pending merger of The Citizens and Southern Corporation (NYSE: CTZ) and Sovran Financial Corporation (NYSE: SOV), the two companies announced today.

Management of the two companies also announced that their combined institution will be named C&S/Sovran Corporation, replacing "Avantor Financial Corporation," which was used when the merger was announed last September 26. With $50 billion in assets and more than 1,000 banking offices in seven states plus Washington, D.C., C&S/Sovran will be the 12th largest bank holding company in the nation.

C&S Chairman and Chief Executive Officer, Bennett A. Brown, who holds the same posts in the new company, said he expects the transaction to close on August 31, after the required 30-day waiting period for review by the Department of Justice.

Sovran, based in Norfolk, Virginia, has 495 offices in Virginia, Maryland, Tennessee, Kentucky and Washington, D.C. C&S, based in Atlanta, has 517 banking offices in Georgia, Florida and South Carolina.

The individual banks will continue operating under the C&S and Sovran names, while products and services will be unified for economic and marketing efficiencies. Some non-bank activities may operate under the combined name.

On a pro forma basis at the end of the second quarter, C&S/Sovran would have had $50.3 billion in total assets, $33.1 billion in loans, $36 billion in deposits and $3 billion in shareholders' equity.

LOS ANGELES (JULY 24) PR NEWSWIRE - Yutaro Hayashi, chairman and chief executive officer of Mitsui Manufacturers Bank, has joined the Campaign Leadership Cabinet for the Union Rescue Mission's (URM) Second Century Campaign.

Hayashi and other prominent Los Angeles leaders are helping URM raise $16 million to fund the most comprehensive facility in America for the treatment and restoration of homeless men, women and children, to be based in Los Angeles.

"As responsible business people, we must be sensitive to the needs of our community," said Hayashi. "The URM's Second Century Campaign will help our city's homeless lead more productive lives."

Hayashi is the first major executive of a Japanese-owned firm to join the campaign. He hosted a breakfast today for other Japanese business and community leaders to encourage their support of and involvement in the Second Century Campaign.

To date, more than $10 million has been raised. Among the URM's strategies for fund raising is the establishment of L.A.'s "100 Points of Light" -- those 100 individuals, organizations and corporations who will be the first to contribute to the Second Century Campaign.

Mitsui Manufacturers Bank, with assets of $1.4 billion, is the twelfth largest bank in California. It markets its services chiefly to mid-sized businesses and professionals, including real estate finance for middle market clients.

#90205p8286 07/24/1990 ~PR Newswire

SOUTH WINDSOR, CT (JULY 24) PR NEWSWIRE - Gerber Scientific, Inc. (NYSE: GRB) announced today that it expects earnings for the first six months of its current fiscal year to be significantly lower than the prior year.

The company is experiencing softness in order entry in all of its major product areas. This trend, which began in the fourth quarter of last year has worsened and as a result the company will have lower first-half orders, sales, and earnings than originally anticipated. Without an

improvement in economic conditions or significant near-term success for new product introductions, the company expects it will be difficult to reverse the unfavorable trend in operating results in the second half of the year.

As noted in its recently published annual report to shareholders, the company attributes this to a number of additive factors including increased worldwide competition, a softer U.S. economy, tighter credit availability to its customers, bankruptcies in the retail industry, lower military spending, and disruption in Eastern Bloc markets. However, the company also noted that it was in a period of transition to newer products which are not expected to have major impact on the short- term consolidated results but which it believes have excellent long-term market potential. The company remains financially strong with high liquidity and a low ratio of debt-to-equity.

Gerber Scientific, Inc. produces high-technology capital equipment that automates production in the apparel, automotive, aerospace, electronics, metalworking, footwear, printing, optical, graphic arts, and signmaking industries.

EL SEGUNDO, CA (JULY 24) PR NEWSWIRE - Sales and earnings of Farr Company climbed to new highs in the second quarter and first half of 1990.

The board of directors today authorized a 5-for-4 stock split, and declared a quarterly cash dividend of 6 cents per share on the increased number of shares to be outstanding following the stock split. This is equivalent to the 7 1/2 cent per share quarterly dividend that the company had been paying on the pre-split shares. Both the stock split and the cash dividend will be paid Sept. 7, 1990, to shareholders of record Aug. 17, 1990.

There are currently 2,836,277 shares of common stock outstanding.

For the quarter, net income was $999,000, up 17 percent from $856,000 a year ago. Earnings per share were 33 cents, an increase 10 percent from 30 cents per share in the prior year, reflecting the greater number of common equivalent shares included in the earnings per share calculation as a result of the recent substantial increase in the price of Farr Company's common stock.

Second quarter sales advanced 13 percent to $22,533,000 from $20,011,000 in the corresponding quarter of 1989.

Net income for the first six months climbed 33 percent to $1,780,000 from $1,340,000 one year earlier, and earnings per share increased 30 percent to 61 cents from 47 cents in 1989. First half sales totaled $43,405,000, up 13 percent from $38,284,000 in the same period last year.

Allan B. Foy, chairman and president, said, "This is our third consecutive quarter of record sales, and increases have been achieved in all our operating units, especially Europe. In terms of markets, the major gains were in gas turbine filter houses; heating, ventilating and air conditioning filters; and dust collection products. The gas turbine market is especially strong at this time.

"The improvement in profits was largely domestic and reflects several factors including increased sales volume, higher gross margins, tight control over costs and reduced interest expense. In addition, our European operations have achieved significant gains as a result of their sales growth.

"Looking ahead, we continue to be optimistic about the company's prospects for further improvements in sales and earnings in the second half. In addition, we believe that the increase in the number of shares outstanding as a result of the 5-for-4 stock split declared today will assist in broadening the ownership of the company as well as improving the marketability of the common stock."

Farr Company is a leading producer of filters for particulate, liquid and gaseous filtration systems.

CHICAGO (JULY 24) PR NEWSWIRE - John Nuveen & Co. Incorporated today announced the initial public offering of a combined total of $95 million of preferred stock of two tax-free exchange-traded funds.

One series of 1,100 shares of preferred stock, priced at $50,000 per share was offered by the Nuveen California Municipal Market Opportunity Fund Inc. Another series of 800 shares of preferred stock, also priced at $50,000 per share, was offered by the Nuveen New York Municipal Market Opportunity Fund, Inc.

Both funds are closed-end investment companies whose common shares trade on the New York Stock Exchange.

Lehman Brothers served as lead manager for both preferred stock

underwritings. Co-managers were Alex. Brown & Sons Incorpoated, Merrill Lynch Capital Markets, John Nuveen & Co. Incorporated, PaineWebber Incorporated, Prudential-Bache Capital Funding and Smith Barney, Harris Upham & Co. Incorporated.

The proceeds from both preferred stock offerings will be invested in their respective funds' portfolios of investment-grade quality municipal bonds.

After completion of the initial public offering, the preferred shares of each fund will initially be available for purchase every week and will pay dividends reset in weekly auctions.

Both funds are managed by Nuveen Advisory Corp., a wholly owned subsidiary of John Nuveen & Co. Incorporated. Nuveen has sponsored more than $39 billion of tax-free trusts and funds owned by over 700,000 investors nationwide. Founded in 1898 and headquartered in Chicago, Nuveen is the nation's oldest and largest (based on number of employees) investment banking firm specializing in the underwriting, trading and marketing of municipal bonds, and of tax free unit trusts, mutual funds and exchange-traded funds.

For more complete information, including a prospectus which explains all charges and expenses, investors should contact their securities representatives or John Nuveen & Co. Incorporated, 333 West Wacker Drive, Chicago, Ill. 60606. Investors should read the prospectus carefully before they invest.

MADRID, SPAIN (JULY 24) PR NEWSWIRE - On July 6, 1990, Iberia Airlines, heading a group of local directors, and with the counsel of International Banks, presented its bid for the privatization of 85 percent of Aerolineas Argentinas with an offer of $2.27 billion. The form of payment offered by the Iberia-led group will entail a repayment to Argentina of $2.01 billion of its foreign debt, $130 million in cash and another $130 million payable in 10 biannual fees.

There are several reasons which caused Iberia to take this important step. Due to the type of fleets, routes and markets, a complementary relationship is possible between Iberia and Aerolineas Argentinas, whose cooperation will result as beneficial to both companies, improving and increasing the service offered to their respective clients.

Furthermore, there is a long tradition of cooperation and understanding between both companies, which will facilitate joint projects. One of the

important aspects of Iberia's option is its historical and prestigious presence in the Latin America market, being the principal European operator in that continent. Iberia currently flies to 47 countries in Latin America, as well as to the United States and Canada, and transported more than 1.2 million passengers between both continents in 1989.

In addition to the Latin America market, Iberia holds an important position on both the European and international levels: fourth position in passengers carried in AEA (Asociacion Europea de Lineas Aereas/European Airline Association), and 10th in IATA (Asociacion Internacional de Transporte Aereo/International Air Transport Association). In the last four years, Iberia has attained a cumulative result of $459.8 million in profit, billings of $11.12 billion and has generated a cash flow of $1.16 billion.

TORONTO (JULY 24) PR NEWSWIRE - Fahnestock Viner Holdings Inc. (Alberta: FHV) released the following results today:

Earnings for the six months ended June 30, 1990 were U.S. $1,271,000 or 11.3 cents per share compared to U.S. $2,149,000 or 19.1 cents per share for the corresponding period of 1989.

Second quarter earnings for 1990 were U.S. $1,036,000 or 9.2 cents per share compared to U.S. $1,211,000 or 10.8 cents per share in 1989. The second quarter earnings include the operations of the 10 B.C. Christopher branches acquired on March 26, 1990.

The U.S. securities markets were less active in 1990 than in 1989. The reduced levels of volume, generally, affected the total revenues for the six months in 1990 compared to 1989. The B.C. Christopher operations and accounts have been completely assimilated and the costs of the conversion of the accounts and offices have been reflected in the second quarter results. The conversion process went smoothly and management is pleased to report that the B.C. Christopher contribution is better than expected. We welcome the B.C. Christopher staff and clients to the Fahnestock group.

Fahnestock Viner Holdings Inc. is the parent company of Fahnestock & Co. Inc., a U.S. broker dealer operating 38 offices in the Midwest, North-Eastern States and Florida.

CONTACT: A.G. Lowenthal, 212-668-5785; or E.K. Roberts 416-364-3397, both for Fahnestock Viner Holdings Inc.

#90205p8308 07/24/1990 ~PR Newswire

SOUTH BEND, Ind. (JULY 25) PR NEWSWIRE - Clark Equipment Co. (NYSE: CKL) today announced net income of $17.4 million, or $1.01 per share, on sales of $343.9 million for the three months ended June 30, 1990. This compares to net income of $17.1 million, or $1.00 per share, on sales of $356.2 million in second quarter 1989, and net income of $20.0 million, or $1.16 per share, on sales of $385.8 million in first quarter 1990. For the six months ended June 30, 1990, Clark net income was $37.5 million on sales of $729.7 million compared to 1989 first-half net income of $31.1 million on sales of $669.9 million.

Leo J. McKernan, Clark chairman and chief executive officer, attributed the second quarter's sales and earnings decreased from first quarter levels largely to the disruption of Brazilian markets by new economic programs introduced in late March and flat sales and net income in the remainder of Clark's business. Second quarter results benefited from a lower provision for income taxes as the cumulative impact of a change in the estimated full-year rate was reflected.

In Clark's Brazil-based Automotive Products business, sales declined by $36.2 million in the second quarter, resulting in a Clark Automotive loss of $3.0 million. ''By the end of June, Brazilian backlogs and order rates were back up to normal levels. While the situation in Brazil has improved substantially, the economic environment remains uncertain. We believe that Clark's high working capital turnover reduces our exposure to financial and accounting losses that can occur in economies struggling to control inflation. Our Brazilian operations are expected to return to profitability in the second half,'' said McKernan.

Clark's incoming orders during the second quarter 1990 were $347 million versus orders of $295 million in first quarter 1990 and $351 million in second quarter 1989. The increase between the first and the second quarters of 1990 reflects the order rate improvement in Brazil. Incoming orders at Clark Components and Melroe Co. were down in the second quarter versus the first quarter. Clark Material Handling's order rate and backlog are up compared to the first quarter. Total order backlogs at June 30, 1990 were $342 million compared to $329 million at March 31, 1990. Excluding Brazil, second quarter order rates were flat and the June ending backlog was down approximately 10 percent compared to the first quarter ending backlog.

McKernan said that second quarter results of VME, Clark's 50 percent opened joint venture, were good. VME's second quarter net income contribution to Clark was $6.7 million compared to $4.2 million in first quarter 1990. ''Strong construction machinery markets in Europe

contributed to VME's improved earnings in the second quarter,'' he said.

Among the second quarter's achievements, McKernan also cited the company's refinanced Leveraged Employee Stock Ownership Plan (LESOP) debt agreement, saying, ''The restrictions on the use of the $65 million cash collateralizing the LESOP debt have been eliminated, improving the company's financial flexibility.''

McKernan also said that, while the company's acquisition of Hurth Axle S.p.A. in mid-July did not affect second quarter results, current expectations are that it will dilute 1990 and 1991 earnings by an estimated 14 and 16 cents per share, respectively, as Clark begins implementing the positive synergies between the two companies. In 1992 and beyond, the transaction is expected to have a positive impact on Clark earnings.

Looking ahead at the second half of 1990, McKernan said, ''As we begin the second half of 1990, we believe the outlook for Clark Equipment Co. continues to be positive. While the year's performance will be hood, emerging softness in world markets could modestly reduce the level of Clark earnings during the remainder of the year.''

Clark Equipment Co.'s business is the design, manufacture and sale of forklift trucks, construction machinery, transmissions for on highway vehicles, and axles and transmissions for off-highway equipment.

ELMHURST, IL (JULY 24) UPI - All that talk about cosmic rays doesn't frighten Elmhurst College professor and space tomato cultivator Frank

Mittermeyer.

Mittermeyer said Monday the tomato seeds he received from NASA - seeds that spent six years in space on the Long Duration Exposure Facility satellite - are bearing fruit.

And when he's done studying the plants, he plans to make a salad.

''They're looking great,'' the biologist said. ''Some are close to being red. It will be a matter of days. They're coming in very quickly.''

Mittermeyer discounted early speculation the seeds could produce poison fruit.

''That original story was incorrect,'' Mittermeyer said. ''NASA has confirmed to me there isn't really any problem with radiation on these things. They don't have high radiation content themselves.''

At the Adler Planetarium in Chicago, Associate Astronomer April Whitt said her space seeds have just begun to sprout.

''Ours are just babies,'' Whitt said. ''They're growing in artificial conditions. They're much slower and frailer than those growing outside. The tomatoes in my garden put these to shame.

''The space seeds germinated faster and grew a little faster (than regular tomatoes) until the time they got real leaves.''

Whitt said she'd like to sample part of Mittermeyer's crop.

''They're just tomatoes,'' she said. ''I'd love to try some.

Mittermeyer and his students plan to run a series of tests on the plants, including chromosome studies, and examine the fruit for weight, texture and color.

''I myself plan to eat some of these,'' he said.

The tomato plants are growing normally, he said, but there are some differences in leaf pigmentation between the space plants and a control crop Mittermeyer planted for comparison purposes.

''Usually there's violet or purple in the leaves,'' Mittermeyer said. ''The colors (on the space plants) appear more intense.

''The green looks about the same. The flowers are a beautiful, nice yellow. There are some changes in the color of some flowers but we haven't determined whether there was any mutation involved.''

Mittermeyer said the plants have been growing normally but they did have an early run-in with the local wildlife.

''Some groundhog came past and ate three plants from top to bottom,'' Mittermeyer said. ''He survived and he doesn't glow in the dark.''

#90205u0221 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - Appeals Court Judge David Souter breezed through the confirmation process earlier in the year for the appellate job a nomination so devoid of controversy that few Senate Judiciary Committee members remembered more about him than his name.

Members pledged a careful examination of Souter and most said they would not let his position on any single issue - should he even divulge one in the usually genteel and indirect questioning process - be a litmus test in his confirmation as a Supreme Court justice.

However, some said they wanted to explore questions about his decisions on civil rights and church-state cases.

''His credentials appear impeccable to me,'' said Sen. Orrin Hatch, R-Utah

a committee member who said he had a scant recollection of Souter's initial approval by the committee.

''I think most of us will want to evaluate him. We'll want to get acquainted and reserve judgement until we have that opportunity,'' Hatch said.

''I think we all kind of suspected he would pick somebody who didn't have a very wide record that could be attacked,'' said Hatch.

''I would hope we would not have a rush of members of the U.S. Senate saying they would vote for or against Judge Souter. ... We should have the hearings, hear those for or against him and vote the issue up or down,'' said Sen. Pat Leahy, D-Vt., who likewise recalled little about the judge.

One of the few members of the Senate to know Souter, New Hampshire Republican Warren Rudman, said it could be to Souter's benefit that he has not had a chance to write too much in scholarly journals and at the appeals court - writings that would point to his potential decisions in the coming years.

Controversial Reagan nominee Robert Bork was rejected in part because he had written numerous scholarly articles that gave critics ample ammunition during Senate confirmation hearings.

''I would be very surprised if there would be serious opposition,'' Rudman said. ''There is no chink in his personal life. He does not belong to any organization that I know of. He works too hard.''

Sen. Howard Metzenbaum, D-Ohio, said Souter is ''pretty much of a blank slate'' but added, ''This senator has heard nothing negative'' about the nominee.

Senate Democratic leader George Mitchell of Maine called Souter a ''respected member'' of the court of appeals and said, ''The president will have my cooperation and that of the Senate in a prompt and fair process for consideration of this important nomination.''

Hearings were not expected to start until after the August recess.

Sen. Paul Simon, D-Ill., a member of the Judiciary Committee, said after quickly reviewing some of Souter's opinions as a judge and as attorney general that ''there are things that raise some questions.''

Specifically, Simon said he was trying to find out whether Souter acted properly as attorney general when he advised the governor of New Hampshire about two cases, one involving voting rights and the other church-state issues.

Asked how he would vote, Simon said, ''I have no idea at this point.''

Sen. Rudy Boschwitz, R-Minn., said he did not know much about the nominee but said he ''sounds like a bright guy.''

People for the American Way, which helped lead the fight against the Bork nomination, urged the Senate to go slow in acting on the Souter nomination saying the ''public interest lies in careful consideration.''

''Souter's record raises more questions than it answers,'' said Melanne Verveer, People for the American Way Action Fund vice president. ''We hope the Senate will give close scrutiny to several troubling aspects of Judge Souter's record regarding such pivotal issues as separation of church and state, civil rights and civil liberties.''

A.E. Dick Howard, a law professor at University of Virginia and a constitutional law scholar, said President Bush's nomination of Souter was ''probably inspired'' by the fact that he was confirmed by the same Senate committee six months ago and it would be easier to get him through the same panel a second time.

BURBANK, CA (JULY 24) UPI - Actor Eddie Quillan, whose six-decade career included roles as idealistic young heroes and boys next door in some of Hollywood's most notable early pictures, has died. He was 83.

The longtime North Hollywood resident died Thursday of cancer, his sister, Roseanne Quillan, said.

Quillan was the lovesick mutineer in ''Mutiny on the Bounty'' (1935), a boy accused of murder in ''Young Mr. Lincoln'' (1939), the young radio mechanic in ''The Grapes of Wrath'' (1940), and the candyman in ''Brigadoon'' (1954).

He appeared in two silent two-reel Mack Sennett slapstick comedies as well as more than 150 films and dozens of television shows in 60 years of acting. He was known for his saucy light air and flair for the double-take.

Born into a family of vaudevillians in Philadelphia, Quillan spent his youth traveling the country performing in the family's variety act.

His break into film came when he stopped to help a disabled car on Santa Monica Boulevard, not knowing that the man with the flat tire was an assistant to film director Cecil B. DeMille.

Quillan signed a contract with DeMille's Pathe Film Corp. and, in 1929, appeared in his first feature film ''The Godless Girl.''

Quillan's television credits include the police melodramas ''Police Woman'' and ''Baretta'' and the 1968-71 situation comedy ''Julia,'' in which he played Diahann Carroll's mailman.

NEW YORK (JULY 24) UPI - An aide to President Bush who helped purchase a failing Oklahoma bank from the federal government, at the same time invested $100,000 with a federal official working on the deal, a published report said Tuesday.

The aide, Robert Thompson, paid the funds to Paul Heafy, chief of liquidation for the Oklahoma office of the Federal Deposit Insurance Corp. in January 1989, The New York Times reported.

At the same time, Thompson resigned his post as a legislative aide to Bush the Times said. He also had worked on the Bush campaign in 1980.

Thompson's $100,000 investment was made to National Loan Investors, a partnership controlled by Heafy, and was not prohibited by federal

conflict of interest laws, the newspaper said.

However, the investment is being investigated by the Senate Subcommitee on Antitrust, Monopolies and Business Rights and the Arizona Department of Insurance.

Thompson's investment funds came from Harvest Life Insurance, a company controlled by Arizona businessman James Fail, the man allowed to purchase the United Oklahoma Bank from the FDIC in January, 1989.

Fail was allowed to purchase the $100 million bank for $526,000, even though he did not meet federal standards for bank purchases.

The $100,000 deposited by Thompson, plus another $50,000 from Fail went into Heafy's National Loan Investors. The partnership buys distressed loans from federal regulators, such as the FDIC.

Heafy got approval from agency lawyers to enter the loan buying business, with the stipulation that he not become involved with an office he once headed in Oklahoma City, the Times said.

In 1988, Thompson worked for Fail on a purchase of 15 failed savings and loan associations from the Federal Home Loan Bank Board, the Times said.

#90205u0294 07/24/1990 ~United Press International

LOS ANGELES (JULY 24) UPI - Tom Johnson, the first person outside the Chandler family to be publisher of the Los Angeles Times, will be named president and chief executive Tuesday of Cable News Network, the newspaper reported.

Citing sources at the Atlanta-based CNN, the Times said Johnson, currently chairman of Times Mirror's newspaper management committee, will replace Burt Reinhardt, 70, who is retiring.

The paper said the announcement would come at a CNN board meeting in Seattle, where co-founder Ted Turner is attending the Goodwill Games that he founded.

Turner reportedly selected Johnson, 49, after a yearlong search that included an evaluation of the future of the decade-old, 24-hour-a-day news channel. Turner reportedly asked Times staffers about Johnson at a party in Los Angeles that the cable mogul attended with actress Jane Fonda.

Johnson, whose nine-year tenure as publisher and three prior years as president, led the paper through a period that saw it triple its revenues to more than $1 billion. In that time the newspaper earned eight Pulitzer

Prizes and circulation rose from 1 million to nearly 1.12 million a day.

He was replaced as publisher last September by David Laventhol, who is also president of Times Mirror.

As it heads into its second decade, CNN, which is credited in many quarters with having revolutionized television news coverage, must decide how to align itself with potential partners and increase its market share abroad.

One possible partner is CBS News, with which CNN could share bureaus, technicians and satellite time.

CNN and sister operation Headline News lost $77 million in their first five years but are now turning a profit for their parent, Turner Broadcasting System.

Johnson, whose outgoing personality is in sharp contrast to the reclusive Reinhardt, would be returning to his native Georgia.

#90205u0310 07/24/1990 ~United Press International

MOSCOW (JULY 24) UPI - Mikhail Gorbachev's plan to restructure the Soviet federation has run into trouble within his closest circle of advisors, drawing opposition from Foreign Minister Eduard Shevardnadze, a witness to the dispute said.

Shevardnadze complained Gorbachev's vision of a looser association of Soviet states ignores local interests, said Andrejs Krastins, deputy chairman of the Latvian Parliament, who watched the two quarrel at a meeting last Friday.

Gorbachev has since decided to reassemble both the Presidential Council and the Council of the Federation to discuss his plan to accelerate economic reforms and push forward with a fundamental redistribution of power within the country.

Krastins said Monday that Shevardnadze was the only person at the meeting of the two advisory panels last week who objected when Gorbachev presented the eight basic principles of his new national compact.

''I am afraid of a union treaty,'' Krastins quoted Shevardnadze as saying about Gorbachev's idea of a looser federation of states with wide independence rather than the current union of 15 republics controlled from the center.

Shevardnadze, Krastins said, believes that the central government should

hold separate negotiations at the highest level with each republic, similar to the forthcoming talks ''with our friends the Lithuanians.''

In another indication of high-level dissension in the Gorbachev camp, senior economic adviser Abel Aganbegyan chafed over the Aug. 15 deadline given his commission for choosing the best plan for a transition to a market economy.

Gorbachev last week called a new union treaty and the movement away from rigid central planning ''two sides of the same coin.''

Any hesitancy by Shevardnadze about the new national compact could hamper Gorbachev's plan for a decentralized union. Others would likely take such reluctance seriously because of Shevardnadze's reputation as a brilliant negotiator and his penchant for compromise.

Gorbachev's difficulties as he tries to restructure his huge country were evident at the meeting Friday, which the presidents of Estonia, Latvia and Lithuania did not attend in another manifestation of the Baltic region's growing aloofness from Moscow.

Krastins, who attended the high-level conclave only as an observer, said Gorbachev noted that he had personally invited the Baltic leaders to the meeting and sharply criticized their absence.

''The directives of the center are being ignored,'' Krastins quoted Gorbachev as saying.

Krastins, in a statement released to Western news organizations in Moscow by the Latvian government, provided the first detailed account of Gorbachev's vision for a new Soviet Union.

Gorbachev, who chaired the meeting Friday, outlined eight spheres to be reserved for the central government, some of which are sure to meet with opposition from republics straining for greater sovereignty or outright secession.

Gorbachev said the Kremlin should remain in control of:

-Defense, borders and the KGB.

-Coordination of market relations, unified monetary policy, prices and standards.

-Guarantees of energy supplies for all republics.

-Coordination of transport.

-Foreign policy, foreign trade and customs.

-Environmental regulation and emergency help in the event of natural disasters.

-Personal and legal rights, and the creation of an institution to prevent ethnic conflicts.

-Guarantees for scientific and technical progress.

In the parallel drive toward a more radical economic pogram, Aganbegyan told the newspaper Izvestia that the Aug. 15 deadline was unrealistic because it would leave too little time for the government to develop the plan before presenting it to the Soviet Parliament in September.

Finance Minister Valentin Pavlov went on Soviet television to deliver the government's latest assurances that it will take steps to protect ''those who cannot provide for themselves in market conditions.''

Pavlov said that ''special measures are envisioned'' that would provide low-income families with welfare payments based on their number of children, give wage bonuses to compensate for planned price hikes and increase interest earnings on savings deposits.

#90205u0371 07/24/1990 ~United Press International

BERKELEY, CA (JULY 24) UPI - Literary historian James D. Hart, a University of California faculty member for 54 years, died of cancer Monday. He was 79.

Professor Hart wrote histories of American and California literature and literary taste as well as contributing literary and historial articles to many periodicals.

He wrote ''Oxford Companion to American Literature'' in 1941 and eventually prepared four revised editions of the 896-page volume. The book lists biographies of American authors and summarizes their major works. His ''A Companion to California'' was written in 1978 and was revised and expanded in 1988 to 1,986 pages.

Hart became director of the University's world-respected Bancroft Library in 1969 after serving as acting director in 1961-62. At the time of his death he was still director of the library and professor emeritus of English.

Born in San Francisco April 18, 1911, Hart was graduated from Stanford University and received his doctorate in American literature from Harvard

in 1936, after which he became an instructor at Berkeley.

He was still a graduate student in 1934 when, with the approval of Oxford University Press editors, he began work on the ''Oxford Companion.''

A teacher of American literature at Berkeley, Hart became chairman of the English Department from 1955-57 and again from 1965-69. He was vice chancellor for academic affairs from 1957-60.

He was also a trustee of Mills College from 1970-86 and for the past seven years was a trustee of the Fine Arts Museums of San Francisco.

''His vigorous, creative leadership of the Bancroft is a gift to future historians and to future generations of Californians,'' former Berkeley Chancellor Ira Michael Heyman said Monday.

''His gracious style, the light touch he gave to the most formal events, his excitement in discovering artifacts of the state's past mark him as a very special person.''

Hart is survived by his wife, the former Constance Crowley Bowles; daughter Carol Field, a San Francisco writer; son Peter D. Hart, a Washington, D.C.-based opinion research firm executive, and four grandchildren. His first wife, Ruth Arnstein Hart, died in 1977.

#90205u0403 07/24/1990 ~United Press International

(JULY 24) UPI - Mark Knudson says he doesn't want to be considered the ace of the Milwaukee Brewers staff, so he'll just have to settle for being its most effective pitcher.

Knudson, who started the season as a spot starter, hurled a six-hitter for his second shutout in three starts Monday night and Robin Yount drove in three runs with a homer and a double to lead the Brewers to a 13-0 rout of Boston.

Knudson, 8-4, struck out three and walked none to post his third straight victory, but nixed any talk of inheriting the ace mantle.

''No way, that's earned over a long period of time, over a several-years' period,'' he said. ''That belongs to Teddy and Boz.''

That would be Teddy Higuera and Chris Bosio, who have done little lately to deserve their nominal roles as Milwaukee's two top starters.

Higuera, 6-5, and Bosio, 4-7, have won just two of their last 20 combined starts, while Knudson has allowed just two earned runs in his last 24 1-3

innings.

The Red Sox, who have lost three straight, had three doubles but had just one runner reach third against the right-hander.

''I was lucky, flat out, from the first inning on,'' Knudson said. ''I didn't have real good location within the strike zone, especially in the first five innings. They hit a lot of balls right to people, some of them hit real hard.''

Boston starter Mike Boddicker needed more than luck. He also gave up a lot of hard hit balls, but most of them found only open spaces.

Boddicker, 11-6, was rocked for seven runs and nine hits in 3 1-3 innings. He is 0-3 in four starts since having a 10-game winning streak snapped July 7.

''Everything was up all night long,'' Boddicker said. ''The curve ball was up. That ball just didn't move.''

''He's a great pitcher,'' said Knudson of his mound oponent. ''He's in a little bit of a tailspin right now, but we were fortunate to catch him right now. Maybe next time we catch him he'll be back in his All-Star form and we'll scuffle to get one run.''

That would certainly be a switch.

In three games against Milwaukee this season, Boddicker is 0-3 with an 11.37 ERA, allowing 16 earned runs and 19 hits in 12 2-3 innings. The Red Sox have lost those three games by a combined score of 36-0 - 18-0, 5-0 and 13-0.

Milwaukee pounded out a season-high 21 hits overall, surpassing a 20-hit attack in an 18-0 victory at Boston.

Yount's solo home run was his 10th. Gary Sheffield, who extended his hitting streak to 11 games, also drilled a solo shot.

Greg Vaughn, B.J. Surhoff, Bill Spiers and Edgar Diaz all knocked in two runs, and Rob Deer chipped in with one RBI.

Elsewhere in the American League: Baltimore bombed Detroit 13-3, Chicago downed Cleveland 3-1, Texas edged New York 3-2 and Oakland nipped California 7-6 in 10 innings.

In the National League it was: Montreal 5, Pittsburgh 0; Philadelphia 7, New York 4; Atlanta 3, Houston 1; Chicago 3, St. Louis 1; Cincinnati 9, San Diego 2; Los Angeles 11, San Francisco 1.

-- AROUND THE AL --

White Sox 3, Indians 1

At Chicago, Carlton Fisk belted his 344th career home run and Greg Hibbard hurled seven strong innings to snap the White Sox's four-game losing skid. Fisk now has 323 as a catcher, four shy of Johnny Bench's major-league record. Tom Candiotti, 10-6, went all the way for the loss. Hibbard, 8-5, picked up the win and Bobby Thigpen registered his major league-leading 32nd save.

Orioles 13, Tigers 3

At Detroit, Mike Devereaux hit his first career grand slam to cap a seven-run third inning and added a two-run triple in the ninth to power Baltimore to its fifth straight win. Dave Johnson, 9-6, struck out a career best seven in 6 2-3 innings. The Orioles have won 12 of 15 to move within four games of first in the AL East. Frank Tanana, 5-7, took the loss.

Rangers 3, Yankees 2

At Arlington, Texas, Kevin Brown fired a four-hitter and Ruben Sierra delivered a two-run single in the fifth inning to lead the Rangers. Brown, 12-7, allowed two runs, walked three and struck out six in posting his American League-leading sixth complete game. Chuck Cary fell to 4-6.

Athletics 7, Angels 6, 10 innings

At Oakland, Calif., Rickey Henderson belted a one-out home run in the bottom of the 10th inning, capping the Athletics' rally from a six-run deficit. Rookie reliever Cliff Young, in his third major league appearance fell to 0-1. Reliever Gene Nelson, 2-2, hurled two innings for the victory.

#90205u0412 07/24/1990 ~United Press International

PHNOM PENH, Cambodia (JULY 24) UPI - A U.S. military delegation arrived Tuesday to inspect what are believed to be the remains of missing Americans from the Vietnam War, marking the first official U.S. contact with the Vietnamese-installed Cambodian government.

The six-man team was scheduled to meet Cambodian officials to discuss efforts to account for 83 Americans still listed as missing in action in Cambodia and to view the remains.

''This is a good sign for relations between the United States and Cambodia even though we do not have diplomatic relations,'' said Foreign Ministry spokesman Chum Bun Rong.

Chum said 10 or 11 sets of remains have been found, some with identification tags. He said most of the remains were found near the border with Vietnam.

Lt. Col. Joe Harvey, commander of the U.S. armed forces' Joint Casualty Resolution Center, declined to speak about the delegation's plans in Cambodia but a Foreign Ministry spokesman said if there were any possibility the remains were American, they would be formally repatriated Thursday.

The U.S. delegation arrived in Phnom Penh on a C-141 cargo jet, the first American military plane to land in Cambodia since helicopters evacuated American Embassy personnel in April 1975, just ahead of the Khmer Rouge who ousted the U.S.-backed Lon Nol government.

''It is good we are finally able to talk with each other,'' said Chum. He said it would depend on the Americans whether the discussions were extended to include other issues beyond MIAs.

''We can begin our talks on humanitarian matters and then go on to how to solve the Cambodian conflict,'' he said. ''You (Americans) can talk with Vietnam without diplomatic relations, so why not Cambodia?''

Chum said Cambodian officials believe more remains could be found despite the years of war and revolution since the men were lost.

''Some people went to a lot of trouble to find the remains, so they may want some money,'' he added.

He said the wreckage of American planes had been found long ago, but no one paid any attention to the remains until two or three years ago. Nevertheless, he said help on MIAs would not depend on political concessions by the United States.

''We work on humanitarian grounds that will not affect other matters,'' he said.

He said Cambodia would like to discuss improved relations with the United States, which last week indicated it would drop its recognition of a three-party resistance coalition seeking to oust the Vietnamese-installed government in Phnom Penh and open discussions with Hanoi on settlement of the 11-year Cambodian conflict.

The United States still lists 2,302 American servicemen as missing in Indochina, which includes Vietnam, Cambodia and Laos. In recent years there have been a number of search missions carried out for MIAs in Vietnam and Laos.

The MIA question has been an emotional and politically volatile issue in the United States, where families and relatives of servicemen missing in the Vietnam War have maintained pressure for a full accounting of MIAs.

The MIA issue has contributed to the refusal of the United States to recognize Vietnam or the Hanoi-installed government in Cambodia, although Washington has maintained ties with Laos.

But Secretary of State James Baker last week in Paris announced a major change in American policy toward Cambodia by stating Washington was willing to talk directly with Hanoi on a solution to the Cambodian conflict.

The policy change apparently left adrift the three-party resistance coalition led by Prince Norodom Sihanouk, mainly because the infamous Khmer Rouge was part of the group.

Baker said the major reason for the U.S. policy change was to prevent the return to power of the Khmer Rouge, who have been blamed for the deaths of more than 1 million Cambodians during its nearly four years in power in Phnom Penh.

Many foreign policy experts believe the shift in U.S. policy could eventually lead to establishment of diplomatic ties between Washington and Hanoi.

The American move, however, has created a political furor among America's allies in the six-nation Association of Southeast Asian Nations, which had firmly backed recognition of the Sihanouk-led coalition and isolation of the Cambodian government led by Premier Hun Sen.

Foreign ministers of ASEAN, meeting in Jakarta, initially denounced the U.S. move on Cambodia, saying it would hinder peace efforts in the region. Baker was scheduled to meet with the ASEAN ministers later this week in Jakarta to explain the U.S. policy.

SYDNEY, AUSTRALIA (JULY 24) UPI - A prisoner who has tested positive for the AIDS virus stabbed a young prison officer in the buttocks with a syringe needle, prompting 1,000 other jailers to strike in protest of the assault.

Gary Pearce, 21, was jabbed by the inmate Sunday at Long Bay jail, 8 miles south of Sydney, as he let the man into an exercise yard, a prison spokesman said.

But medical officers said it will take up to 90 days to obtain conclusive results on whether Pearce, who finished training as a prison officer three months ago, contracted acquired immune deficiency syndrome.

''Man, if I don't have it, I've got the rest of my life to live for, but if I do, I've got the next four years to make the most of it,'' Pearce said Tuesday.

On Monday, 1,000 prison officers went on a 24-hour strike at the Long Bay jail complex and the Mulawa women's prison over the attack.

Pearce said the inmate who stabbed him first asked him to open a gate leading to the exercise yard.,

''The inmate was standing behind me and I felt him touch my backside, then I felt a sharp jab, the needle got caught in my trousers but I knocked it out when I spun around,'' he said.

''Some blood sprayed on my pants then he picked up the syringe and ran away shouting 'AIDS'.''

Pearce said he ran to a senior officer's post and his collegue squeezed blood from the small wound and poured a mild antiseptic around the area.

''I was terrified last night and I'm still scared,'' Pearce said Tuesday.

He said he had lost sleep over not knowing if he will live or die but he was trying to keep a positive attitude over the attack.

The prisoner, Greaham Farlow, 24, appeared at Waverley Court charged with malicious wounding with intent to cause serious bodily harm and assault, a police spokesman said.

He was remanded to appear at Waverley Court on Sept 24.

The court was told Farlow has been subjected to physical and verbal abuse since the attack. He will be transfered to another jail, police said.

The striking prison officers met again Tuesday and vowed not to return to work until Wednesday.

The industrial action is in support of a proposal to isolate AIDS-infected prisoners, Prison Union spokesman Mick Howard said Tuesday.

New South Wales Corrective Services Minister Michael Yabsley Tuesday said he did not plan to change the government's policy in integrating AIDS-infected inmates with other prisoners.

''I have no intention of allowing a modern-day leper colony to be set up in the state's prison system,'' Yabsley said.

#90205u0469 07/24/1990 ~United Press International

SEOUL, South Korea (JULY 24) UPI - President Roh Tae-woo made it clear Tuesday he will not accept opposition demands for the dissolution of the current National Assembly and new parliamentary elections.

Roh met with leading members of his ruling Democratic Liberal Party to review the political situation strained by the resignation of 80 opposition lawmakers.

The president said opposition efforts to force the current National Assembly to be dissolved and replaced through elections were unconstitutional, presidential spokesman Lee Soo-jung said.

''The constitution was adopted (in 1987) based on national consensus. The opposition demands go against that consensus and popular expectations,'' Roh said, according to Lee.

Roh also said opposition attempts at outdoor protests against the government could damage the economy by disturbing industrial peace and discouraging investment.

He asked opposition leaders to negotiate the return of their members to Parliament. A total of 80 opposition legislators have sent in resignations to protest the legislation by the ruling party of controversial laws on July 14. Roh also said the opposition must join the government in efforts to improve relations with North Korea, the spokesman said.

The disputed laws included one to place the entire armed forces under a unified command and others to restructure the nation's broadcast structure.

Opponents have charged the new command setup could weaken civilian control over the military and the broadcast restructuring could bring networks under government control.

The government has said the command realignment was designed to meet the changing military situation in Korea and the broadcast restructuring was needed to accommodate demands for more varied information and to improve management of the existing networks.

Opposition politicians have said they will not respond to any negotiations with the government unless the disputed laws are nullified. The government party has said the opposition resignations will be turned down by the

National Assembly in which it enjoys more than two-thirds majority.

#90205u0472 07/24/1990 ~United Press International

BANGKOK. Thailand (JULY 24) UPI - Vietnamese-backed Cambodian government troops killed 142 guerrillas during recent search-and-destroy operations in two strategic northern provinces, a government radio report said.

Phnom Penh Radio, in a broadcast late Monday, said government troops launched the military operations against the resistance forces in several villages of Kompong Thom Province, 75 miles north of Phnom Penh, during the week of July 8-15.

The government forces killed 63 guerrillas, wounded many others and seized a number of arms, the broadcast said.

''We are in total control of the entire areas of Preah Damrei, Banteay Stoung, Chamna Kraom and Stoung District in Kompong Thom Province,'' the radio report said.

Government forces also killed 79 resistance fighters in heavy battles July 11-13 around Oddar Meanchey Province, 150 miles northwest of Phnom Penh, according to the report.

The Phnom Penh regime, which was installed by Vietnamese invasion of Cambodia in 1979, controls most of the country but has been unable to wipe out the U.N.-recognized three-pronged resistance for more than 10 years.

Hanoi announced the total withdrawal of its troops from Cambodia last September but the resistance has rejected the claim.

#90205u0480 07/24/1990 ~United Press International

BEIRUT, Lebanon (JULY 24) UPI - A visiting British delegation, in a rare encounter with Iranian-linked figures, held a lengthy meeting Tuesday with the spiritual leader of Hezbollah, the group believed to be holding foreign hostages.

Britain's Conservative Party deputies, Robert Adley, Colin Shepherd and Tim Rathbone, met the powerful cleric, Sheikh Mohammed Hussein Fadlallah, at his heavily guarded residence in a Hezbollah-patrolled southern suburb of Beirut.

Adley, in a statement as he emerged from the closed-door meeting, said the talks did not deal with the plight of 16 Western captives believed held in secret hideouts in the suburban region.

''The word (hostages) was not mentioned. We have just been discussing the Lebanese and Middle East problems,'' Adley said.

The delegation arrived in Beirut Sunday as the London Independent reported that Gerlad Kaufman, the shadow Foreign Minister of the Labor Party, had traveled to Syria to try break the deadlock over the British hostages.

While Iran enjoys strong authority on Lebanese fundamentalists believed holding the captives, Syria has 35,000 troops deployed in predominantly Moslem Lebanese territory.

Fadlallah, a Moslem scholar, is widely believed to be Iran's top ally in Lebanon.

Adley said the talks also touched on the straining of British-Iranian ties which were said to be affecting the captive problem.

''With goodwill and understanding on both sides, we both believe that diplomacy in the end will resolve the problems between Iran and Britain,'' Adley said.

Asked whether he would expect a breakthrough in resolving the Moslem death threat against author Salman Rushdie, Adley said, ''I don't think it's going to be as you described a breakthrough. Feelings of many Moslems have been deeply hurt, which we understand.

''I think that many Moslems know that the British government is not responsible for what authors write, but they don't stop feeling very offended. I think that time is the only healer,'' Adley said.

The late Iranian spiritual leader Ayatollah Khomeini had urged Moslems to track down and kill Rushdie for writing the ''Satanic Verses,'' a book many Moslems considered blasphemous.

Seyyed Hussein Musawi, leader of the Iranian-linked Islamic Amal militia, has recently suggested that if Britain were to expel Rusdhie, it might contribute to resolving the hostages' plight.

There are 16 foreign hostages held in Lebanon, including three Britons and six Americans.

Ayoub Hemayed, a politburo member of the pro-Syrian Amal miliia, claimed in a statement that Hezbollah triggered the present fighting against Amal in the southern district of Iklim Al Tuffah last week to undermine a possible release of a Western hostage.

''Hezbollah sparked off the battle while there were reports about the

release of an Irish hostage,'' Hemayed said.

Irish captive Brian Keenan was widely expected to be freed earlier this month as a result of efforts by Middle East-based Irish diplomats. But the captive has failed to surface.

Independent observers believe that inter-Shiite struggle has nothing to with the hostages.

#90205u0614 07/24/1990 ~United Press International

BAGUIO, Philippines (JULY 24) UPI - Workers retrieved the bodies of hundreds of people buried in landslides in remote northern villages, raising the death toll from last week's massive earthquake to 1,597, officials said Tuesday.

In Manila, the House of Representatives quickly appoved President Corazon Aquino's request for a $434 million fund to rehabilitate areas ruined by the July 16 temblor.

The Senate was expected to approve the fund shortly.

In another development, Press Undersecretary Horacio Paredes told reporters 200 troops were sent to secure buildings, gas stations and other facilities after looting broke out Monday night in the hard-hit mountain resort city of Baguio for the first time since the quake.

Paredes did not elaborate but residents of remote villages had complained about the slow distribution of relief goods. He said the government airlifted 96,000 tons of relief supplies to towns surrounding Baguio, 120 miles north of Manila.

The military Office of Civil Defense put the quake death toll at 1,597, with 1,047 others missing and feared dead, and 2,935 others injured. The Social Welfare Department said 1,080,160 were left homeless by the temblor which measured 7.7 on the open-ended Richter scale.

OCD said workers recovered 698 bodies from landslides in towns near Baguio and in the nearby provinces of Abra, Nueva Vizcaya and Nueva Ecija.

In the hillside town of Carranglan in Nueva Ecija, 95 miles north of Manila, Mayor Luzvimindo Otik said 2,946 houses were crushed by landslides and rescuers still were looking for hundreds of missing villagers.

Similar situations were reported in scores of isolated communities and the toll was expected to rise further as helicopter-borne troops pressed their search for missing victims.

In Baguio, miners and Philippine Military Academy cadets continued to hunt for bodies in the rubble of 28 flattened buildings after foreign rescue teams gave up hopes of finding survivors.

Aquino visited her home province of Tarlac Tuesday morning, inspecting cracked roads, damaged bridges and breached dikes along the Tarlac river.

Officials have recorded 648 aftershocks of last weeks temblor, the worst since 3,000 people were killed in a quake and tidal wave in August 1976.

In the central Philippines, officials said an aftershock of a June 14 quake that killed seven people rocked the islands of Negros and Panay at 3:03 a.m. They said the quake measured intensity 5 in Aklan province, 4 in Iloilo and 3 in Bacolod. No damage was reported.

Aquino welcomed the swift action taken by Congress on the rehabilitation fund as a ''shining example of unity in government as it responds to the pressing needs of our people.''

However, lawmakers announced they would push through their proposal to suspend payments on the country's $26 billion foreign debt and channel the money to the recovery effort.

Aquino Monday rejected legislative calls to unilaterally call for a moratorium of debt payments.

#90205u0680 07/24/1990 ~United Press International

COLOMBO, Sri Lanka (JULY 24) UPI - Security forces captured a strategic town in northern Sri Lanka, ending two days of heavy fighting that left at least 200 Tamil rebels and 17 government soldiers dead, a military official said Tuesday.

The official said security forces took control of the town of Paranthan, 180 miles north of Colombo, late Monday. Paranthan is just south of the Elephant Pass causeway that links the rebel-controlled Jaffna Peninsula with the rest of the country.

''We encountered very heavy fighting but seized full control of Paranthan and its environs by nightfall,'' said a military official.

At least 200 rebels of the Liberation Tigers of Tamil Eelam and 17 soldiers were killed in the fighting, which began Sunday after guerrillas attacked a military patrol, the official said.

He said at least 60 rebels and 35 soldiers were wounded during the two

days of fighting.

With the capture of Paranthan, security forces as of Monday controlled all towns on the highway between Vavuniqa, 135 miles north of the capital, and Elephant Pass.

But authorities said fighting continued in other parts of the northern and eastern provinces.

Monday, Ranjan Wijeratne, the minister of state for defense, said security forces were still seeking to control of three areas in the eastern province.

''In the next week or so we should be able to finalize things in the eastern province,'' Wijeratne said.

Security forces have been battling for control of towns in the northern and eastern provinces since June 11 when fighting erupted after rebels staged simultaneous attacks on four military bases. Since then, more than 1,500 rebels, soldiers and civilians have been killed.

The Tamil Tigers are fighting to establish in the northern and eastern provinces an independent homeland for the nation's mostly Hindu Tamil minority because they are discriminated against by the majority Sinhalese, who are mostly Buddhist and who control the Colombo government.

The Sri Lankan government battled several Tamil separatist groups from 1983 until 1987 when, in a bid to end the violence, Colombo signed a peace-accord with India in which New Delhi sent thousands of peace-keeping troops to Sri Lanka to maintain law and order and to supervise the surrender of weapons by Tamil militants who agreed to lay down their arms in exchange for greater autonomy in Tamil areas.

But the powerful Tamil Tiger, refused to surrender, claiming the accord failed to fulfill Tamil aspirations.

Fighting ensued between Indian troops and the Tigers and more than 1,100 soldiers and 600 Tiger rebels were killed. India failed to defeat the rebels and withdrew the last of its troops March 24, leaving behind a fragile peace between the Sri Lankan government and the Tigers.

Many political analysts believed the government and the rebels would be able to settle their differences without further violence. But the peace was shattered last month when rebels attacked military bases in eastern Sri Lanka.

(JULY 24) UPI - Stock prices closed sharply lower Tuesday on the Tokyo Stock Exchange as reports of unrest in the Middle East shook the bond and equities markets.

The deep sell-off of stocks Monday on Wall Street also worked against the Tokyo market.

The blue-chip Nikkei Average of 225 selected issues, which plunged 526.73 points Monday, lost another 192.33 points to 31,702.46.

The broader-based Tokyo Stock Exchange Price Index of all listed major shares lost 25.33 points to 2,304.59.

Trading was slow with turnover estimated at 350 million shares, compared with 302 million shares Monday.

Declines hammered advances 774 to 205, while 144 issues remained unchanged.

Elsewhere in Asia, stock prices plunged in volatile trading on the Hong Kong Stock Exchange amid profit taking following the setback on Wall Street Monday. Activity was concentrated in the blue-chip sector.

The closely watched Hang Seng Index, which gained 19.46 points Monday, tumbled 64.02 points to 3,559.89.

Among the narrower indexes, industrials dropped 66.95 points, financials lost 38.35, utilities fell 56.65 and interest-sensitive properties plunged 119.63 points.

Volume was again heavy as an estimated 2.59 billion shares changed hands, compared with 2.62 billion shares Monday.

In Singapore, stock prices closed lower in lackluster trading on the Singapore Stock Exchange.

The key Straits Times Industrial Index, which gained 2.83 points Monday, fell 11.32 points to 1,554.06. The narrower All Singapore Index, which rose 1.71 points Monday, eased 2.79 points to 441.95.

An estimated 50.3 million shares changed hands, compared with 49.3 million shares Monday.

In Australia, stock prices closed broadly lower in moderate trading on the Sydney Sharemarket, hammered by Wall Street's and Tokyo's sharp losses.

The blue-chip All Ordinaries Index, which slipped 3.1 points Monday, fell 11.4 points to 1,587.0. The narrower All Industrials Index fell 22.3

points to 2,460.6 and the All Resource Index eased 3.4 points to 919.0.

An estimated 65.5 million shares changed hands, compared with 64.5 million shares Monday.

#90205u0882 07/24/1990 ~United Press International

WARSAW, Poland (JULY 24) UPI - Lithuanian President Vytautas Landsbergis said in published remarks Tuesday his republic will not accept ''an atmosphere of warnings, pressure and threats'' during talks with the Kremlin this week.

In an interview with the independent Polish newspaper Zycie Warszawy, Landsbergis said he will demand the withdrawal of Soviet troops from Lithuania, which was annexed in 1940 along with Estonia and Latvia.

''We expect the occupational troops to leave the country,'' Landsbergis said. ''If it does not happen, it will mean that the World War II is not over.''

The Kremlin, which declared void Lithuania's March independence declaration, agreed to open talks with the Lithuanian authorities in Moscow this week after the Baltic republic agreed to a temporary suspension of its secessionist drive.

Landisbergis said he wants his republic to be an equal partner in the negotiations.

''We shall not agree for the negotiations in an atmosphere of warnings, pressure and threats,'' he said.

Landisbergis also criticized Poland and the West for being too lenient with Moscow after Moscow imposed an economic blockade on the republic to punish it for the declaration of independence.

''Polish policy could have been more independent of Moscow,'' he said.

Landsbergis has said Poland should have established diplomatic relations with Lithuania, defying the Soviet non-recognition of the act of independence. But in a move not to anger Moscow, Poland declared that Lithuania had the right to be independent.

Polish news reports, meanwhile, said that Lithuanian authorities have been harassing an estimated 400,000 Poles living in the neighboring Soviet republic of 3.2 million.

The weekly Polityka said Lithuanian authorities hampered the process of

opening elementary and high schools for the Polish minority. The harassment was so strong the two regions inhabited mostly by Poles demanded autonomy, Polityka said.

#90205u0899 07/24/1990 ~United Press International

PITTSBURGH (JULY 24) UPI - A seriously ill 3-year-old girl received a new small intestine and liver in a double transplant operation that lasted nearly 13 1/2 hours, a Children's Hospital spokeswoman said Tuesday.

Tracey Gonzales, of Corpus Christi, Texas, was listed in critical condition after surgery that began at 5:25 p.m. Monday and ended at 7:10 a.m. Tuesday, spokeswoman Sue Cardillo said.

Cardillo said surgeons would likely wait one week before making a formal prognosis on the girl's chances of survival, adding the procedure's success rate is ''very low.''

Tracey, whose new organs came from the same unidentified young donor, needed a small intestine and liver because of short gut syndrome, a disease in which the intestine is too small to adequately function. Subsequent intravenous nourishment ultimately destroyed her liver.

The girl's condition has deteriorated since she was admitted to Children's Hospital on April 22, Cardillo said. Tracey has been accompanied by her mother, Pam Gonzales.

The hospital's last multiorgan transplant operation was in 1988 when three-year-old Rolandrea Dodge of Fruitland, N.M., received five organs but died three months later.

#90205u0940 07/24/1990 ~United Press International

NEW YORK (JULY 24) UPI - Marla Maples says Donald Trump has wanted to divorce Ivana for years and Maples predicts her own love affair with Trump could turn out to be ''a story with a very beautiful ending.''

Maples, 26, told the New York Daily News that the estranged Mrs. Trump is ''out every night in London and New York, going on dates to her society parties, while Donald is at home raising the children.''

Ivana Trump said Maples's charges about her being an absentee mother were totally untrue.'' Through a spokeswoman, Ivana said, ''I see my children every single day. Donald sees them once a week at most - and has gone weeks on end without seing them at all.

''Beyond that, I won't dignify anything Marla Maples has to say,'' Ivana said through the spokeswoman. She sounds just like Donald.''

Donald Trump is currently battling Ivana's attempts to gain a larger share of his fortune in a high-profile separation battle reportedly centered on his relationship with Maples, a model and aspiring actress.

Maples said she was shocked about a statement attributed to Ivana that the affair between Trump and the younger woman was over. Maples said she loves Trump and it was fair to say he feels the same way.

Maples said of Donald, ''I love him,'' and ''there is no way (Ivana) could not have known'' of her relationship with th real estate developer, whose financial problems have recently overtaken his personal ones.

''I had nothing to do with Donald's marriage,'' she told the News. ''I don't want to be judged and I'm not a homewrecker.''

Maples was asked if she would marry Trump once he is divorced.

''Of course, I would think about it,'' she said. ''This could be a story with a very beautiful ending.''

The interview with the tabloid was published less than a month before an Aug. 20 hearing on a disputed pre-nuptial agreement between Donald and Ivana Trump.

The hearing is expected to determine whether the December 1987 agreement that stipulates Ivana should get $25 million of her husband's money in a divorce settlement is valid.

Trump claims it is. His wife says it isn't and is pursuing her wish to share equally in his empire, despite the fact that her husband has been dropped from the billionaire list and is trying to sell properties to settle bank debts.

Maples says she opposes pre-nuptial agreements.

''I would never have signed,'' she said. ''That makes the relationship so shallow. You fall in love with love - not money.''

#90205u0949 07/24/1990 ~United Press International

JAKARTA, Indonesia (JULY 24) UPI - Southeast Asian foreign ministers threatened Tuesday to forcibly turn back boat people landing on their shores if the United States does not agree to forced repatriations or set up holding centers for the torrents of unwanted arrivals.

In a double-barreled attack on Washington, the delegatestot the Association of Southeast Asian Nations ministerial meeting also warned the U.S. decision to withdraw diplomatic recognition of the Cambodia guerrilla coalition could result in a Khmer Rouge military victory.

They lashed out at their longtime ally for hampering efforts at finding a solution to the 11-year-old Cambodian conflict and leaving them with unwanted refugees streaming out of Vietnam 15 years after the communist victory.

Bristling over the passage of the July 1 deadline for resolution of the refugee problem without any action, the ASEAN ministers said first-asylum countries have ''the sovereign right to take such actions as they deem necessary, including the abandonment of temporary refuge.''

The ministers from Indonesia, Malaysia, Thailand, the Philippines, Singapore and Brunei issued a joint statement noting the ultimatum from a Manila meeting in May threatening to push boat people back to sea if the United States and Vietnam did not act by July 1 had passed ''without any resolution.''

The delegates said there will be no reason for the U.N. High Commissioner for Refugees to convene another meeting ''unless there are clear indications of political willingness by the two countries concerned to effectively address and deal with involuntary repatriation.''

International refugee workers estimate Malaysia has pushed off boatloads containing about 8,500 people fleeing Vietnam in the past year, directing them to Indonesia instead.

The Philippines has begun refusing to allow boat people to disembark unless a resettlement country promises to eventually accept them as immigrants.

The first-asylum countries, non-communist Southeast Asia along with Hong Kong, host 150,000 Indochinese boat people awaiting resettlement in the West.

Maintaining the refugees is straining their economies, they set the initial deadline to allow the United States time to arrange alternatives for those screened out as ineligible for resettlement, deemed to be fleeing poverty instead of political persecution.

Noting Vietnam and the United States still refuse to accept the involuntary repatriation of those screened out and have not set up a regional holding center, the ministers said the position ''is inconsistent with internationally accepted practice and risks establishing precedents

that will lead inevitably to a breakdown of international understanding on the treatment of asylum seekers.''

The Bush administration has rejected mandatory repatriation on humanitarian grounds.

The ASEAN statement blamed the United States and Vietnam for the collapse of the Comprehensive Plan of Action signed in Geneva a year ago. Under the Plan, the first asylum countries agreed to provide temporary refuge to all who sought it and Western nations pledged to resettle them.

The U.S. move to oust the Cambodian resistance from the United Nations sparked another barrage of criticism, with Singapore's Minister for Foreign Affairs Wong Kan Seng leading the assault.

''It will only encourage the Vietnamese to persist in their illusion that they need not compromise,'' said Wong, adding the change in stance could encourage the Khmer Rouge, armed by China, to abandon negotiations and step up efforts to regain power by force.

After a marathon meeting on the eve of the ASEAN conference, the ministers agreed to support the continued occupation of the U.N. seat by the resistance headed by Prince Norodom Sihanouk, the followers of former Prime Minister Son Sann and the communist Khmer Rouge. They said the U.S. shift would reduce the incentive for Vietnam and Cambodia to agree to a solution based on power-sharing with the coalition partners pending elections.

The ASEAN position was backed by the United States for eight years until last week when Secretary of State James Baker announced the United States was withdrawing recognition of the coalition and opening a new dialogue on Cambodia with Vietnam, the chief backer of Phnom Penh's communist regime.

Baker, who is scheduled to arrive here Thursday to elaborate, said the move was aimed at preventing a return of power by the Khmer Rouge, the most powerful military faction that is blamed for the deaths of 1 million Cambodians when it was in power until overthrown by Vietnam in 1979 and the current government installed.

#90205u1057 07/24/1990 ~United Press International

BEIRUT, LEBANON (JULY 24) UPI - Rival Shiite Moslem forces battled Tuesday for the control of a strategic southern region, forcing thousands of civilians to flee, police said.

Medical reports and Palestinian sources said 20 people had been killed and 30 wounded since dawn, raising the death toll in nine days of fighting to

118 killed and wounded to 273.

The Syrian-backed Amal militia and the pro-Iranian Hezbollah, vying for control of Lebanon's 1.5 million Shiites, have been engaged in a bloody power struggle for more than two years.

Hezbollah, or Party of God, and Amal are struggling for control of the Iqlim Al Tuffah region. Police souces said the rival Shiite gunmen Tuesday traded mortar, heavy artillery and machine-gun fire along the Tuffah frontlines, east of the port city of Sidon, 24 miles south of Beirut.

Military sources say more than 3,000 Amal gunmen are pitted against some 1,900 Hezbollah fighters backed by about 750 Iranian Revolutionary Guards.

Amal said in a statement its fighters repulsed a series of attacks launched by Hezbollah since dawn against the group's positions in the strategic hilltop village of Jarjou. The statement said Amal gunmen succeeded in gaining ground and established three positions inside the village.

A Hezbollah spokesman said Amal gunmen tried to capture Jarjou but failed.

Amal, backed by communist and Baathist militiamen, earlier launched at least two futile main offensives to try retake Jarjou, once a tranquil resort village overlooked by mountaintop positions manned by Israeli-backed South Lebanon Army troops.

Observers have said Syria and Iran, which have coordinated efforts to reconcile the rival Shiite groups, have emphasized the need to halt military operations in the Iqlim, which is adjacent to Israeli-controlled areas.

Security sources said a number of Tuffah villages including Ain Buswar, Kfar Fila, Mlita, Sarba, Houmin and Ankoun, came under heavy shelling during the attacks Tuesday.

Police said Israeli troops and their surrogate South Lebanon Army militia bombarded Hezbollah, Amal and Palestinian positions in the Tuffah region. Palestinian sources said two Palestinian guerrillas were killed and seven others wounded.

Military sources have said Palestine Liberation Organization Chairman Yasser Arafat, who last week ordered some 450 of his followers to deploy in Al Tuffah, apparently took advantage of the inter-Shiite struggle and drastically expanded his military presence.

Witnesses said clouds of black smoke covered the embattled areas as ambulances with sirens screaming rushed dozens of wounded gunmen and

villagers from the region to hospitals in nearby cities and towns.

The intensification of the fighting prompted thousands of civilians to flee their homes and villages to more secure areas. Some of them sought refuge with relatives, while many others set up tents in open fields.

Unofficial reports said as many as 20,000 people fled their villages last week, raising to 70,000 the number of displaced persons from the Tuffah region since the Amal-Hezbollah confrontation began there last December.

Moslem sources said local and regional parties were pressuring the rival forces to accept a cease-fire and start peace negotiations.

Amal sources emphasized that negotiations will not be possible until Hezbollah withdraws from Jarjou.

#90205u1135 07/24/1990 ~United Press International

NEW YORK (JULY 24) UPI - Stock prices moved slightly higher in early trading Tuesday as the market tried to rebound from Monday's dramatic plunge.

The Dow Jones industrial average, which sank 56.44 Monday, was up 5.70 to 2910.40 at 10 a.m.

Advances led declines 550-531 among the 1,626 issues crossing the New York Stock Exchange tape. Volume was moderate, amounting to about 23.65 million shares during the first 30 minutes of trading.

The Dow industrials fell more than 100 points during Monday's trading for the first time since last October's ''mini-crash'' before rebounding later in the day but they still rang up their third-largest loss of the year.

Analysts blamed the early debacle on poor earnings reports, a gloomier outlook for interest rates after last week's inflation data and stock prices that had become overvalued relative to earnings.

The Dow bottomed out with a loss of about 106 points at late morning. This year's two larger losses came on Jan. 12, when it fell 71.46, and on Jan. 22, when it sank 77.45.

The Dow transportation average also fell 2 percent, losing 23.18 to 1136.13.

Despite the rout, trading was never halted. NYSE regulations currently call for a one-hour trading halt when the Dow falls 250 points and a two-hour halt if it falls another 150 points.

Analysts blamed disappointing earnings reports last week concentrated among technology stocks such as Advanced Micro Devices, Storage Technology and especially Texas Instruments, which late Friday reported quarterly earnings of 2 cents a share compared with $1.14 a year ago.

And the feeling that interest rates will not be coming down anytime soon after last week's report of unexpectedly high inflation drained the market of much of the fuel that powered the Dow industrials rally to the 3000 mark.

MILTON, PA (JULY 24) UPI - A woman who said she could cast a spell to make a 13-year-old a better skateboarder faces animal cruelty and other charges because the boy disemboweled a cat to obtain ingredients for the ritual, police said Tuesday.

The boy, whose identity was not released by police, was charged with cruelty to animals in a juvenile petition filed May 14.

Police said Cathy Rauch, 18, told the youth that witches grant spells in exchange for animal body parts and made a list of items she needed.

''In return, I will give any spell I am capable of doing,'' police said Rauch wrote on the back of the list.

The boy told police Rauch claimed she could cast a spell to make him more adept on his skateboard.

Investigators said the teenager, after obtaining the list on May 8, killed and disemboweled a neighbor's cat. The boy said he took the animal's heart and other body parts to Rauch.

Police said Rauch admitted giving the teenager the list but denied receiving the body parts.

A complaint filed Monday before Northumberland County District Magistrate William Kear charged Rauch with cruelty to animals, corruption of minors and criminal conspiracy.

Police said the items Rauch indicated were needed for the ritual included a cat's heart, whiskers and teeth, along with blood, human if possible.

The teenager told police Rauch said she had performed other spells in the past.

Members of the boy's family discovered the list of ingredients May 9 and alerted police. The cat's carcass was found at the boy's home.

A spokeswoman in Kear's office said Rauch would be issued a summons to appear Aug. 23 for a preliminary hearing.

#90205u1160 07/24/1990 ~United Press International

TORONTO (JULY 24) UPI - Northern Telecom Ltd. Tuesday reported second-quarter earnings of $95.7 million, or 37 cents a share, up 27 percent from $75.3 million, or 29 cents a share, in the year-ago quarter. Revenues increased to $1.7 billion up from $1.52 billion in the second quarter of 1989.

For the first half of 1990, Northern Telecom reported earnings of $174.8 million, or 67 cents a share, up from $127.9 milion, or 49 cents a share, in 1989. Revenues increased to $3.27 billion up from $2.90 billion a year earlier.

Chairman Paul G. Stern credited strong demand for the telecommunication giant's products in the company's solid earnings and revenue growth. "Our commitment to new product development and our investments associated with the introduction of FiberWorld and other new product lines as planned continue to increase," Stern said.

For the quarter and the first half, sales of its central office switching equipment accounted for the largest revenue increase, the company said. Revenues from transmission products showed the largest percentage increase overall in the first half.

Northern Telecom is a global supplier of fully digital switching systems and operates manufacturing plants in Canada, the United States, Malaysia and Europe. A U.S. subsidiary, Northern Telecom Inc. is based in Nashville.

#90205u1192 07/24/1990 ~United Press International

ULAN BATOR, MONGOLIA (JULY 24) UPI - Early results from the primaries of Mongolia's first free parliamentary election indicated Tuesday the communists would continue their seven-decade rule but the democratic opposition predicted it would win a share in power for the first time.

The government announcement on Sunday's voting left some confusion over the parties' strength but international observers monitoring the election said the communists, the Mongolian People's Revolutionary Party, appeared likely to win in the final round this Sunday.

The opposition criticized the primary voting for some irregularities and for procedures that favored the communists but acknowledged the balloting had been generally free and fair. International observers, speaking on condition of anonymity, agreed.

''This is our first election,'' Mongolian Prime Minister Sharabyn Gumgaadorj said at a news conference at the squat, colonnaded Foreign Ministry in downtown Ulan Bator. ''There are some shortcomings and bumps but it's been comparatively fair and free.''

''There were no major violations,'' said Erdeniin Batuul, leader of the main opposition group, the Mongolian Democratic Party, citing ''problems'' such as arbitrary disqualification of opposition candidates and invalidation of some ballots.

The two-part election comes after eight months of stunning change in Mongolia, a windswept land of plains and hills between the Soviet Union and China. The nation has been ruled since 1921 by a hidebound Stalinist-model communist party.

Prodded by reforms in the Soviet Union and Eastern Europe, and by a small pro-democracy movement that sprang up last December, the MPRP earlier this year changed its leadership, relinquished its constitutional monopoly on power and began opening the nation's economy.

The opposition has demanded swifter political reforms, an end to official privilege for ranking ruling party members and a faster shift to a market-oriented economy. Some opposition leaders want private property rights restored.

The primary narrowed down to no more than two the number of candidates in races for the national Parliament, the Great People's Hural, with 430 seats each representing a geographic district in the nation of about 2 million people.

The National Election Commission said the primary left 799 candidates, since only one candidate was nominated in some of the 430 districts. Most of those are rural areas believed still loyal to the ruling party.

The surviving candidates, which in contested races included the top two vote-getters in the primary, included only 101 candidates pledged to the three largest of the five opposition parties, the commission said. Most of the other 703 are MPRP members or independents. The government figures were incomplete on party affiliation and on two smaller opposition groups.

Even if all opposition candidates win in the second round, the communists would retain a solid majority in the 430-seat Hural, which previously rubber-stamped party decisions.

But opposition leaders predicted the coalition of the three biggest parties would be a force in the newly elected legislature and could influence the selection of a key ''Small People's Hural,'' which will act as a standing body and make most major decisions.

''We hope to win 40 to 50 seats,'' said S. Zorig, 28, a university lecturer who founded the pro-democracy movement last December and now heads the Mongolian Democratic Union, whose affiliated Mongolian Democratic Party is the coalition leader.

The wild cards after next Sunday are the independents and some ruling party members running on opposition slates, as well as a substantial progressive wing within the communist organization itself that foreign diplomats said could split the MPRP.

But at a news conference, the communist leader, Gambojavyn Ochirbat, played down any such possibility.

''So far, there's no tendency for the party to split,'' Ochirbat said. ''But inside the party, there are differences of opinion on certain issues.''

Spokesmen for the three main opposition groups also said their figures on survival of candidates pledged to them through the first round of voting were higher than the government results.

Zorig, who won in his own primary race in Ulan Bator and will compete for a Parliament seat, said the opposition suffered from poor organization and coordination, especially in rural areas but that in general the voting had been ''quite fair.''

#90205u1233 07/24/1990 ~United Press International

ISLAMABAD, PAKISTAN (JULY 24) UPI - U.S.-backed guerrillas in Afghanistan have captured a key position on the Afghan government's inner security ring around a major garrison town near the Pakistan border, Western diplomatic sources said Tuesday.

They said Moslem guerrillas from all the major resistance groups in the area last week jointly launched fresh attacks against Khost, about 15 miles from the Pakistan border. The resistance has been besieging the town for almost a year.

There was no immediate word from the pro-Soviet Afghan government in Kabul on the reports, which could not be verified independently.

The guerrillas, who are based mostly in Pakistan and backed by the United States and Saudi Arabia, have failed to capture any major urban centers despite the February 1989 withdrawal of Soviet troops backing the Communist government in Kabul. The rebel factions have been embroiled in bloody feuds among themselves.

The regime of Afghan President Najibullah has defied Western predictions of its swift overthrow following the Soviet pullout.

The diplomatic sources said the guerrillas, known as Mujahideen, seized two government positions around Khost last week. They identified the positions as Shalka and Ghurguri.

''Shalka had formed an important link in the regime's inner security line around Khost,'' one source said. ''Observers say its capture is significant because it marks the first time part of this inner line has fallen to the resistance. In most areas, the Mujahideen are within 500 meters of the line.''

The sources said the guerrillas have also stepped up rocket attacks on Khost itself, causing heavy casualties and damage. Resistance groups last week claimed to have downed two military transport planes landing at the town's airfield.

Khost is a major garrison town, but is surrounded by resistance-held territory and can only be supplied by air.

Government forces have responded with intense air and artillery barrages against guerrilla positions in the area, the sources said.

CHICAGO (JULY 24) UPI - Christopher Duda, a test tube baby born more than 7 years ago with a twin sister, is dead from complications of a defective heart. His twin survives in good health.

Christopher and Danielle were the nation's second test tube twins when they were born to Mr. and Mrs. Robert Duda on May 14, 1983.

Danielle was a perfectly healthy baby but her brother, who was just 4 pounds, 13 ounces, was born with two chambers in his heart instead of four and had no spleen. The heart defect hindered his breathing and the flow of blood to his lungs; the lack of a spleen brought down his defenses against infection.

Christopher underwent four heart surgeries, the first when he was 2 days old, including a complex operation last week to reroute his bloodflow. Although the surgery seemed successful, fluid began building up internally and he was unable to recover.

Robert Duda tried to put the death into perspective, remembering a time not so long ago when he was told he and his wife never could have children.

''The miracle is that I had a beautiful son for seven years,'' Duda said Tuesday of Christopher, who died Sunday at Children's Memorial Hospital.

''We were told seven years ago that we could not have children. Then, when we turned to in vitro, we were told there was a 5 percent chance we would have one child. We had two.''

The births of Cristopher and Danielle at Evanston Hospital was the result

of their parents' third try at in vitro fertilization.

Doctors have said the problems were not related to in vitro fertilization.

''We can speculate that it might have been a contributing factor but there is no evidence,'' said Dr. Carl Backer, a cardiac surgeon who assisted in some of Christopher's operations.

''He didn't have two strikes against him, he had 2 1/2,'' Backer said.

But the Dudas never gave up on Christopher's chances and said he didn't suffer the colds and pneumonia doctors had said he would suffer as part of his illness.

''Since his birth, Christopher had been operated on so many times and each time he pulled through,'' Duda said. ''I thought this time would be the same thing.''

He called Christopher a ''typical little boy'' who loved the Teenage Mutant Ninja Turtles and Nintendo. He and his sister were ''inseparable'' and shared a bedroom, Duda said.

''We have to thank God for such a wonderful child,'' he said.

#90205u1269 07/24/1990 ~United Press International

CHICAGO (JULY 24) UPI - The commodity brokerage Stotler and Co., reportedly headed for an uncertain future since a Taiwanese financier declined to take a $10 million stake, has started clearing its trades through another broker, a spokesman said Tuesday.

Last week, the group headed by Chicago Board of Trade Chairman Karsten Mahlmann said an investor agreed to buy a substantial interest in the company. But the Chicago Tribune and Chicago Sun-Times, quoting sources Tuesday, said the Taiwanese investor who had pledged $10 million has pulled out for an unknown reason.

Industry sources told the Tribune the rebuff could be the end of the commodity brokerage that controlled nearly $300 million in customer funds, and could be a major embarrassment for Mahlmann, who has traveled the globe as a free-market proponent and opponent of uneeded and costly regulations.

Mahlmann Tuesday was to testify before the U.S. Senate Banking Committee, which is hearing testimony on whether the Commodity Futures Trading Commission or the Securities and Exchange Commission should control the futures industry.

The Chicago Mercantile Exchange announced Stotler had begun clearing its trades Monday through Brody, White and Co., Inc., a CME clearing member since 1977.

Brody spokesman Phillip Coppin said the arrangement means Stotler will be a non-clearing CME and Chicago Board of Trade member "using our capital and their wherewithall" and "makes sure there's sufficient capital to support customer accounts." Coppin described Brody as a "broker's broker."

Sources said regulators found Stotler had slipped below minimum capital requirements because capital put on the books of the holding company should have been put on the books of the brokerage. They also cited the company's too-rapid growth as another factor.

#90205u1274 07/24/1990 ~United Press International

GENEVA (JULY 24) UPI - With little more than four months left, major trading nations began planning Tuesday to intensify discussions aimed at successfully concluding the troubled Uruguay Round of trade liberalization talks.

Negotiating teams will meet continuously in Geneva up to Dec. 4, when trade ministers are to convene in Brussels to adopt a final package that would encompass world trade issues, officials said.

In light of the contentious nature of issues still to be resolved in the Uruguay Round, however, plans are also being made to hold meetings of officials all the way up to ministerial level if they become necessary, the officials said.

Hugo Paemen, the European Community's director of external relations, said top officials ''will have to be available on a permament basis'' to make the political decisions needed to break trade policy deadlocks.

''The political dimension is growing,'' he said. ''Probably the big political options will still be open in December for ministers to decide.''

For their part, top EC officials ''will be available on a full-time basis '' Paemen said.

''There will be no holiday, which is quite exceptional for the Community because normally in August there is only a janitor to answer the phone,'' he joked with reporters.

Paemen said ''one crisis was averted'' Monday, when the EC and the United States agreed to begin immediate substantive negotiations on their farm trade dispute.

He said this would promote bilateral as well as multiparty negotiations on other deadlocked issues - including textiles, services, anti-dumping rules and import duty reductions on manufactured goods.

An asssessment of where the 107-nation Uruguay Round stands after three and a half years was taking place this week at a meeting of the Trade Negotiations Committee, which oversees the talks.

Like the previous Kennedy and Tokyo rounds, the Uruguay Round is being held under the auspices of the General Agreement on Tariffs and Trade, the world trade regulatory body.

Discussions centered Tuesday - and would again Wednesday and Thursday - on the shape of a summarizing statement by GATT director general Arthur Dunkel in his capacity as chairman of the Trade Negotiations Committee, GATT spokesman David Woods said.

Dunkel consulted with U.S., EC and other leading delegates on how he could ''define where the blockages are'' and what must be done ''to prevent failure,'' Woods said.

That in turn, the spokesman said, could include the convening of ''urgent and more high-level'' meetings.

U.S. and EC negotiators as well as other officials cautioned anew Tuesday that although ''substantive negotiations'' will now begin on agriculture and other big issues, basic differences remain as deep as ever.

The EC's Paemen noted that ''everything is linked to everything'' and a package deal can be concluded only if there is agreement in all 15 Uruguay Round negotiating sectors.

#90205u1276 07/24/1990 ~United Press International

SRINAGAR, INDIA (JULY 24) UPI - A government spokesman Tuesday said security forces intercepted and fought a group of armed Moslem militants crossing the disputed Kashmir border from Pakistan, killing 20 radicals and capturing nine others.

The latest violence brought to 67 the number of Moslem militants killed by Indian security forces in the past one week.

The official said the clashes occurred Monday night in the northern area of the strife-torn Jammu and Kashmir state, but declined to identify the area where the shooting occurred.

The spokesman said 20 militants were killed and nine others were captured in the gun battle, but no details were given on possible security force casualties.

Huge quantities of ammunition and arms were recovered from the militants, the official said.

New Delhi believes Pakistan is arming and training Moslem militants who have waged a separatist rebellion in the Kashmir valley against the government of Hindu-dominated India.

Islamabad denies the allegations but admits to offering moral support to the movement.

The separatist campaign in mid-January snowballed into a mass anti-India movement backed by virtually all 4 million Moslem inhabitants of the region after security forces fired on demonstrators in the state capital of Srinagar, 400 miles northwest of New Delhi, killing at least 35 civilians.

More than 600 people have died since then and the normal life in the valley has been disrupted with near daily curfews, bomb blasts, gun battles, strikes and anti-India demonstrations.

New Delhi reacted to the development by deploying tens of thousands of security forces to smother the separatist campaign, but the movement shows no sign of slowing.

Tuesday, government work remained paralyzed on the second day of a three-day strike by more than 150,000 Moslem state government employees. The strike was called to protest alleged atrocities committed by security forces against civilians, government sources said.

Indian security forces have been accused of human rights abuses in Kashmir including the gang rape of a woman en route to her wedding ceremony and the burning of nearly 300 homes in two villages near Srinagar.

#90205u1288 07/24/1990 ~United Press International

NAIROBI, KENYA (JULY 24) UPI - A prominent lawyer emerged from three weeks in hiding to hold talks with President Daniel arap Moi Tuesday, a day after he said the president had been misled about the causes of recent pro-democracy unrest.

Paul Muite told reporters he talked to Moi for almost two hours but did not apologize, as the president had asked him to do, for his involvement in calls for the introduction of multi-party politics in Kenya. He did not

say what he and Moi discussed.

Muite ducked out of sight on July 4 after security police detained a dozen leading opponents of the one-party system in Kenya, including a number of lawyers and two former cabinet ministers, Kenneth Matiba and Charles Rubia.

Muite and colleague Gibson Kamau Kuria went into hiding, saying they feared they would also be detained. Kuria sought refuge in the U.S. Embassy and was later allowed to leave the country. Those detained are still being held.

On July 7, a banned rally for multi-party democracy degenerated into rioting in Nairobi which spread to other Kenyan towns and lasted for five days.

President Moi Sunday called on Muite to emerge from hiding and apologize for what the president described as his part in causing the rioting.

Muite replied Monday that the unrest had nothing to do with him, that the President was being misled by those around him, and that his only crime was to agree, as a lawyer, to represent some of the detained men.

''I wish to categorically condemn the violence, destruction of property, burning of vehicles and other acts of hooliganism which occurred in Nairobi and elsewhere,'' he wrote. ''Neither myself nor my clients had any prior knowledge and were not privy to the instigation ... of that violence.''

The Kenyan detentions have drawn international condemnation, especially from the United States, where Sen. Edward Kennedy, D-Mass., last week introduced a bill calling for a cutoff of economic and military aid to Kenya.

Numerous Kenyan politicians in return have accused the United States of meddling in the East African country's internal affairs.

Kenya has been a de facto one-party state since 1969, and in 1982 Moi changed the constitution to make the Kenya African National Union, or KANU officially the sole legal party in the country.

Matiba, Rubia and others - including lawyers and churchmen - have called for the past three months for that change to be repealed.

#90205u1289 07/24/1990 ~United Press International

JERUSALEM (JULY 24) UPI - Prime Minister Yitzhak Shamir told three European Community foreign ministers Tuesday that Israel's central aim is

to achieve peace with its neighbors, in particular the Palestinians.

The EC troika, made up of the past, present and future presidents of the EC foreign ministers' council, spent less than 24 hours in Israel to hold talks on the peace process and the situation of the Palestinians in the occupied West Bank and Gaza Strip.

After their meeting with Shamir, the foreign ministers of Ireland, Italy and Luxembourg traveled to Tunis for meetings with Arab League officials.

Shamir told the ministers that Israel's main objective is advancing the peace process according to the Israeli government's 1989 peace initiative, Shamir adviser Avi Pazner said.

Shamir, whose Likud Party recently formed a new government after the breakup of a Likud-Labor coalition over the pace of the peace process, also reiterated the Israeli government's opposition to the inclusion of the Palestine Liberation Organization in any peace talks.

''It is a terrorist organization whose objective is the annihilation of the state of Israel,'' Pazner said.

''The meeting ended with the prime minister pointing out that he wants the foreign ministers to leave Israel with the feeling that Israel is working for peace, and will do everything to further the peace process,'' Pazner said.

Italian Foreign Minister Gianni de Michelis, current president of the EC ministers' council, said after the meeting Europe was interested in further developing its relations with the Middle East, Army Radio reported.

''Europe believes that a furthering of the peace process in the Middle East will serve the interests of the countries in the region and the Common Market,'' de Michelis said.

The troika, which met with Foreign Minister David Levy Monday, did not come to put pressure on Israel, de Michelis told Army Radio.

''But we want to do something about furthering the peace process in order to advance the situation in the territories and to give support to the moderates,'' he said.

Shamir raised the issue of growing anti-Semitism in Europe and urged the foreign ministers to work against it in their respective countries, Army Radio reported.

#90205u1296 07/24/1990 ~United Press International

JERUSALEM (JULY 24) UPI - A Palestinian shot and wounded during clashes with Israeli soldiers has died of his injuries in the occupied territories where Palestinians observed a strike Tuesday called by an Islamic fundamentalist group.

A 28-year-old Palestinian also was shot late Monday by masked Arabs in the West Bank village of Lubban Sharqiya. Police were investigating the motive behind the slaying.

An estimated 230 Palestinians suspected of collaborating with Israel or of allegedly immoral behavior have been killed by other Arabs since the start of the nearly 32-month-old Palestinian uprising.

At least 687 Palestinians have been killed by Israeli security forces or civilians during the same period.

Military and Palestinian sources said Mohammed Salama, 19, died late Monday of wounds he suffered when Israeli soldiers attempted to quell rioting and stone throwing in the West Bank village of Beit Lid on July 14. Salama died in a Nablus hospital. The military was continuing its investigation into the shooting.

Residents of the occupied territories of the West Bank and Gaza Strip and of Israeli-annexed East Jerusalem shut their stores Tuesday in observance of a general strike called by the outlawed Islamic Resistance Movement.

The strike commemorated the capture of Baghdad in 1258 by Hulagu - a grandson of Genghis Khan - which marked the end of the Islamic Abbasid Caliphate.

Palestinian sources said that while residents of the territories observed the commercial strike, transportation was normal.

#90205u1322 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - Connecticut's two senators Tuesday announced legislation to provide a ''safety net'' for workers expected to be laid off in the defense industry and direction for integrating defense businesses into the civilian sector.

The measure, one of several introduced in Congress aiming to assist workers soon to be displaced as a result of defense cutbacks, would use 10 percent of the so-called budget peace dividend of defense cutbacks, or about $1 billion, to fund a package of severance and health benefits for laid-off workers and create a federal council to coordinate assistance to the workers.

The plan, scheduled to operate for seven years, was announced at a news conference by Sens. Joseph Lieberman and Christopher Dodd, both Democrats.

''We ought to fulfill our obligation to the people who have made the peace dividend possible and that is the defense workers and companies and the communities in which they are located,'' he added.

The legislation would provide severance pay equal to 65 percent of the average state salary for manufacturing for durable goods, about $16,000 per year, for one year and would provide one year of health insurance for displaced workers.

It would also establish a federal Council of Economic Diversification to oversee assistance to workers, businesses and communities hurt by defense cutbacks and would encourage defense contractors to make the transition to civilian production and to retrain and educate their workforce. In addition, the legislation would increase federal funding for community planning grants from $2 million to $20 million so areas hardest hit can receive more assistance.

WASHINGTON (JULY 24) UPI - Statistics show state medical boards are failing to take adequate action to discipline incompetent or unethical doctors, a consumer health group charged Tuesday.

Public Citizen Health Research Group released a report showing that state medical boards failed to increase the number of serious disciplinary actions against doctors in 1988, the most recent year for which data were available.

A total of 1,489 medical license revocations, suspensions and probations were invoked by the 50 states and the District of Columbia in 1988, the same number of actions taken the previous year.

''We are very disappointed by these results, though not surprised. The numbers mean that patients are still not being protected from physicians who operate drunk, commit gross acts of negligence or sexually assualt patients,'' said Dr. Sidney Wolfe, executive director of Public Citizen.

Last month, Public Citizen, founded by consumer activist Ralph Nader, released a report listing about 6,900 ''questionable'' doctors disciplined by state medical boards and the federal government. That report included the number of disciplinary actions taken by state medical boards in 1987.

In 1988, the states that showed the largest declines in disciplinary rates

against doctors were Delaware, New York and Wisconsin, Public Citizen said. Seven other states - Arizona, California, Montana, New Hampshire, Texas, Rhode Island and Vermont - also declined in performance, the consumer group said.

Georgia, Iowa, Missouri, Oklahoma and Nevada were the states with the highest rates of disciplinary action against doctors in 1988. Georgia averaged 8.55 serious disciplinary actions per 1,000 doctors in 1988.

The lowest disciplinary rates came in two states with relatively few doctors. Rhode Island, with 2,489 physicians, averaged 0.4 actions per 1,000 doctors in 1988 while Montana, with 1,323 doctors, had no disciplinary actions in either 1987 or 1988.

To support its claims that state medical boards are failing to properly police the medical profession, Public Citizen cited a 1989 study by Tufts University in Boston that found sanctions against doctors by malpractice insurance and other physician-owned insurance companies averaged about 13.6 per 1,000 doctors per year.

#90205u1355 07/24/1990 ~United Press International

DETROIT (JULY 24) UPI - A top officer of the United Auto Workers union has warned that UAW bargainers must ensure during this summer's labor negotiations that Detroit's ''Big Three'' automakers do not push the union out of supplier plants, a newspaper reported Tuesday.

UAW Vice President Odessa Komer, who oversees more than 80,000 UAW members employed at part suppliers, told bargainers the current round of talks ''will be the last opportunity we have to bring any pressure on the issue of union-busting in the supplier industry.''

In a letter obtained by the Detroit News and reported in Tuesday's editions, Komer also said that ''if we can't slow this erosion, the next assault on the labor movement could come through union-free joint ventures and our union would stand to lose the most.''

UAW membership among employees of independent parts suppliers has declined by 60 percent during the last 10 years.

Talks between the UAW and the nation's three top carmakers - General Motors Corp., Ford Motor Co., and Chrysler Corp. - began last week in efforts to reach new labor pacts covering about half a million auto workers.

The current three-year agreements expire Sept. 14, and top UAW officials have said that increasing job security is their top priority.

The UAW also will strive to reduce ''outsourcing,'' or the practice of the Big Three sending out work to be done by other companies.

''All too often when we sit down with (supplier firms), we are told auto companies are insisting supplier contracts specify there will be an uninterrupted flow of production,'' Komer said in the letter. ''Naturally, this is interpreted to mean no collective bargaining agreements... or to put it bluntly - union-free.''

Carmakers denied they are actively seeking union-free labor.

''General Motors is a union company,'' GM spokesman John Maciarz told the News. ''It doesn't make sense for us to be accused of union-busting.''

Ford spokesman Dick Routh said the No. 2 automaker was not increasing the amount of work done outside, either at union or non-union firms.

But Komer said in the letter that Ford recently transferred parts stamping work from a unionized Budd Co. plant and awarded it to Ogihara of America Corp., a non-union concern.

#90205u1357 07/24/1990 ~United Press International

CAPE CANAVERAL, FL (JULY 24) UPI - The launch of an Atlas 1 rocket carrying a $189 million science satellite to study Earth's invisible magnetic field has been postponed again until Wednesday, officials said Tuesday.

General Dynamics Corp., the rocket's builder, hoped to launch the rocket Tuesday afternoon but delayed the launch until 3:21 p.m. Wednesday at the earliest while engineers replace a faulty switch, a NASA spokeswoman said.

''The earliest possible with doing the hardware work moves them into no earlier than Wednesday,'' said NASA spokeswoman Pat Phillips.

The launch was postponed for the third time in four days Monday just four minutes before the scheduled blastoff when engineers could not switch on the rocket's internal power.

The problem was traced to a faulty ''vehicle power changeover switch,'' which was removed late Monday and replaced Tuesday. Engineers began tests to make sure everything was working properly, said General Dynamics spokesman Jack Isabel.

''Engineers are in the process of validating that new hardware,'' said Isabel, adding that a decision on when to schedule the next launch attempt

was expected late Tuesday.

Before Monday's problems, the 143-foot booster sitting on launch pad 36-B at the Cape Canaveral Air Force Station had already been delayed twice before - Friday because of a helium leak and Sunday by stormy weather.

Mounted inside its protective 14-foot-wide nose cone is the Combined Release and Radiation Effects Satellite, or CRRES, a joint NASA-Defense Department satellite built to study the interaction between the supersonic solar wind, Earth's upper atmosphere and the planet's magnetic field.

CRRES, a solar-powered 3,732-pound satellite built by Ball Corp. of Denver is equipped with 24 canisters of barium and lithium that will be released into space and detonated over the next year, ''painting'' the otherwise invisible magnetic field with vast clouds of glowing chemicals.

Program manager Richard Howard said the releases, scheduled to begin in September and continue through next July, should be ''very visible'' to observers in the United States, creating celestial displays that bear ''an uncanny resemblance'' to the aurora borealis, or northern lights.

The satellite also carries Defense Department experiments to study the effects of space radiation on microelectronics, research expected to help engineers design satellite equipment that is better able to withstand the rigors of space.

The mission marks the debut of the Atlas 1 rocket, a commercial version of the workhorse Atlas-Centaurs built by General Dynamics of San Diego. A successful launch was considered crucial to the company's plans to win a share of the lucrative commercial launch market, dominated by the European Ariane rocket program.

CRRES originally was scheduled for launch Friday, but a liquid helium leak between the first stage of the Atlas and its Centaur second stage forced NASA managers to delay the flight with less than an hour to go before blastoff. The leak was fixed Saturday.

The Atlas 1 was valued at $64 million. But under the terms of the launch contract, General Dynamics swapped the rocket for out-of-use government launch equipment that will be modified for use in the commercial Atlas program.

CRRES was built to study the invisible bubble of Earth's magnetic field, called the ''magnetosphere,'' to learn more about how it interacts with the solar wind, a stream of electrons, protons and other particles blasted away from the sun. The importance of such research is easily seen.

When high-energy particles from a solar flare smash into the magnetosphere

for example, a ''geomagnetic storm'' can occur, disrupting communications and causing problems for electrically sensitive satellites.

To learn more about how the process works, CRRES will release chemical ''tracers'' into space that will briefly paint the otherwise invisible magnetic field with bright colors.

For each experiment, one or two canisters will be ejected into space and detonated about 25 minutes later, after the satellite is a safe distance away.

High-energy ultraviolet light from the sun then will ionize the released chemicals, changing the number of negatively-charged electrons in a given atom to give the gas an electrical charge.

The resulting ''plasma'' clouds, initially 60 miles or so in diameter, then will stretch out along Earth's magnetic field lines much like iron filings will line up around a bar magnet to make its force field visible.

#90205u1384 07/24/1990 ~United Press International

CHARLOTTE, NC (JULY 24) UPI - Evangelist Jim Bakker said Tuesday he is making regular payments on a $500,000 fine for defrauding his followers, giving the government five times what he earns cleaning prison toilets.

In a telephone call from federal prison in Minnesota, the television preacher said assertions by a U.S. attorney that the government may have to garnish his wages to get its money are not true. Bakker said he is voluntarily paying the money.

Bakker works 37 1/2 hours a week at the Federal Medical Center in Rochester, Minn., earning $4.12. But his commissary account also includes money that family, friends and followers send him.

''All the money I have in the world is in that commissary account,'' said Bakker. ''I don't have any property on the outside and I don't have any money anywhere else.''

The charismatic Bakker, 50, was convicted last year of fraud and conspiracy stemming from the way he raised and spent money at PTL. He was sentenced to 45 years in prison and fined $501,025.

On Monday, U.S. Attorney Tom Ashcraft released a list of the Top 10 criminal debtors in the Western District of North Carolina. Bakker was No. 3 on the list and Ashcraft said the government would pursue every means possible to force him to pay up.

''We pursue every legal way to collect these debts,'' Ashcraft said. ''But some people refuse to make any effort to pay what they owe. Garnishment of wages for federal debts will be possible in all states if Congress passes legislation now pending.''

The federal prison system, however, provides that a maximum of only $25 per quarter can be taken from an inmate's prison account to pay fines assessed by a criminal court. That would be a little less than half the $53.63 cents Bakker makes per quarter.

Like other inmates, Bakker is not allowed pocket change in prison. All of his mail is opened before he receives it and any cash or checks deposited in his account at the prison commissary.

The evangelist, however, said he is paying far more than that voluntarily to the government.

''I've been giving them $100 a month out of this commissary money, so I am actually giving them five times as much as I earn at my job,'' Bakker said.

Prison officials could not be reached to confirm or deny Bakker's statement, but have earlier said his commissary money goes for things like shaving supplies, postage and stationery - provided there is enough money in his account to cover the cost.

Bakker has appealed his conviction and sentence to the 4th U.S. Circuit Court of Appeals in Richmond, Va., and prosecutors must file their response to his bid for a new trial by Wednesday.

One of Bakker's lawyers in the appeal, Don Ervin, of Houston, said the threat of garnishment by the U.S. Attorney's Office underscores how ruthless the government has been in dealing with the evangelist.

''This shows the depth of his persecution,'' Ervin said. ''I just think it points up how incredibly oppressive the goverment has been and makes him a victim in the eyes of the public. To sensitive people, his sentence was shocking.

''The question for the government is how much can you hurt someone? How much depravation can you wreak on an individual?'' the attorney said.

#90205u1401 07/24/1990 ~United Press International

LONDON (JULY 24) UPI - A study of the hands of 100 corpses revealed a ''highly significant association'' between the age of the deceased and the lifelines traversing the dead palms, The Royal Society of Medicine said Tuesday.

The monthly journal of the prestigious institution reported that three doctors in Bristol had studied 63 dead men and 37 dead women and discovered some sort of scientific foundation to palmistry.

''We have found a strong statistical correlation, particularly for the right hand, and the age of death,'' the article in the August edition said. ''A highly significant association between the two was discovered which was strengthened further when the hand size was controlled.''

The investigators went to 100 consecutive autopsies, at which a coroner would prise open the hands of the corpses aged between 30 and 90.

They devised a ratio for balancing a subject's hand size to its actual lifeline length and then assessed what age the lifeline represented.

Another researcher not involved in the data collection and uninformed of the hypothesis being pursued analyzed the material and matched these figures to hospital records of the age of the deceased.

The journal displayed the findings on a graph, on which the scattering of dots representing lifeline ratios were closely clustered around a line representing actual age at death.

Those with short lifelines died young, and those with longer lifelines lived into old age, the article said.

The researchers acknowledged their findings could be pure chance, but drew some ironical conclusions about the implications if lifelines are a true reflection of life expectancy.

''Such findings would have important financial and ethical considerations for the use of resources in a cash-limited heatlh service, not to mention plastic surgeons who may wish to extend their private practise and their patient's lifelines,'' the journal said.

''It would, moreover, be a handsome gesture, and augur well for future relationships with general managers, if the diagnostic dexterity of a glance at the hands (to see whether an illness is the patient's last) where to dispense with these costly blood tests and X-rays,'' it said.

Palmistry was popular in ancient China and India. One of its most famous adherants was Cheiro, who was renowned for correctly forecasting the death dates of Queen Victoria and King Edward VII by looking at their palms.

SAN FRANCISCO (JULY 24) UPI - Two more Chinese Consulate staff members in San Francisco have disappeared and apparently plan to defect, bringing to seven the number of people who have fled the office since the Tiananmen Square massacre.

The disclosure came just before Tuesday's arrival of the highest-ranking group of Chinese officials to visit the United States since the violence in Beijing last year. They will visit San Francisco and San Jose for 2 days.

Wang Shaohua, a consulate spokesman, identified the two staff members Monday as Pang Yongjin, vice consul for administration, and Shen Xuliang, the consulate's chef. He said they disappaered last week.

The San Francisco Chronicle was told by a Chinatown source: ''They will defect, but right now (Pang and Shen) just want to keep a low profile.''

But Wang said Pang and Shen just ''finished their tenure'' and left the consulate.

This was disputed by sources close to the two men, telling the Chronicle that the pair left the consulate because they plan to defect and are in hiding in the San Francisco Bay area.

Both staff members began work in the consulate in 1986. Pang was the personal secretary to Consul General Zheng Wan-Zhen. Shen was well-known in San Francisco's diplomatic community and in China for his culinary skills. Both men are in their 30s.

Wang said the departure of Pang and Shen would not affect the visit of the Chinese dignataries. But one source told the Chronicle: ''Every defection is embarrassing, especially when you have big shots coming to see you.

''At least now there are two more empty beds (in the consulate) for the mayors to sleep in.''

Like their coworkers, Pang and Shen will probably apply for permanent residency under immigration laws which allow former diplomats to remain in the United States for ''compelling reasons,'' their friends said.

#90205u1455 07/24/1990 ~United Press International

ASHEVILLE, NC (JULY 24) UPI - Be it ever so humble, there's no place like home - especially if it's the Biltmore House, whose value was conservatively placed by a tax assessor Monday at $16 million.

Buncombe County tax assessor Charles Clark conceded the house, one of only

two European-style castles in America, may be worth more than that. But he said he didn't much care for its medieval accoutrements.

''It may be worth $100 million to somebody,'' said Clark, ''but it wouldn't be worth it to me.''

Clark spent a month poking through the Biltmore's nooks and crannies, consulting estate experts and then crunching the numbers. He said the house is a real fixer-upper, a real estate term meaning only a handyman would dare buy it.

The tax man said the house, built from 1890 to 1895, has some drawbacks, not the least of which is the fact that it's old.

''It has a circuit board that was designed in 1900, a heating system that won't keep the water in the third and fourth floors from freezing and copper flashing that needs replacing,'' Clark said.

The Biltmore was built by George Vanderbilt, heir to a fortune generated by his father, 19th century industry baron Cornelieus Vanderbilt and grandfather of the current owner, William Cecil.

The Biltmore is privately owned and used for business purposes as a museum which means Cecil must pay property taxes.

Clark said appraising the house was no easy matter.

''Let me tell you, I was not walking on familiar ground when I started this appraisal,'' he said. ''It's kind of like a work of art - how in God's name do you value something like that until it has been sold?''

The closest thing to the Biltmore House in America is 19th century publishing magnate William Randolph Hearst's castle in San Simeon, Calif. But no one knows its tax value because the state of California has owned it since 1967.

Clark said his evaluation took into consideration replacement value. But he added that term does not mean what it would cost to reproduce the house.

For one thing, few stone craftsmen are left who can fit Indiana limestone blocks so tightly that a sheet of paper won't fit between them. For another, most people don't want homes that grandiose.

''Let's face it, if you wanted to replace a house, you wouldn't build a dining room with a 50-foot ceiling,'' Clark said.

Clark said the replacement value for most homes is $45 a square foot. But he estimated the value of the Biltmore at $323 a square foot.

From that he subtracted 40 percent depreciation to allow for the castle's intriguing but obsolete workings. He noted in his report that most people would not want to live there.

The Buncombe County tax rate is 68 1/2 cents per $100 valuation. That would put the property tax for the Biltmore at $109,903, roughly four times higher than the last time it was appraised.

Cecil declined to comment on whether the tax rate is fair. He said he has not decided whether to appeal Clark's appraisal.

''They realize,'' said Clark, ''that proving I'm wrong is just about as hard as proving I'm right.''

#90205u1456 07/24/1990 ~United Press International

KONAWA, OK (JULY 24) UPI - City Manager Bill Taylor said he doesn't remember much about the incident but wouldn't blame the City Council if it fires him for slapping a council member's head with a socket wrench.

The council suspended Taylor Monday night for two weeks and told him he will learn Aug. 6 whether he still has a job.

''I'll probably lose everything I've got - 40 years of hard work,'' Taylor said. ''I couldn't blame them. I stepped out of line. I can't figure out why. I'm sick right now.''

Betty Myatt, owner and operator of the Sweet Shoppe, said Taylor struck Councilman Dean Wooten on the top of the head with a socket wrench Friday afternoon ''while cussing every breath.''

''Next thing I knew, he was laying on the floor cold as a cucumber,'' Myatt said. ''He looked dead. We thought he was.''

Wooten was released after treatment in a hospital emergency room. He was not immediately available for comment.

Taylor, who said he recalls little about the incident, was cited for disturbing the peace. His lawyer told him not to talk about it.

#90205u1461 07/24/1990 ~United Press International

NEW YORK (JULY 24) UPI - Assistant District Attorney John F. Kennedy Jr. took a New York State bar examination for the third time Tuesday under the pressure of losing his job if he flunks again.

Kennedy, 29, was one of 7,400 hopefuls taking the exam Tuesday and Wednesday at the Jacob K. Javits Convention Center.

Maureen Curran, a spokeswoman for the New York Board of Law Examiners, said results of the current test will not be announced until early November.

On the line for the handsome son of the late president is his $30,000 job, which he will lose if he fails to pass the exam for the third time.

''All assistants get three chances,'' said Colleen Roche, a spokeswoman for Manhattan District Attorney Robert Morgenthau. ''It's a long-standing office policy.''

If Kennedy passes, he gets a $1,000 raise, Roche said.

Kennedy can take the test as many times as he wishes, but he cannot return to the district attorney's office until he passes it.

Kennedy is a 1989 graduate of New York University Schol of Law. He took his first bar exam in November and, after learning he flunked, took it again in February and failed again.

He vowed then to study hard and take the exam again.

Kennedy was sworn in last August as an assistant prosecutor working with a unit focusing on white-collar crime, low-level political corruption and other felonies. He was part of a three-member team of prosecutors who investigated illegal wiring of drug money from New York to the Dominican Republic.

His cousin, Robert F. Kennedy Jr., also failed the bar exam in 1982 and resigned as an assistant district attorney amid charges of drug abuse. He entered a drug treatment program, received a suspended sentence and probation, and eventually was admitted to the bar in 1985.

Kennedy, the only son of President John Kennedy and Jacqueline Kennedy Onassis, has been named the nation's ''sexiest hunk'' in several popularity polls. A bachelor who lives quietly in an apartment on Manhattan's Upper West Side, he patronizes some of the city's trendiest restaurants and nightspots in the company of generally unidentified young women but he also has been linked with Madonna, Daryl Hannah and Julia Roberts.

Kennedy's sister, Caroline Kennedy Schlossberg, 32, passed the bar exam on her first try three years ago. She is the mother of two small children and is not currently practicing law.

-30- 2632
#90205u1512 07/24/1990 ~United Press International
BOSTON (JULY 24) UPI - A Tennessee surgeon who died from AIDS complications apparently did not infect any of his patients with the virus that causes the deadly disease, scientists said Tuesday.

Researchers, who combed through records of 2,160 people operated on by the surgeon during the eight years he may have been infected with the AIDS virus, said there is no evidence he transmitted the disease to any of them.

They said the results of the study - the most comprehensive of its kind - support the concept that patients who undergo surgery by a doctor who has the human immunodeficiency virus, or HIV, run little risk.

Dr. William Schaffner of Vanderbilt University, co-author of the study, said there have been no reported instances of a doctor or other health care worker transmitting HIV to a patient.

Furthermore, there have been no reports of clustering of people with HIV in which the source of infection might have been a health care worker, Schaffner and colleagues reported in the Journal of the American Medical Association.

Nevertheless, Schaffner said the potential for doctor-to-patient HIV transmission ''is acknowleged by everyone experienced in this field. It could happen tomorrow.''

Schaffner said he thinks the time has come to establish national guidelines for HIV-infected medical workers to follow in dealing with patients.

''We know that nationwide, about 5 percent of AIDS cases are among health care workers. This means virtually every hospital with more than 300 beds has had to deal with the problem'' of having at least one staff member with AIDS or HIV, he said.

In the new study, Schaffner and his co-researchers identified people the surgeon with AIDS operated on between Jan. 1, 1982 and September 1988, when he gave up his practice because of failing health.

Although the study did not identify the surgeon, newspapers and television in Nashville, where he worked, named him as Dr. Harold Dennison. The doctor and his family acknowleged his AIDS diagnosis shortly before his death of respiratory failure on January 30, 1989.

Dennison was a general surgeon who performed operations at three hospitals

in Nashville. Of the surgeries he carried out from the beginning of 1982 - the earliest time researchers think he might have been infected with HIV - 694 were abdominal operations, 358 were hernia repairs, 332 were breast operations, 280 involved the colon or rectum and the rest involved a variety of procedures, such as removal of skin growths.

Of the 2,160 people identified as having undergone surgery by Dennison, Tennessee vital statistics records indicated 264 had died as of April, 1989 - none of them from AIDS, the study said.

Schaffner said another 244 could not be located, leaving 1,652 who were notified of Dennison's diagnosis and offered free AIDS testing and counseling. Subsequently, 616 underwent testing. Only one, an ex-convict who admitted to using intravenous drugs and having frequent sexual encounters with prostitutes, tested positive for HIV.

The study said the fact that the man was in a high risk group for HIV infection and was diagnosed with tuberculosis in 1984, when Dennison removed a lymph node from him, ''suggests that he already may have had AIDS at the time of his surgery.''

In an editorial accompanying the study, Dr. Frank Rhame of the University of Minnesota estimated the risk of surgeon-to-patient HIV infection at between one in 100,000 and one in 1 million. Based on cases of surgeons transmitting hepatitis B virus to patients, Rhame said the riskiest operations are probably those involving hysterectomies and pelvic surgery, in which doctors sometimes must work blindly, moving sharp instruments by touch as well as sight.

Although some medical associations recommend voluntary testing of health workers for HIV, Rhame said the medical profession currently has no uniform policy about what should be done if someone tests positive.

#90205u1523 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - A broad coalition of religious and civil liberties groups, often at odds with one another, will join in pushing legislation designed to rectify the Supreme Court's so-called peyote ruling they believe gutted the constitutional right of the free exercise of religion.

The groups, including the National Council of Churches, Americans United for Separation of Church and State and the American Civil Liberties Union, said they will back a Religious Freedom Restoration Act to be introduced in the House on Thursday by Reps. Stephen Solarz, D-N.Y., Paul Henry, R-Mich., James Sensenbrenner, R-Wis., and Don Edwards, D-Calif.

''We have fought for religious liberty in this country since 1620 and we will continue to do so,'' said the Rev. Paul Sherry, president of the 1.6 million-member United Church of Christ.

Sherry made his comments in a letter to members of Congress urging them to sign on as co-sponsors to the proposed bill, saying it would ''restore protections to religious liberty, which the court unnecessarily abandoned in its April 17 ruling in ''Oregon State Employment Division vs. Smith.''

In that decision, the Supreme Court upheld the withholding of unemployment compensation to two drug counselors who were fired for using peyote during ritual worship services of the Native American Church.

In its decision, the Supreme Court said the Free Exercise clause of the Constitution's First Amendment does not excuse violations of criminal law and Oregon's drug laws making the use of peyote - even in religious worship - illegal.

That ruling, according to the Rev. Dean Kelley of the National Council of Churches, ''swept aside the Free Exercise standard that the Court has used for 27 years by no longer requiring the state to show a compelling interest for overriding an important worship practice of a recognized religion.''

The ruling created widespread panic and consternation among religious groups across the theological and political spectrum who saw in the court's rationale a threat not only to the worship practices of religious minorities but also of their own faiths.

Efforts to convince the Court to reconsider the ruling were rejected by the justices in June.

In throwing its support behind the proposed legislation, the American Civil Liberties Union said it offers ''a much-needed answer'' to the Smith decision in which Justice Antonin Scalia, writing for the court majority, said that from now on, when a citizen's freedom to worship collided with valid, religiously neutral state laws, the laws would take precedence.

''Without corrective legislation ... Smith could quite easily be cited to criminalize communion for Christian minors or be employed to strip a Jewish student of his right to wear a yarmulke to school,'' the ACLU said in a letter to House members.

The April decision abandoned the ''compelling state interest'' test and ''less restrictive means'' standards for judging the constitutionality of state laws that burden the freedom of religion and the behavior of states in refusing to allow religious exemptions to such laws.

The proposed legislation would, by statute, seek to restore those standards.

#90205u1532 07/24/1990 ~United Press International

MOSCOW (JULY 24) UPI - Raging forest fires in northern Siberia threatened a major natural gas pipeline and forced the evacuation of an area where authorities declared a state of emergency, reports said Tuesday.

Nikolai Kovrigin, mayor of the town of Nadym at the center of the fires, said firefighters, trainees and civil defense detachments were flown in from other regions to battle a 35-mile ''tongue of flame.''

''Nadym with its 50,000 inhabitants and many settlements have been grasped in an ominous ring of flaming fire,'' the newspaper Komsomolskaya Pravda reported. ''A state of emergency has been declared in the district. The population, with women and children first and foremost, are being evacuated from the most dangerous zones.''

The local authorities asked the Soviet government and the Russian republic for emergency aid, the newspaper said.

In a separate area of Siberia, heavy rain and flooding near Lake Baikal caused loss of life, left thousands homeless and inflicted $640 million in damage, a newspaper said.

The spontaneous fires, started by unusually high summer temperatures, were ravaging pine forests in one of the Soviet Union's main gas-producing regions near the Arctic Circle, the official Tass news agency said.

''Sparked by an extraordinary heat wave, with the air temperature above (104 degrees) in the shade, fires on peat bogs and the taiga have been raging here for more than a week now,'' Tass said in a dispatch from Nadym.

''The wells of the Yamburg gas deposit, one of the largest in the U.S.S.R. have been protected with a bank of earth,'' Tass said. ''Fire barriers are being urgently erected along the corridor of the main pipelines that deliver natural gas to Soviet and foreign consumers.''

The threatened pipeline is part of a 3,000-mile conduit that has become an important supplier of gas to Western Europe since its construction in the 1980s.

Tass reported large leaks in the same pipeline last week, farther south near the city of Tyumen, but it was not known whether the forest fires were caused or exacerbated by those releases. The same region was also stricken by oilfield fires that forced the closure of 27 wells, the

earlier reports said.

Kovrigin, the Nadym mayor, said 30,000 acres of forest and deer pastures had been destroyed.

''Although the fire has turned to the northeast, the threat for both the gas pipelines and the residential settlements has not passed,'' he said. ''The wind direction could change at any minute, and any consequences are possible.''

Kovrigin said a shortage of advanced equipment was hampering the firefighting effort.

Komsomolsklaya Pravda called the firefighting forces ''ridiculously small'' and warned: ''The fire is advancing practically without impediment.''

Natural disaster has also struck a region based about 1,500 miles southeast of Nadym, near Lake Baikal in central Siberia, the Sovetskaya Rossiya newspaper said.

''Heavy rainfall west of Lake Baikal in Siberia caused severe floods, resulting in deaths and 400 million rubles ($640 million) worth of material damage,'' the newspaper said. ''Thousands of people were left homeless and more than 400 bridges were swept away when rivers overflowed their banks.''

The flooding near the world's deepest lake has been aggravated by ''thoughtless large-scale tree cutting'' in the area, the report said.

WASHINGTON (JULY 24) UPI - The United States will begin removing its arsenal of 400 tons of nerve gas weapons from West Germany on Thursday and should complete the withdrawal by the end of September, the Pentagon announced Tuesday.

The weapons are to be shipped to a remote Pacific island where they will be destroyed in a specially built incinerator.

''The removal of chemical munitions will start on July 26 (Thursday),'' Pentagon spokesman Pete Williams said. ''The entire operation, including the loading of ships, which starts on July 26, will probably go through the end of September. But it is on schedule.''

The nerve gas is in about 100,000 artillery shells stored in a large, secluded depot at Clausen, near the French border in the state of

Rhineland-Palatinate.

The stockpile consists of two types of nerve gas, Sarin and VX, odorless and colorless agents that attack the nervous system and can cause convulsions and death within minutes.

Under the U.S. withdrawal plan, the shells will be placed in vapor-proof containers, trucked in high-security convoys to a nearby rail station, taken by train several hundred miles to the North Sea port of Nordenham, and then shipped to Johnston Atoll, 700 miles southwest of Hawaii, for destruction by the U.S. Army.

The removal is projected to cost $46 million.

An initial U.S.-German plan called for withdrawal of the weapons by 1992 but West German Chancellor Helmut Kohl successfully pressed the Bush administration in 1989 to move more quickly.

The weapons to be removed from West Germany are ''unitary'' shells that contain deadly gas. The more modern ''binary'' weapons carry two chemical agents that are harmless until mixed together shortly before reaching their targets.

The removal will leave the United States without chemical weapons in Western Europe for the first time in more than 20 years.

President Bush and Soviet President Mikhail Gorbachev signed an agreement June 1 to halt production of chemical weapons as soon as the pact is ratified by U.S. and Soviet lawmakers and to reduce each side's chemical stockpile to 5,000 tons by 2002.

The United States has about 25,000 tons of chemical weapons; the Soviet Union about 50,000 tons.

As a result of the new U.S.-Soviet accord, Cheney earlier this month canceled planned tests of the nation's newest chemical weapon and told military officials to begin to prepare to put chemical production facilities into mothballs.

He also withdrew the administration's request for $140 million in new production funds for binary chemical warheads for artillery shells and bombs.

The United States resumed production of chemical weapons in 1987 following an 18-year moratorium.

#90205u1571 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - President Bush feels progress is being made in budget negotiations and House Democratic leader Richard Gephardt said Tuesday the two sides hope to make a deficit-cutting deal by the time Congress begins its August vacation.

Bush met with congressional leaders at the White House Tuesday morning before beginning a one-day political trip to Philadelphia and New York. The negotiations, set to continue on Capitol Hill in the afternoon, are aimed at finding ways - including spending cuts and revenue increases - to reduce the projected federal deficit next year by $100 billion.

''The president feels they made progress,'' White House spokesman Marlin Fitzwater said of the morning meeting.

Talking with reporters aboard Air Force One, Fitzwater said the group ''is doing the heavy lifting'' of sifting through budget details to fund ways to shrink the deficit.

If no agreement is reached, the Gramm-Rudman balanced budget law could force radical cuts in many programs.

Asked if Bush would use his campaign stops to build pressure on the Democrats on the budget issue, Fitzwater said the president will ''be very gentle. They're working in a spirit of harmony and cooperation.''

The spokesman said the two sides ''agreed ... this morning that they would try to keep the rhetoric under control and really try to make this a productive week of work.''

Bush's message to the leaders was that ''for the good of the economy, we need a package (of reductions) to get the interest rates down. ... Time is important,'' Gephardt said.

Gephardt, D-Mo., said after the 90-minute White House meeting that negotiators discussed ''the need to cut down the political debate and cut down the comment. I believe we've gotten through the stage of people making political points. I think that's out of their systems.''

He said the negotiators now have a ''better understanding of the ranges and totals'' they are seeking in reductions in defense spending, the entitlement programs and tax revenues.

But he added, ''There are still some very tough issues of discussion to close on that are hard to do.''

Current plans call for administration and congressional negotiators to meet w$th Bush for morning meetings at the White House, with fuller

meetings on Capitol Hill in the afternoons on a daily basis for the next two weeks.

''I still think we can do it,'' Gephardt said, noting that negotiators hope to have a package complete by the time Congress begins its annual August recess, expected by Aug. 10.

Failure to reach an agreement by that time would bring the negotiations perilously close to the Sept. 30 end of the fiscal year.

If no deal is made to reach the Gramm-Rudman deficit target, some $100 billion in automatic spending cuts would be needed to bring the deficit down from a projected $169 billion to the fiscal 1991 limit of $64 billion.

#90205u1574 07/24/1990 ~United Press International

CAPE CANAVERAL, FL (JULY 24) UPI - A final make-or-break fueling test Wednesday to check for leaks aboard the grounded shuttle Atlantis will determine NASA's launch schedule for the rest of the year, officials said Tuesday.

If Atlantis passes the test, NASA would be clear to launch the spaceplane around Aug. 11 on a secret military mission. The shuttle Columbia then could be launched around Sept. 9 on a 10-day astronomy flight originally scheduled for takeoff May 30.

But if Atlantis fails the leak test, only one flight would be able to get off the ground before a high-priority mission in October by the shuttle Discovery to ferry the Ulysses solar probe into space.

Under that scenario, sources said, NASA managers are debating two options:

-Option No. 1: Haul Atlantis back to the Vehicle Assembly Building, remove it from its external fuel tank and attach it to the tank and boosters originally planned for use by Columbia. Atlantis then could be hauled back to pad 39A for another fueling test around Aug. 17 and launch on Sept. 10.

-Option No. 2: Move Atlantis back to the VAB and haul Columbia to pad 39A for a fueling test and launch around Aug. 31.

In both cases, Discovery would remain scheduled for liftoff Oct. 5.

The goal of Wednesday's test is to check for leaks around a flange where Atlantis's 17-inch-wide hydrogen fuel line attaches to a massive ''disconnect'' fitting that allows the tank to be jettisoned in space.

With Columbia already grounded by a hydrogen leak in its disconnect

assembly, NASA managers were forced to ground Atlantis as well earlier this month because of a tiny leak in the fuel line flange area.

The flange joint is held together by 48 bolts and in a last-ditch bid to fix the problem at the launch pad, technicians tightened the bolts 10 percent beyond specifications.

NASA spokesman Bruce Buckingham said about two thirds of the bolts tightened more easily than expected, implying the joint was looser than engineers would have expected. Officials were hopeful that over tightening the bolts would eliminate the leak.

Even so, many engineers expected the leak to reappear Wednesday. But some leakage may be allowable and officials would not rule out the possibility that Atlantis could be cleared for flight ''as is.''

If NASA managers decide to launch both Atlantis and Columbia before Discovery's October mission, engineers would face a tight summer schedule. Preliminary plans call for the following schedule under that scenario:

-July 27: Atlantis's secret military payload is moved to launch pad 39A for installation in the shuttle's cargo bay.

-Aug. 11: Atlantis and its five-man, all-military crew are launched on a four-day mission, the first since the Hubble Space Telescope was carried into orbit April 24 aboard Discovery.

-Aug. 18: Columbia is hauled to pad 39A. Under this scenario, a fueling test would not be conducted.

-Sept. 9: Columbia and its seven-man crew are launched on a long-delayed astronomy mission.

-Oct. 5: Discovery carries the Ulysses solar probe into space.

If Atlantis cannot be launched because of the flange leak, NASA managers likely would elect to bolt the orbiter to Columbia's tank and boosters and proceed with launch. Here is NASA's preliminary schedule for that scenario:

-July 30: Atlantis is hauled back to the VAB.

-Aug. 2: Atlantis is unbolted from its external tank.

-Aug. 4: The shuttle is attached to Columbia's tank and boosters.

-Aug. 11: Atlantis is returned to pad 39A.

-Aug. 17: Another fueling test is conducted to make sure the shuttle is

leak free.

-Aug. 24: Atlantis's military payload is moved to the launch pad for installation aboard the shuttle.

-Sept. 10 (approximate): Atlantis is launched.

-Oct. 5: Discovery is launched on the Ulysses mission.

#90205u1630 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - President Bush challenged the Senate on Tuesday to eschew single-issue politics in its consideration of Supreme Court nominee David Souter to keep the high court ''above the flames of political passion.''

''I've nominated this man, David Souter, because I believe his combination of education, experience and integrity are second to none. He's a man of great judgment, and I fully believe he will be a great justice on the Supreme Court,'' Bush said at a political fund-raiser in Philadelphia.

Bush announced his choice of Souter, 50, a former judge on the New Hampshire Supreme Court and currently a member of the 1st U.S. Circuit Court of Appeals, on Monday. If confirmed by the Senate, Souter would succeed retiring Justice William Brennan, 84, the court's most liberal member.

''The Supreme Court must be guided by independent minds, and its members are appointed for life largely to keep them above the flames of political passion,'' Bush said.

''So in my nomination of Judge David Souter for Senate confirmation to fill the seat vacated by Justice William Brennan, there was no single issue, no litmus test or standard dominating my decision to nominate. And I will add that there should be no litmus test in the process of confirmation,''

Bush told his audience his ''full priority was to appoint a justice true to the life and the spirit of the Constitution, a priority that I'm confident will also guide the Congress in the confirmation process.''

Insisting the nation ''has a long tradition of judicial restraint,'' Bush said: ''I believe I am recommending an individual with a strong incisive, independent devotion to interpreting the Constitution. He's a quiet man of enormous intellectual strength, a tough trial court judge with a great legal mind and an impartial quality that will serve the court well.''

Souter sailed through Senate confirmation of his nomination to the 1st Circuit two months ago, and many Judiciary Committee members could recall little more about him than his name.

One senator called the Souter review ''pretty much of a blank slate'' and another said he could not think of ''anything negative about him.''

Sen. Warren Rudman, R-N.H., one lawmaker who knows Souter, said the virtual absence of scholarly or legal writings by the nominee could help him during confirmation proceedings. Reagan nominee Robert Bork was rejected, in part, because he had authored numerous articles that gave critics ample ammunition.

''We're not bracing for some horrendous fight with the United States Senate,'' said Bush, who called Souter a man of ''keen intellect and highest ability.'' In fact, the president said, ''I would expect that the chances of that are minimal.''

Bush praised Souter's judicial opinions, but could cite no single quality beyond judicial conservatism - the principle that judges should not expand laws enacted by Congress - in explaining his decision.

Bush said it ''would have been inappropriate'' to have brought political views into play, even though Souter could have a pivotal role in deciding cases on abortion, affirmative action and other emotional issues.

The court is sharply divided on abortion and abortion rights activists believe that one more conservative on the bench could lead to the overturning Roe vs. Wade, the landmark ruling that legalized abortion in 1973.

Bush said he had made clear in talks with Attorney General Dick Thornburgh and other top advisers that he did not want the search for a nominee to be ''dominated by politics or special interests'' or follow a ''litmus test.''

''I believe that we've set a good example of selecting a fair arbiter of the law,'' said Bush of Souter, who was appointed to the New Hampshire Supreme Court in 1983 by Gov. John Sununu, now White House chief of staff.

Judiciary members pledged a careful examination and most said they would not let Souter's position on any single issue - should he even divulge one in the usually genteel and indirect questioning process - be the sole factor in determining his confirmation.

''I would hope we would not have a rush of members of the U.S. Senate saying they would vote for or against Judge Souter. ... We should have the hearings, hear those for or against him and vote the issue up or down,'' said Sen. Pat Leahy, D-Vt., who like many others recalled little about the

judge.

Sen. Paul Simon, D-Ill., a member of the Judiciary Committee, said after quickly reviewing some of Souter's opinions as a judge and as attorney general that ''there are things that raise some questions.''

Simon said he wanted to find out if Souter acted properly as attorney general when he advised the governor of New Hampshire about two cases, one involving voting rights and the other church-state issues.

#90205u1636 07/24/1990 ~United Press International

NEW YORK (JULY 24) UPI - Salomon Inc. Tuesday reported second-quarter net income fell to $120 million, or 89 cents a share, from year-ago record earnings of $253 million, or $1.89 a share. Earnings were essentially unchanged from 1990 first-quarter net income of $119 million, the firm said.

Second-quarter revenues slipped to $2.09 billion from $2.3 billion a year ago. Revenues for the first six months of 1990 were $4.4 billion, compared with $3.9 billion a year ago. For the first six months of 1990, net income totaled $239 million, or $1.77 a share, compared with $225 million, or $1.54 a share, a year ago.

Performance by Salomon's securities segment was off from a year ago, but showed a continuation of strength evident in the first quarter, the company said.

"A particularly positive development was the strengthening of investment banking revenues as companies returned to the equity markets," the company said.

Salomon's energy segment showed a sharp improvement over a year ago, "primirily attributable to stronger refining margins," while the commodities segment posted a $62 million pretax loss. Adverse trading results in certain agricultural products were the principal reasons for the second quarter loss," the company said.

EAST BERLIN (JULY 24) UPI - The East German government collapsed Tuesday when one of the junior parties withdrew from the coalition in a dispute over whether the two Germanys merge before or after all-German elections.

''We have reached the limits of our tolerance (and) the prime minister has made it impossible for the Liberal faction to continue in the coalition,''

said Rainer Ortleb, head of the East German Liberals.

After a series of hectic meetings between the Liberals, the Social Democrats and Prime Minister Lothar de Maiziere, the Liberals put an end to the weeklong crisis over election procedures that has gripped the East German government.

De Maiziere's conservative Christian Democratic Union insisted throughout the crisis on holding elections with separate rules in East and West Germany before unification.

A spokesman for the Social Democrats said the SPD will not pull out of the seven-party coalition ''for now.''

''We will see if there is a last possibility to reach a substantial solution to the controversial unification question,'' said Wolfgang Thierse, head of the East German SPD.

The SPD had joined forces with the Liberals last week in opposing de Maizieres's position and demanding full unification before equal all-German elections.

De Maiziere said Tuesday afternoon after several meetings that he failed to reach a compromise with the two parties.

''The arguments I have heard did not convince me but I have not been able to convince the other parties,'' he said.

Ortleb of the Liberals, who hold two Cabinet posts in the government, sharply criticized de Maiziere for trying to dodge a political decision on unification and election procedures.

''The prime minister tries up to this hour by all means, including the misleading of the public, to avoid political decisions,'' Ortleb said.

''I see a man who will talk to people for such a long time that one really has to give up hope.''

The seven-party coalition govenrment holds 303 seats in the 400-member parliament, including 23 held by the Liberals, 88 by the SPD, and 167 by the CDU.

The arch-conservative German Social Union, which sided with the CDU during the crisis, has 25 delegates in the Volkskammer, the East German pasrliament.

A German Social Union spokesman said he is disappointed that the Liberals have acted ''so irresponsible.''

Spokesman Hansjoachim Walther said his party will continue to ''back the prime minister'' even in a minority government.

#90205u1654 07/24/1990 ~United Press International

HOUSTON (JULY 24) UPI - Browning-Ferris Industries said Tuesday it has signed a definitive agreement to acquire ACCO Waste Paper Companies, the southwest's largest independent collector and processor of paper for recycling.

The acquisition is the latest in a series of moves by BFI to gain access to markets for recyclable materials. BFI last month announced agreements with other companies for paper and aluminum recycling, and last year reached a similar agreement involving plastic. Terms of the ACCO agreement were not disclosed.

"BFI is committed to expanding our involvement in the recycling process as an important part of our contribution to answering today's solid waste challenges," said James B. Mattly, southwest region vice president.

"Because high transportation costs make paper recyling a very local operation, we are pleased to be taking a major step in Houston and the southwest by acquiring the region's premier waste paper recycling company."

ACCO, founded in Houston more than 40 years ago, collects, separates and processes corrugated cardboard, newspaper and all types of high-grade paper. It has facilities in Houston, San Antonio, and Austin.

A specialized fleet of ACCO trucks also collects on-site baled corrugated paper from stores and businesses throughout east, central and south Texas. The company also processes recyclable materials collected by the city of Austin in its 100,000-plus-home curbside program. Houston-based BFI is one of the largest publicly held companies primarily providing waste services.

"As part of BFI, we expect to handle substantially larger volumes each month," said ACCO President Alan Stein. "We expect our growth to increase as we become more involved in working to recycle a larger portion of BFI's overall waste stream, and as we examine expansion opportunities in other markets."

BFI last month announced an agreement under which Weyerhaeuser Paper Co. will purchase up to 10,000 tons a month of newspaper, cardboard and office paper collected by BFI in Arizona, California, Nevada, Oregon, Washington and British Columbia, Canada.

The company also announced in June an agreement under which Alcoa

Recycling Co. will buy cans collected by BFI in curbside recycling programs. Last year, Wellman Inc. agreed to accept about 100 tons of plastics from BFI each month for recycling. BFI currently operates more than 150 curbside recycling programs reaching 1.4 million households nationwide.

#90205u1665 07/24/1990 ~United Press International

GENEVA (JULY 24) UPI - The world's major trading nations, facing a December deadline, Tuesday discussed intensifying efforts to get the deadlocked Uruguay Round of trade negotiations moving.

Delegates said emergency actions taken in conjunction with this could include special meetings of high-level trade officials with government policymakers to reinforce decisions reached by lower-level negotiators in their attempts to resolve outstanding issues in the talks.

Even then, many delegates from the major trading countries meeting here said privately, the most difficult trade issues - agriculture, textiles, and services - are likely to spill over well into 1991.

"Time has become our enemy," U.S. deputy trade negotiator Julius L. Katz told a meeting of the Trade Negotiations Committee, which monitors the Uruguay Round. The current round of trade liberalization talks, which began in November 1986, are widely viewed as being in serious trouble.

Katz said "policy-specific commitments" are needed for a successful outcome and reiterated President Bush's recent statement that "no agreement is better than a bad agreement." The negotiations are supposed to end with a package accord being adopted by trade ministers at a meeting in Brussels beginning Dec. 4.

Hugo Paemen, the European Community's director of external relations, said top officials "will have to be available on a permament basis" to make the political decisions needed to break trade policy deadlocks. "The political dimension is growing," he said. "Probably the big political options will still be open in December for ministers to decide."

For their part, top EC officials "will be available on a full-time basis," Paemen said. "There will be no holiday, which is quite exceptional for the Community because normally in August there is only a janitor to answer the phone," he joked with reporters.

Paemen said "one crisis was averted" Monday, when the EC and the United States agreed to begin immediate substantive negotiations on their farm trade dispute. He said this would promote bilateral as well as multiparty negotiations on other deadlocked issues - including textiles, services,

anti-dumping rules and import duty reductions on manufactured goods.

An asssessment of where the 107-nation Uruguay Round stands after three and a half years was taking place this week at a meeting of the Trade Negotiations Committee, which oversees the talks.

Like the previous Kennedy and Tokyo rounds, the Uruguay Round is being held under the auspices of the General Agreement on Tariffs and Trade, the world trade regulatory body.

Discussions centered Tuesday - and would again Wednesday and Thursday - on the shape of a summarizing statement by GATT director general Arthur Dunkel in his capacity as chairman of the Trade Negotiations Committee, GATT spokesman David Woods said.

Dunkel consulted with U.S., EC and other leading delegates on how he could "define where the blockages are" and what must be done "to prevent failure " Woods said. That in turn, the spokesman said, could include the convening of "urgent and more high-level" meetings.

U.S. and EC negotiators as well as other officials cautioned anew Tuesday that although "substantive negotiations" will now begin on agriculture and other big issues, basic differences remain as deep as ever.

The EC's Paemen noted that "everything is linked to everything" and a package deal can be concluded only if there is agreement in all 15 Uruguay Round negotiating sectors.

-30- 3778

#90205u1674 07/24/1990 ~United Press International

TORONTO (JULY 24) UPI - The Canadian Auto Workers and General Motors of Canada began talks Tuesday aimed at replacing a three-year-old agreement due to expire on Sept. 14.

Talks between the CAW, which represents more than 60,000 auto workers, and Ford Motor Co. of Canada Ltd. and Chrysler Canada Ltd. are set to get underway on Wednesday and Thursday, respectively. Bob White, president of the CAW, said the union had not yet decided which company to target, and that serious negotiations won't begin until mid-August.

White made his comments to reporters after an hour-long presentation meeting with GM's vice-president and general director of personnel, Frederick R. Curd Jr, in which the two men outlined their respective positions.

White said the union would highlight job and income security in addition to annual wage increases, improved cost-of-living allowances, expanded

child care and vacation bonuses.

There are about 36,500 CAW members at GM plants in Oshawa, St. Catharines, Windsor, Scarborough, Woodstock and London, in the province of Ontario, and in Ste. Therese, in the province of Quebec.

Curd said in a statement that GM was looking for "a moderate settlement that helps to reduce the competitive cost gap." "GM's ability to make pay increases must be linked to productivity," Curd added. "To do otherwise would negate cost reductions already achieved."

White said although GM profits were down, the company has made more than $500 million in Canada since the current contract was signed in 1987 and that the company was "healthy".

White said the talks were taking place in an atmosphere similar to the early 1980s with the economy slowing down, and both the Canadian dollar and interest rates artificially high. The Canadian dollar recently set a ten-year-high and prime interest rates at the country's major banks sit at 14.75 percent.

Contract talks which began last week in the United States between the UAW and the "Big Three" auto makers, whose contracts are also up for renewal, would not have much of an impact on negotiations in Canada, White said.

But White added it was unlikely that the CAW would target the same auto maker as the UAW does. White said the CAW would announce its target company in late August or early September.

The Canadian auto talks mark the first time since the CAW separated from the UAW in 1985 that all Big 3 auto makers will negotiate simultaneously on both sides of the border.

#90205u1697 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - Federal Reserve Board Chairman Alan Greenspan said Tuesday the nation's central bank is making progress in its battle to wipe out inflation despite its recent action that lowered interest rates.

In testimony to a House banking subcommittee, Greenspan said the level of money in circulation is "fairly rapidly approaching a ... level that is consistent with long-term price stability." "If we stick to that, we will achieve success," he said.

Greenspan also assured lawmakers that "I see nothing in the action that we have taken in recent days that alters our stated path" of eliminating inflation in five years.

On July 13, the Fed acted to ease interest rates slightly in response to tougher credit standards that many banks have been imposing on commercial borrowers. After the borrowing binge of the 1980s, "it's back to fundamentals now" for banks, the Fed chairman said.

Greenspan said the central bank believes the inflation rate will hover in a range of 4 1/2 percent to five percent for the year, but he expressed concern about higher prices. "Inflation is higher currently than we would like," he said.

Greenspan said "the core rate of inflation in consumer prices, proxied by abstracting from movements in food and energy prices, picked up sharply in the first quarter but has moderated in recent months."

"This moderation has been concentrated in the prices of goods, perhaps reflecting the ebbing of capacity pressures in a number of industries, while service price inflation has shown little sign of abating," he said.

"In 1990, Federal Reserve policy has continued to be directed at sustaining the economic expansion while making progress toward price stability," Greenspan said.

The Fed chairman also reported that there is still no sign of a widespread "credit crunch," but he acknowledged many commercial borrowers are having a difficult time tracking down loan money. "The change in credit supply conditions may have significant implications for borrowing, spending and policy," Greenspan said.

But "I would not call this change a 'credit crunch,' as those words connote a contraction of lending on a major scale, with many borrowers effectively shut out of credit markets, regardless of their qualifications " he said.

#90205u1715 07/24/1990 ~United Press International

BOSTON (JULY 24) UPI - The tortured 19th century Dutch painter Vincent Van Gogh apparently did not suffer from epilepsy or madness but from a disabling inner ear disorder, researchers said Tuesday.

Dr. I. Kaufman Arenberg said an analysis of 796 letters Van Gogh wrote to family and friends between 1884 and his death by suicide on July 29, 1890 at age 37 ''reveals a man constantly in control of his reason and suffering from severe, repeated attacks of vertigo'' rather than epilepsy.

Although Van Gogh was diagnosed with epilepsy by a physician at the asylum for epileptics and lunatics at Saint-Remy, France, where the painter

committed himself in 1889, the ''descriptions in his letters are those of a person suffering from Meniere's disease,'' said Arenberg, of the Swedish Medical Center in Englewood, Colo.

Meniere's disease is a disorder of the inner ear, characterized by recurrent attacks of vertigo, hearing loss and tinnitus - a ringing, buzzing or roaring in the ear. People with vertigo frequently have the sensation that objects are revolving around them, or that they are revolving through space.

Arenberg said the common view of Van Gogh as an epileptic, who also may have been deranged, is based largely on the diagnosis of the doctor at Saint-Remy, who wrote in 1889 that the painter was ''suffering from acute mania with hallucinations of sight and hearing which may have caused him to mutilate himself by cutting off his ear.''

The diagnosis reflects how slowly medical knowledge spread from cities to the provinces at the time, since Meniere's disease - and its common confusion with epilepsy - was known to doctors in Paris, Arenberg and co-researchers wrote in the Journal of the American Medical Association.

On Dec. 23, 1888, while he was living in the town of Arles, Van Gogh cut off part of his left ear and sent it to a prostitute. A doctor called in to examine him wrote that the painter had returned from a brothel and, ''assailed by auditory hallucinations, mutilated himself by cutting off his ear.''

The researchers said this bizarre behavior suggests Van Gogh's ''tinnitus had become intolerable'' and that he tried to alleviate the hallucinations by eliminating their source.

Arenberg said it is clear from Van Gogh's letters that in between his vertigo attacks, which could last for hours or a day, he experienced symptom-free intervals. Nevertheless, it appears that toward the end of his life ''Van Gogh became despondent over his apparently hopeless, incurable illness,'' he said.

''I'm sure there were other factors as well that led to his suicide, but he was depressed and worried about his disease. He may have had a bad attack that day. We don't know. We do know he shot himself, walked back into town and died two days later,'' Arenberg said.

If Van Gogh had been correctly diagnosed, it would not have made a difference in his physicial condition, since there was no effective treatment for Meniere's disease at the time, Arenberg said. But he added that the painter's mental outlook might have improved ''if he knew wasn't epileptic or mad.''

Arenberg said there is no evidence that Van Gogh's vertigo was responsible for the evolution of his distinctive style, since it is unlikely he painted during an attack. But he said the painter's apparent fear that one day he would get an attack that would not subside may be the reason he produced paintings at a furious pace during his symtom-free periods.

''It is tragic, but in a sense, we may owe Van Gogh's greatest works to his disease,'' Arenberg said.

He said an estimated 7 million Americans suffer from Meniere's disease. In many cases, the cause is not known and symptoms can differ greatly in severity, he said. Those with the disorder usually experience a build-up of pressure in the inner ear, caused by an excess of fluid, he said.

In up to 85 percent of cases, symptoms can be alleviated with diuretics and other drugs and salt-free and caffeine-free diets, Arenberg said. In remaining cases, he said, surgery is usually necessary, either to remove the inner-ear or a nearby nerve or to install a shunt to drain fluid from the inner ear.

#90205u1717 07/24/1990 ~United Press International

LONDON (JULY 24) UPI - The government Tuesday proposed a more discreet arrangement for paying 11 leading members of the British royal family, sparing them the embarrassment of an annual public announcement of their raises.

Under the proposal, the millions of pounds received by Queen Elizabeth II and other royals each year will be paid in a lump sum that will increase by a set percentage each year over the next decade.

The royal House of Windsor since 1972 has received a yearly pay raise announced in the government's budget as part of the ''civil list.'' The annual announcement always brought the cost of the monarchy into the public eye and was perceived as putting an undignified pricetag on an important British institution.

Financial consultants have reportedly been summoned to look at the operation of the monarchy and to make it more cost-efficient. The new plan is aimed at having the royalty run along the lines of a modern business.

Prime Minister Margaret Thatcher proposed in Parliament that Queen Elizabeth as of Jan. 1, 1991, be given 7.9 million pounds a year, the equivalent of $14.2 million, with an annual increase of 7.5 percent over the next decade.

Although the proposal would increases the monarch's current pay of $5.09

million pounds, or $9.16 million, the new arrangement will also give the royal family more responsibility for running their palaces.

Ten other royals will get a combined first-year sum of $1.9 million pounds or $3.42 million, and the total cost for the decade will be $79 million pounds, or $142.2 million, Thatcher said.

''There are a great many people who regard the royal family as the greatest asset the United Kingdom has,'' said Thatcher, who said she believed the arrangements were ''appropriate for the dignity of the crown and in tune with responsible financial management.''

Her plan was endorsed by Neil Kinnock, leader of the main opposition Labor Party, and is almost certain to be passed during the next parliamentary session.

But Dennis Skinner, a renowned anti-monarchist and Labor Party member, said the payments to the queen - Britain's wealthiest person - should be viewed in light of the plight of retirees who have suffered social welfare cutbacks under Thatcher.

''We are talking about somebody that does not pay the poll tax,'' he said of the queen, referring to Thatcher's unpopular new flat rate tax for the support of local governments. ''Why should the taxpayer be handing out large sums of money to the queen and all the hangers-on at the palace?''

The civil list, most recently revised in 1972, was started under King George III, a notoriously profligiate spender who found it difficult to manage his income. He handed the entire sum over to the treasury, which then set him an annual income that would allow him to live in the manner befitting a monarch.

The queen yearly pays the government the equivalent of about $90 million derived from her numerous land holdings across Britain.

Prince Charles and Princess Diana are not on the civil list because the prince of Wales has chosen to live off his income from the Duchy of Cornwall. Experts believe he will abandon the civil list when he assumes the throne and support himself by his own income.

MOSCOW (JULY 24) UPI - The first member of the ultra-rightist Pamyat society was brought to trial Tuesday on anti-Semitism charges in a long-awaited test case of Soviet promises to stamp out racist propaganda.

Konstantin Smirnov-Ostashvili, a leader of the Pamyat group that blames

Russia's ills on Jews and Freemasons, immediately demanded his lawyer's dismissal, alleging that at least two-thirds of all Moscow's attorneys are Jewish.

''I don't trust any of the Moscow legal colleagues,'' Smirnov-Ostashvili said to raucous applause and shouts from the courtroom packed with 200 conservative supporters in black shirts and trousers, the Pamyat uniform.

Smirnov-Ostashvili conceded that his appointed lawyer was not Jewish but continued to demand an attorney from Finland, Sweden or ''any neutral country,'' persisting even after the court refused his request.

The courtroom spectators also railed against Soviet and foreign reporters covering the trial, yelling: ''Get the press out of the Temple of Phemis '' in reference to the Greek goddess of justice.

When the judge could not control the proceedings because of the shouts and catcalls, he recessed the trial in the center of Moscow until Wednesday.

Amid growing concern about anti-Jewish sentiment in the country, a Soviet lawmaker demanded Monday that President Mikhail Gorbachev drop well-known writer Valentin Rasputin from his top advisory panel, alleging that the author is anti-Semitic.

Smirnov-Ostashvili faces charges of inciting racism and anti-Semitism, stemming from the disruption of a meeting of writers on Jan. 18.

Eyewitnesses to the incident said Smirnov-Ostashvili led a band into the House of Writers and demanded that all Jewish writers leave Russia, sparking a chair-hurling ruckus in which several people suffered minor injuries.

A photograph in the Ogonek weekly magazine showed Smirnov-Ostashvili holding a megaphone and reportedly demanding that Jewish writers go into a separate room for a document check.

Moscow Radio said the case is the first time anybody has been charged with inciting ethnic strife and violating Article 74 of the Soviet criminal code.

Despite the vast wave of publicity the present trial is affording Pamyat, its rightist views received scant support earlier this year in contested elections for local and republican parliaments.

The trial opened two days after the Communist Party newspaper Pravda urged that laws be enforced against rising anti-Semitism in the Soviet Union to ease Jews' fears of pogroms and to stem a burgeoning emigration.

A total of 100,000 Soviet Jews emigrated last year, and Pravda said the exodus could reach 300,000 in 1990, a serious brain-drain for the Soviet Union and cause of tension with Arab nations.

Although the Pamyat organization has splintered into several branches, all factions adhere to the stated belief that a Zionist-Masonic conspiracy has ruined Russia and continues to do it harm.

Freemasons form an international secret society whose guiding principles are charity, brotherly lovely and mutual aid, and which has become a favorite target for anti-Semites and conspiratorialists.

Pamyat members interviewed by United Press International in recent months have said they are only against Zionism, the political movement to create a Jewish homeland, and do not hate Jews as people.

But their letters to the press and printed materials about ''kike-Communists'' belie their disclaimers.

One of the Pamyat activists' most recent charges is that Boslhevik Jewish commissars killed the last czar, Nicholas II, and his family in July 1918.

#90205u1748 07/24/1990 ~United Press International

KUWAIT (JULY 24) UPI - Egyptian President Hosni Mubarak made surprise visits to Iraq and Kuwait Tuesday in a bid to defuse a dispute over oil production that apparently prompted Iraq to stage military maneuvers along its border with Kuwait.

''My trip is aimed at resolving the present crisis between Iraq, Kuwait and the United Arab Emirates and clearing the atmosphere,'' Cairo Radio quoted him as saying.

State owned Cairo-radio said Mubarak traveled to Baghdad and attended a banquet in his honor in the presence of Iraqi leader Saddam Hussein, before continuing to Kuwait. Kuwait Radio said Mubarak began talks with Kuwait's emir, Sheikh Jaber al Ahmad al Sabah, but gave no details.

Egyptian officials said Kuwait agreed not to take its case to the United Nations, but to rely on Arab League mediation efforts to resolve the crisis.

Cairo Radio said Mubarak, who offered Monday to mediate the dispute, also planned to visit Saudi Arabia. Mubarak said he hoped his mission would result in a meeting between the foreign ministers of Iraq, Kuwait, the United Arab Emirates, Egypt and Saudi Arabia to resolve the oil dispute.

Iraq claims Kuwait and the UAE are exceeding OPEC oil production levels and driving down prices, as Iraq tries to revive an economy ravaged by nearly eight years of war with Iran. The crisis has intensified ahead of Thursday's meeting in Geneva of the Organization of Petroleum Exporting Countries.

Iraq apparently wants to make sure Kuwait and the UAE agree at the OPEC meeting to formalize a recent promise to cut production.

Mubarak's mediation efforts came as Western diplomats in Baghdad confirmed Iraqi troops had been staging a show of military force.

''The Iraqis have been staging military maneuvers along their joint border with Kuwait over the last few days but we have no exact numbers of troops or equipment involved,'' one West European diplomat in Baghdad said by telephone.

''The Iraqi troop maneuvers appear to be saber-rattling on the Iraqi side to try and put the wind up the Kuwaitis,'' the diplomat said.

The diplomat said the ruling Al Sabah family of Kuwait, which supported Baghdad during the Persian Gulf war, had placed its tiny forces on alert. It was not clear if Kuwait had called on its Gulf Cooperation Council allies to activate a defense pact on its behalf. The GCC includes Saudi Arabia, Bahrain, the United Arab Emirates, Qatar, Oman and Kuwait.

The Washington Post reported Tuesday that Iraq, which in the 1970s laid claim to the whole of Kuwait and was involved in military clashes with the emirate, had massed 30,000 troops on the Iraq-Kuwait border and that the U.S. Navy in the Persian Gulf had been placed on alert.

An official Washington source, however, said the status of the U.S. forces in the gulf had not changed.

State Department spokeswoman Margaret Tutwiler, meanwhile, said there has been a buildup ''on both sides'' of the Iraqi-Kuwaiti border but could not give specific numbers.

''The United States is watching the situation closely,'' Tutwiler said, adding the U.S. Navy has six ships in the Persian Gulf - four frigates, one destroyer and the flagship of the U.S. Middle East force. ''We are very concerned. Iraq and others know that there is no place for coercion and intimidation in a civilized world.''

Arab League envoy to the United States Clovis Maksoud said in Washington, ''The reports about military action are highly exaggerated. We believe the economic and political situation will be resolved very soon.''

Maksoud said aside from Mubarak's trip, Arab League Secretary-General Chedli Klibi was in Baghdad after visiting Kuwait.

''I think the results of the diplomatic attempt to calm things will be evident later this week when OPEC meets in Geneva. Both Kuwait and the United Arab Emirates have been cooperative,'' Maksoud said.

OPEC meetings are traditionally preceded and attended by rhetoric designed to drive up oil prices. From July 9 - when oil markets began to become aware of efforts to curb overproduction - to Monday, the price of the key OPEC Dubai light crude rose from $13.30 to $16.75.

In Geneva, OPEC ministers held bilateral meetings Tuesday and several said they expect the 13 OPEC members to work toward a higher oil price target. Delegates also hinted Iraq's tough stand will help restore OPEC discipline.

''The oil market is now assured more than ever that Kuwait and the United Arab Emirates will not overproduce, following the Iraqi measure,'' said a diplomat from Iran, which has also suffered from falling oil prices.

#90205u1758 07/24/1990 ~United Press International

HARRISBURG, PA (JULY 24) UPI - Former Pennsylvania Auditor General Don Bailey said Tuesday he has written to U.S. Sen. Arlen Specter, R-Pa., asking that an independent prosecutor be named in the drug probe of former state officials, one of whom was a top aide of former Gov. Dick Thornburgh.

Bailey said he wrote the letter July 17 urging the special prosecutor because of the long delays in bringing the case to a conclusion. A federal grand jury has been reviewing the allegations for 14 months, and nearly four years have passed since they were first raised.

The case involves Richard Guida, 43, a former deputy state attorney general who resigned in 1986 after a radio reporter raised allegations of drug use by public officials, although Guida denied using cocaine and was cleared in an internal investigation.

Henry Barr, who was a top aide of Thornburgh, is an apparent target of the probe, although his name has not been mentioned in open court.

''The broader question of a cover-up, or why it has taken this long for the system to do its job, has got to be answered by looking at this thing objectively,'' said Bailey. ''There are enough suspicions raised here that we need a special prosecutor who can do an objective job.''

Bailey did not allege that the current prosecutors are acting improperly. But he noted that both Thornburgh and U.S. Attorney for Harrisburg James

West have recused themselves from the case because of their acquaintance with the targets of the probe.

The Guida case is being conducted by Gordon Zubrod, assistant U.S. attorney in Harrisburg.

Bailey was defeated by Republican Barbara Hafer in his re-election bid in 1988.

There was no immediate response on Bailey's letter from Specter's office.

Last week, U.S. District Judge Edwin Kosik in Scranton nixed Guida's plea agreement at the request of federal prosecutors. Kosik agreed that Guida had not lived up to his agreement to provide information the FBI about his drug activity.

Documents filed with the court indicate Guida told a grand jury June 19 that he used cocaine with Barr several times between 1984 and 1988. Barr was a top aide to Thornburgh when he was governor, and briefly during Thornburgh's tenure as attorney general.

The documents said the government believes Guida falsely denied having knowledge of Barr's cocaine use after September 1988, around the time Barr joined the Justice Department as Thornburgh's assistant.

BELFAST, NORTHERN IRELAND (JULY 24) UPI - A landmine apparently planted by the Irish Republican Army exploded Tuesday beneath a police patrol car, killing three officers and a nun who was in a second vehicle, authorities said.

The Royal Ulster Constabulary said there were no claims of responsibility for the attack near Caledon village in county Armagh, 40 miles west of Belfast, but the assault bore all the hallmarks of an operation by the IRA as part of its protracted campaign to end British rule in Northern Ireland.

Officials said the landmine was planted in a drain beneath the road and detonated by wire when the unmarked police vehicle drove past in response to an emergency call, which was apparently issued as a lure.

They said the powerful device blasted the armor-plated car off the road into a nearby field, where it landed on its roof. A 20-feet-deep crater remained and debris was scattered around for hundreds of yards.

Police said all three occupants died instantly.

The explosion hit a second vehicle with full force. One of the occupants, a nun, died after being hospitalized, and a second woman was listed in a satisfactory condition, officials reported.

Police said masked men took over a house about 50 yards from the site before the attack.

''The ground just shook beneath us,'' said garage owner Paul Core. ''When I went to the road I saw one car lying in the field about 40 yards away. We were first on the scene and saw a white Mini Metro with two young lassies (women) in their twenties in it unconscious.''

''We got them out and into an ambulance which arrived later,'' he said. ''It wasn't until then that we saw the police car on the opposite side of the hedge. All three men inside were dead.''

More than 30 people have died in extremist violence in Northern Ireland this year.

#90205u1782 07/24/1990 ~United Press International

CLEVELAND (JULY 24) UPI - The Cleveland Public Library has discovered on its shelves a rare set of minutes of Germany's parliament from early 1939 until late 1941.

The minutes of the Reischstag, the nation's parliament between the two world wars, from Jan. 30, 1939, seven months before Hitler started World War II by invading Poland, to Dec. 11, 1941, the day Hitler declared war on the United States.

Library Director Marilyn Mason said Tuesday the minutes were discovered last week during a routine check to make sure materials are listed in the catalogue.

Fran Clark, a spokesman for the library, said an extensive check with the Library of Congress and other institutions found only one other collection containing those years, at the University of Illinois in Champaign-Urbana.

''When we found out the New York Public Library and the Library of Congress didn't have that series, we contacted the Hoover Institute at Stanford University, which has a good collection of Eastern European history,'' Clark said. ''But they said no.''

Checks with Harvard, Dartmouth, Johns Hopkins and the State Department also came back negative. Officials finally discovered Illinois had a collection covering those years but is missing the third volume of the seven-volume collection. The Cleveland library is missing Volume 4 so when

the volumes are microfilmed it will be a complete collection.

''It's like finding a treasure in your attic,'' Mason said. ''Literally, that's where we found it - in the library's fifth-floor attic - as a result of our inventory and preservation efforts.''

As part of its research collection, the library has minutes of the German, French, Italian and English parliaments dating back to the 19th century, but the library's computerized catalogue says the German collection ended with the year 1938.

''Libraries we have contacted indicate the find is a very important item and would be of interest to scholars,'' Mason said. ''Because we will microfilm it, we can make it available to people all over the world.

''It is interesting we found it just as East and West Germany are talking about reunification.''

The Reichstag was formed with the creation of the Weimar Republic after Germany lost World War I. Hitler's National Socialists took over the body in the early 1930s and, in January 1933, had Hitler named chancellor. Two months later he was given dictatorial powers and the Reichstag became simply a forum for his speeches.

Deborah Hefling, head of the library's preservation department, said the find was made just in time, since the yellowing pages likely would have disintegrated within another five years.

Among the entries:

-Monday, Jan. 30, 1939, from a speech by Hitler: ''Germany has no territorial claims on England and France, except the return of her colonies ...''

-Friday, April 28, 1939: ''The Reichstag welcomes the interim representatives of Germans in Bohemia and Moravia (parts annexed from now defunct Czechslovakia) and from Memel (seized from Lithuania) and hears Hitler.''

-Sunday, May 4, 1941: ''Hitler's speech to Reichstag notes Germany had 4,800 casualties in the Balkans.''

-Thursday, Dec. 11, 1941: ''Hitler in a Reichstag speech declares war on the United States, announces a German-Italian-Japanese agreement to conduct the war jointly and blames President Roosevelt with personal responsibility for the war.''

#90205u1800 07/24/1990 ~United Press International
CROOKSTON, NE (JULY 24) UPI - An explosion and fire caused by a faulty propane system destroyed the town's post office early Tuesday and damaged several nearby buildings, Deputy State Fire Marshal Jerry Larson said.

The explosion at 1:10 a.m. destroyed the post office building and threw debris at least two blocks away, Larson said.

''There's not much left,'' Long said of the two-story building. ''It's about four feet high.''

The explosion also blew out windows in the City Hall and in a nearby vacant bank building, punched several holes in a metal storage building and blew over three mobile homes, Long said.

There were no injuries, although residents of the mobile homes were shaken up, Long said. A man driving near the building at the time of the explosion was not hurt, but bricks from the building hit his truck, Long said.

Firefighters from the Valentine Rural Fire Department fought the blaze and were helped by a few residents of Crookston, said Valentine Fire Chief Allen Brott.

''It was reported to us as a fire. When we got there the building was completely leveled,'' Brott said. ''The walls were in piles. It just blew them all over.''

There was a three-bedroom apartment above the post office but it had been vacant for about three weeks. Long said the apartment contained some furnishings and it was being cleaned up for new occupants.

The blast could be heard a mile away.

''It woke a lot of people up,'' Long said.

#90205u1806 07/24/1990 ~United Press International
WASHINGTON (JULY 24) UPI - The House and Senate, warned American jobs are at risk, refused Tuesday to cut the federal support price for sugar despite arguments consumers would save $500 million if the guaranteed price were cut 2 cents.

The votes virtually assured there will be no change in the support price, even though Congress is only part way through debate on the new five-year farm policy law, since price support critics said they would not seek

another House vote on the sugar issue.

In addition, the votes indicate that farm program critics face powerful opposition to their plans to try to scrap other farm law provisions they see as wasteful.

''The bottom line (on sugar) is, it is jobs in the United States of America, farmers in the United States,'' shouted Rep. Kika de la Garza, D-Texas, chairman of the Agriculture Committee, as the House vote neared. ''It's jobs, jobs, jobs in the USA.''

Critics said a 2-cent cut in the support price, which the pending bill would freeze at 18 cents a pound for the next five years, could save consumers $500 million a year, as well as restraining U.S. production and allowing foreign growers to sell more sugar in the United States.

The House rejected the idea, 271-150. Senators, in a roll call a few hours earlier, rejected the 2-cent cut, 54-44.

''We got waxed. I thought we would do much better,'' Rep. Thomas Downey, D-N.Y., a leading price-cut advocate, said after the House vote.

''I think we still have in this country a fairly protectionist bent,'' Downey added.

There was speculation farm-state congressmen prevailed on the sugar vote with the help of colleagues worried about textile imports or saving other jobs under pressue from foreign competition. Defenders of the support price warned a cut would drive farmers, and sugar refineries, out of business.

Sen. Bill Bradley, D-N.J., vainly argued during Senate debate that the sugar program ''was the S&L of the farm program.'' The sugar program guarantees farmers a minimum price for sugar and sharply limits imports of lower-priced foreign sugar.

Import quotas unfairly deprive U.S. allies of a market and indirectly hinder efforts to stamp out cocaine production, Bradley said.

''These countries have to have other goods they can export. Sugar is one of those goods,'' Bradley said.

Supporters argued the sugar program ensures a reliable supply of sugar at reasonable prices. Sen. Bennett Johnston, D-La., said the cut would ''devastate my state'' and questioned why sugar was under attack when the program, thanks to fees charged on imports, operates at no cost to the government.

''I don't know why the foreign aid group, the goody-goody, soft-headed, American-job-exporting gang, wants to export another set of jobs,'' Johnston said.

The sugar program, which has kept U.S. sugar prices above the world prices has been credited with aiding the development of lower-priced corn sweeteners in the past decade.

#90205u1808 07/24/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (JULY 24) UPI - The government has rejected Austria's offer of the equivalent of $87,000 of electricity a day in return for shutting down the aging Bohunice nuclear power station near Bratislava for a five-week inspection.

Czechoslovakia, saying it has no alternative to nuclear power, also confirmed the country's plans to put four more nuclear reactors into operation near the Austrian border.

The Austrians are worried the two reactors at the 25-year-old Bohunice station, outdated pressurized water models, are unsafe. But at a meeting in Bratislava Tuesday between the Austrian environment minister and her Czechoslovak counterpart, Josef Vavrousek, the Czechoslovaks rejected the offer.

''It was not realistic,'' Karel Wagner, the head of Czechoslovakia's Atomic Energy Commission, told United Press International.

Czechoslovakia's immediate environmental priority is to shut its sulfur-belching coal power plants in north Bohemia, and officials are faced with promoting nuclear energy as a ''green'' alternative to coal.

''We have no immediate reason to stop the station,'' Wagner said of the Bohunice plant. ''We know this station is not at contemporary safety levels, but it is not the only one in the world.

''The technology of these reactors is old-fashioned,'' he said. ''But our safety record is quite better than the European average. We operate these reactors very carefully.''

The two Bohunice reactors generate about 800,000 megawatts of power. At present, 27 percent of Czechoslovakia's electricity is supplied by nuclear power.

Wagner said Czechoslovakia would go ahead with plans to finish two nuclear reactors at Temelin near Austria, and would eventually put two more reactors at Temelin into service.

#90205u1809 07/24/1990 ~United Press International
WASHINGTON (JULY 24) UPI - The United States ordered two U.S. warships to leave port early for a ''short-notice'' military exercise now under way with the United Arab Emirates in the tense Persian Gulf, the Pentagon said Tuesday.

''These exercises are conducted from time to time, but that's about all I can say,'' Pentagon spokesman Pete Williams said when asked if the exercise was called in response to Iraq's threats against Kuwait or the UAE.

Asked whether it will be seen as a show of U.S. force to Iraq, Williams said, ''I can't tell you how it's seen. I can only tell you that we conduct these exercises from time to time to ensure that we can work effectively with our allies in the region, and I'll leave it to others to conclude how it's seen.''

The Washington Post reported Tuesday that Iraq had massed 30,000 troops on the Iraq-Kuwait border and that the U.S. Navy in the Persian Gulf had been placed on alert.

Williams effectively denied that U.S. forces were on alert.

''I haven't determined that our ships there are, quote, on alert,'' he told Pentagon reporters in an apparent slip of the tongue that broke longstanding Pentagon policy of never discussing U.S. alert status.

Acknowledging his miscue, Williams offered, ''I'm trying to disabuse you from getting too caught up in this 'alert' business.''

Williams said the United States has six warships in the Persian Gulf - four frigates, a destroyer and the command ship of the Joint Task Force-Middle East, the USS LaSalle.

He said two of the ships were in port in Bahrain but ''got underway early'' to participate in this ''short-notice exercise'' that was believed to have started on Monday.

''We are currently participating in a small-scale exercise with the United Arab Emirates,'' Williams said, declining to elaborate on details of the operation or to say when the order came down for the exercise to begin.

''Short-notice exercises are not unheard of,'' he said. ''We have longstanding agreements and commitments to our friends in the region.''

The Persian Gulf crisis stems from Iraq's claims that Kuwait and the UAE are exceeding OPEC oil production levels, forcing down prices at a time that Iraq is trying to recover economically from eight years of war with Iran.

The U.S. Joint Task Force-Middle East began escorting U.S.-flagged Kuwaiti tankers through the gulf in 1987 during the Iran-Iraq war, but has been engaged in only a ''monitoring status'' of the tankers since Dec. 16, 1988.

The Pentagon said there was no aircraft carrier battle group or battleship in the Indian Ocean region that includes the Persian Gulf. That means the United States has no air or long-range naval firepower in the area.

The nearest aircraft carrier was believed to be in the South China Sea.

The United States used to keep a naval battle group in the Indian Ocean at all times, but changed the policy last year as tensions eased in the Persian Gulf. Now, a carrier battle group is assigned to the Indian Ocean area for only six months of a year.

Williams declined to discuss future ship movements but said, ''I'm unaware of anything that has changed in that (Indian Ocean policy) schedule.''

#90205u1825 07/24/1990 ~United Press International

MONROVIA, LIBERIA (JULY 24) UPI - A rebel gunboat shelled President Samuel Doe's executive mansion during assaults Tuesday by guerrillas who have routed troops on all fronts and brought the government to the brink of capitulation after a six-month rebellion, residents said.

A rebel assault that took the guerrillas into the Liberian capital Monday apparently was staged by the forces of Prince Johnson, who has led a breakaway rebel faction that split from guerrilla commander Charles Taylor.

There have been conflicting reports over whether Johnson has reconciled with Taylor since he left Taylor's National Patriotic Front three months ago.

State Department spokeswoman Margaret Tutwiler said the situation was somewhat quieter than Monday, with rebels in control of an island near the capital, but it was not certain if the rebels were in the force led by Taylor, or a separate group led by Prince Johnson. She said, ''President Doe has not requested assistance in being evacuated. Our offer to evacuate him still stands.''

Taylor, a former civil servant who lived in the United States after being accused of corruption by Doe, launched the rebellion six months ago. He

orchestrated a full-scale assault on Monrovia last Thursday after laying siege to the capital for more than two weeks.

Taylor has promised to hold free elections within six months if he takes over the nation, which is located on the southwestern coast of West Africa and founded in 1822 by former U.S. slaves.

Residents Tuesday reported a rebel vessel shrouded in the early morning darkness steamed toward Doe's seafront mansion and fired at least six rounds at the heavily fortified command post.

They said flashes could be seen from the sea as the ship fired at the five-story Israeli-designed building, where Doe is holed up with about 500 crack troops from his Krahn tribe after refusing all offers of evacuation.

Soldiers based on the grounds of the mansion returned the fire and the booming of cannons echoed across the sleeping city.

The ship retreated and witnesses reported seeing one shell from the mansion fall harmlessly into the ocean only a few hundred yards offshore.

Damage at the mansion could not be immediately ascertained.

Reporters who tried to reach the building and the adjacent Information Ministry were turned back by troops.

Residents said Doe's disintegrating army, which has been outflanked and swept back into a small pocket of the city, overnight staged reprisal killings.

At least nine male bodies, most stripped of their clothing, were found on a beach not far from the embassy district. Other bodies were scattered nearby, and witnesses told a photographer that soldiers had brought the victims to the site and killed them.

Ethnic conflict underlies the rebellion. Doe's Krahn-dominated army has frequently slain civilians from the majority Gio or Mano tribes, which back Taylor. In turn, the rebels have committed numerous excesses against Krahn people in areas they have occupied and many observers fear a rebel takeover also will involve vast retaliatory bloodletting.

In the remaining government-controlled areas, shops were shuttered and streets filled with hungry civilians vainly searching for food and water, which have become scarce since the guerrillas laid siege to the capital more than two weeks ago.

Civilians were harassed frequently by nervous soldiers patrolling the city.

Doe, who had not been seen in public for more than two weeks, was said by a diplomatic source over the weekend to to have lost touch with reality, becoming ''convinced he is invincible'' and clinging to the tribal belief that magic will save him.

Doe has spurned all offers of asylum and vowed Sunday to fight to the finish. U.S. diplomats in Monrovia have been unable to persuade Doe to flee from his encircled capital and leave Monrovia to Taylor.

#90205u1840 07/24/1990 ~United Press International

NEW YORK (JULY 24) UPI - The court-appointed trustee for Eastern Airlines said Tuesday he expects the company and certain employees to be indicted by a federal grand jury for maintenance violations that took place prior to the carrier's 1989 strike.

"In recent days, the U.S. attorney has advised Eastern and the trustee that the company and certain of its management personnel will be subject to criminal indictments," Eastern trustee Martin Shugrue said at a news conference in Manhattan.

The criminal charges against Eastern and its employees - believed to be the first such indictment of an airline - would represent another setback for the troubled carrier, which has sought to rebuild business since its unions launched a crippling strike in March 1989.

Shugrue said the company had sought a plea agreement with U.S. Attorney Andrew Maloney and had been willing to plead guilty to certain charges concerning record keeping at Eastern facilities at John F. Kennedy International Airport in Queens, N.Y., before March 1989.

However, Shugrue said, those discussions broke down when prosecutors insisted that Eastern plead guilty to a conspiracy charge. Shugrue said no evidence of a conspiracy exists.

"We can not and will not plead guilty to violations of the law for which we find no evidence," Shugrue said. "Therefore, we anticipate the federal grand jury will indict Eastern and certain employees."

The grand jury for the Eastern District of New York in Brooklyn has been investigating whether Eastern employees falsified maintenance records at Kennedy and LaGuardia international airports and possibly others for more than a year, Shugrue said. Eastern has closed the maintenance facility at Kennedy.

The investigation had targeted certain Eastern employees, but Shugrue said he did not know which individuals faced indictments. The investigation

reportedly targeted Joe Leonard, Eastern's chief operating officer, and Edward Upton, former vice president for maintenance and engineering. Upton resigned in February. Shugrue sought to blunt the impact of pending criminal charges by stressing that the alleged violations occurred prior to the 1989 strike.

Shugrue was appointed by U.S. Bankruptcy Judge Burton Lifland in April to run Eastern in place of parent Continental Holdings, formerly known as Texas Air Corp.

"These are violations that occurred some time ago and have nothing to do with Eastern today," Shugrue said. "Eastern has many problems, but flying a safe airline is not one of them."

#90205u1843 07/24/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (JULY 24) UPI - A previously secret Interior Ministry report published Tuesday disclosed that 82 Czechoslovakians were killed in 1968 when Warsaw Pact tanks and troops rolled into the nation to crush the Prague Spring reforms of Alexander Dubcek.

The newspaper of President Vaclav Havel's Civic Forum organization, Obcanske Dennik, printed the report and said it was distributed after the invasion only to the country's five top Communist leaders.

The report said that by Sept. 28, 1969, about five weeks after the Soviet-led invasion put an end to the reforms championed by Dubcek, 82 people had been killed, 300 seriously injured and 500 otherwise injured by the five invading Warsaw Pact armies.

Most of the victims had been shot, the report said. Many had been standing in groups or on balconies, it said.

The article described the carnage in Liberec, where Havel, then a playwright, wrote reports for clandestine anti-Soviet radio broadcasts.

Even since last November's Velvet Revolution overthrew the Communist regime installed by the Soviets, Czechoslovakians have never publicly venerated citizens felled by the Soviets in 1968.

Instead, the great martyr of the invasion has been Jan Palach, a 19-year-old university student who immolated himself the following January in Prague's Wenceslaus Saquare to protest the continuing Soviet occupation.

The publication of the report came as Soviet Foreign Minstry spokesman Gennadi Gerasimov, visiting Prague Tuesday, said the Soviet Union's 1956 invasion of Hungary and the 1968 invasion of Czechoslovakia were

inexcusable.

''We are in the process of reassessing our history right now,'' Gerasimov told reporters in Prague. ''Certainly the 1956 events in Hungary, as well as the 1968 events in Czechoslovakia, must be considered inadmissable.''

About 32,000 people were killed in the 1956 Hungarian uprising. Its brutal repression by the Soviet Army marked the first time the Soviet Union used force to keep one of its satellites within the Soviet orbit.

#90205u1881 07/24/1990 ~United Press International

DETROIT (JULY 24) UPI - A Soviet spokesman says Sergei Fedorov has left the national hockey team, apparently to play for the NHL's Detroit Red Wings, and a federal officials confirmed Tuesday the Red Wings have contacted them about work papers.

In Detroit, the Red Wings scheduled a late afternoon news conference to discuss the situation.

Lonnie McDaniel, acting director of the Immigration and Naturalization Service office in Detroit, said that office was contacted Monday by Red Wings officials asking about procedures for obtaining temporary work papers.

McDaniel said no names were mentioned and no papers had been filed by late Tuesday morning. He also said the office had received no communications from Fedorov himself.

Yuri Korolev, first vice president of the Soviet Ice Hockey Federation, said through an interpreter at the Kennewick, Wash., hotel where the team is staying that Fedorov had left the team.

''We don't have any ill feelings toward Fedorov,'' Korolev said. ''We didn't want to begin the games with such an incident.''

''As far as we know, the hockey player left his team, he's in Detroit, he's talking to a hockey team there,'' Barbara Smith, director of public affairs for the Seattle Organizing Committee for the Goodwill Games, said Tuesday.

''We have not made any communication with him directly. We have not talked to any Soviet officials about this and they have not made any statement to us,'' she said.

''We hope he participates as a Goodwill Games athlete in Tri-Cities with the hockey team.''

Korolev hinted the Red Wings may have played a part in the decision by Fedorov, 20, to leave the Soviet team.

''There is a system that is in place for a Soviet player to go and play in the NHL after he is 28 years old,'' Korolev said. ''Now, the NHL clubs are taking younger players. Right now, we have good relations with the NHL. It's not the league, it's more the clubs that are involved. We don't agree with their methods. We would like to regulate the process.

''We are willing to have negotiations with Detroit if the player is returned. If the player is not returned, there is nothing to discuss. We're talking about the Goodwill Games and there has been no goodwill. These kinds of things can be decided through discussion. Those days when they could not be decided by discussion are gone. We believe in freedom and freedom of choice, but the player owes an allegiance to his club.''

McDaniel said he understands Fedorov currently is in the United States on a visitor for business visa.

''Under our immigration law, they (Red Wings) can petition for him as a temporary worker to play hockey for them. If he meets the qualifications of temporary worker of distinguished merit and ability and we approve the petition and he meets all other qualifications, he could play hockey for them,'' McDaniel said.

McDaniel said the INS would have to determine whether Fedorov qualifies as a player of ''distinguished merit and ability,'' which he defined as meaning, in this case, a ''major league talent.''

Fedorov also would be required to ''establish to us his intention to return to his country when he is done playing hockey'' in order to obtain the type of visa required, McDaniel said.

He called it a ''pretty simple case'' which could be handled in ''probably a couple of weeks.''

McDaniel said the case would ''absolutely not'' involve a defection.

''All he's doing is expanding his opportunities to play hockey.''

Korolev said Soviet hockey officials were not concerned about other players leaving the team or trying to defect.

''We don't worry about others leaving here, but perhaps the next time,'' he said. ''It's sort of like a barrier in the water and the water is being collected and then the dam breaks and you cannot stop it.''

Fedorov was selected by the Red Wings in the fourth round of the 1989 NHL entry draft. He was the first Soviet ever chosen by the team, and his selection marked the earliest any Soviet had been taken at that time.

The 6-foot-2, 195-pounder played on the Central Red Army and Soviet national teams.

#90205u1929 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - The administration said Tuesday the Soviet Union, facing a critical shortage of food grains and hard cash to pay for foreign purchases, is not eligible for credit sales of American farm products.

Secretary of Agriculture Clayton Yuetter told The Washington Post that Soviet government representatives had asked for $2 billion credit to finance this year's purchases.

But State Department spokeswoman Margaret Tutwiler said, ''The Soviet Union does not currently qualify for any U.S. agricultural credit or credit guarantee program.''

She said congressional approval of the bilateral trade agreement granting most-favored-nation trading status would be necessary for the Soviet Union to be eligible for general sales credit guarantee programs.

The Soviet Union has applied for special trade consideration, but the administration has informed the Soviet government that it will not be granted until the Supreme Soviet puts into law the eased conditions for emigration of Soviet Jews and other minorities.

The Supreme Soviet, the equivalent of the U.S. Congress, is scheduled to take up the emigration law in September.

''As a general policy, the United States does not engage in credit or credit guarantee sales that displace normal cash sales,'' Tutwiler said.

The Soviets have been able to raise the hard currency in the past through sales of gold, or by borrowing from Western European financial institutions.

In the current fiscal year, the Soviets have bought about 20 million metric tons of corn and wheat, nearly approaching last year's record of 21.7 million tons. the Soviet Union is the largest single purchaser of U.S. grains.

Soviet officials have said that the country could be facing a critical

shortage of grain, mainly because of a breakdown in the country's infrastructure, which means that much of the harvest spoils because it cannot be delivered in time to consumers.

The issue of grain sales and possible indirect financial help is expected to be among the isssues discussed between Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze when they meet in the Siberian town of Ikurtz Aug. 1.

#90205u1936 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - The government, facing a $2 billion bill to insure defaulted student loans, is considering replacing one of the largest loan guarantors with a new organization, officials said Tuesday.

The Higher Education Assistance Foundation, or HEAF - which has a $9.6 billion portfolio of loan guarantees - is facing serious financial problems that have contributed to a sharp decline in the stock price of Sallie Mae, the federally chartered student loan marketer.

HEAF, like other guarantee agencies, insures student loans by paying bank lenders 100 percent of a defaulted loan. The Education Department, in turn, reinsures the guarantors' loan. But the government only pays the guarantor 90 percent when defaults exceed five percent of the guarantee agency's loan portfolio and only 80 percent when defaults exceed nine percent.

HEAF has received less than 100 percent reimbursement - usually 80 percent - for the last four years, Education Department officials said. HEAF is on the brink of financial collapse because it is losing the other 20 percent.

"Right now, we're looking at a range of alternatives whereby another entity or entities would perform each or all of (HEAF's) functions, either on a short- or a long-term basis," said Education Undersecretary Ted Sanders. "Under this scenario ... HEAF would not exist."

Sanders said the government has rejected HEAF's request to merge with the Nebraska Student Loan Program Inc., contending it would represent a short-term remedy and "appears to circumvent the law."

In 1988, the government reimbursed all guarantors $1.4 billion, including $500 million to HEAF. In fiscal 1989, the government reimbursed guarantors $1.9 billion and estimates its 1990 reimbursements will reach $2 billion.

Between October 1989 and April 1990, the government paid HEAF $788 million. HEAF is expected to pay another $300 million to banks by the end of this fiscal year, an amount that will subsequently be paid by the government.

Sanders said that five or six other guarantee agencies are experiencing financial problems but that their defaults are not nearly as monumental as HEAF's problems.

Education Secretary Lauro Cavazos said in a brief statement to reporters that HEAF's situation will not affect the ability of students to obtain loans, lenders to make loans or guarantors to insure those loans.

"While HEAF's problems are serious to that organization, they do not threaten the integrity of the nationwide Guaranteed Student Loan program or the loans now guaranteed by HEAF," Cavazos said. An Education Department task force has been sent to HEAF's St. Paul, Minn., offices to review the agency's loan portfolio.

HEAF's financial problems have triggered a decline in the stock of Sallie Mae, the federally chartered Student Loan Marketing Association, which buys student loans from banks. In the past two days, the price of Sallie Mae stock has dropped by better than $6 a share on the New York Stock Exchange as a result of HEAF's financial woes.

Cavazos and Sanders declined to state precisely what led to HEAF's financial problems, but Sanders did say the agency's substantial portfolio of loans for trade schools, which have high default rates, is a major factor.

A few years ago, 70 percent of HEAF's loans were for trade schools and 30 percent for four-year institutions. Sanders said its 1989 portfolio mix was about 35 percent for trade schools and the remainder for four-year institutions.

#90205u1952 07/24/1990 ~United Press International

PHILADELPHIA (JULY 24) UPI - Gene Shue, a former player and coach in the NBA, accepted his first administrative job Tuesday when he was named general manager of the Philadelphia 76ers.

Shue, who coached for three franchises during his 23-year career, was signed to a two-year contract to replace John Nash, who resigned after last season and was later named general manager of the Washington Bullets.

''He has over 20 years of experience in the NBA and I've always felt he is a tremendous evaluator of talent,'' Philadelphia owner Harold Katz said in announcing Shue's appointment.

Shue, whose 784 coaching victories rank fourth in NBA history, was fired by the Los Angeles Clippers in January 1989 and most recently worked in the banking and mortgage business in California.

Shue, 58, who coached in Philadelphia from 1973 until 1977, said he approached Katz about the general manager's post because of ''a need to continue my career in basketball.''

Katz said Shue would initially concentrate on the basketball responsibilities of his position, then move into the business end of the job.

''We hope to get Gene acclimated in the next six to nine months and then let him get active in the business end,'' Katz said. ''I will probably add one more person (in the marketing department) but we're pretty satisfied with the way things are going.''

David Katz, the owner's son and team vice president, and Gerry Ryan, the business manager, have handled the business duties of the general manager's position since Nash left and have done a good job, Katz said.

Shue, who also coached for the Baltimore and Washington Bullets and the San Diego and Los Angeles Clippers, said it was too early for him to discuss the 76ers' needs for the coming season.

''I really need to get my feet wet and get a feel for the job before I can make any comments,'' he said.

Katz said the franchise would continue to operate as it has in the past, with Shue joining Katz, coach Jim Lynam, assistant coach Fred Carter, and assistant general manager Bob Weinhauer on the decision-making committee.

Weinhauer, who was one of the finalists for the GM position, was promoted Tuesday from his post as director of player personnel. He said he was naturally disappointed he did not get the top job but said he would have no problems working with Shue.

Shue was drafted out of Maryland by the Philadelphia Warriors in 1954 and played in the NBA for 10 years. He began his coaching career with the Bullets in 1966.

He was most recently vice president for Pyramid Financial, a mortgage company, in Downey, Calif., and previously worked for Mission Valley Bank in San Clemente, Calif.

Katz said he was not concerned that Shue had been out of the NBA since he was dismissed by the Clippers.

''He's only been out for less than a season,'' Katz said. ''Gene has stayed active and watched pro and college games. Gene knows this year's crop of talent and I've always felt he was a good evaluator of talent.''

#90205u1956 07/24/1990 ~United Press International

PARIS (JULY 24) UPI - Hungary and Czechoslovakia officially returned to the fold of the 16-million strong Scouting movement Tuesday at the 32nd World Scout Conference.

''We have never stopped being good Scouts. Once a Scout, always a Scout. I am just happy to be able to openly wear my uniform again,'' said Levanthe Mathe, a Hungarian delegate to the conference.

For Hungary and Czechoslovakia, the revival of Scouting comes after a gap of nearly 50 years. Scouting started in Czechoslovakia in 1911 and in Hungary in 1919, but was banned by the Communist government in the 1940s.

The Boy Scouts of America presented $25,000 each to Hungary and Czechoslovakia at the Paris conference to help the scouting movement in their countries. Hungary has more than 10,000 members in the two Scouting associations started in 1988 and Czechoslovakia has more than 70,000 members.

The Soviet Union, which banned Scouting in 1917, also indicated its interest in the being a part of the movement at the conference following the launch July 1 of a program for children affected by the Chernobyl nuclear disaster.

Nearly 1,235 children from Byelorussia, Ukraine and Russia, affected by the irradiation from the nuclear disaster in April 1986, are guests of Scouts and Guides in 15 European countries for a month's holiday.

''The revival of Scouting in Central and Eastern Europe is an indication of the growing need for pluralistic and apolitical organizations in these countries,'' Jacques Moreillon, secretary general of the World Organization of the Scout Movement, told a news conference.

The five-day conference that started Monday has delegates from 131 countries, representing the 16 million strong membership of the movement that was founded by Robert Baden-Powell to ''create a better world''.

''I have a dream that not very long from now Soviet Scouts and Scouts from other countries will remember this year as a year of true international solidarity,'' said Vladimir Lomeiko, Soviet Ambassador to UNESCO.

In a message read to the conference, Soviet President Mikhail Gorbachev said the Scouting movement comes close to ''implementing the cherished dream of mankind - to live without hatred and violence, in an atmosphere of goodwill among people from different nations.''

Scout Movement spokesman Mark Clayton said the Baltic states of the Soviet Union - Lithuania, Latvia and Estonia - have begun to clamor for recognition of their Scouting organizations, but he said they could not be recognized before political questions involving their status are settled.

#90205u1992 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - Several major business lobbies, alarmed at the prospect of an ''energy tax'' to help reduce the massive federal budget deficit, warned Tuesday such levies would harm economic growth and jobs, with the poor likely to be hurt the most.

President Bush and congressional leaders are in the 11th week of deficit-reduction negotiations, and, according to business lobbyists, various ''broad-based energy taxes'' are being seriously considered.

''I do think there's momentum behind an energy tax,'' said George Lawrence president of the American Gas Association.

At a minimum, ''the trial balloons out there need to be shot down,'' he added.

In a sign of increasing concern, The American Gas Association, National Rural Electric Cooperative Association, American Petroleum Institute, National Association of Manufacturers and other business lobbies called news conferences to argue against new taxes on energy.

The groups oppose several approaches to energy taxes - a gasoline excise tax, a surcharge based on the carbon content of various fuels or taxes on energy use at the production and retail levels.

Some lobbyists said it appeared unlikely that budget negotiators would embrace the ''carbon tax,'' which has received support from environmental groups intent on reducing carbon dioxide emissions from power plants and factories.

Carbon dioxide is considered the main culprit in the global warming phenomenon.

Other lobbyists said a gasoline excise tax was unlikely in an election-year environment.

''Federal budget summiteers are considering energy taxes to provide over half - roughly $14 billion - of the $25 billion sought in new revenues to bail them out of their fiscal crisis,'' the Edison Electric Institute said in a statement.

While lawmakers may favor such taxes because they are ''hidden'' and more ''politically palatable,'' the costs will be passed on to consumers, the association of electric companies warned.

Broad-based energy taxes are regressive - the poor pay more than the rich as a percentage of income - will fuel inflation, throw people out of work, hit colder East Coast states harder than other areas of the country and weaken America's competitiveness overseas, the business groups said.

Charles DiBona, president of the American Petroleum Institute, proposed an alternative means to cut the budget deficit - a value added tax preferred by many European governments.

It could be imposed on all goods and service, including imported goods, but would be refunded on items exported from the United States.

''Energy taxes would be poison to economic growth, jobs and international competitiveness,'' said Jerry Jasinowski of the National Association of Manufacturers.

Such taxes ''would increase the chances of a recession'' in the current slow-growth economy, Jasinowski said.

Although many people believe the budget problem can be solved by increasing corporate tax levies, ''we haven't taxed individuals enough in this country,'' Jasinowski said.

Other groups opposing broad-based energy taxes at two news conferences were: the American Public Power Association, the American Paper Institute and the American Iron and Steel Institute.

About 50 major corporations and business lobbies have hastily formed an ''Energy Tax Coalition'' and sent a letter to Bush and congressional negotiators opposing ''all forms of energy taxes said to be under consideration'' - including gasoline taxes or a surcharge based on the carbon content of particular fuels.

#90205u2008 07/24/1990 ~United Press International

NEW YORK (JULY 24) UPI - Feeling the impact of a post-market-crash economy, New Yorkers are hunting for - and finding - great places to dine out for less than $15 per person, an industry survey said Tuesday.

"There is no need to eat badly in any price level," said Punch In, a computerized service surveying the travel and restaurant industry. "The good news is that the quality of food has improved - thanks to a health

conscious generation and the 'nouvelle' movement."

New York has turned into the world's capital for restaurants offering good value and true diversity. Ethnic is back in a big way, the survey found, but the focus has shifted from high-priced exotic haunts to colorful inexpensive cafes.

"An economy turned sour, a generation of out-of-work yuppies and the current influx of hot money from abroad have brought back the sorrily missed breed of wonderful ethnic spots, music and jazz haunts, and bistro-cum-trattoria so said.

Italian cuisine is leading the ethnic pack, with East Side's Belladona proposing pasta dishes for only $6, with a bring-your-own-bottle policy surely helping to slash the check.

"It is a charming sidewalk cafe, BYOB policy, and $6 pastas that can rival and even surpass the $20 variety offered by its competitors," the survey said. "A three-course meal can be devoured for under $15."

Arlecchino, in the Village, is another Italian restaurant combining genuine atmosphere - although the chef is from Ecuador - and fine traditional cuisine, "realistically priced."

New contenders on the New York ethnic scene are a string of Middle Eastern restaurants offering a variety of "sensuous, theatrical, and appealing" cuisine, Punch In said.

Also in the Village is Lofti's Couscous, named after the traditional North African dish made of grain served with lamb, chicken, and vegetables in a spicy sauce, and described as simply "the best Moroccan restaurant to ever open in New York."

Also getting high marks for tasty Middle Eastern cuisine combined with low prices is the East Side's Sido Abu Salim, getting rave reviews for its eggplant puree and tabbouleh salad.

When it seemed that nothing new could emerge on the crowded Chinese restaurant scene, Tripple Eight, dubbed a "Chinatown extravaganza," promises to deliver a spectacular traditional tea-lunch, delivering cart after cart of dumplings and appetizers, for less than $15 per person.

"The tea-lunch, served from 8 a.m. to 5 p.m., may be the best in the United States," says Punch In. "It is unequalled in San Francisco or London for its mix of oriental elegance, fabulous food, and low prices."

Also from the Far East, and florishing on the West Side, are numerous Korean barbecue houses, specializing in thinly sliced beef wrapped in

spices and lettuce leaves. Ny Kom Tang Bul House is a name worth remembering, while its West 32nd Street rivals also deserve a visit, the survey said.

For true bargain-hunters and spice-lovers, the India Pavillion is the place to go on East 54th street, with the check totaling not more than $10 per person. And for low-calorie, low-budget diners, the Little White House brings Turkish delights such as grilled fish and meat - "New York's best buy in a steak dinner for under $15" - although it is advisable, diet-wise to pass the extra-sweet deserts.

Good deals at French restaurants are hard to find anywhere in the world - including Paris. Punch In praised West Side's Quatorze, which has received so much acclaim already that its prices are going up, but still within reasonable limits; Les Sans-Culottes, on the East Side, with its unique wallpaper depicting leading characters of the French Revolution; and hard-to-pronounce Pierre's Les Douceurs de Paris, in the Village.

Often crowded is midtown's Kennedy's where a traditional Irish meatpie and a beer cost about $10. A few blocks away is Kavkazian, a Georgian restaurant which "may have some of the worst service in town," but "the best fried chicken in town" and great Russian music.

Punch In regularly updates its ratings of restaurants, hotels, airlines, travel facilities and wines around the word and is distributed electronically and through syndication with Delphy or CompuServe services.

#90205u2017 07/24/1990 ~United Press International

BONN, WEST GERMANY (JULY 24) UPI - A West German government official said Tuesday the break-up of the East German government coalition will not endanger scheduled talks on unification between the two German governments.

Spokesman Dieter Vogel said ''he does not see any reasons'' why the withdrawal of the Liberals from the East German government coalition should threaten negotiations.

West Germany's interior minister said earlier Tuesday he is confident the unification treaty will be completed by the end of August, despite the crisis over election procedures in East Berlin.

''We will achieve our goal of completing unification by December,'' Minister Wolfgang Schaeuble said after a Cabinet committee meeting on German unification.

He said he thinks the dispute over the unification date and election procedures which broke up the East German coalition government Tuesday,

will fade soon.

''Regarding those events, we will have problems remembering in three months from now what they were all about,'' Schaeuble said.

But the East German coaltion parties fundamentally disagreed if East and West Germany should officially unify before or after all-German elections.

Prime Minister Lothar de Maiziere's senior coalition party insists on holding separate elections in the two Germanys before merging, while the Social Democrats and the Liberals demand full unification before equal elections.

Schaeuble said the Bonn government has already offered to work out an election agreement with East Berlin to settle the question on voting procedures.

''And that can mean separate elections under different rules or united elections under our rules,'' he said.

Schaeuble said the East German government crisis will not delay the unification process, adding that the most difficult choice to make during unification talks will be whether Berlin or Bonn will be named capital of a united Germany.

''The question on the capital is the most controversial,'' he said, ''but that will not make (unification) fail either.''

#90205u2018 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - U.S. employment costs increased by 1.1 percent in the second quarter of 1990 and finished the 12 months ending in June up by 5.4 percent, the Labor Department said Tuesday.

The Employment Cost Index advanced by 1.7 percent in the first quarter and by5.5 percent in the 12-month period ending in March, according to the department's Bureau of Labor Statistics.

The index measures changes in wages, salaries and employer costs for benefits for private-sector and government workers. The Labor Department noted that employment costs "rose more rapidly" from June 1989 to June 1990 than in the preceding year.

The department also said "while the acceleration in wage and salary gains reflects the April 1, 1990, increase in the federal minimum wage, from $3.35 an hour to $3.80, the impact of that increase on overall wage and salary gains appears to be small."

#90205u2028 07/24/1990 ~United Press International
LONDON (JULY 24) UPI - Stock prices closed narrowly mixed in sluggish trading Tuesday on the London International stock exchange amid some light buying and selling from institutional investors.

The blue-chip Financial Times 100-stock index, which tumbled 40.4 points Monday, added 1.6 points to 2,360.9. The key index had been up around 12 points at midday. The narrower top 30 industrial average slipped 0.4 points to 1,866.7.

Volume amounted to around 386 million shares, compared with 370 million shares changing hands Monday.

Analysts said cash-heavy institutions took advantage of buying into the market, following the dramatic plunge Monday on Wall Street. Market watchers also noted that a shortage of stock also helped to boost some selective stocks.

Despite dramatic falls in some leading issues, stocks overall ended stable. Among widely traded stocks, Grand Metropolitan, which acquired the Burger King fast food chain when it took control of Pillsbury, tumbled 25 cents to $15.22 in sympathy after McDonald's Corp. posted a disappointing earnings.

Elsewhere in food group, Dalgety fell 14 cents to $6.62 and United Biscuits lost 11 cents to $6.38.

Oil and related stocks rose sharply as crude oil prices firmed following the reported massing of Iraqi troops on the Kuwait border. Enterprise Oil climbed 27 cents to $12.18 and London & Scottish Marine Oil gained 27 cents to $8.08.

Eurotunnel, which is building the Channel Tunnel connecting Britain to France, gained 27 cents to $9.32.

Reuters plunged $3.06 to $19.06 after the communications company warned of an increase in cancellations of its services due to economy drives by major clients, which will hurt profits in the second half of the year.

-30- 1946
#90205u2030 07/24/1990 ~United Press International
WASHINGTON (JULY 24) UPI - The following are a sample of some rulings that Supreme Court nominee David Souter has written or been involved in as a justice on the New Hampshire Supreme Court:

In a 1986 medical malpractice case, a woman who contracted measles during her pregnancy and gave birth to a baby with severe defects sued her obstetrician. The woman argued her doctor was negligent in failing to warn her of the possibility of birth defects so that she could have undergone prenatal testing in time to terminate the pregnancy. The doctor was against abortion.

Souter, concurring with the majority in sending the case back for probable trial but writing separately, said, ''The trial court did not ask whether, or how, a physician with conscientious scruples against abortion, and the testing and counseling that may inform an abortion decision, can discharge his professional obligation with engaging in procedures that his religious or moral principles condemn. To say nothing about this issue could lead to misunderstanding,'' he wrote.

''...The court holds that a sphere of medical practice necessarily permitted under Roe vs. Wade (legalizing abortion) is not exempt from standards of reasonable medical competence.''

In a March 1988 ruling, Souter wrote an opinion overturning a rape conviction. He overturned the conviction because the trial judge, citing the state's rape victim shield law, refused to allow the jury to consider evidence of the alleged victim's activities just prior to her rape claim. The woman brought the rape charge after being assaulted by the man's girlfriend, who discovered the two in his trailer. He claimed the woman consented to sex and had been ''inviting sexual advances'' from others in the bar where they met.

''The sexual activities of a complainant immediately prior to an alleged rape may well be subject to a defendant's constitutional right to present evidence. ... The demand of the (state and federal) constitutions is all the clearer when the activities were carried out in a public setting.''

In a case involving a disputed insurance policy, Souter ruled against a boy seeking to recover damages after his stepfather killed his mother and wounded the boy in her home.

Walter Shankle shot and killed his ex-wife, wounded her son from a previous marriage and then committed suicide in 1980. The son's biological father sought insurance money for his son's injuries and medical treatment and for his own emotional suffering.

Souter upheld findings that the son and his father were not entitled to recover damages because the insurance policy excluded coverage for medical expenses and liability ''to the insured.'' Souter also agreed with the dismissal of the father's claim of emotional injury, saying that was outside the scope of policy coverage.

In a case brought by the state of New Hampshire, the court upheld the attempted murder conviction of a man who tried to kill his ex-girlfriend's lover. The defendant appealed, citing the admission of certain testimony.

Souter joined in the opinion upholding the conviction, but wrote separately on an issue involving trial procedure that was not part of the appeal. Souter said defense counsel should have been allowed to approach the bench during objections to the admission of certain testimony, saying such a rule was necessary to avoid reversible error and to provide the defense with the opportunity to elaborate on objections.

In a Senate questionnaire he filled out prior to his nomination hearings for a position on the federal appeals court in Boston, Souter wrote in response to a question on ''judicial activism:''

''The obligation of any judge is to decide the case before the court, and the nature of the issue presented will largely determine the appropriate scope of the principle on which its decision should rest. Where that principle is not provided and controlled by black letter authority or existing precedent, the decision must honor the distinction between personal and judicially cognizable values. The foundation of judicial responsibility in statutory interpretation is respect for the enacted text and for the legislative purpose that may explain a text that is unclear. The expansively phrased provisions of the Constitution must be read in light of its divisions of power among the branches of government and the constituents of the federal system.''

#90205u2032 07/24/1990 ~United Press International

DETROIT (JULY 24) UPI - The nation's automakers on Tuesday posted a combined 13 percent decline in sales of domestically made cars and light trucks during mid-July from strong year-ago levels, but analysts predicted the "sluggish and saturated" market should gradually strengthen this quarter.

Sales of domestically built cars during the July 11-20 period declined 13.3 percent from a year ago when measured by sales per day, while light truck sales declined 12.6 percent.

The annual sales rate for domestically built cars - the most common measure of industry performance - was 6.8 million cars during the period, down sharply from a 7.8 million-unit rate last year.

"Actually, these numbers are better than expected," said David Healy, of investment firm Barclays de Zoete Wedd in New York, adding that while sales are down from last year's robust levels, so is the level of support

from buyer incentives.

"It is still a sluggish and saturated market, but the level of rebates per unit is also down a bit," Healy said. "The selling rate normally accelerates during the summer, and this year will be no exception."

Buyers may also be spurred into buying now to avoid price increases on 1991 models. Ford Motor Co. has already told its dealers prices will rise an average of over three percent.

The nine companies - General Motors Corp., Ford, Chrysler Corp., American Honda Motor Co., Nissan Motor Manufacturing U.S.A., Toyota Motor Sales U.S.A., Mazda Motor Manufacturing (USA) Corp., Mitsubishi Motor Sales of America, Inc., and Subaru-Isuzu Automotive Inc., or SIA - reported combined sales of 191,779 cars and 119,162 trucks in the United States during the latest period. This compares with 221,231 cars and 136,300 trucks sold in the year-ago period, automakers said.

The daily selling rate of 34,549 vehicles compares with 39,726 vehicles per day for the same period last year. There were nine selling days in both the latest and year-ago period.

So far in 1990, the firms have sold 3.92 million cars, down 4.8 percent from the almost 4.1 million units sold in the comparable 1989 period when measured by sales per day. Light truck sales totaled 2.33 million units, down 1.6 percent from nearly 2.36 million trucks sold during the same period a year ago.

The industry's latest showing mimicked a pattern all too familar this year - double-digit declines by the Big Three, and year-to-year gains among most foreign-based carmakers building in the United States.

Sales of GM's domestically made cars during the latest period, slid 13.4 percent from a year ago, while its truck sales were off 13.2 percent. Second-ranked Ford posted a 24.6 percent drop in car sales and a 10.4 percent decline in truck sales. Chrysler's car sales decreased 17.9 percent, while its light truck sales, including Jeep, fell 16.7 percent when compared with a year ago.

Among the smaller companies reporting sales of U.S.-built cars - all of them transplants, or U.S. manufacturing operations of large Japanese carmakers - Honda posted a 3.1 percent gain from a year ago. Toyota's sales rose 62.5 percent from relatively low production volumes a year ago.

Nissan reported a 1.6 percent dip in sales of its U.S.-built cars, while its domestically made compact truck sales slipped 0.5 percent from low year-ago levels.

Mazda sold 2,276 cars produced at its Flat Rock, Mich. assembly plant, up from 1,334 a year ago. Mitsubishi reported sales of 1,057 Eclipse cars built at its joint venture plant with Chrysler in Illinois, vs. 992 a year ago. SIA's sales totaled 588 cars and 184 trucks built at its new joint venture plant in Lafayette, Ind.

WASHINGTON (JULY 24) UPI - Economic development in Central America is the best solution to illegal migration to the United States, even though it would actually stimulate immigration in the short term, a special commission concluded Tuesday.

Expediting a free-trade agreement between the United States and Mexico was a principle recommendation of the Commission for the Study of International Migration and Cooperative Economic Development in its report to Congress.

"The issue for many countries is stark: they either export goods and services to create jobs at home, or they export people," the commission said in a summary of its report.

The commission was created by Congress as part of a package of 1986 immigration reform laws to study the causes of growing illegal immigration to this country. The panel focused on Central America and the Caribbean Basin as the originating countries of the vast majority of illegal aliens.

"We started from the premise that we really didn't think law enforcement was the long-term answer," commission Chairman Diego Asencio told the House Foreign Affairs Committee in presenting the report. "The conclusion we came to was that the only thing that would possibly work would be the promotion of international trade."

Noting that "the search for economic opportunity is the primary motivation" for illegal immigration to the United States, the report concluded "job-creating economic growth is the ultimate solution to reducing these migratory pressures."

But the commission emphasized "the economic development process itself tends in the short to medium term to stimulate migration by raising expectations and enhancing people's ability to migrate."

Asencio said contrary to popular belief illegal immigrants most often come from the somewhat "upwardly mobile" populations of sending countries, rather the poorest, and economic development in the short term would therefore raise the numbers of those who could afford to attempt immigration.

"Any serious cooperative effort to reduce migratory pressures at their source," the panel concluded, "must be pursued over decades, even in the face of immediate contrary results."

Rep. John Bryant, D-Texas, the commission's only member from Congress and the author of legislation that created it, said he previously opposed a free trade policy as harmful to American workers, but his work on the panel changed his thinking. "I came to the conclusion that we have no choice," Bryant said, "but to open up markets to our hemispheric neighbors ... even if that means sacrifice."

Asencio and Bryant also stressed the U.S. government needs to sharpen its focus on immigration so that the issue becomes a consideration in all other policy decisions. "We would like immigration to be closer to the frontal lobes of the federal government," Asencio said.

WASHINGTON (JULY 24) UPI - In a move affecting 1,500 cities, the EPA tightened controls Tuesday on industrial discharges of toxic wastes that can pass through municipal sewage systems untreated and contaminate lakes, rivers or coastal waters.

Under new rules issued by the Environmental Protection Agency, local officials will have to take greater measures to make sure that industrial plants detoxify their chemical wastes - such as cyanide-laced effluent - before pumping them into sewage systems.

The rules also place new requirements on industrial dischargers to sample their effluent and tell authorities what kinds of toxic wastes they are putting into sewers. Industry also must notify officials when there is an accidental or larger than normal release.

The regulations are aimed at preventing toxic wastes from passing through sewage treatment plants and being dumped into local waterways or incorporated in sewage sludge used as fertilizer.

EPA officials said the tighter controls would help local authorities halt industrial discharges of wastes that cannot be removed by decontamination processes used at sewage treatment plants.

In addition to reducing harm to fish and other aquatic life, the rules are intended to stop discharges that could disrupt operation of sewage treatment plants by corroding pipes, obstructing wastewater flow or causing explosions or fires.

Under federal law, industry is permitted to discharge certain toxic wastes

into sewage systems, provided they carry out ''pretreatment'' programs to remove hazardous, ignitable or explosive constituents that local treatment plants are not designed to handle.

EPA surveys have found widespread industry noncompliance with the pretreatment requirements and the agency increasingly has held municipal sewer authorities responsible for improving enforcement against chronic violators.

Last year, the EPA, in conjunction with the Justice Department, filed suit against Detroit, El Paso, Phoenix, San Antonio and 57 other cities nationwide for failing to adequately enforce pretreatment requirements, which are imposed under the Clean Water Act.

The EPA estimates one-third of the nation's 1,500 largest sewage systems are not enforcing at least one key pretreatment requirement.

EPA Administrator William Reilly expressed hope the tighter controls on toxic discharges would increase incentives for industry to minimize the generation of wastes.

''By tightening controls on industrial pollutants sent to sewage treatment plants, EPA is preventing pollution before it is produced,'' Reilly said in a statement.

Under the new rules, which are expected to take effect this September, those 1,500 sewer authorities will have to test their discharges to local waterways to determine if toxicity levels are too high. The results of such testing must be publicly reported at least once every five years.

In addition, local authorities will be required to increase monitoring of major industrial dischargers so that at least one inspection and discharge sampling is performed each year.

Based on the results of the toxicity testing and increased inspections, local officials will decide whether increased restrictions are needed on industrial dischargers.

The rules also require local authorities to issue discharge permits for each major industrial discharger, setting specific limits or pretreatment requirements for toxic wastes pumped into sewage systems.

GENEVA (JULY 24) UPI - OPEC oil ministers held private bilateral talks Tuesday in advance of a crucial production and price conference held against the background of tension between Iraq and Kuwait.

Ministers on arrival in Geneva predicted the 13 OPEC members will agree on a higher target for oil prices. The mid-year conference is due to start Thursday.

Several ministers and their aides said OPEC was determined to boost actual world prices for OPEC oil by ensuring observance of individual output quotas. Delegates said Iraq's tough attitude against Kuwait - a longtime over-producer - was designed to and would help restore such discipline.

The oil market is now assured more than ever that Kuwait and the United Arab Emirates will not overproduce, following the Iraqi measure, an Iranian official said. Iran and Saudi Arabia made it clear they will support the disciplinary drive. Officials said OPEC has lost between $5 million and $7 million since March because of lower oil prices, partly caused by overproduction.

Iraq's Oil Minister, Issam Abdul Al-Chalabi, speaking to reporters on his arrival, avoided any reference to the tension along the border between Iraq and Kuwait.

But he reiterated earlier statements that he will seek a steep increase in the OPEC basic target price average for seven Mideast crudes from the current $18 a barrel to $25 a barrel. "We made a lot of analyses before

and they are all valid," he said.

He said Iraq will agree to a proposal to raise the total OPEC production ceiling to 22.5 million barrels a day to allow for a 400,000 barrel increase in the quota of the United Arab Emirates, the cartel's main overproducer. Officials largely expected agreement on the new output ceiling.

If there is no new new development regarding Kuwait and Iraq, it is predicted that OPEC ministers will increase the output ceiling from the current 22.086 million barrels a day to 22.491 million barrels a day for the third quarter of this year, an Iranian delegate said.

Saudi oil minister Hisham Mohiddin Nazer declined to comment on the current dispute between Iraq and Kuwait. "We are here to solve oil problems," he said. "We will study all the proposals and market analyses and make a decision. Saudi Arabia is for a higher (target) price," Nazer said. The Gabonese delegation said it will also back proposals to raise the OPEC target price.

An OPEC delegate said that the actual current average price has been boosted by recent Kuwaiti and UAE output cuts and $16.25 a barrel last Friday compared to $14.40 at the beginning of July.

Delegates said it still had to be decided whether to set the likely new production ceiling for just two or so months or until the end of the year. Some Gulf members reportedly planned to propose convening an extraordinary conference to raise the reference price in September or October, ahead of the regular end-of-year conference in December.

(JULY 24) UPI - A cagey bit of programming worked for NBC in the weekly television ratings, with the conclusion of a two-part movie grabbing the top slot this week and part one scoring high the last time around, it was reported Tuesday.

Monday night's broadcast of part two of ''Love and Hate: A Marriage Made in Hell,'' starring Kate Nelligan, was the top-rated show in the weekly Nielsen ratings for the week of July 16-22.

Part one of the miniseries, broadcast July 15, placed sixth in the ratings for the week of July 9-15. The show's ratings were the third-highest for all NBC miniseries broadcast this season, following ''Blind Faith'' and ''Drug Wars: The Camarena Story.''

In other good news for NBC, the July 17 special ''Real Life with Jane

Pauley'' tied for fifth place, the highest-ever rating for a network news special. Five ''Real Life'' specials have been scheduled for the summer.

Reruns of the perennially top-rated ''Cheers'' (NBC) and ''Roseanne'' (ABC) were in second and third place respectively and ABC's ''20/20'' zipped to fourth place, compared with its 21st place showing a week ago.

It was a three-way pileup in seventh place, with Fox's ''The Simpsons'' and ''Married...With Children'' tying with NBC's ''Golden Girls.''

''The Miss Teen USA'' pageant broadcast on CBS rounded out the top 10. Some usual top 10 finishers, CBS's ''60 Minutes'' and NBC's ''The Cosby Show'' and ''A Different World,'' were bumped to 11th, 12th and 13th places respectively.

A rerun of NBC's ''Quantum Leap'' outpaced two original shows in the prime-time race July 18, placing 39th over ABC's Barbara Walters special ''The Perfect Baby'' (41st place) and CBS's ''Top Cops'' in 43rd place.

NBC won five nights of the week - Monday, Tuesday, Wednesday, Thursday and Saturday - its first such showing since Feb. 26. ABC won Friday night and Sunday belonged to CBS.

For the week ending July 22, it was the 10th consecutive win for NBC with a 10.2 rating and a 20 share, followed by CBS with an 8.7 rating and a 17 share. ABC had an 8.4 rating and a 16 share and Fox posted a 6.1 rating and a 12 share.

CBS topped the Sunday night movie competition with ''A Gathering of Old Men'' tied for 25th place with ''In the Heat of the Night.'' The NBC Sunday movie, ''Kill or Be Killed'' placed 32nd and it was anything but the night for ABC's ''Tonight's the Night'' in 58th place.

ABC's ''World News Tonight'' with Peter Jennings again was the top-rated news program for the week with an 8.9 rating and a 20 share. The ''CBS Evening News'' with Dan Rather had an 8.0 rating and an 18 share and NBC ''Nightly News'' with Tom Brokaw finished with a 7.4 rating and a 17 share.

In the 43-week season-to-date competition, NBC has a 13.4 rating and a 23 share, followed by ABC with a 12.0 rating and a 21 share, and CBS has an 11.4 rating and a 20 share.

Each ratings point represents about 921,000 households. A share is the percentage of TV sets in use that are tuned to a particular show or network.

The top programs for the week ending Sunday, July 22, according to the A.C. Nielsen Co., were:

1. NBC Monday Movie: Love and Hate (NBC)
2. Cheers (NBC)
3. Roseanne (ABC)
4. 20/20 (ABC)
5. (tie) Empty Nest (NBC)
   Real Life with Jane Pauley (NBC)
7. (tie) Golden Girls (NBC)
   Married...With Children (Fox)
   The Simpsons (Fox)
10. Miss Teen USA Pageant (CBS)

RIVERDALE, GA (JULY 24) UPI - Four firebombs were hurled at the NAACP office in Clayton County Tuesday, causing extensive damage to the building and its contents, police said.

It was the second such bombing at the Clayton County headquarters in eight days.

Clayton Police Lt. Doug Jewett said two Molotov cocktails - glass bottles filled with flammable liquid - struck the sidewalk outside the building. Two more were tossed through a building window.

''The furniture was destroyed,'' Jewett said. ''There also was heavy damage to the walls and the rest of the facility.''

The firebombing occurred about 7:30 a.m., before the office opened.

The same office was damaged July 16 when it was hit by a similar device. A private residence where a black family lives also was the target of a firebomb last week.

''There's no way to tell if the incidents are related,'' Jewett said.

Jewett said police had no suspects in custody and added no threats were directed at the Clayton County NAACP before or after the incidents. The last threatning call was made to the office more than a year ago.

Earl Shinhoster, regional director for the NAACP, said the organization would press on.

''The building was gutted. The entire interior and furnishings were damaged substantially,'' Shinhoster said. ''But without a doubt we're going to continue operating in Clayton County.''

Shinhoster said about one dozen racial incidents have been reported in the county in about a year.

Most of those incidents have been limited to vandalism of property belonging to blacks who had moved into largely white neighborhoods, Shinhoster said.

#90205u2226 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - Several major business lobbies, alarmed at the prospect of an "energy tax" to help reduce the massive federal budget deficit, warned Tuesday such levies would harm economic growth and jobs, with the poor likely to be hurt the most.

President Bush and congressional leaders are in the 11th week of deficit-reduction negotiations, and, according to business lobbyists, various "broad-based energy taxes" are being seriously considered.

"I do think there's momentum behind an energy tax," said George Lawrence, president of the American Gas Association. At a minimum, "the trial balloons out there need to be shot down," he added.

In a sign of increasing concern, The American Gas Association, National Rural Electric Cooperative Association, American Petroleum Institute, National Association of Manufacturers and other business lobbies called news conferences to argue against new taxes on energy.

The groups oppose several approaches to energy taxes - a gasoline excise tax, a surcharge based on the carbon content of various fuels or taxes on energy use at the production and retail levels.

Some lobbyists said it appeared unlikely that budget negotiators would embrace the "carbon tax," which has received support from environmental groups intent on reducing carbon dioxide emissions from power plants and factories. Carbon dioxide is considered the main culprit in the global warming phenomenon.

Other lobbyists said a gasoline excise tax was unlikely in an election-year environment. "Federal budget summiteers are considering energy taxes to

provide over half - roughly $14 billion - of the $25 billion sought in new revenues to bail them out of their fiscal crisis," the Edison Electric Institute said in a statement.

While lawmakers may favor such taxes because they are "hidden" and more "politically palatable," the costs will be passed on to consumers, the association of electric companies warned.

Broad-based energy taxes are regressive - the poor pay more than the rich as a percentage of income - will fuel inflation, throw people out of work, hit colder East Coast states harder than other areas of the country and weaken America's competitiveness overseas, the business groups said.

Charles DiBona, president of the American Petroleum Institute, proposed an alternative means to cut the budget deficit - a value-added tax preferred by many European governments.

It could be imposed on all goods and service, including imported goods, but would be refunded on items exported from the United States. "Energy taxes would be poison to economic growth, jobs and international competitiveness," said Jerry Jasinowski of the National Association of Manufacturers.

Such taxes "would increase the chances of a recession" in the current slow-growth economy, Jasinowski said. Although many people believe the budget problem can be solved by increasing corporate tax levies, "we haven't taxed individuals enough in this country," Jasinowski said.

Other groups opposing broad-based energy taxes at two news conferences were: the American Public Power Association, the American Paper Institute and the American Iron and Steel Institute.

About 50 major corporations and business lobbies have hastily formed an "Energy Tax Coalition" and sent a letter to Bush and congressional negotiators opposing "all forms of energy taxes said to be under consideration" - including gasoline taxes or a surcharge based on the carbon content of particular fuels.

WASHINGTON (JULY 24) UPI - House and Senate conferees are expected to finish work on a comprehensive oil spill bill this week, setting the stage for possible final approval by Congress next week, congressional aides said Tuesday.

With only a few relatively non-controversial issues to be resolved, the House-Senate conference committee working on the oil spill bill has tentatively scheduled a meeting for Thursday to tie up the remaining loose legislative ends.

''I think it's a very good bet - a bet-the-farm kind of bet - that we'll finish on Thursday,'' said Sue Waldron, spokeswoman for Rep. Walter Jones, D-N.C., chairman of the conference committee and of the House Merchant Marine and Fisheries Committee.

Waldron said the few issues left to be resolved included various aspects of liability for spill damages and uses of a federal oil spill response fund that would be set up under the bill.

She said it appeared likely House and Senate conferees would be able to settle those matters Thursday, enabling them to send a compromise bill back to the House and Senate for final approval.

As for whether Congress might be able to send an oil spill bill to President Bush before the August congressional recess, Waldron said: ''We are hearing this is what the leadership wants.''

Aides to senators on the conference committee also said chances were good that the conferees could report out a compromise bill Thursday.

Diane Dewhirst, a spokewoman for Senate Democratic leader George Mitchell of Maine, said Mitchell was eager to send Bush the oil spill bill before the summer recess, but that it still was not clear whether that was possible.

The oil spill bill would limit the liability of spillers for cleanup costs and victim compensation while also creating a $1 billion industry-financed federal fund to cover emergency cleanup and compensation needs as well as those costs above the liability limits.

#90205u2289 07/24/1990 ~United Press International

MIAMI (JULY 24) UPI - A tropical depression brewing in the Caribbean Sea picked up strength Tuesday and was upgraded to a tropical storm that officials dubbed ''Arthur,'' the first tropical storm of the season.

Tropical Storm Arthur could dump 3 to 5 inches of rain and produce local flooding as it moves west toward the Caribbean's windward islands, forecasters at the National Hurricane Center said.

Tropical storm warnings were issued for the islands of Trinidad, Tobago and Grenada and its dependencies, forecasters said.

Maximum sustained winds were near 40 miles an hour, just over the 39-mph threshold for tropical storms. Some strengthening is likely during the next 24 hours, forecasters said.

At 2:30 p.m. EDT Tuesday, Arthur was centered about 160 miles east of Trinidad, at latitude 10.7 north, longitude 58.5 west.

The storm was moving westward at about 20 mph and was expected to continue

that motion through Wednesday, then possibly turn more toward the west-northwest, forecasters said.

Arthur formed from the season's second tropical depression.

The year's first tropical depression brought heavy rains to Cuba in late May, before the official start of the hurricane season, which runs from June 1 to Nov. 30.

#90205u2299 07/24/1990 ~United Press International

MOUNTAIN VIEW, Calif. (JULY 24) UPI - A new moon only 12 miles in diameter has been discovered orbiting the planet Saturn, NASA announced Tuesday.

The tiny object was found by Mark Showalter, a planetary scientist, in analysis of pictures taken 9 years ago by the Voyager 2 spacecraft. The new moon appeared as a small bright spot on 11 pictures out of 25 candidates spewed out in a computer search of 30,000 images.

Showalter's computer program knew what to look for because the moon's presence had been predicted.

Saturn is 700 times bigger in volume than Earth, and is the third planet out from Earth. It orbits 886 million miles away within several snow white rings.

The new moon was predicted because of a disturbance in a 200-mile-wide gap in Saturn's outermost major ring, the ''A'' ring.

It was theorized that the gap, known as Encke's Gap, results from the presence of an unseen body. The gravity of the moon would disturb the particles in the huge ''A'' ring in an interaction that would create a gap in the ring and waves along the gap's inner edges.

Showalter's computer program analyzed waves on the edges, which resemble the wake of a motorboat, to determine the position and mass of the moon. Into the computer program was added information about the spacecraft's positions and camera angles in 1980-81.

The computer search through the enormous stock of Voyager images churned up 25 candidates, of which 11 were winners, showing a small bright spot. Temporarily the new moon was designated 1981 S13. It exists 46,000 miles from Saturn's surface, and is the 18th and farthest-out of the planet's moons.

Brian Marsden of the International Astronomical said the moon, if confirmed, would be the second celestial body successfully predicted

because of its gravitational effect.

''This is the first time since the discovery of Neptune that this has been successfully done in the solar system,'' Marsden said in Cambridge, Mass. Neptune was discovered in 1894.

To confirm the existence of the new moon, Marsden said, more work must be done and recommended examining data sent back to Earth from the Voyager 1 probe.

Saturn has more moons than any other planet in the solar system. It is followed by Jupiter's 16 moons and the 15 moons around Uranus.

Given the large number of Saturn's moons, Marsden said, ''I think it would be surprising if there aren't more moons. It's a question of whether they can be detected. They are very far away and very small things.''

The Voyager 2 spacecraft flew past Neptune in 1989 and, while still messaging data, now is headed out of the solar system. Showalter's work was done at the Ames Research Center of the National Aeronautics and Space Administration.

#90205u2314 07/24/1990 ~United Press International

RADNOR, PA (JULY 24) UPI - Sun Co. reported Tuesday that it had second-quarter net income of $155 million, or $1.07 a share, a 10 percent increase from $105 million, or 98 cents a share, reported for the same period in 1989.

The oil company said revenues for the 1990 second quarter were $2.89 billion, compared with $2.92 billion for the same period last year.

Sun said net income for the first half of 1990 was $186 million, the same amount reported for the first six months last year.

Sales for the first half this year were $6 billion, compared with $5.56 billion for the first half of 1989.

The increase in income in the second quarter was attributed to an increase of more than 100 percent in domestic refining and marketing earnings, said Sun chairman and chief executive Robert McClements.

Domestic refining and marketing earnings in the 1990 second period were $131 million, compared with $65 million in the 1989 second quarter, he said.

''Strong performance in gasoline, distillate and lube oil margins, coupled

with higher refinery utilization rates were the primary factors which enabled us to double refining and marketing earnings,'' McClements said in a prepared statement.

#90205u2379 07/24/1990 ~United Press International

(JULY 24) UPI- Despite last-minute profit taking, U.S. crude-oil prices rose on the New York Mercantile Exchange Tuesday on concerns about Iraq's massing of troops on its border with Kuwait.

The benchmark West Texas Intermediate crude for September delivery ended the day on the Merc up 6 cents at $20.56 a barrel, after trading as high as $20.92 a barrel. Volume was a heavy 108,191 futures contracts.

Iraq has been conducting a war of words with Kuwait and its other Persian Gulf neighbor, the United Arab Emirates, charging that their excess oil production had hurt its economy by driving oil prices lower.

There had been reports last week that Iraq was moving military to its border with Kuwait and the Washington Post reported Tuesday that 30,000 Iraqi troops had assembled there.

The U.S. State Department confirmed that there had been a military buildup on the border by both Iraq and Kuwait, but would give no numbers.

The Pentagon said two U.S. warships in the Gulf had been ordered to leave port early for a ''short-term'' military exercise now underway with the UAE in the tense region.

Egyptian President Hosni Mubarak also was shuttling between Iraq and Kuwait with a four-point plan to defuse the dispute.

The oil market, however, may have been expressing some skepticism in a wave of profit taking and heavy selling in the last few minutes prior to the Merc 3:10 p.m. EDT close.

WTI was trading around $20.70 a barrel when heavy sales by some large traders hit the exchange shortly prior to the Merc's closing, said Bill Hinton of Stotler & Co. in New York.

''There was some very heavy selling at the close, enough to make the market come off,'' Hinton said.

''There was a lot of profit taking in the last 10 minutes,'' agreed Peter Beutel, a trader with Merrill Lynch Futures Inc. in New York.

The market had risen earlier in the day on ''more corroboration of Iraqi

troops on Kuwait's border,'' Beutel said.

The market appeared to be somewhat suspicious that the Iraqi verbal and military gestures may only be a new version of the hype that usually precedes a meeting of the 13-nation Organization of Petroleum Exporting Countries.

World crude prices have already rise $3-$4 a barrel since early this month on the belief that OPEC will succeed in bringing the UAE and Kuwait to heel.

OPEC oil ministers are scheduled to hold their semiannual meeting in Geneva Thursday, in which Kuwait and the UAE are expected to bow to demands that they limit their oil output so world crude prices will rise.

Iraq may only be trying to assure that that the two do not renege on earlier indications they've given of cutting back production.

This view was given credence by the Arab League's U.S. envoy in Washington Clovis Maksoud, who said, ''The reports about military action are highly exaggerated. We believe the economic and political situation will be resolved very soon.

''I think the result of the diplomatic attempt to calm things will be evident later this week when OPEC meets in Geneva. Both Kuwait and the United Arab Emirates have been cooperative.''

On the European cash market, United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - edged up 25 cents to $17 a barrel.

Britain's widely traded North Sea Brent gained 17 cents to $19.10 a barrel.

On the U.S. Gulf Coast cash market, prompt delivery WTI slipped 10 cents to $19.55 a barrel.

On the Merc, unleaded gasoline for August delivery eased down 0.07 cent on the day to 63.28 cents a gallon, while August delivery heating oil climbed 0.82 cent to 57.32 cents a gallon.

#90205u2386 07/24/1990 ~United Press International

NEW YORK (JULY 24) UPI - Stock prices closed higher Tuesday in active trading on the New York Stock Exchange, with virtually all the gains concentrated in the blue chips, which benefited from a late bout of buy programs.

The Dow Jones industrial average, which sank 56.44 Monday, rose 17.82 to close at 2922.52, halting the slide which took the key index down almost 90 points in the previous two sessions.

Among broader market gauges, the New York Stock Exchange composite index edged up 0.23 to 194.45 and Standard & Poor's 500-stock index rose 0.48 to 355.79. The price of an average share rose four cents.

Advances barely led declines, 750 to 743, among the 2,009 issues crossing the NYSE tape. Big Board volume totaled 181,920,000 shares, compared with 209,030,000 shares traded Monday.

Analysts said the session was dominated by program trading, used to profit on price differences between stocks and stock-index futures, which pushed the blue chips around most of the day. Buy programs asserted themselves in late trading, sending the blue chips into the plus column.

"There was also some bargain hunting," said Ron Doran, director of institutional trading at C.L. King & Associates in Albany, N.Y. "Programs initially kicked it off but then there were some buyers coming in to mark stocks up a little."

A midday bout of program selling had pushed prices down. At one point the Dow industrials were down as much as 25 points, but soon recovered to post a modest loss.

In early trading, prices drifted narrowly as the market struggled to find a new course after Monday's plummet in the Dow industrials. The key average plunged more than 100 points in the early going Monday before recovering to close with a loss about half that size.

Oil issues, meanwhile, gained from news that U.S. officials were watching with concern the buildup of Iraqi armed forces along the Kuwaiti border but were not taking "any special steps to change the status" of American forces in the region.

The massing of Iraqi forces is a suspected outgrowth of tensions stemming from excessive OPEC oil production, blamed by Iraq for lower world oil prices.

"It was a good day compared to yesterday, a good recovery from a poor situation," Doran concluded. "It was fairly stable and I think that's what major players were looking for - stabilization."

On the trading floor, Dow Chemical was the most active issue, down 5 3/4 to 52 3/8. Student Loan Marketing Association, known as Sallie Mae, followed, down 1 3/4 to 48 1/8. Mesa Limited Partnership was third, up 1/8 to 4 1/8.

Among other blue chips, Woolworth fell 1 1/8 to 32 5/8, IBM lost 1 1/8 to 114 3/4, General Electric rose 3/8 to 72 7/8 and McDonald's rose 1/4 to 33 1/4.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 216,727,660 shares, compared with 250,496,270 shares traded in the previous session.

Prices closed mixed in active trading on the American Stock Exchange. The Amex Market Value index rose 0.59 to close at 355.51. Declines led advances, 312 to 252, among the 811 issues traded. The price of an average share rose two cents. Composite volume totaled 16,649,640 shares, compared with 20,043,500 shares traded Monday. An oil and gas exploration company, Energy Service, led the Amex issues, up 1/4 to 4 1/4.

The National Association of Securities Dealers composite index fell 2.08 to 442.56.

#90205u2389 07/24/1990 ~United Press International

RENO, Nev. (JULY 24) UPI - Subliminal messages allegedly recorded on an album by the heavy-metal rock group Judas Priest ''played a contributing role'' in the suicides of two young men, an expert in subliminal messages testified Tuesday.

Howard Shevrin, a professor of psychology at the University of Michigan said the phase ''Do it,'' allegedly hidden on the group's ''Stained Class'' album was responsible in part for the deaths of Raymond Belknap and James Vance. The two shot themselves in 1985 after listening to the songs for several hours while drinking beer and smoking marijuana.

Shervin, who said he has been researching ''subliminal perception'' since 1956, said messages appealing to the subconcious mind can prompt ''compulsive reactions'' in people.

Shevrin was a key witness in the district court trial in which the parents of Belknap and Vance claim subliminal messages were mainly responsible for their deaths.

On Dec. 23, 1985, Belknap, 18, died instantly after shooting himself with a shotgun. Vance, then 20, blew away his face but lived for three years before dying of complications from the wounds and the prescription drugs.

The parents of the two young men argue that the words ''Do it, do it,'' masked under a drum beat on the album, invaded the subconscious of the young men and led to their suicide pact. They also contend that the record

played backwards includes such sayings as ''F-- the Lord.''

Judas Priest and CBS Records both deny there were any hidden messages on the record.

Shevrin's testimony ran contrary to that of Dr. Donald Lunde, a clinical professor of psychiatrist and behavorial sciences at Stanford, who told District Judge Jerry Whitehead Monday a subliminal message would not trigger suicide. Lunde said the high risk factors in the background of the two troubled youths were the reasons for the suicide attempts.

Shevrin said the ''inner conflicts'' of the two young men, the lyrics on the records and the subliminal message all contributed to the tragic event. He testified that if one of those ingredients had been missing, there probably would not have been a suicide.

He said the victims exhibited ''violent destructive behavior'' and had conflicts with girlfriends, families and others. They became like brothers using drugs and alcohol and turned to the heavy metal music ''as a source of support and strength.''

Shevrin said he based his conclusions on the subliminal messages on the pretrial testimony of William Nickloff, a sound engineer who said he was able to decipher the words ''Do it'' in at least seven places on the album.

Attorneys for the family say their case may be complete by early next week. They have not yet revealed how much money they are seeking but the medical bills for Vance were in excess of $400,000.

A verdict for the parents could force record companies to screen lyrics or face the possibility of having to pay huge punitive damages in similar cases.

There have been at least three previous cases - in California, Georgia and New Jersey - in which suicides have been blamed on the album ''Suicide Solution'' by the rock singer Ozzy Ozbourne, another performer who has recorded for CBS.

The California case was dismissed when a court ruled that song lyrics were protected by the free speech provisions of the First Amendment. The Georgia case is still pending, and heavy metal is no longer a factor in the New Jersey case.

In the Judas Priest case, U.S. District Judge Jerry Carr Whitehead has ruled that subliminal messages are not a form of speech and therefore are not covered by First Amendment protections. But he has not ruled whether the Judas Priest album contains such material.

#90205u2408 07/24/1990 ~United Press International
NEW YORK (JULY 24) UPI - A bus carrying children home after a day at the beach Tuesday went out of control on a rain-slicked Brooklyn street and crashed into a tree injuring 11 youngsters, one of them critically.

Police said the driver of the vehicle suffered a heart attack after the accident and died later in a hospital.

One of the children was rushed by helicopter to Bellevue Hospital in Manhattan in critical condition with head injuries, An Emergency Medical Services spokesman said, while 10 other children were taken to other hospitals. Their identities and conditions were not disclosed.

The accident occurred about 2:15 p.m. when the bus ran over a large puddle ''hydroplaned'' over the water and then slammed into a tree, Police spokesman Scott Bloch said.

An unidentified adult who was on the bus with the driver and the children was the only person to escape injury.

HOUSTON (JULY 24) UPI - Franchisees of the Jiffy Lube auto lubrication chain alleged Tuesday that Pennzoil Co., Jiffy Lube's parent company, is engaged in a conflict of interest, in which it backs both Jiffy Lube franchises and the independent stations with which they compete.

The owners of 25 of 27 Houston-area Jiffy Lube outlets have filed a $150 million suit against the company, alleging the conflict of interest and claiming it lied about financial problems and tried to force franchisees out of business.

The suit was filed last week in Galveston County against Jiffy Lube and its parent, Pennzoil Co. Jiffy Lube officials declined to discuss the suit.

''Our position is that because there is litigation pending, we will deal

with these issues in the courthouse,'' said Carolyn Foster of Jiffy Lube.

Pennzoil, which purchased 80 percent of financially troubled Jiffy Lube earlier this year in a $43.5 million deal, also declined Tuesday to discuss the suit. But spokesman Bob Harper said most of Jiffy Lube's financial problems began long before the Houston oil company acquired its interest in the chain.

The suit claims Jiffy Lube lied about its financial problems and deliberately undercut its franchisees in the hope of gutting them, closing them down and reselling them.

The suit also charges Pennzoil has taken an active role in Jiffy Lube's affairs, despite its interest in a chain of quick-lube outlets that has become one of Jiffy Lube's largest national competitors.

The franchise owners - Pride Enterprises, Ultra Lube, Houston Lube, G.G.S. Inc. and K Washington Lube - are seeking $30 million in actual damages, $120 million in punitive damages and $1.6 million in attorney's fees and expenses.

Most of Jiffy Lube's 1,107 quick-lube centers are independent franchises, and 85 to 90 percent of these franchises use Pennzoil oil and products.

But Pennzoil also has contracts to supply oil to 550 independent stations that compete throughout the country with Jiffy Lube centers, according to John Sasser, president of the Jiffy Lube Association of Franchisees. Under these sales contracts, Pennzoil provides the independents with financing and assistance in site selection and advertising.

Sasser, who owns 47 Jiffy Lube franchises in partnership with three other people, said Pennzoil voluntarily terminated its supply contracts with independent stations when the company signed a strategic alliance with Jiffy Lube in March 1988.

But Sasser said Pennzoil mysteriously amended the alliance agreement to allow such contracts two months before acquiring Jiffy Lube.

The company also has continued to lose money for the past two years, prompting complaints and threats of more lawsuits from franchisees.

The franchisees' association, representing 575 Jiffy Lubes nationwide, has raised more than $250,000 in anticipation of a legal battle against the company, although it has not filed suit.

The Galveston suit, however, claims Jiffy Lube induced investors to acquire new franchises by providing financial information the company knew was incorrect.

As a result, the suit says, investors bought the outlets not knowing their profits would never meet royalty payments owed Jiffy Lube.

The suit claims the scheme was designed to destroy the franchises.

The operators' suit also states Pennzoil's interest in a chain of ''10 Minute Lube'' centers is in conflict with its Jiffy Lube holdings.

#90205u2447 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - Claiming the House ethics committee's recommendation of a reprimand against Rep. Barney Frank, D-Mass., does not go far enough, Rep. Newt Gingrich, R-Ga., said Tuesday he would seek the harsher penalty of censure against Frank for dealings with a male prostitute.

Gingrich, assistant Republican House leader, said he does not think Frank should be expelled the House, a punishment to be sought by Rep. William Dannemeyer, R-Calif., saying such a penalty would be ''too tough.''

But Gingrich said censure was needed ''to have any sense of dignity'' about the House. Gingrich said Frank's behavior in the case was ''stunning'' and ''totally violated public trust'' and called censure ''the minimum appropriate action.''

The House is expected to consider the matter Thursday.

The ethics committee, in a report released Friday, cited Frank for forwarding a memorandum on behalf of Stephen Gobie - an admitted prostitute who was on probation on felony convictions of cocaine dealing and child pornography - to Virginia law enforcement officials that contained inaccurate information and for fixing 33 parking tickets incurred by Gobie. The committee of six Democrats and six Republicans approved the reprimand recommendation unanimously.

A reprimand is the least severe punishment involving action by the full House that the ethics committee could recommend. It requires Frank to stand before the House while Speaker Thomas Foley reads the reasons for the punishment. A censure, in addition to the reading, would strip Frank of his position as chairman of a Judiciary subcommittee.

But Foley predicted the House would follow the recommendation of the ethics committee, saying there is ''a very strong record'' of the chamber accepting the advice of the panel.

Frank, a leading liberal voice in the House who is heavily favored to win

re-election in November for a sixth term, has admitted to paying Gobie $80 for a sexual encounter in 1985 and later hiring him as an aide with personal funds. Frank, an admitted homosexual, said he fired Gobie in 1987 after learning Gobie was operating a prostitution service out of Frank's Capitol Hill home.

In a statement released Tuesday, Frank reiterated that he finds reprimand ''an appropriate recommendation.''

''I am disappointed that there are efforts to politicize the ethics committee report, in sharp contrast to practice in the House in virtually every case,'' Frank said.

There is recent precedent for the House rejecting the recommendation of the ethics committee in order to impose tougher penalties. In 1983, the committee urged reprimands for Reps. Daniel Crane. R-Ill., and Gerry Studds, D-Mass., but the House voted for censure.

#90205u2454 07/24/1990 ~United Press International

NEW YORK (JULY 24) UPI - The dollar slipped again Tuesday on Congressional testimony by Federal Reserve Chairman Alan Greenspan, which money traders interpreted as indicating U.S. short-term interest rates will drop further.

Currency traders said market participants were wary of Greenspan's assertions to a House banking subcommittee that inflation was being mastered despite his central bank's recent moves to ease interest rates.

''The dollar seemed to take a hit after Greenspan's comments,'' said currency vice president Earl Johnson of Harris Trust & Savings Bank in Chicago. He said they ''got people thinking about possible Fed easing again.''

Global investors expecting lower U.S. interest rates tend to divert funds to higher-yielding investments in other currencies. The resulting dollar sales drive down the currency's price against other units.

In late New York dealings the dollar changed hands at 1.6213 German marks, down from 1.6215 late Monday. It was quoted at 148.80 Japanese yen, ahead from the previous closing price of 148.20.

Noting an ascendant deutsche mark, Johnson said German ''confidence is coming back'' as economic union proceeds without major problems.

Economist Cynthia Latta of DRI/McGraw Hill, a Lexington, Mass., financial and business research company, said the dollar's fall indicated world

investors ''are not at all persuaded'' the Fed has dampened inflation.

Diminished Fed militance against inflation would give Greenspan more latitude in easing credit to stave off a recession, she said.

Tensions in the Persian Gulf provided the dollar with some background support but were not a major influence, Johnson said.

Other late New York dollar rates: 1.3780 Swiss francs, down from 1.3825; 5.4350 French francs, off from 5.4430; and 1,186 Italian lire, down 2 lire from the previous day's 1,188.

The British pound slipped to $1.8135 from $1.8255.

In Europe, the dollar closed lower against the major European currencies in a continuation of Monday's plunge on Wall Street losses. But it rallied briefly on reports Iraqi troops were moving to the Kuwait border.

Currency dealer Wayne Andrews of the large British investment bank Barclays de Zoete Wedd predicted the dollar will keep falling as the Federal Reserve is forced to lower interest rates to ward off a recession.

In Frankfurt, the dollar closed lower at 1.6255 marks against 1.6285 at Monday's close. The dollar was down in Zurich at 1.3865 Swiss francs compared to 1.3925 at Monday's close.

In London, the pound closed slightly lower against the U.S. unit at $1.8250 against $1.8215.

The U.S. unit closed lower in Paris, Brussels and Milan, to 5.4475 French francs against 5.4920, to 33.45 Belgian francs, a drop from the last trading Friday, when exchanges closed at 33.85 before a long weekend, and 1,189.60 lire compared with 1,198.75.

The dollar's Milan closing was the lowest for the dollar in Italy since Jan. 5, 1988, when it dipped to 1,187.50.

Earlier in Tokyo, safe-haven buying on Gulf tensions gave the dollar a modest boost against the yen. It ended at 148.70 yen against 148.50.

In Zurich, gold closed higher at $369 an ounce against $366.50, and was also higher in London at $369 an ounce against $368.25.

Dealers said investors were buying gold as a hedge against further declines in stocks and the dollar after Monday's U.S. equities drop.

Republic National Bank in New York closed cash gold at $367.50 an ounce, off from $368.75 Monday. The New York Commodity Exchange settled gold at

$367.90 an ounce, off from $369.10.

Silver closed lower in Zurich at $4.90 an ounce against $4.92. The metal fell off in London as well, to $4.87 an ounce compared with $4.92.

Republic closed cash silver at $4.825 an ounce, down from $4.90, while Comex silver slipped to $4.811 from $4.882.

#90205u2455 07/24/1990 ~United Press International

BEIRUT, Lebanon (JULY 24) UPI - Iran said Tuesday it would soon issue a death sentence against Roger Cooper, a British businessman imprisoned on spying charges.

The pro-government Iranian magazine Kayhan Havai, in a report telexed to the Beirut office of United Press International, quoted Ayatollah Muhammad Yazdi, the head of Iran's Judiciary, as saying: ''The verdict (against) Cooper would be executed immediately after being issued.''

''The Supreme Court is to issue its verdict on Roger Cooper, a British national arrested and jailed in Iran on espionage charges, in the near future,'' Havai quoted Yazdi as saying.

Cooper was jailed in Iran last year after London severed diplomatic relations with Tehran in the furor over publication of the book ''The Satanic Verses'' by British author Salman Rushdie. The late Ayatollah Ruhollah Khomeini's branded the book blasphemous to Islam and called on Moslems around the world to try to kill the author.

-30- 1159

#90205u2467 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - Federal prosecutors have urged a judge to impose a four-year prison term and a $500,000 fine on a drug company official convicted of using payoffs to speed up government approval of generic drug applications.

The penalty was proposed in a sentencing memorandum in the case of Raju Vegesna, who worked for American Therapeutics Inc. of Bohemia, N.Y., and is scheduled to be sentenced Thursday in U.S. District Court in Baltimore on two racketeering counts, which were part of a plea agreement.

Vegesna is one of 13 pharmaceutical company and Food and Drug Administration officials convicted in the 1988 scheme that revealed company payoffs for quick government action on generic drugs applications.

''Of all the generic drug company officials who have come before this

court for sentencing, Raju Vegesna's criminal conduct was the most extensive and egregious.

''He made unlawful payments to four employees of FDA's Generic Drug Division - Charles Chang, David Brancato, Jan Sturm and Walter Kletch. He chose to violate the law on 12 occasions in the span of 14 months. His unlawful payments totaled over $60,000,'' U.S. Attorney Breckinridge Willcox said in a July 20 sentencing recommendation to the court.

He also said Vegesna destroyed documents ''to eliminate a paper trail.''

Willcox recommended that Vegesna receive a four-year prison term and a $250,000 fine on one count and a suspended sentence, with three years' probation, and a $250,000 fine on the other. He could get five years in prison and a $250,000 fine on each count.

The sentencing memorandum describes American Therapeutics drug applications that ''breezed'' through FDA's approval process, including:

-Maxide, or triamterene-hydrochlorothiazide, was the last of seven applications submitted to FDA for the product, yet it was approved first. It was approved in 182 days while Brancato, the review chemist, took 276 days to review the application that received approval second.

-Chlorazepate dispotassium was submitted 19 days after FDA received the first application for the product, yet American Therapeutics' application was the first approved - 158 days before the first application was approved.

-Trazodene hydrochloride, was submitted 10 months after the first application for the product was filed with the FDA, but was approved 19 days after the first applicant.

Vegesna's attorneys could not be reached for comment, but Willcox's memo notes that defense attorneys had urged leniency in the sentencing because of Vegesna's cooperation and because he is in ''dire financial straits.''

Willcox countered by telling the judge that Vegesna's financial statement shows he has hundreds of thousands of dollars and lives in an elegant home on New York's Long Island.

So far, four former generic drug executives, not counting Vesegna, four former FDA officials, one consultant and three companies have been convicted and sentenced. Another former FDA official has been indicted and is awaiting a September trial.

#90205u2472 07/24/1990 ~United Press International

FAIRBANKS, Alaska (JULY 24) UPI - Firefighters battled growing blazes near villages, highways and the trans-Alaska oil pipeline Tuesday, but the all-out fight, along with favorable winds, kept potentially disastrous fires away from people, property and the pipeline.

Thundershowers predicted for the fire-ravaged interior of Alaska brought more lightning than rain Tuesday, posing a danger of new blazes as fire officials prayed for rain to drown out fires burning uncontrolled throughout the dry interior of the state.

The 121 fires raging on 1,268,381 acres of Alaska have been sparked by lightning throughout July.

Most of the 2,700 firefighters at work were dispatched to a few dozen key fires that posed threats.

''We're monitoring one fire 15 miles south of Pump Station No. 5 about 1 1/2 miles from the pipeline,'' said Marnie Isaacs, spokeswoman in Anchorage for Alyeska Pipeline Service Co., the consortium of oil companies that operates the 800-mile pipeline, which carries one-fourth of domestic crude from Prudhoe Bay to Valdez for delivery to U.S. refineries.

''It's not a threat,'' Isaacs said of the 120,000-acre blaze.

She said the Dalton Highway, a supply road from Fairbanks to Prudhoe Bay, presented a good 30-foot-wide firebreak, and she said Alyeska had water trucks ready to help fight flames if the fire got too close for comfort. She also said that tundra in the area offered less fuel.

A 3-mile section of pipeline was buried, but Isaacs said the above-ground section was wrapped in a thick insulating metal sheath that protected the pipeline from flames.

Another fire burned to the Dalton Highway and stopped without crossing it to the pipeline, said Trish Hogervorst-Rukke, a fire information officers at Alaska Fire Service headquarters.

Visibility on the Dalton Highway was very bad, said John Horn, regional director of the state Department of Transportation, but he said traffic was moving on the oil field supply road and on the highways to Canada, which have been closed at times by flames and smoke.

But Horn said smoke in Fairbanks - 50 miles from the closest fires - was worse Tuesday than at any time in the past week.

''Visibility at the airport was down to three-quarters of a mile,'' he said. ''This is the worst day yet, and you can really smell it.''

Smoke blanketed interior Alaska, making it difficult to fight some of the smokier fires, Hogervorst-Rukke said.

An air quality health alert remained in effect for many areas.

Fires threatening the towns of Tetlin, Minchumina and Old Crow in the Yukon Territory were held back by winds or by fire lines carved into the earth and often stretching between lakes.

The biggest fires were burning on national wildlife refuge land managed by the U.S. Fish and Wildlife Service, but fires also were burning on other federal and state lands and on native lands.

A new concern was that some firefighters were dropping out of the fire, Hogervorst-Rukke said. ''They sign up for 21 days, and some are not renewing after their three-week contract expires.''

Most have been working for three weeks without a break. Weather was the biggest factor in determining how much longer the battle would continue.

#90205u2475 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - In June 1986, Supreme Court nominee David Souter voted with the majority in an auto insurance case despite the fact he thought New Hampshire's top court was wrong.

While the case itself was of little importance to those not involved, it offers a key insight into the man who may replace Justice William Brennan. Souter wrote separately to note that the sole reason he joined the majority was ''stare decisis,'' a term used to decribe the legal principle of following previous court rulings and the mark of a cautious, workmanlike jurist.

Souter, who spent most of Tuesday at the White House preparing for the confirmation process, has written 191 opinions while on the New Hampshire Supreme Court but none of them directly deal with the pressing issues of the day such as the right to abortion, affirmative action or church state disputes.

He has no record of public speeches or piles of law review articles of the sort that helped lead to the demise of Robert Bork in 1987. However, despite the paucity of such documents, a picture of Souter has begun to emerge.

A review of his opinions shows him to be a judge definately in the conservative mold who often ruled against criminal defendants. His

writings, however, have none of the fire of Justice Antonin Scalia and more resemble those of Justice Anthony Kennedy, who was eventually confirmed to the seat Bork failed to capture.

A bachelor, the 50-year-old member of the 1st U.S. Circuit Court of Appeals likes to jog and hike the Appalachian Trail, study New Hampshire history and collect books. Souter, who has reported his net worth as $621,000, lived on the family farm in rural Weare, near Concord, is a Harvard and Harvard law school graduate and a Rhodes scholar.

Senate Judiciary Committee Chairman Joseph Biden, D-Del., has not set a date for the start of hearings but it is likely they will be held in September so that Souter could be confirmed before the Supreme Court session opens on the first Monday in October.

According to White House officials, Souter will meet with Senate leaders of both parties Wednesday and Thursday as the FBI updates the background investigation it conducted for his appeals court seat.

President Bush, aware a Senate battle could break out over his first nominee to the Supreme Court, said Tuesday ''we're not bracing for some horrendous fight with the United States Senate.''

Bush said ''there was no single issue, no litmus test or standard dominating'' his decision and added there ''should be no litmus test in the process of confirmation.''

In a Senate speech, Sen. Arlen Specter, R-Pa., a member of the Senate Judiciary Committee, said it would be ''innapropriate'' for senators to ask Souter his position on abortion although he called it the ''most divisive'' issue since slavery.

However, on a Supreme Court where the right to abortion has been in jeopardy since a closely decided 1989 case giving states more power to regulate the procedure, both Bush's and Specter's comments may be wishful thinking.

Even though Souter testified only briefly last April prior to his appeals court appointment, he did give a glimpse of his thinking on issues.

Sen. Edward Kennedy, D-Mass., asked Souter about a unanimous New Hampshire Supreme Court decision he wrote overturning the conviction of a man accused of rape because the trial court exluded evidence that the victim made ''suggestive advances'' to several men, including the defendant.

Kennedy said the decision appeared to contradict the state's ''Shield Law'' which forbids the admission as evidence prior consensual sexual activity between the victim and any person other than the defendant and

asked Souter ''will you be sensitive to the privacy interests of rape victims.''

''Yes,'' Souter replied, explaining there was always an ''obvious tension'' between protecting the rape victim and the ''undoubted right'' of a defendant ''to present proofs favorable to himself.''

''There comes a point at which the testimony which, on the face, is excludable under the rape shield law becomes so relevant and so important to the issue of guilt and innocence that the statute has to yield to the Constitutional interests,'' Souter said.

Another of Souter's opinions involved a medical malpractice case decided in 1986 in which a woman who contracted measles during her pregnancy and gave birth to a baby with severe defects sued her obstetrician.

The woman argued her doctor was negligent in failing to warn her of the possibility of birth defects so that she could have undergone prenatal testing in time to terminate the pregnancy. The doctor was against abortion.

The court sent the case back to lower court for trial on the claims and Souter, in a concurring opinion, expressed concerns about the prospect of ordering an anti-abortion doctor to inform a patient about abortion.

''The trial court did not ask whether, or how, a physician with conscientious scruples against abortion, and the testing and counseling that may inform an abortion decision, can discharge his professional obligation with engaging in procedures that his religious or moral principles condemn. ... The court does not hold that some or all physicians must make a choice between rendering services that they morally condemn and leaving their profession in order to escape malpractice exposure.''

CAMBRIDGE, Mass. (JULY 24) UPI - Fifteen Supreme Court justices have listed Harvard Law School on their resume, but never have the school's alumni been packed on the high court so densely as in recent years.

President Bush's nominee David Souter would be the 16th Harvard alumnus to sit on the high court, joining current members Antonin Scalia, Anthony Kennedy and Harry Blackmun. Outgoing justice William Brennan graduated from Harvard, as did 1986 retiree Lewis Powell.

''I'd say it's the most influential law school,'' said Harvard professor Richard Parker. ''It's certainly one of the four best in the U.S and because of its size and historic influence, it's fair to call it the most

influential.''

Harvard graduates on the Supreme Court have come in waves - in 1906, four sat on the high court: Oliver Wendell Holmes, Henry Billings Brown, William Henry Moody and the only chief justice the school ever produced, Melville Fuller.

Its alumni have also twice served concurrent terms. Louis Brandeis and Edward Sanford both served from 1923 to 1930, while Felix Frankfurter and Harold Hitz Burtom both sat from 1945 to 1958.

Other Harvard-educated justices were Benjamin Robbins Curtis, who served from 1851-1857 and Horrace Gray, on the court from 1882-1902.

The school's three acknowledged peers in American legal education - Stanford, Yale and Chicago universities - can all lay claim to the top spot in various specialties, professors agreed. But according to William Fisher, director of the school's Program on Legal History, none quite maintains Harvard's pervasive influence.

''It produces by far the largest number of teachers,'' Fisher said. ''As for the effect on government decision-making, it probably used to be that Yale had a stronger reputation of public service, but that seems to have changed over the last few years.''

Fisher said there were two popular impressions of Harvard Law and its philosophy - one the ''Paper Chase'' version of a rigorous, classically orthodox school; the other of a nest of radicalism, the ''nihilism in action'' view.

''Neither is right,'' he said. ''Harvard Law is not dominated by any particular strand of theory. You'll find and extremely wide array of people here.''

Sixteen-year professor Richard Parker called Harvard's the ''most pluralistic law school in the country,'' but said that has not always been the case.

''I would say until the early 1970s it may well have been one of the least diverse faculties in the country,'' Parker said. ''Not conservative by today's standards, but one dominated by establishment liberalism of an unadventuresome, unimaginative sort.''

The professors said there was no ''typical education'' associated with Harvard Law School.

''That argument would be based on the assumption that during the three years, students minds were somehow decisively formed, and I think that's

just not true,'' Parker said. ''I think that list of five - Kennedy, Scalia, Blackmun, Brennan and Souter - speaks for itself. That's a very diverse group.''

#90205u2516 07/24/1990 ~United Press International

NEW YORK (JULY 24) UPI - Gasoline production of the nation's refineries rose to a 1990 high and supplies increased last week at a time of year when they normally fall, the American Petroleum Institute reported Tuesday.

The API statistics for the week ended July 20 provide some hope to drivers of a stop in the rise in retail prices at the pump that has occured over recent months.

The industry group reported that gasoline production last week hit a yearly high of 7.4 million barrels daily, compared to 7.2 million barrels a day in the previous week and higher than the year-ago output of 7.3 million barrels daily.

Refinery utilization increased for the fourth week in a row, with U.S. refineries operating at 93.7 percent of capacity last week, compared with 92.9 percent a week earlier and 90.7 percent a year ago.

Pump prices rose during recent months as U.S. refineries were relatively slow to emerge from their annual maintenance ''turnarounds'' from heating oil to gasoline production.

Some large refineries suffered damage during last December's freeze and needed more extensive maintenance than usual.

Gasoline supplies, which normally fall at this time of year with warm-weather driving, increased to 216.3 million barrels from 215.6 million barrels in the prior week but remained below year-ago levels of 221.3 million barrels.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, also increased to 167.2 million barrels from 166.6 million barrels a week earlier and were significantly higher than year-ago levels of 156.3 million barrels.

Gasoline imports slipped to 448,000 barrels daily from 487,000 barrels daily in the previous week but were well above year-ago imports of 217,000 barrels daily.

Crude oil inventories declined to 383.7 million barrels from 385.3 million barrels in the prior week but remained way above year-ago levels of 330.5 million barrels.

Crude oil imports fell to 6.6 million barrels a day from 7.0 million barrels a day in the previous week but were higher than year ago imports of 6.4 million barrels a day.

Imports of refined products edged up to 2.0 million barrels daily from 1.9 million barrels daily in the preceding week but were less than year-ago imports of 2.2 million barrels daily.

Inventories of distillate - used for home-heating oil and diesel fuel - rose to 117.1 million barrels from 114.7 million barrels a week earlier and remained above year-ago levels of 109.4 million barrels.

Distillate production remained level at 2.9 million barrels daily, the same level as the preceding week and was higher than year-ago output of 2.8 million barrels daily.

Distillate imports fell to 277,000 barrels a day from 281,000 barrels a day in the previous week but were much less than year-ago imports of 398,000 barrels a day.

#90205u2535 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - President Bush has selected the three U.S. representatives for a new board of an international environmental center being set up for Central and Eastern Europe, the White House said Tuesday.

Those named were Frank Loy, president of the German Marshall Fund of the United States; John Schmitz, deputy counsel to the president for environmental and energy matters, and Helen Patrauskas, vice president for environment and safety engineering for Ford Motor Co.

They will serve on the board of trustees of the Regional Environmental Center for Central and Eastern Europe, which is being established in Budapest, Hungary, to coordinate a response to pollution and related problems in the area.

White House press secretary Marlin Fitzwater said William Reilly, adminitsrator of the Environmental Protection Agency, will represent Bush at the official opening of the center planned for Sept. 6.

Congress has authorized $5 million for the Regional Environmental Center as part of the Support for Eastern European Democracy Act of 1989.

#90205u2539 07/24/1990 ~United Press International

SAN JOSE, Calif. (JULY 24) UPI - Chips and Technologies Inc. posted fourth-quarter net income of $6.3 million, or 41 cents a share, down 37.6 percent from $10.1 million, or 65 cents a share, in the same quarter of 1989.

The company, one of the most profitable companies in California in the late 1980s, also reported its first decline in full-year earnings.

Sales for the semiconductor manufacturer rose to $81.7 million from $61.8 million in the year-earlier quarter.

The decline in profits was expected. Lower prices for the company's older computer chipsets cut into profit margins, the company said. At the same time, a worldwide shortage of Intel's 386DX and 386SX microprocessors caused Asian computer manufacturers to buy fewer chipsets, which are used in conjunction with Intel microprocessors in IBM-compatible computers.

For fiscal 1990, net income slid 11.2 percent to $29.3 million, or $1.88 a share, from $33 million, or $2.23 a share, in the prior year. It was the first year in the company's 5-year history that it has posted a decline in annual earnings.

Sales grew to $293.4 million in fiscal 1990 from $217.6 million in the prior year.

The dip in profits was a sharp contrast to 1989, when Chips and Technologies was ranked No. 1 on the Los Angeles Times 100 list of the most profitable corporations in California with a 66.5 percent return on equity in the prior two years.

A company spokeswoman said an ongoing product transition should improve profit margins in the current fiscal year.

NEW YORK (JULY 24) UPI - President Bush will nominate Ryan Crocker, the political counsel at the U.S. Embassy in Cairo, to be U.S. ambassador to Lebanon, the White House announced Tuesday.

Crocker, 41, has been stationed in Cairo since 1987 and is a former chief of the political section of the U.S. Embassy in Beirut. He would succeed Thomas McCarthy.

#90205u2590 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - Mayor Marion Barry's chauffeur testified

Tuesday that he drove Barry straight from his home to two government functions the morning a prosecution witness said Barry was elsewhere buying crack cocaine.

Walter Bracy offered what appeared to be a strong alibi for Barry on one of the 14 cocaine and perjury counts against him, but under cross-examination he told an exasperated prosecutor he could remember virtually no other details from chauffeuring Barry throughout his 12 years in office.

Bracy said he picked Barry up at his home about 9:15 a.m. on Sept. 7, 1988 and drove directly to a ribbon-cutting ceremony for a Safeway grocery store, then drove him to fire department headquarters for a meeting that lasted nearly until noon.

Government witness Lydia Pearson testified earlier this month that she delivered crack to the mayor at the Frank D. Reeves Municipal Center at about 10 a.m. that day, handing Barry a job application at the same time, the basis for one of the cocaine possession counts.

Under cross-examination Bracy told Assistant U.S. Attorney Judith Retchin he did not remember three other ribbon-cutting ceremonies she cited since Sept. 7, 1988. He also said he did not remember any specific details of events where he drove Barry this year between January and May.

Bracy drives for Barry between 7:30 a.m. and 3:30 p.m. daily, but said he has never driven Barry to a private residence in Washington.

During the 8-week-old trial, 10 prosecution witnesses testified Barry used cocaine or was supplied the drug at 20 homes - besides 15 hotels, four boats and two government offices.

''Is there anything you do recall, any place you do recall taking Mr. Barry?'' asked Retchin.

''Only to the District Building'' where the mayor's office is located, Bracy replied.

Pearson testified that she sold Barry cocaine 25 times in the summer of 1988, including Sept. 7 at the Reeves Center.

On Monday, a worker at the Reeves Center testified he received Pearson's job application that morning and did not even see Barry. The city's fire chief and another official said Barry was at the fire department meeting, but they could not say when he arrived.

On Tuesday, Mundy called former city worker and convicted drug dealer Charles Lewis back to the stand. Lewis is the key prosecution witness for

seven of the 14 counts against Barry, including all three felony counts of perjury.

Mundy had hoped to discredit Lewis, who proclaimed himself a small-time drug dealer, by linking him to drug kingpin Rayful Edmond III, convicted in December as the city's largest cocaine dealer.

But Lewis denied any connection to Edmond, and U.S. District Judge Thomas Penfield Jackson said Mundy had no viable evidence of his allegations and could not pursue the questioning with the jury present.

But Lewis did testify again with the jury present, acknowledging that he provided the government with the names of four women who later testified against Barry about his alleged drug involvement in the Virgin Islands.

Mundy questioned Lewis about the behavior of one of the women, Linda Maynard, who testified that during a party at a Virgin Islands hotel where crack cocaine was present, Barry forced her to have sex with him.

Lewis said he and Barry walked Maynard to her car after the alleged sexual assault, and that Barry kissed her on the cheek and she did not seem ''distraught,'' ''irritated'' or ''hurt.''

''Was their conduct friendly toward each other?'' Mundy asked.

''I would say so,'' said Lewis.

Mundy also had wanted to call the husband of another government witness to the stand. Carol Bland Jackson has testified that she was present when Barry snorted cocaine at a city apartment in the summer of 1986.

Mundy said Roscoe Jackson would testify that his wife told him former model Rasheeda Moore offered her $5,000 to ''back her up'' about Barry's drug use on that occasion.

Carol Jackson, questioned in court without the jury present, said her husband is in prison and that she had not spoken to him in a year.

Asked if Moore - Barry's former lover who worked with the FBI in the Jan. 18 sting that led to his arrest - offered her money in exchange for testimony, Carol Jackson said ''absolutely not.''

Judge Jackson ruled that Mundy again had no grounds for pursuing the allegation before the jury.

Two witnesses testified Tuesday that Barry was at the Safeway opening Sept. 7, 1988.

Mundy said he expected to call at least four more witnesses before resting te defense case. He said he had not decided whether to put Barry on the stand.

Outside court, Barry said he had been rehearsing testimony and said the chances were ''50-50'' he would testify.

Barry, 54, is charged with three felony counts of perjury and 11 misdemeanors counts of cocaine possession and conspiracy to possess cocaine. If convicted of all counts he could be sentenced to 26 years in prison and fined $1.85 million.

#90205u2594 07/24/1990 ~United Press International

WASHINGTON (JULY 24) UPI - The Commodity Futures Trading Commission Tuesday made its first charges in a long-standing criminal and civil investigation into fradulent trading practices at New York commodity exchanges.

The federal agency charged three New York area brokers and a futures trader with fraud in the handling of customer orders for crude oil futures contracts traded on the New York Mercantile Exchange.

The federal agency in a statement said charges had been filed against Michael Pomerantz of Scarsdale, N.Y., and a brokerage firm he owned, MSP Trading Inc.

Also charged were Lawrence Beck of Fort Lee, N.J. and John King of Oldbridge N.J., independent floor brokers who worked for Pomerantz, and a trader named Douglas Friedman of Forest Hills, N.Y.

No action was taken against the NYMEX itself, which cooperated in the CFTC probe, the statement said.

According to the CFTC charges, which will be brought before an administrative law judge, most likely in New York, Friedman worked in collusion with the other three to execute unfair trades from July of 1988 through December 1988.

In 34 transactions that took place over the six month period, the three brokers took the opposite side of their own customer orders, which violates the antifraud provision of the the Commodity Exchange Act, according to Michael Klejna, CFTC director of enforcement for the CFTC.

Friedman was a NYMEX member, but is no longer; the three brokers are all currently NYMEX members.

The CFTC last year launched a criminal and civil investigation of trading practices at the NYMEX, the world's largest trader in oil-futures contracts, and the Commodity Exchange Inc., a leading exchange for trading precious metals.

The probe involved alleged ''front-running,'' the practice of a trader profiting from customers' orders and tips by buying or selling for his own account first.

In May 1989, federal agents with search warrants invaded the trading floor shared by the two exchanges to issue subpoenas to scores of traders for trading data.

Until now, no charges have been filed as a result of the investigation.

Front-running has been banned by the two exchanges. The two, however, endorse dual-trading, which allows traders to buy and sell for both their own accounts and those of customers.

Exchange officials argue that dual-trading is needed to provide the liquidity necessary for an orderly market.

The CFTC earlier this year proposed a rule that would outlaw all dual-trading.

#90205u2637 07/24/1990 ~United Press International

PHILADELPHIA (JULY 24) UPI - President Bush was back on the campaign trail Tuesday, walking a thin line between election battle cries for the GOP and a need for goodwill with Democrats who hold the key to a budget deal and confirmation of his Supreme Court nominee.

During a day of politicking that was expected to pull in $1 million for Republicans in Pennsylvania and New York, Bush displayed a kinder, gentler tone in deference to the sensitive state of political affairs in Washington.

In one breath denouncing ''fiscal follies'' and irresponsible spending by Congress, which for much of the past 40 years has been controlled by Democrats, Bush in the next welcomed cooperation by Democratic leaders in forging a bipartisan plan to cut the deficit.

The criticism was implied rather than direct and far more muted than might be expected in the run-up to the fall campaign. But White House officials acknowledged a decision had been made to tone down the rhetoric and avoid any undue antagonization.

The pendulum swung back Tuesday night in New York, where Bush said he was eager to reach a budget accord with the Democrats, but warned that ''as long as the liberal mindset dominates, we will be forced to measure our successes in catastrophes averted and calamities mitigated.''

The trip followed political appearances late last week that saw Bush praise House Democratic leader Richard Gephardt of Missouri, once the target of presidential pique as one of his most vocal critics in Congress, for his work on the budget summit.

In advance of the traditional Labor Day kickoff for political campaigns, Bush has begun to try out themes that may prove effective against the Democrats in the fall campaign without jeopardizing support he needs to move key priorities through Congress.

Last Friday in Montana, that had him blaming the Democrats for ''government by gridlock in Washington'' while crediting their leaders in Congress with ''some good cooperation'' in working on a bipartisan solution to the deficit crisis.

If at times Bush seemed confused or contradictory, that was just fine with his advisers, who believe he has more leeway to go on the attack at political events outside Washington than at close quarters inside the Capital Beltway.

Still, even that assumption acknowledges limits. And while popularity has afforded him certain freedom, a USA Today poll last week, showing his approval rating down, could point to risks in hammering the Democrats too hard.

For one, he needs their cooperation in negotiations on a deficit-reduction plan he has billed as critical to the continued growth of the economy. So too will Bush need Democratic votes to win Senate confirmation of David Souter, the little-known jurist he tapped Monday to succeed the venerable liberal William Brennan on the Supreme Court.

Several months ago, riding high on popular support for his invasion of Panama and the fall of communism in Eastern Europe, Bush might have confronted those challenges and others from a position of unquestioned strength.

But as foreign policy achievements are displaced on the national agenda by domestic political crises such as the deficit and the savings and loan debacle, public confidence appears to have softened and Bush could find it more difficult to frame the issues of the November election for the GOP.

-30- 3607

#90205u2642 07/24/1990 ~United Press International

LOS ANGELES (JULY 24) UPI - Marlon Brando's son, Christian, was ordered Tuesday to stand trial for murder in the shooting of his half-sister's boyfriend inside the actor's mountaintop mansion.

Brando's defense laywers had asserted the May 16 shooting was a tragic accident that arose from a struggle for a gun, or, at worst, the result of Christian's drunken rage upon learning that his sister, pregnant at the time, had been physically abused by her boyfriend.

But Deputy District Attorney Steven Barshop argued, ''This is not a struggle; this is not a fight. This is nothing but murder.''

After hearing two days of testimony in a preliminary hearing, Municipal Court Judge Larry Fidler sided with the prosecution and decided there was enough evidence to warrant a trial on murder charges.

Christian Brando, who has been held without bail since his arrest on the night of the slaying, was granted $10 million bail.

His father, who sat stone-faced in the front row throughout the hearing next to his younger son, Miko, left without comment through a rear entrance, avoiding the huge pack of reporters, photographers and others in the hallway. The victim's father, sitting nearby, also declined comment.

Christian Brando, a 32-year-old welder, was ordered returned Aug. 7 for arraignment in Superior Court on one count of murder and one count of possession of an illegal weapon, an assault rifle. That weapon was not used in the killing.

A third charge, possession of an illegal silencer, was dropped by prosecutors at the start of the preliminary hearing.

Dag Drollet, the 26-year-old Tahitian boyfriend of 20-year-old Cheyenne Brando and father of her newborn child, was shot to death in the den of the actor's large gated home in the Santa Monica Mountains.

Christian Brando told arresting officers Drollet was shot accidentally as the two men wrestled over a pistol.

Defense lawyer Robert Shapiro told Fidler Tuesday, ''This case, at most, is a manslaughter.''

Shapiro said Christian reacted the way any brother would when Cheyenne, who was nearly nine months pregnant, told him at dinner earlier on the night of the shooting that Drollet had beaten her.

''He wanted to go to this person and say, 'Hey, man, lay off my sister,'''

Shapiro said, and during the confrontation, ''the gun was discharged.''

Evidence that Christian Brando was legally intoxicated hours after his arrest also indicates he was too drunk to form the ''specific intent'' to kill needed to prove murder, Shapiro said.

But Barshop said the evidence shows Drollet was shot while he sat on a couch with a cigarette lighter in his left hand and a television remote control in his right hand.

During Tuesday's session, the attorneys quarreled over how long it took police to come to the house to photograph the slaying scene and do ballistics tests.

Shapiro said Brando left the room undisturbed for two months, delaying his plans to briefly turn it into a shrine to Drollet. ''He wanted to light a candle ... then clean up the blood and the residue and go on with his life.''

Meanwhile, although Fidler agreed there was enough evidence to warrant a trial, prosecutors figure to have a harder time winning a first-degree murder conviction.

About a month after the shooting, Cheyenne left for Tahiti and has been medically and physically unable to return to testify, leaving police and prosecutors with only her initial statements.

Fidler ruled Tuesday that Cheyenne's statement by itself was inadmissible.

He agreed with the defense that substituting a statement for Cheyenne's in-person testimony would deprive the defense of the constitutional right to cross-examine and confront an accuser.

Prosecutors suffered another setback Monday when Fidler ruled that Christian Brando's tape-recorded interview with detectives after his arrest cannot be used against him. Fidler agreed with defense attorneys that a Los Angeles police investigator erred by not fully informing Brando of his constitutional right to a lawyer.

The detective said when he read Brando his Miranda rights, he did not mention that an attorney would be appointed if Brando could not afford one.

Barshop said he will ask the Superior Court judge assigned to the trial to permit the tape as evidence.

#90205u2677 07/24/1990 ~United Press International

JULY 24) UPI - Thunderstorm rains flooded streets and stranded cars in Arizona and Massachusetts Tuesday, while runoff from days of heavy rains in southern Texas sent rivers and streams surging over their banks.

Interstate 17 through Tucson, Ariz., was closed at many intersections by up to 1-foot of standing water, the National Weather Service said. Dry creek beds were transformed into raging torrents with up to 7 1/2 feet of water.

Thunderstorms dumped 7 inches of rain on Middleboro, Mass., in less than six hours, the NWS said. More than 5 inches of rain in less than 4 hours caused extensive flooding at Bridgewater, Mass. High water stranded many vehicles in Fall River, Mass.

Power was cut to all of Cape Cod and Martha's Vineyard for part of the afternoon when lightning hit a power line, a spokesman for Commonwealth Edison said. About 160,000 customers were affected by the outage.

In the rural southern Texas county of Val Verde, rain tapered off early Tuesday, but runoff continued to flow into the Devils River, putting some low water crossings 6 feet under water.

Flood waters closed highways 163 and 189 in northern Val Verde County as well as the Dolan Creek Road near Loma Alta.

Farm interests said heavy rain in central, east and south Texas was a mixed blessing. It delayed the harvest of corn and sorghum, caused some crop damage but helped the peanut and soybean crops.

Thunderstorms rumbled across parts of the South again, this time with scattered violence. A line of thunderstorms with winds gusting to 70 mph roared through metro Atlanta Monday evening, creating rush-hour havoc and causing widespread damage.

Linemen for the Georgia Power Co. worked through the night to restore power to 20,000 Atlanta area homes. No one was reported hurt but winds gusted to 70 mph, trees were downed and lightning set a house afire.

Scattered thundershowers were reported over Washington state and Oregon. Cooler, moister weather helped firefighters corral a 630-acre blaze in north-central Washington.

Severe storms also were reported in central Utah, where a National Weather Service spotter in Payson, about 40 miles south of Salt Lake City, reported large hail and heavy rain.

Rainshowers also were scattered over parts of Wyoming, Montana, Colorado, New Mexico, Iowa, Ohio, New York State, Maine, Louisiana, and Florida.

Low temperature records were set in Paducah, Ken., 60 degrees; and Pueblo, Colo, 54 degrees.

#90205u2744 07/24/1990 ~United Press International

SAN FRANCISCO (JULY 24) UPI - Thomas Field Jr., who abruptly resigned as chairman and chief executive of McKesson Corp. in September, filed a lawsuit Tuesday charging the company with breach of contract.

The suit, filed in San Francisco Superior Court, asks for $500,000 in compensation for benefits Field says were denied him after he quit his $1.2-million-a-year job.

McKesson said in a prepared statement that it was ''disappointed and surprised'' by the lawsuit.

''We believe we have treated Mr. Field fairly,'' the company said. ''The company has made a very generous offer that we feel adequately compensates him for the rights under his employment agreement.''

In his suit, Field claims McKesson deceitfully offered him full benefits so he would resign and then used its ''disproportionate economic might'' to ''grind plaintiff into submission.''

Field also accuses the company of violating a promise not to discuss the reasons for his resignation. When he resigned, the company issued a press release that cited differences ''over management philosophy and the future direction of the company.''

Field joined McKesson as president and chief operating officer in 1984 and was named CEO in 1986 and chairman in 1988. During his tenure, he helped restructure the $7.6 billion company, a distributor of drugs and other products.

ROTA, SPAIN (JULY 24) UPI - Jury selection in the court-martial of a Navy lieutenant charged with raping a female officer aboard the USS Suribachi while it was in port began Tuesday at the U.S. Navy's Rota Naval Base.

Lt. j.g. Robin E. Brown, 27, of Rawlins, Wyo. pleaded innocent to the charges Monday.

Naval spokesmen said the name of the victim would not be released unless it was made public during the evidence phase of the court-martial,

expected to begin Wednesday. They said the trial would last 4-5 days.

The trial judge, Capt. Thomas A. Lawrence said between 6-10 Navy officers were to be chosen to serve on the jury.

The prosecutor is Marine Capt. Walter G. Sharp.

Brown is defended by two lawyers, Lt. Pamela E. Chartier, assigned by the Navy, and Marine Capt. J. H. Drescher, chosen by the defendant.

The prosecution said Brown was charged after a female officer complained to the ship's commanding officer that Brown assaulted her in the early morning of April 4 while the Suribachi was docked at Cartagena, Spain.

Navy spokesmen said the victim was checked medically, offered counseling and returned to duty.

Brown was reassigned to the Rota Naval Base for the court-martial.

The spokesman said the Suribachi, an ammunition carrier, has a crew of about 350 sailors, including about 25 officers. Five of the officers are female and about 11 percent of enlisted crew are female.

Female officers and crew were first assigned to the Suribachi in 1988.

Navy spokesmen said there are about 54,000 women serving in the U.S. Navy and that women officers serve on destroyers, sub tenders, oilers, combat stores ships and ammunition ships. Others serve in naval aviation as pilots and air crew.

LIMA, Peru (JULY 24) UPI - Nearly 100 people died in clashes involving guerrillas and security forces in the past two days, including an academic assassinated by suspected Shining Path rebels, police and news reports said Tuesday.

Police said masked raiders burst into the home of Ciro Alberto Aramburu Villena, director of student welfare at the University of San Cristobal de Huamanga in the Andean city of Ayacucho, at 2 a.m. and gunned him down as he tried to jump out of a second floor window.

Aramburu Villena's daughter, 31-year-old Flora Aramburu Castelares, was shot and wounded in the right shoulder when she cried for help, police said.

The University of San Cristobal of Huamanga is considered a center of

agitation of the Shining Path guerrillas, who follow a Marxist line founded by the late Chinese revolutionary leader, Mao Tse-tung.

For the past week students have occupied the university's cafeteria, demanding free meals.

The legal adviser to the university, Hernando Colonia Arteaga, was killed in a similar predawn raid by suspected Shining Path guerrillas four days ago.

The founder of the Shining Path movement, Abimael Guzman Reynoso, is a former philosophy professor at the university.

Since the Shining Path uprising began in 1980, seven members of the faculty and dozens of students have been killed at that institution in Ayacucho, 230 miles southeast of Lima.

The newspaper Republica said 67 suspected guerrillas and five soldiers were killed in one of the bloodiest battles reported recently between the two sides. The fighting occurred Sunday night near the village of Buenos Aires, in the province of Huamalies, 140 miles northeast of Lima, the newspaper said.

The newspaper said 300 rebels in several columns surrounded an army base and attacked when the 30-man garrison refused to surrender, but they were driven away and chased helicopter gunships.

In the province of Huanta, 30 miles north of Ayacucho, police reported that two men were found dead Monday, apparently when dynamite they were carrying for a guerrilla attack accidentally exploded. Police said they found a banner near the two bodies with the slogan, ''Movement of Anti-terrorist Liberation,'' a previously unknown group.

The mayor of the jungle municipality of Junin, 160 miles east of Lima, Andres Galarza Flores, said that 13 Amazon basin Indians were killed fighting with bows and arrows and poisoned darts against guerrillas using firearms.

He said that an undetermined number of the guerrillas also died in the fight.

In the village of Santa Cruz, 80 miles northeast of Lima, four provincial authorities and the mayor were executed by bullets after summary trials in which they were accused of being ''government servants,'' police said.

Police reported another three persons were killed in in the district of Limbani, 500 miles southeast of Lima, by rebels who dynamited installations of the state mining company and the city hall.

Nearly 20,000 persons have been killed in fighting between guerrillas and security forces since the Shining Path guerrillas began their uprising in 1980, concentrating their attacks in rural areas.

BOGOTA, Colombia (JULY 24) UPI - Unidentified gunman Tuesday shot and killed Maria Restropo, attorney general of the Antioquia department, and a policeman who was with her, officials said.

Restropo, 46, and the police officer were shot several times as they entered the front door of the attorney general's office in Aparto, 120 miles north of Medellin, the capital of Antioquia.

The attorney general had been conducting an investigation into the shooting deaths of 42 peasants in the town of Turbo, in the north of the department near Aparto.

The peasants were kidnapped Jan. 15 from the village of Pueblo Bello. Their bodies were found April 16 during a search of the farm of Fidel Castano, who calls himself anti-communist.

Castano heads a group of people who organize themselves to combat communist guerrillas operating in the north of Antioquia and the southern part of the Cordoba department.

No one claimed responsibility for killing the justice official.

The Medellin police did not have information on the attack, but members of the regional Communist Party told news reporters the Castano group was responsible for the fatal shooting.

The national attorney general, Carlos Hoyos Jimenez, was kidnapped and murdered Jan. 25 in Medellin. Police said that attack was ordered by the Medellin cocaine cartel, led by Pablo Escobar Gaviria, who is wanted on drug trafficking charges in the United States.

Medellin is situated 150 miles northeast of Bogota.

LOS ANGELES (JULY 25) UPI - A group of prominent filmmakers called Tuesday for an overhaul of how movies are rated, and a New York distributor announced that his company is releasing an X-rated movie with a self-appointed adults-only ''A'' rating.

The distributor, Silverlight Entertainment, said it will put out Wayne Wang's ''Life Is Cheap But Toilet Paper Is Expensive'' with the ''A'' rating because it wants to make clear that the film is not intended to be viewed by minors. But Silverlight emphasized that the film is not pornographic.

Set for debut in New York and San Francisco on Aug. 24, the movie is a view of life in contemporary Hong Kong.

Mark Lipsky, president of the company, said the film was rated X by the Motion Picture Association of America mainly because of a scene in which a character looks briefly at a pornographic magazine featuring pregnant women.

But Lipsky asserted that the film is not sexually explicit to the point that it deserves an X rating and that distributing it as such would be tantamount to ''economic suicide.''

His announcement was made at a news conference in front of the MPAA's offices in Sherman Oaks where 31 directors released a letter urging the MPAA to end its practice of giving X ratings to non-pornographic films.

''At a time when all artist' rights to free speech and expression are in peril, we the undersigned believe that the artistic freedom and integrity of American filmmakers are being compromised by an outdated and unfair rating system whose pracices have and will continue to result in the de facto censorship of their work,'' the letter said.

The directors, including Francis Ford Coppola, Ron Howard, Spike Lee, Barry Levinson and Sydney Pollack, said in the letter to MPAA President Jack Valenti that the association should institute an ''A'' or ''M'' (for mature) rating designation for adult-oriented non-pornographic films.

A spokeswoman for Valenti said he would not respond to the letter until later this week.

The filmmakers said the X rating, originally intended to indicate that a film should not be seen by children, has come to mean that it is simply pornographic. As a result, the X-rated or unrated film faces bans on where it can be shown and advertised, the letter said.

''The taint of an X rating clearly results in massive and arbitrary corporate censorship,'' the filmmakers said. ''Failure to address this problem will help foster a new era of McCarthyism in the arts as during the 1950s, when the networks claimed it was not they who blacklisted artists, but the sponsors.''

The filmmakers said the new rating would indicate that a film contains strong adult themes or images and that minors are not to view them.

''This is not a compromise between art and commerce,'' the letter said. ''It is an essential action designed to protect the U.S. Constitution.''

Lipsky said the only hard piece of evidence Valenti has offered to support the rating system is a survey that has never been released to the public showing that 70 percent of parents find the system to be ''fairly useful'' or ''very useful.''

The ratings system, which dates back to 1968, came under stiff criticism last week from a New York judge who nevertheless dismissed a petition brought by Miramax Films and director Pedro Almodovar against the MPAA and the X rating given Almadovar's ''Tie Me Up! Tie Me Down!''

Judge Charles Ramos called the rating system censorship and said the MPAA should either revise it or drop it.

#90205u2986 07/24/1990 ~United Press International

CHICAGO (JULY 24) UPI - An accused computer hacker who published the program for the emergency 911 system for the southeastern United States threatened the lifeline of many communities, a U.S. attorney said in opening statements Tuesday.

Craig Neidorf, 19, Chesterfied, Mo., is on trial in U.S. District Court on charges of wire fraud and interstate transfer of stolen property. If convicted, he faces 21 years in prison and fines of $122,000.

Neidorf allegedly was aided by Robert Riggs, 20, Decatur, Ga., who has pleaded guilty in the case and is expected to testify against Neidorf. Riggs faces a maximum 15 years in prison and $250,000 fine.

The government claims Niedorf, using a computer at the University of Missouri in Columbia, obtained the E911 program and published an edited version of it in ''PHRACK,'' a magazine he put out specifically for computer hackers.

The indictment said Neidorf and Riggs communicated by electronic mail while making their plans to infiltrate the E911 system.

Assistant U.S. Attorney Bill Cooke told the federal jury Tuesday that Neidorf's actions threatened the safety of residents throughout the southeastern region.

''That system (911) is the lifeline of many communities in the United

States,'' he said. Cooke has not yet revealed whether the theft or publication of the program affected any police or fire departments.

The E911 program is valued at about $80,000 and controls emergency calls in Alabama, Mississippi, Georgia, Tennessee, Kentucky, Louisiana, North Carolina, South Carolina, and Florida, Cooke said.

Neidorf's lawyer, Terry Gross, called the case ''an unprecedented threat to the free press.''

But Rich Adams, a special agent for the Secret Service, said the outcome of the case would have no bearing on legitimate computer bulletin boards.

The Secret Service is only looking to crack down on hackers ''maliciously trying to get into hospital records and 911 systems, or stealing credit card information for personal gain,'' Adams said.

#90205u3086 07/24/1990 ~United Press International

TEGUCIGALPA, HONDURAS (JULY 24) UPI - About 3,000 Nicaraguans in Honduras launched a hunger strike Tuesday to demand food, supplies and speedy repatriation to their homeland, U.N. officials said Tuesday.

Urlich Von Blumenthal, a representative for the U.N. High Commission for Refugees, said there was no reason for the strike because the Nicaraguans, including former Contra rebels and their dependents, are receiving enough food to survive.

An estimated 27,000 Nicaraguans are still in Honduras since the disbanding of the Contra rebel force, which began in Honduras in April and ended last month in Nicaragua.

Most of the Contra rebel combatants left the camps at Yamales, 88 miles east of Tegucigalpa, after Nicaraguan President Violeta Chamorro's election victory over the Sandinistas in February, but their relatives and war wounded remained.

About 1,000 wounded or crippled fighters handed in a batch of useless weapons to U.N. peacekeeping forces April 18.

Blumenthal said the hunger strikers receive the same supplies as the rest of the refugees, but added that some food was possibly diverted elsewhere because Contra leaders are in charge of distributing the provisions.

He said the repatriation of Nicaraguans to their homeland - being monitored by the Organization of American States' Support and Verification Commission - was slowed down by the general strike earlier this month in

Nicaragua and by bureaucratic delays.

Under the repatriation program, an estimated 750 Nicaraguans are to leave Honduras every week.

#90206b0015 07/25/1990 ~Business Wire

LONGMONT, CO (JULY 25) BUSINESS WIRE - Staodynamics Inc. (NASDAQ: SDYN) Wednesday announced that it has introduced to the market its latest pain management product, the Maxima(R) III TENS (transcutaneous electrical nerve stimulation) device.

W. Bayne Gibson, Staodynamics' president, said, "For 15 years Staodyn has been a leader in the electrostimulation industry. This new product represents the latest in microprocessor technology and, based on initial response from our sales representatives and dealers, is expected to be a major product for our company."

"Only Maxima III permits changing pulse width without having to readjust the intensity control. Hence, the patient feels the true effects of varying pulse width, and can accurately adjust for comfort; no other TENS unit on the market offers this patented feature.

"This newest generation of Staodyn's highly successful Maxima TENS product line also features "soft turn-on" which allows the unit to turn on slowly after changing batteries or reconnecting lead wires by the patient," said Gibson.

Gibson commented, "We anticipate this product will be a contributor to the expected profits in the remaining quarters of the year. As previously announced, we expect to achieve an increase over our record sales and operating income levels last year."

He also stated, "The Maxima II TENS unit is the first on the market to offer true strength duration modulation, which tracks the strength duration curve as it varies in intensity and width. Although some manufacturers claim to offer strength duration modulation, no other unit on the market supplies modulation that tracks a true strength duration curve. "Only Maxima III scans the entire spectrum of pulse width while producing equal amplitude of sensation over the whole range."

Staodynamics is a leading manufacturer of medical electronic products, primarily TENS (transcutaneous electrical nerve stimulation) devices used for the relief of chronic and acute pain, and NMES (neuromuscular electrical stimulation) devices used in physical and sports medicine for muscle re-education and rehabilitation.

The company has been engaged in an extensive clinical investigation using electrotherapy for wound care, which when approved for sale within the United States, is likely to become a major portion of the company's business.

#90206b0016 07/25/1990 ~Business Wire

LOS ANGELES (JULY 25) BUSINESS WIRE - Ducommun Inc. (ASE/PSE:DCO) reported net income of $620,000, or 19 cents per share, on sales of $19,706,000 for the quarter ended June 30, 1990.

This compares with net income of $77,000, or 2 cents per share, on sales of $17,828,000 for the second quarter of 1989.

For the first six months of 1990, net income was $896,000, or 27 cents per share, cmpared with net income of $437,000, or 13 cents per share, for the first half of 1989.

Net income for the first six months of 1989 included a loss of $456,000, or 14 cents per share, from discontinued operations. Sales for the first six months were $37,899,000 in 1990 compared with $34,319,000 in 1989.

The company recorded an extraordinary tax credit of $258,000, or 8 cents per share, in the second quarter of 1990, and $383,000, or 12 cents per share, in the first half of 1990, for utilization of net operating loss carryforwards, substantially offsetting the provision for taxes. These amounts are reflected in net income reported for both periods.

Approximately $58 million of federal net operating loss carryforwards remain unutilized subject to certain limitations.

Norman A. Barkeley, chairman, president and chief executive officer, said, ''The company's strong performance in the second quarter was based upon the continuing shift in our product mix from military projects to commercial air transport programs, reductions in overhead and lower interest costs resulting from a substantial reduction in our debt.''

He added, ''Ducommun is now represented in all major commercial transport programs of Boeing, McDonnell Douglas and Airbus Industries, with a significant percentage of sales designated for export markets.''

Looking ahead, Barkeley said, ''We continue to expect sales and net income for the full year to exceed 1989 results. Our commercial aerospace business is strong and additional reductions in overhead are being put

into effect.''

Ducommun manufactures components and assemblies for the aerospace industry.

#90206b0020 07/25/1990 ~Business Wire

LITTLETON, MA (JULY 25) BUSINESS WIRE - Alliant Computer Systems Corp. (NASDAQ: ALNT) Wednesday reported second quarter 1990 revenues of $21.2 million, an increase of 25 percent from the $17 million reported in the same quarter 1989. The net loss for the quarter was $1.2 million, or $.09 per share, compared with a profit of $.4 million, or $.03 per share, in 1989.

For the six month 1990 period, revenue totalled $41.5 million, compared with $32.7 million in 1989, a 27 percent increase. Net loss for the six month period was $.2 million, or $.02 per share, compared with net income of $.5 million or $.04 per share in 1989.

"The second quarter, as we commented early in July, reflects difficulties associated with our new product transition," said Ronald H. Gruner, chief executive officer. "Orders for the company's RISC-based FX/2800 supercomputer have been delayed by longer and more extensive customer testing procedures than those required for the earlier generation, lower priced FX/Series systems.

"In addition, there have been system performance issues for certain applications in the initial release of the product. These areas are being addressed aggressively."

"We have shipped approximately 30 of our new supercomputers since announcement, about three quarters of which are upgrades by our existing customers," Gruner said.

Average selling prices for upgrade sales are approximately 60 percent of those for full system sales. In addition, the recent acquisition of Alliant's Japanese distributor led to an increase in the company's overall selling, general, and administrative expenses.

"We expect that third quarter results could be similar to those of the second quarter, due primarily to some of the same transitional issues, combined with the impact of the seasonally sluggish European business," Gruner said.

"The closing of several large orders can mean the difference between a sequentially stronger or a weaker quarter. We are marketing the FX/2800 aggressively into appications which take advantage of our system's outstanding performance."

Alliant Computer Systems Corp. manufactures standards-based parallel supercomputers with visualization tools that enable scientists and engineers to quickly interpret and solve complex problems.

PLAINFIELD, IN (JULY 25) BUSINESS WIRE - PSI Resources Inc. (NYSE:PIN) Wednesday announced earnings of 44 cents per share of common stock for the quarter ended June 30.

Earnings per share were down from 68 cents for the second quarter of 1989. The decrease is primarily due to the effects of a phased-in 13.2 percent retail rate reduction ordered by the Indiana Utility Regulatory Commission in 1988 and another 4.3 percent reduction in April 1990.

Earnings for the 12 months ended June 30 were up 3.6 percent, from $1.97 per share a year ago to $2.04. The effect of the recent rate reductions on earnings was offset by a charge in December 1988 for reserves to cover the anticipated cost of the tentative settlement of a lawsuit by Wabash Valley Power Association. The pending suit is related to the canceled Marble Hill nuclear project.

BOULDER, CO (JULY 25) BUSINESS WIRE - Exabyte Corp. (NASDAQ:EXBT) reached another milestone with the unveiling of its new 31,650-square- foot headquarters building.

The addition is part of an ongoing facilities expansion effort to keep pace with the five-year-old company's explosive growth. The Boulder Exabyte campus now totals 116,000 square feet.

The new building contains 21,650 square feet of marketing, sales, materials, purchasing and executive offices, and a 10,000-square-foot warehouse.

Construction of the executive offices started in the fall of 1989 and took nine months to complete. The offices were occupied on July 16. The warehouse was occupied in March 1990.

''We are pleased with the steady growth of our company, reflected in this new addition to our facility,'' said Peter Behrendt, president and chief executive officer. ''The dedication of this beautiful new building is yet another step forward in Exabyte's short but exciting history, a milestone that symbolizes our single-minded focus on achieving excellence in everything we do.''

In August 1989, Exabyte completed construction on a new 28,500-square-foot manufacturing facility to satisfy its rapidly growing product demand. Today that state-of-the-art facility operates four production lines on two shifts. Exabyte's manufacturing partner, Kubota Ltd., located in Osaka, Japan, also has increased its production capacity.

One of the fastest growing high technology companies in the Rocky Mountain region, Exabyte posted second revenues of $46.3 million, up 150 percent from 18.5 million for the like period last year.

For the six months ended June 30, 1990, the company reported revenues of $86.8 million, an increase of 159 percent over revenues of $33.5 million for the equivalent period last year. Currently more than 560 people work at Exabyte, up from 315 employees at the beginning of this year.

Exabyte Corp. designs, manufactures and markets high-capacity 8mm cartridge tape subsystems that address the rapidly growing market for cost-effective data storage solutions. More than 120,000 units have been shipped worldwide to OEMs, system integrators, value-added resellers and distributors.

MENLO PARK, CA (JULY 25) BUSINESS WIRE - Adia Services Inc. (NASDAQ:ADIA) a national supplier of personnel services, Wednesday announced that earnings for the second quarter of 1990 were 40 cents per share, compared with 43 cents per share in the comparable period in 1989.

Net income for the quarter was $5.0 million, compared with $5.4 million in 1989. Revenues for the quarter increased 13 percent to $166.6 million, up from $148.0 million last year.

For the first six months of 1990, Adia's net income was $10.0 million (80 cents per share) as compared with $10.3 million (83 cents per share) for the like period a year ago. The 1989 amounts exclude the effect of an accounting change for income taxes. Revenues for the first half of 1990 increased 13 percent to $327.5 million.

Adia continues to seek acquisition candidates. During the second quarter, Adia purchased Northwest Consulting Group, an outplacement firm with offices in Seattle and Portland; LearData Info-Services Inc., a data processing specialty operation with offices in Denver, Dallas, Tulsa, Okla. and Phoenix; and Temp Connection Ltd., a general clerical temporary help company located in New York City.

Combined annualized revenues of these businesses total approximately $19 million. In the second quarter Adia also acquired over 20 franchise offices from one of its Nursefinder franchisees.

Adia also announced today that it has entered into a tax sharing agreement with Adia Holdings Inc. (AHI) a wholly owned subsidiary of Adia S.A. (ASA) Adia's parent company. The agreement is designed to allow Adia to share

in any tax savings realized as a result of its consolidation for U.S. tax purposes with other AHI companies in the United States.

This tax sharing agreement will become effective if and when ASA owns 80 percent or more of the outstanding stock of Adia. ASA currently owns approximately 66 percent and would need to acquire approximately 1,800,000 additional shares of Adia's publicly traded stock to reach this level.

During the second quarter of 1990, Adia also announced its quarterly cash dividends (4 cents per share on common stock, and $.035 per share on Class B Common Stock). These dividends were paid on June 15, to share holders of record on June 1.

EL MONTE, Calif. (JULY 25) BUSINESS WIRE - Marshall Industries (NYSE:MI) Wednesday reported operating results for its fourth quarter and fiscal year ended May 31, 1990.

Net sales for the fourth quarter were at a record level of $153,003,000, compared with $134,764,000, in the same quarter of the prior year, the previous record. Net income for the quarter was also at a record high of $6,216,000, or 73 cents per share vs. $4,609,000, or 50 cents per share a year ago.

For the fiscal year ended May 31, 1990, net sales increased to a new high of $543,690,000, up from the prior year and previous record of $533,467,000. Net income of $20,092,000 for the year or $2.25 per share compared to $21,403,000, or $2.31 per share reported in the prior year.

Management commented that the record level of sales in the fourth quarter was principally a result of increased volume in semiconductors and computer subsystems. Improved net income per share in the quarter resulted primarily from the higher level of sales.

Marshall Industries is a leading national distributor of industrial electronic components, computer products, electronic test instruments and production supplies.

#90206b0042 07/25/1990 ~Business Wire

TEMPE, AZ (JULY 25) BUSINESS WIRE - MicroAge Inc. (NASDAQ:MICA) and Sun Microsystems Inc. Wednesday announced an agreement whereby MicroAge Inc. will be authorized to distribute and support Sun SPARC-based workstations to its network of company-owned and franchised locations.

Under this agreement, each MicroAge location must be individually authorized by Sun and must offer systems in combination with software, training and support. MicroAge currently has a number of Sun authorized locations.

Alan Hald, chairman of MicroAge Inc., stated ''MicroAge is well known within the industry for its ability to install UNIX and networking solutions. The company already provides advanced technical and systems integration support to its Sun-authorized locations. This agreement will further expand that support and will bring our effective marketing, distribution and national account servicing capabilities into play.''

Hald added, ''While MicroAge franchisees have been in the workstation business for the past two years, Sun is the first major workstation vendor to fully commit advanced workstation products to the channel. For workstations to be marketed profitably, much needs to be done to reduce the time resellers must now invest selling, staging and installing workstation systems. MicroAge's support skills and experience with the logistics of high end systems give our locations a definite competitive edge.''

MicroAge believes the price/performance of Sun's newest products will immediately expand the market for technical applications, including AutoCAD, which MicroAge is already successfully marketing. In addition, in the near term, there is an excellent opportunity to market UNIX-based general business solutions on Sun networks. Earlier this year, MicroAge entered into an agreement with Lotus Development Corp. to market and support Lotus 1-2-3 software on Sun SPARCstations.

Headquartered in Tempe, MicroAge markets and distributes information technology products and services through an international network of more than 732 franchised, company-owned and dealer locations.

Sun Microsystems Inc., headquartered in Mountain View, Calif., is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating systems and productivity software.

NEW YORK (JULY 25) BUSINESS WIRE - Tandy Corp. Wednesday introduced the Tandy 1000 RL -- the first personal computer with unique home management programs so practical and simple that it can become an essential part of family life.

The Tandy(R)1000 RL computer is a fully integrated system of hardware and software developed with a specific focus on the home user.

''The Tandy 1000 RL is an entirely new generation of home computer -- one that helps manage everyday home tasks, is easy to use and affordable,'' said John V. Roach, chairman of the board and chief executive officer of Tandy Corp.

The Tandy 1000 RL is sold at Tandy's more than 7,000 Radio Shack(R) stores nationwide. The price of the ready-to-use systems range from $750 to $1,299.

''Computers have been accepted in the workplace for years, but not in the home because they've been too hard to use and too expensive,'' Roach said. ''Finally, we've solved those problems.

''The Tandy 1000 RL is so easy to use that it guarantees success. Even the novice user can be productive with the 'RL' after just 15 minutes. Should they need additional help, we've established a comprehensive program to meet our customers' needs,'' he said.

In addition to the computer's built-in tutorial programs, Radio Shack personnel have been specially trained to work individually with customers who have a question. A dedicated team of computer experts is set up at Tandy's Fort Worth, Texas, headquarters for store representatives to contact for quick, on-the-spot solutions. Customers with a telephone modem can communicate with the technicians themselves.

The Tandy 1000 RL is the result of Tandy Corp.'s more than a decade of experience as the leading maker and marketer of personal computers. ''We designed the 'RL' after years of research, program development, and an extensive focused testing program with families in the home,'' Roach said.

The ''RL'' comes with 24 built-in programs developed especially to make everyday home tasks easier. Also, it is fully PC-compatible and will run other business and personal software programs. Its unique comprehensive approach to the home and its ease of use has earned it the ''Good Housekeeping Seal.''

#90206b0052 07/25/1990 ~Business Wire

REDMOND, WA (JULY 25) BUSINESS WIRE - Data I/O Corp. (NASDAQ:DAIO) Wednesday reported sales and earnings for the quarter ended June 28, 1990.

Net earnings were $66,000, or 1 cent per share. This compares with earnings of $400,000, or 6 cents per share, in the second quarter of 1989.

Second quarter net income was impacted by approximately $540,000 in one-time pretax charges and by approximately $240,000 in income tax expenses in excess of the company's planned 40 percent effective rate. These charges and expenses adversely affected second quarter earnings per share by approximately 8 cents.

These charges included reserves for excess inventory and for closed offices and an accrual for accelerated retirement of the company's chief executive officer. An effective tax rate of 87 percent resulted from the company' inability to realize current U.S. tax benefits from losses incurred at its foreign subsidiaries.

Sales for the second quarter were $14.9 million, down 3.6 percent from the same period in 1989. Sales of device programmers were down 3.7 percent from the second quarter of 1989. Orders for device programmers were 8 percent higher than last year, but shipments of the newly introduced 2900 Programming System were constrained by manufacturing problems which should be resolved by the end of the third quarter. Sales of design software declined 3.1 percent from prior year levels, primarily as a result of price reductions on the FutureNet Schematic Designer software product.

Milton Zeutschel, Data I/O's acting president and chief executive officer said: ''While first half sales and earnings were below plan, we are encouraged by the customer acceptance of the new 2900 Programming System. The 2900 has technology and price leadership that will enable us to recapture the market share which we lost in the mid-priced segment of the market.''

Data I/O Corp. is the world's leading manufacturer of solutions for users of progammable integrated circuits. Its products include logic and memory device programmers which encode application specific instructions into programmable memory and logic devices; electronic design software used in designing, testing and synthesizing of programmable logic devices (PLDs) and field programmable gate arrays (FPGAs); and FutureNet Schematic Designer software. Data I/O has sales and service offices worldwide.

CLEVELAND (JULY 25) BUSINESS WIRE - Karen N. Horn, chairman and chief executive officer of Bank One, Cleveland, was elected a TRW director at the regular meeting of the company's directors today.

The appointment is effective immediately. Prior to electing Horn, the company's directors voted to increase the number of directors to 13.

Horn previously served as president of the Federal Reserve Bank of Cleveland and as treasurer of The Bell Telephone Co. of Pennsylvania. She holds a Ph.D. in economics from The Johns Hopkins University. Her other board memberships include Eli Lilly and Co. and Rubbermaid Inc.

In addition, Horn is vice chairman of the board of trustees of Case Western Reserve University and a trustee of The Johns Hopkins University, The Rockefeller Foundation, The Business Enterprise Trust, The Greater Cleveland Roundtable, The Cleveland Orchestra, Cleveland Tomorrow and The Cleveland Clinic Foundation.

DALLAS (JULY 25) BUSINESS WIRE - Hogan Systems Inc. (NASDAQ:HOGN) Wednesday reported a net loss of $344,000, or 3 cents per share, on revenues of $10,552,000 for its first fiscal quarter, ended June 30, 1990.

During the comparable period a year ago, the company earned $1,009,000, or 7 cents per share, on revenues of $10,618,000.

''License fees for IBA and IMMS, our two principal products, were lower than we had anticipated,'' said Gary Fiedler, President and Chief Executive Officer. ''However, revenues from professional service fees continued to increase during the quarter.

''As our service business grows, we expect these fees to help balance the quarterly fluctuations we experience from product revenues alone.''

Fiedler said that a previously announced license agreement entered into during the first quarter has not been included in these results of operations because certain conditions under the contract were not fulfilled by the end of the quarter. These conditions are expected to be fulfilled during the second quarter, at which time license revenues under this agreement would be included in the results of operations for that

quarter.

Hogan Systems Inc., of Dallas, designs, markets and supports integrated on-line application software products for use by financial institutions worldwide. The company maintains major sales and support offices in Woking, England; Melbourne, Australia; New York City and Dallas.

SAN FRANCISCO (JULY 25) BUSINESS WIRE - Ironstone Group Inc. (NASDAQ/NMS:IRON) Wednesday announced the appointment of John Elting Treat as a member of the board of directors.

Treat is a vice president of Booz, Allen & Hamilton Inc. He will serve as an outside director of Ironstone Group replacing Steven N. Machtinger. Machtinger, senior vice president and general counsel of Hambrecht & Quist Inc., served as an internal director during the interim.

A specialist in the worldwide energy practice, Treat is responsible for energy risk management assessment and assists Booz, Allen's financial services practice in support of stock and futures exchanges.

He served as president of the New York Mercantile Exchange from 1982-84 and was responsible for international energy and strategic materials policy in the White House as a member of the National Security Council Staff under Presidents Carter and Reagan. Treat served in a variety of senior posts in the U.S. Department of Energy, including appointment as Deputy Assistant Secretary for International Affairs.

Ironstone Group Inc., through its majority owned subsidiaries, Iron-Oak Supply Corp. and American National Petroleum Co. (NASDAQ:ANPC), is engaged in wholesale distribution of plumbing and mechanical supplies and equipment and in oil and gas exploration and production and energy related services.

#90206b0074 07/25/1990 ~Business Wire
BEVERLY HILLS, CA (JULY 25) BUSINESS WIRE - A Litton-led team including Rockwell International and Boeing has been chosen by the Department of

Defense to develop a miniature aerospace navigation system that would be significantly lower in cost at one-eighth the size and weight of systems performing similar functions today.

The objective of the three-and-a-half year, $13 million program is the demonstration of advantages to be gained from the integration of new high-accuracy fiber optic gyro and silicon chip accelerometer inertial navigation sensors with a gallium arsenide Global Positioning System receiver.

The integration of these solid state devices in a single seven-pound system would combine the accuracy of a self-contained inertial navigation system with the radio navigation precision of the satellite-based Global Positioning System.

The two-phase program, sponsored by the Defense Advanced Research Projects Agency through the U.S. Naval Ocean Systems Center, is aimed at design of a high-performance system that could be used in both tactical and strategic vehicles such as manned aircraft, missiles and remotely piloted vehicles.

''Successful development will represent a major step forward in solid state navigation technology and open new applications in the future for both military and commercial markets,'' said A. David Klein, vice president for advanced programs at Litton's Guidance & Control Systems division in Woodland Hills.

The Litton division is the system integrator and will develop the inertial portion of the miniature unit. Collins Government Avionics division of Rockwell will develop the Global Positioning System receiver. The Boeing Military Airplane Company will apply its experience with a wide range of airframes to design the system adaptations for a variety of applications.

The team will develop and produce prototype systems for laboratory and flight testing to demonstrate high-accuracy navigation and continuous performance in hostile electronic jamming environments and under high flight dynamic conditions.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems to U.S. and world markets.

PORTLAND, OR (JULY 25) BUSINESS WIRE - Mercy Corps International, a relief and development agency, is providing relief to quake-stricken areas of the Philippines.

Deng Samonte, Filippino country director for Mercy Corps, is overseeing distribution of supplies while medical personnel are heading toward worst hit areas under the direction of the Philippine National Red Cross and the Department of Social Welfare and Development. Mercy Corps is partnering with Cross Foundation Relief agency in the Philippines.

Victims in quake-damaged areas need tents, food, water, water purifiers and medicine.

''Because Mercy Corps is already on the ground in the Philippines we have a substantial network to work with,'' said Ellsworth Culver, Mercy Corps' president. ''We are already discussing rehabilitation programs to follow the relief phase,'' he added.

Donations for Philippines Quake Relief may be sent to Mercy Corps International, Portland, Oregon, 97201.

#90206b0086 07/25/1990 ~Business Wire
REDONDO BEACH, CA (JULY 25) BUSINESS WIRE - Dr. Kenneth T. Yano, a leading gallium arsenide and millimeter/microwave technologist, has been named manager of TRW's Phase 1 MIMIC program, Dr. Marvin S. Stone, vice president and general manager of TRW's Electronics and Technology Division announced Tuesday.

Yano succeeds Dr. Herbert M. Trachtenberg, who managed TRW's Phase 1 MIMIC program from its inception in May 1988. Trachtenberg will assume other responsibilities within TRW in its Space Communications Division.

MIMIC, short for Millimeter/Microwave Monolithic Integrated Circuits, is the government's premiere gallium arsenide manufacturing and application program.

TRW is a major participant in the joint industry-government effort to reduce the size, weight, complexity, and cost of space and defense systems using millimeter and microwave frequencies through the use of advanced gallium arsenide integrated circuits.

''Herb Trachtenberg used his wide program management experience to give

our MIMIC effort its solid start and a firm footing,'' said Stone. TRW leads one of four industry teams participating in the MIMIC program. Included on the TRW team are General Dynamics, Honeywell, Hittite Microwave, and Texas Instruments.

Under Trachtenberg, the TRW MIMIC team met the program's key objectives for its first 18 months. ''Ken Yano,'' reported Stone, ''will move TRW's MIMIC Phase 1 into its final stages and prepare the TRW MIMIC team to bid vigorously on the program's second phase.''

The MIMIC program is funded through DoD's Defense Advanced Research Projects Agency. The team's customer is the U.S. Army Laboratory Command's Electronics Technology and Devices Laboratory, Fort Monmouth, N.J.

Yano joined TRW in 1973 and has held a series of increasingly reponsible positions in technology development, business development and program management.

Technical areas in which Yano has worked include gallium arsenide, millimeter and microwaves, surface acoustic waves, lasers, and fabrication of microelectric devices with sub-micron dimensions.

He began his most recent assignment -- manager of TRW's Advanced Microelectronics Laboratory -- in 1986. Under his management, the laboratory grew from 104 people to 240 people and operated with multi-million-dollar budgets for capital and for research and development.

He managed the development of TRW's Class 10 gallium arsenide cleanroom and pilot line.

Yano holds a bachelor's degree in engineering from the California Institute of Technology (1968) and master's degree (1969) and a doctorate degree (1973) from Stanford University. He is a member of the Institute of Electrical and Electronic Engineers, and the American Institute of Aeronautics and Astronautics, Sigma Xi, and Tau Beta Pi.

#90206b0088 07/25/1990 ~Business Wire

NEWPORT BEACH, CA (JULY 25) BUSINESS WIRE - Downey Savings and Loan Association's (NYSE/PSE:DSL) board of directors Wednesday declared a 7 cents per share cash dividend payable on Aug. 24 to holders of record on Aug. 6.

In conjunction with the dividend announcement, Gerald H. McQuarrie, chief executive officer of Downey Savings, said that net earnings for the second quarter of 1990 were $10,292,000, or 64 cents per share, up substantially from the $5,768,000, or 36 cents per share, posted for the like quarter of 1989.

For the first six months of 1990, total net earnings amounted to $23,448,000, or $1.45 per share. For the like period last year, net results were $26,775,000, or $1.66 per share, and included a one-time gain of $10,945,000, or 68 cents per share, from a cumulative effect of change in accounting principle.

At June 30, total deposits were $3.3 billion, down $198 million since year-end 1989. Approximately $172 million of this intentional run-off represented high-cost savings deposits attributable to our former subsidiary, Butterfield Savings. Butterfield deposits currently approximate $147 million, as compared with $319 million at Dec. 31, 1989, and $534 million at year-end 1988.

In addition, certain credit union deposits of about $80 million were not rolled over by Downey Savings for other business reasons. At the end of the quarter, the average cost of deposits was 7.56 percent, as compared with 7.76 percent at year-end.

#90206b0090 07/25/1990 ~Business Wire

IRVINE, CA (JULY 25) BUSINESS WIRE - Advanced Logic Research Inc. (OTC:AALR) Wednesday announced a new addition to the BusinessVEISA family: the BusinessVEISA 32CSX.

The innovative BusinessVEISA 32CSX is the first SX-based PC to offer an EISA bus and is the first to exploit 386SX technology by moving processing power from 16-bit to full 32-bit mode using ALR's VEISA scalable architecture. BusinessVEISA 32CSX advances CPU processing from 20-MHz 386SX to 32-bit/33-MHz i486 and is packaged in a small compact desktop chassis.

Economically priced at $2,799 for the base system (1-MB RAM, 1.2-MB floppy), BusinessVEISA 32CSX comes packaged with 20-MHz 386SX CPU, ALR's FlexCache+ memory architecture (using two-way set associative) and 32-KB cache RAM to deliver up to 15 percent faster processing power than non-cached 20-MHz 386SX-based machines.

The system is also designed to support secondary 64-KB cache using ALR's

VEISA upgrade CachePAK Module and supports EISA bus master devices. BusinessVEISA 32CSX is targeted at entry-level 386 buyers who know their computing requirements will increase in the future and thus want to avoid product obsolescence.

Integrated features on the BusinessVEISA 32CSX system are 2-MB RAM (1-MB on Model 1), 32KB cache RAM including ALR's proprietary FlexCache+ memory architecture, 1.2-MB 5.25-inch floppy drive, embedded IDE-type hard drive controller, EISA bus and ALR VEISA scalable architecture with a 20-MHz 386SX CPU installed (CPU support up to 33-MHz i486).

Model 1 includes as standard a special ALRlan card, making the system network-ready. An optional ALR Ethernet card is available for $295.

Expandable features on the BusinessVEISA 32CSX include up to 49-MB of standard memory (17-MB on the system board), support for secondary 64-KB cache using ALR's VEISA CachePAK Module, 16-bit Super VGA supporting 800 by 600 resolution, ALR FlexView 2X Super VGA monitor, choice of 40- and 106-MB disk storage capacity and optional 330-MB high-speed drive using a cached EISA-type ESDI controller.

The drive space on the BusinessVEISA 32CSX accomodates two half-height and two 3.5-inch devices.

Advanced Logic Research, is a leader in innovative high-performance CPU technology. ALR carries the most comprehensive line of ISA, Micro Channel and EISA-based PCs and upgradeable PCs ranging from entry-level 12.5-MHz 286 computers to 33-MHz 386, 25-, 33-MHz i486-based high-performance systems and multiprocessor systems based on UNIX and Novell.

#90206b0091 07/25/1990 ~Business Wire

WILMINGTON, CA (JULY 25) BUSINESS WIRE - The VECTOR W8 TwinTurbo sports car, designed and developed by Vector Aeromotive Corp. (NASDAQ:VCAR(D)) has passed six primary safety tests, certifying it as possibly one of the safest high-performance automobiles available, it was announced Wednesday.

According to a report prepared by Global Vehicle Services, an independent safety compliance organization, the VECTOR passed all compliance requirements in critical crash tests with little damage to the automobile's integrity, while still establishing a passenger safety rating well within government minimum standards.

According to Rod Garn of Global Vehicle Services, only one sequence of tests was required and no equipment modifications or re-tests were necessary, ''A rarity, indeed, when compared with other models produced in the United States, Europe or Japan that frequently need on-site changes or shipment back to the factory for rework prior to certification.''

Tests results were generated over two days during two separate collisions. The first collision involved frontal impact at 30 miles-per-hour against a stationary barrier. The remaining test consisted of a 4,000-pound sled hitting the rear of the VECTOR at the same speed.

According to Steven Pruitt, chief test engineer of the independent lab that conducted the tests, federal standards require a score of 1,000 or lower in tests for Head Injury Criteria (HIC). The VECTOR achieved an HIC rating of 383 for the driver side with air bag and 499 for the passenger three-point manual seat belt.

Femur, or knee loads, were also approximately half of the minimum standards. Test results for rear impact showed that the VECTOR exhibited far less crush damage than any other car evaluated for fuel system integrity, Pruitt noted.

''These tests results rank the VECTOR as safer than approximately 90 percent of automobiles on the road today,'' he added.

David Kostka, vice president of engineering for Vector Aeromotive asserted that VECTOR's engineering standards are far greater than the minimum safety standards required by the federal government.

''We devoted a significant amount of development time to engineer the VECTOR so that it would crush in a smooth, progressive manner, giving it essentially a 'soft hit,' which leads to low passenger injury,'' said Kostka. ''We were excited to see that the VECTOR crushed exactly as we had planned, with no damage to the roll cage structure, suspension or driveline.''

''Remarkably, the car could have been driven away after both front and rear impacts!''

The Department of Transportation standard for fuel system integrity encompasses mounting the vehicle on a 360-degree roll-over fixture for 20 minutes immediately following both front and rear impacts, during which only a specified rate of fuel leakage is allowed.

The VECTOR remained dry throughout the procedure. VECTOR production models are currently completing a round of safety and emissions tests that certify road worthiness in the United States.

The American-made VECTOR, at $250,000, is in the same price category with the Ferrari F40 and Lamborghini Diablo. The VECTOR, designed to surpass both of them in quality, performance and reliability, has a monocoque chassis that is epoxy bonded and riveted with aircraft fasteners, techniques similar to those used in the aerospace industry.

The powerplant is a TwinTurbo V-8 engine that generates over 600 horsepower, based on confirmed dynamometer tests.

Vector Aeromotive has headquarters in Wilmington near the Port of Los Angeles.

#90206b0100 07/25/1990 ~Business Wire

CHULA VISTA, CA (JULY 25) BUSINESS WIRE - Rohr Industries has reached a follow-on agreement with European manufacturer Airbus Industrie to supply engine nacelle systems for 800 airliners.

The Rohr-Airbus agreement, valued at more than $1 billion, calls for Rohr to furnish nacelle systems for engines on two models of Airbus airliners, the CFM56-5A for the A320 and the CFM56-5B for the A321, initially in early 1992.

The A321 is a stretched derivative of the current A320-200 aircraft; the A321's nacelle system retains significant commonality with the existing one. Nacelle sytems are the aerodynamic structures that surround jet engines.

Currently, Rohr is supplying CFM56 nacelle systems for 200 Airbus A320 airliners under a 1984 contract. The follow-on agreement expands the program to cover 1,000 airliners.

''This program demonstrates the benefits of bringing together the capabilities of the international aerospace community,'' said Don Purdy, Rohr's vice president of commercial business. ''This Europe-oriented program continues to be successful and mutually beneficial for us and our customers.''

Members of the Rohr program team are Hispano-Suiza of France, Aeritalia Societa Aerospaziale Italiana and Incoform Brama of Great Britain.

Airbus Industrie is an aircraft manufacturing consortium owned by these aerospace partners: Aerospatiale of France, Deutsche Airbus of West Germany, British Aerospace PLC and Construcciones Aeronauticas S.A. of Spain.

Rohr designs, integrates, manufactures and supports aircraft engine nacelle systems and components for commercial, military and business aircraft. Rohr, with headquarters in Chula Vista, has 10 facilities in the United States and one in Europe.

SAN DIEGO, CA (JULY 25) BUSINESS WIRE - Ventura Software Inc., a Xerox company, Wednesday announced a new support plan for its customers of Ventura Publisher and FormBase software products in the United States and Canada.

Under the new plan, registered first time purchasers of current level software, either Ventura Publisher Gold Series or FormBase 1.1, will receive free technical support. Customers who upgrade to current level software will be provided with free technical support for 60 days.

The new customer support plan for Ventura Publisher and FormBase consists of four programs including: the Corporate Group Support Plan, Individual Support Plan, Basic Support, and On-Demand Technical Support.

The Corporate Group Support Plan is designed primarily for large customers having a central internal support group or multiple software installations.

Subscribers to the Corporate Support Plan for Ventura Publisher and FormBase receive toll-free access for five designated users to the Ventura Software Inc. Technical Support Center; top priority handling of their support calls; a 25 percent discount on up to 15 future upgrades of Ventura Software products; free automatic distribution of software patches; five free subscriptions to Ventura Professional magazine; and five discount coupons toward attendance at selected training workshops.

The annual fee for the Corporate Support Plan is $1,000.

The Individual Support Plans for both Ventura Publisher and FormBase are similar to the corporate user plan; however, they offer support for one individual user, express handling of support calls, a 10 percent discount on purchases of Ventura Software Inc. products, and a discount coupon for selected training workshops.

There is an annual fee of $150 for the Ventura Publisher Individual Support Plan and $100 for the FormBase Individual Support Plan.

The Basic Support plan is offered free of charge for newly registered, first time purchasers of either Ventura Publisher Gold Series or FormBase 1.1. Upgrade customers are provided with free technical support for 60 days.

Ventura Software Inc., a Xerox company, is a leading supplier of publishing, forms processing and database management software solutions for IBM PCs and compatibles. The company markets its software solutions through a dealership network of more than 4,000 outlets. Ventura Software Inc. has its headquarters in San Diego.

#90206b0110 07/25/1990 ~Business Wire

HOUSTON (JULY 25) BUSINESS WIRE - Southdown Inc. (NYSE:SDW) announced net earnings of $8.0 million, or $0.38 per share on a fully diluted basis, for the three month period ended June 30, 1990.

This compares with net earnings of $6.7 million, or $0.30 per share, in the second quarter of 1989. Net earnings in the second quarter of 1989 included $3.0 million, or $0.18 per share, from the company's oil and gas operations which were sold in late 1989 and have been classified as a discontinued operation.

For the first six months of 1990, net earnings were $14.3 million, or $0.66 per share fully diluted, compared with $13.7 million, or $0.61 per share, a year earlier. The 1989 results included $6.3 million, or $0.37 per share fully diluted, of earnings from the discontinued operations.

Operating earnings were $19.1 million in the second quarter of 1990, compared with $20.3 million a year earlier. The lower operating earnings were primarily the result of a decline in earnings from the concrete products operations, which have been adversely effected by the slowdown in construction activity in the Florida and Southern California markets. Operating earnings for the first half of 1990 were $35.7 million, compared with $39.9 million a year ago.

Interest expense declined significantly in 1990 compared with a year ago.

Interest expense totalled $7.5 million and $15.0 million in the second quarter and first half of 1990, respectively, compared with $14.8 million and $28.9 million, respectively, in the comparable periods in 1989. The decline reflects substantially less debt outstanding than a year ago as a result of the sale of the company's oil and gas operations.

Southdown Inc. is one of the leading U.S. cement and ready-mixed concrete companies. The company manufactures cement in eight plant locations around the country and markets ready-mixed concrete in Florida and Southern California.

#90206b0119 07/25/1990 ~Business Wire

ALAMEDA, CALIF. (JULY 25) BUSINESS WIRE - Sitka Corp., formerly known as TOPS, Wednesday announced support for the new Sun Sparcstation IPC with TOPS for Sun Workstations.

The networking software product enables Sun's UNIX Workstations to share files and resources with Macintosh computers and industry-standard DOS-compatibles.

With Sitka's TOPS for Sun Workstations, the $9,995 color workstation can become a non-dedicated file server for Macs and PCs running TOPS file sharing-software. It also allows Sun Workstations to print to Laserwriters on AppleTalk networks.

Using Sitka's TOPS for Sun Workstations, StarNine's Mail Link SMTP gateway and Sitka's InBox Plus electronic mail allows the Sun Workstation to act as a mail server.

This enables Macs, PCs and Suns to send electronic mail seamlessly via the SMTP gateway.

Sitka's TOPS for Sun Workstations server is also a TOPS to NFS gateway. Through this gateway, TOPS clients may connect to the platforms of over 150 PC-NFS vendors such as Hewlett Packard, DEC, Apollo and Cray.

TOPS for Sun Workstations sells for $1,295, and supports the Sun-4, SPARC, Sun386i and Sun-3 families running Sun OS 4.x.

Sitka Corp. is a leading supplier of networking software for IBM Personal Computers and compatibles, Apple Macintosh Computers and Sun Workstations. Sitka networking and electronic mail software provides the best solution for businesses needing to connect disparate environments.

With more than 600,000 users worldwide, the company has the world's second-largest installed base of LAN software, according to the market research firm Infonetics.

SEATTLE (JULY 25) BUSINESS WIRE - Celerex Corp. Wednesday announced that Jose V. Porto, its president and chief operating officer, has taken a medical leave from the company.

The duration of the leave is currently unknown.

Thomas A. Marinkovich, co-chairman of the board of directors of the company, will serve as interim president and chief operating officer until Porto is able to return to his full-time duties at Celerex.

Marinkovich has been a member of the company's board of directors since April 1988. He was named co-chairman of the Celerex board on April 11, 1990, at which time he assumed a more active role in the day-to-day operations of the company.

Marinkovich is also affilaited with Medallion Partners, an investment and management group located in Denver. Affiliates of Medallion Partners, including Marinkovich, own or have rights to acquire approximately 54 percent of the outstanding stock of the company. Until September 1988, Marinkovich was president and chief operating officer of Daniels & Associates Inc., a large Denver-based multiple cable television system operator.

Celerex is in the electronic payment systems business, specializing in credit card authorization, electronic draft capture and check verification. Celerex stock is traded through NASDAQ under the symbol CEXY.

PLAINFIELD, IN (JULY 25) BUSINESS WIRE - PSI Energy announced Wednesday that Darrell V. Menscer, the company's president and chief operating officer, will retire as an officer and director of the utility and its parent company, PSI Resources, on Aug. 31, 1990.

''Darrell Menscer has given exemplary service to PSI and to the nation's electric utility industry,'' said James E. Rogers Jr., PSI Energy chairman and chief executive officer. ''He is correctly regarded by his peers as one of the outstanding executives in our industry. It's obvious that his leadership and experience will be missed at PSI.''

With Menscer's retirement, two of PSI Energy's senior officers will become chief operating officers of the utility's largest business units -- Power and Customer Operations.

Larry E. Thomas will serve as both senior vice president and chief operating officer of Customer Operations. Joseph W. Messick Jr. will serve as both senior vice president and chief operating officer of Power System Operations. Rogers will assume the title of president.

''In recent months, it has become clear to me that Larry Thomas and Joe Messick are prepared to assume full authority over their respective operations,'' Menscer said. ''This made it easier for me to choose retirement at this time.''

Menscer, 56, joined PSI in May 1980 as the company's president and chief operating officer. Prior to coming to Indiana, he was an executive at Carolina Power & Light. He has worked in the electric utility industry for 30 years.

Menscer said he planned to remain in the electric utility industry as a private consultant and would maintain a consulting relationship with PSI.

LOS ANGELES (JULY 25) BUSINESS WIRE - Security Pacific Corp. announced Wednesday that it has received federal regulatory approvals for the acquisitions of La Jolla Bancorp and Santa Clarita National Bank (SCNB).

Security Pacific officials said the acquisition of La Jolla Bancorp is expected to close in 30 days but that the Santa Clarita National Bank acquisition is still subject to SCNB shareholder approval.

Security Pacific announced its intention to acquire La Jolla Bancorp in October 1989 as part of its plan to expand its presence in San Diego County.

La Jolla Bancorp is the parent company of La Jolla Bank & Trust Co., the second largest bank with headquarters in San Diego County.

Santa Clarita National Bank operates 11 branches in the fast-growing Santa Clarita Valley and San Fernando Valley areas of Los Angeles County. Security Pacific signed a letter of intent to acquire SCNB in March 1990.

Security Pacific Corp. is the fifth largest bank-holding company in the United States with more than $94 billion in assets.

CONWAY, Ark. (JULY 25) BUSINESS WIRE - Acxiom Corp. (NASDAQ:ACXM) reported first quarter results Wednesday, according to Charles D. Morgan Jr., chief executive officer and chairman of the board.

Consolidated revenue for the first quarter ended June 30, 1990 was $23,617,000 compared to $19,806,000 for the first quarter ended June 30, 1989, a 19 percent increase. Net income for the first quarter ended June 30, 1990 was $480,000 compared to $1,190,000 for the quarter ended June 30 1989, a 60 percent decrease. Per share earnings for the quarter ended June 30, 1990, were 10 cents per share versus 25 cents per share for the quarter ended June 30, 1989, a 60 percent decrease.

''As anticipated, first quarter consolidated results reflect the impact of Acxiom's restructuring of our fulfillment handling and mailing services operations. We also made investments to prepare for future revenue growth which we anticipate will produce a general improvement in operating results during the second half of the current fiscal year,'' Morgan stated.

In line with Acxiom's long term goals, Acxiom has streamlined its mailing services operation in Philadephia and the fulfillment operation in Sunderland, England. Acxiom has also closed its Lakewood, N.J. fulfillment facility. These strategic measures will allow Acxiom to ultimately reduce costs, better utilize existing facilities and improve margins for these areas of the business.

Data processing revenues were up for the quarter reflecting the growing opportunity in database marketing for Fortune 500 companies. International performance continued strong in the first quarter.

In addition, Morgan said, ''Our first two outsourcing conversions have been completed with very positive results. This area continues to hold long-term growth potential for the company.''

Acxiom provides a complete range of marketing services, software and outsourcing to direct marketing businesses and marketing divisions of Fortune 500 companies in the United States and United Kingdom. Acxiom services include marketing database, list enhancement, list processing, mail preparation, fulfillment, consulting and analysis.

SANTA MONICA, CA (JULY 25) BUSINESS WIRE - National Medical Enterprises Inc. (NME) announced Wednesday that its board of directors approved an increase in the company's quarterly cash dividend to a new rate of 20 cents per share, or 80 cents per share annually.

Richard K. Eamer, NME chairman and chief executive officer, said the new quarterly dividend marks the 28th increase in the past 16 years.

''The new dividend represents the largest increase in NME's history,'' Eamer said. ''This increase reflects the results of NME's recent strong operating performance and management's confidence in the company's continued growth in the future.''

The company most recently paid an 18-cent quarterly dividend, or 72 cents per share annually. In addition, in January NME distributed to shareholders, as a special dividend, one share of Hillhaven for each NME

share.

The dividend will be paid on Sept. 7 to shareholders of record on Aug. 17.

National Medical Enterprises, one of the nation's largest health care services companies, owns, operates and manages acute, psychiatric and physical rehabilitative hospitals, and substance-abuse treatment centers throughout the U.S. and internationally.

MENLO PARK, CA (JULY 25) BUSINESS WIRE - SPARC International has announced the first group of systems to pass the tests for SPARC Compliance Definition 1.0.

The systems that have passed the first round of compliance testing are the SPARCstation 1, the SPARCstation IPC (both from Sun Microsystems) and the Solbourne 500/810 from Solbourne Computer.

The SPARC Compliance Definition outlines the requirements for hardware vendors to develop compatible SPARC systems and for independent software vendors to run identical application binaries on all compliant SPARC platforms.

Once a vendor's product is verified compliant, SPARC International will license the SPARC trademarks to promote recognition of the SPARC brand and increase product market acceptance.

Both Sun Microsystems and Solbourne have committed to compliance testing for their product lines. Scott McNealy, president and chief executive officer of Sun Microsystems stated, ''Realizing the importance of compliance to the SCD specification, we requested that SPARC International test the SPARCstation IPC on a confidential basis in advance of our announcement date.

The SPARC Compliance Definition 1.0 enables cross vendor compatibility for systems based on the SPARC architecture. The test suite is structured around several layered elements. At the core of the first level is SPARC/VS (SPARC/Validation Suite) a bill of materials check on the filesystem and a verification of the libraries and protocol for the MIT X-Window client programs.

In addition, the SCD test includes several application level tests including those provided by Autodesk (AutoCAD), Lotus Development (Lotus 1-2-3), Frame Corp. (Framemaker), Oracle Corp. (Oracle), Wolfram Technology (Mathematica) and WordPerfect Corp. (WordPerfect).

The SCD 1.0 is based on Sun Operating System (OS) 4.X. which is available through Sun or Interactive Systems, both SPARC International members. SCD 1.0 assures compatibility for application software today and provides for simple migration to AT&T UNIX SVR4.

SPARC International, located in Menlo Park, was founded in February 1989 as an independent, non-profit corporation chartered with the responsibility of the SPARC RISC architecture developed by Sun Microsystems. Membership is open to all component, hardware and software vendors as well as individuals who are committed to promoting SPARC and directing its evolution as an open RISC standard.

LA HABRA, CA (JULY 25) BUSINESS WIRE - Landmark Bancorp (NASDAQ:LMBC) and its subsidiary Landmark Bank, announced Wednesday an increase in the semi-annual dividend from 10 cents per share to 12 cents per share.

Such dividend is for shareholders of record on Aug. 6, 1990.

Craig Collette, president, stated that the company's board had approved the increase in its semi-annual dividend due to increased earnings for the six months ending June 30, 1990. The reported earning of 67 cents per share was an 8 percent increase over the 63 cents per share reported the prior year.

Collette further stated, ''we are delighted with the progress of Landmark Bank. Our business plan, management team, and asset base has made our future look very optimistic. We are pleased that the bank's performance allows the company to increase its dividend as further appreciation for the support given by our shareholders.

SAN FRANCISCO (JULY 25) BUSINESS WIRE - McKesson Corp. announced Wednesday at its annual meeting of stockholders that John M. Pietruski, 57, and Robert H. Waterman Jr., 53, have been elected members of the board of directors.

The two replace retiring directors Robert Dockson and J. Paul Sticht who have reached mandatory retirement age. Dockson is the retired chairman and chief executive officer of CalFed Inc. Sticht is the retired chairman of RJR Nabisco Inc.

Pietruski is the retired chairman and chief executive officer of Sterling Drug Inc. and is currently president of New York-based Dansara Co., a privately held general management and consulting firm. He is also a director of General Public Utilities Corp., Hershey Foods Corp., Lincoln National Corp., The TPG Capital Corp. and Cytogen Corp.

Waterman is founder and president of Waterman & Co., a management research and publishing firm established in 1988. For 21 years prior to that, he was with the management consulting firm of McKinsey & Co. where he was a senior director.

He co-authored the best selling book, ''In Search of Excellence,'' and is the author of several other well-known business books. Waterman also serves on the boards of directors of Boise Cascade Corp., Applied Energy Services Inc. and ASK Computer Systems.

#90206b0182 07/25/1990 ~Business Wire
NEWARK, CA. (JULY 25) BUSINESS WIRE - Margaux Inc. (NASDAQ:MRGX) Wednesday reported net income of $13,000 on revenue of $4,352,000 for its first quarter ended June 30.

This compares to a net income of $284,000 (4 cents a share) on revenue of $3,149,000 for the like period last year. Last year's net income, however included licensing income of $297,000.

First quarter revenue increased by $1,203,000 (38 percent) over last year's revenue of $3,149,000. Restating last year's net income to exclude the one-time receipt of the $297,000 license fee, first quarter net income improved from last year's loss of $13,000 to a profit of $13,000 in the recently ended quarter.

Margaux President, Stephen H. Clark, attributed the improved results to increasing new store construction activity among most supermarket customers.

Margaux makes refrigeration and air conditioning systems for supermarkets and convenience stores.

#90206b0185 07/25/1990 ~Business Wire
REDMOND, WA (JULY 25) BUSINESS WIRE - Kicking off the celebration of the 15th anniversary of the company, Microsoft Corp. Wednesday announced record revenues and earnings for fiscal year 1990, which ended June 30.

With revenues of $1.18 billion, the company became the first personal computer software company to exceed $1 billion in sales in a single year. Net income for fiscal 1990 was $279.2 million and earnings per share were $2.34.

Revenues for fiscal 1990 increased 47 percent over fiscal 1989 revenues of $803.5 million. Net income rose 64 percent from 1989's $170.5 million. Earnings per share were in line with revenue and net income increases, exceeding 1989's by 54 percent. Earnings per share are restated for a two-for-one stock split in April 1990.

Revenues for the fourth quarter of fiscal 1990 were $337 million, an increase of 53 percent over the $220.2 million for the same period of

1989. Net income increased 76 percent from $45.4 million, or $0.40 per share, in 1989, to $80 million, or $0.65 per share in 1990.

Mike Hallman, president and chief operating officer, attributed the excellent fiscal year to a number of factors. ''These results represent the continued strength of the company across our product groups and channels of distribution. Shipments of the Microsoft family of applications and of Microsoft Windows 3.0 contributed strongly to revenues. Revenues from worldwide retail products increased 61 percent.''

The worldwide introduction of the Microsoft Windows 3.0 graphical environment was the major corporate event during the final quarter of 1990. Over 5,000 people attended the introduction through satellite transmission. Microsoft Project for Windows and Microsoft PowerPoint for Windows, two new applications for the Microsoft Windows environment, were also released during the fourth quarter.

Microsoft was founded in 1975 by Bill Gates and Paul Allen with a corporate vision of putting ''a computer on every desk and in every home.'' The company's first product was the programming language BASIC written for the MITS Altair computer, one of the first personal computers.

Microsoft Corp. (NASDAQ:MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems languages and application programs, as well as books, hardware and CD-ROM products for the microcomputer marketplace.

#90206b0214 07/25/1990 ~Business Wire

SACRAMENTO, CA (JULY 25) BUSINESS WIRE - Foundation Health Corp. (ASE:FH) Wednesday announced that it has sold its remaining minor equity interest in a Washington HMO to Qual-Med Inc., for $1 million in cash.

Foundation executives said the $1 million in revenue was unanticipated because it looked doubtful that Colorado-based Qual-Med would exercise its option to purchase the remaining equity from Foundation.

''This is a $1 million windfall which will reflect favorably in fiscal year 1991,'' said Daniel D. Crowley, president and chief executive officer of Foundation Health Corp., which operates one of California's largest HMOs. ''It also officially marks the end of our last small link to the

non-California subsidiaries.''

Qual-Med purchased the Washington HMO in 1989 as part of Foundation's move to spin off all non-California HMOs, which also included HMOs in New Mexico, Oregon, New Jersey.

Foundation earlier reported nine month net income for FY 1990 of $8.4 million as compared to a loss of $3.7 million for the comparable period a year earlier.

The company will issue its full FY 1990 earnings report in mid-August based on a June 30 year-end close.

#90206b0220 07/25/1990 ~Business Wire

NEW YORK (JULY 27) BUSINESS WIRE - S&P lowers the senior debt ratings of Security Pacific Corp., Security Pacific Overseas Finance N.V., Security Pacific Australia Ltd., and Security Pacific Bancorp Northwest (formerly Rainier Bancorp.) to double-'A'-minus from double-'A'.

Also lowered were the subordinated debt ratings of Security Pacific Corp. and Security Pacific Bancorp Southwest (formerly Arizona Bancwest Corp.) to single-'A'-plus from double-'A'-minus, and the preferred stock rating of Security Pacific Corp. to single-'A' from single-'A'-plus.

About $9.8 billion of debt and preferred stock is affected.

The commercial paper ratings of Security Pacific Corp., Security Pacific Bank Canada and Security Pacific Australia Ltd. are affirmed at 'A-1'-plus.

Also affirmed are the certificates of deposit and/or letter of credit-backed issues of Security Pacific National Bank, Security Pacific Bank Arizona and Security Pacific Bank Washington and the deposit notes of Security Pacific Australia Ltd., at double-'A'/'A-1'-plus.

The downgrades reflect the higher risks borne by holding company creditors than those of banks, particularly given the consolidated company's moderately high risk profile.

Deteriorating business conditions in the real estate and highly leveraged transaction lending areas could put pressure on earnings and thus reduce holding company financial flexibility. Nevertheless, the ratings, which remain high relative to other domestic banks', continue to benefit from the relative stability of the company's financial performance.

Security Pacific, the fourth-largest banking organization in the U.S., is broadly diversified, with operations throughout western U.S., where it has a strong retail banking franchise, while corporate and merchant banking activities are national and international in scope. Significant nonbank operations, including consumer and commercial finance as well as venture capital investments, and securities processing add another dimension of diversification.

Profitability has also been improving thanks to streamlining efforts over the past few years. These considerations offset the relatively modest capitalization and high loan leverage, although these ratios have been improving and should continue to do so.

The company's funding sources are also very diversified and dependence on purchased funds could decline with continued expansion of the retail branch network. Nonperforming assets are not expected to rise substantially above their narrow historic range, S&P said.

CALGARY, ALBERTA (JULY 25) BUSINESS WIRE - Superior Propane Inc., a wholly owned subsidiary of Norcen Energy Resources Ltd. (TSE/ASE:NCN), Wednesday announced that it has entered into a definitive agreement to acquire Skelgas Group Inc. for a cash consideration of U.S. $160 million.

Skelgas is the fourth largest retail marketer of propane in the United States, with a marketing network extended to 11 Great Lakes and Midwest states and with retail propane sales in 1989 of approximately 600 million litres.

Upon closing of the acquisition, which is anticipated in September 1990, Superior will become the third largest propane marketer in North America. Closing is currently pending certain regulatory filings and approvals in the United States.

Commenting upon the acquisition, Donald J. Edwards, executive vice president and chief operating officer of Superior, said: ''The size and quality of the Skelgas marketing network forms an excellent cross-border extension to Superior's Canadian operations.

Additionally, and perhaps most importantly, the acquisition provides Superior with a solid foothold in the U.S. marketplace, with considerable opportunities for further significant growth.''

DALLAS (JULY 25) BUSINESS WIRE - American Medical Holdings Inc. (AMEX:AMI) and its wholly owned subsidiary, American Medical International Inc., announced Wednesday that the company's note purchase agreement has been amended, among other things, to extend the term of the funding notes in the aggregate principal amount of $578,375,000 from July 24, 1990, to Nov. 25, 1990.

The funding notes were initially issued to raise part of the financing for the acquisition of American Medical International Inc.

Harry J. Gray, chairman of the board and chief executive officer, stated: ''The amendment to the note purchase agreement permits holdings and AMI to continue to explore various refinancing alternatives for its subordinated debt.

''Since our acquisition of American Medical International Inc. in October 1989, the company has achieved significant cost reduction and improved operating results, and has completed in excess of $600 million of its divestiture program ahead of schedule and budget.''

AMI and its affiliates, which founded the investor-owned hospital industry in 1960, currently operate 54 hospitals, including 46 acute care hospitals and six psychiatric hospitals in the United States and two hospitals in Spain.

PHOENIX (JULY 25) BUSINESS WIRE - Swift Transportation Co. Inc. (NASDAQ/NMS:SWFT) Wednesday announced revenues and earnings for the second quarter ended June 30, 1990.

Revenues for the second quarter increased 20 percent to $37.5 million, compared with $31.3 million for the corresponding period in 1989. Net earnings increased to $1.8 million or 34 cents per share, compared to $.6 million or 11 cents per share for the corresponding quarter a year ago.

Revenues increased primarily due to the company's continued fleet expansion. Swift's improved profitability was the result of the company's reduction in operating ratio from 91.2 in the second quarter of 1989 to 88.1 in the second quarter of 1990.

For the six months ended June 30, 1990, revenues increased 22 percent to $72.5 million from $59.3 million in the first six months of 1989. Net earnings increased to $3.4 million or 63 cents per share, compared to $.9 million or 18 cents per share. Earnings per share for 1990 and 1989 are based on 5,300,000 number of common shares outstanding.

SAN FRANCISCO (JULY 25) BUSINESS WIRE - PC WORLD, the magazine for PC-proficient managers, Wednesday announced the appointment of Richard Marino as Associate Publisher in charge of all sales and marketing operations.

''I am extremely pleased that Rich has joined PC WORLD and the IDG family '' said PC WORLD Publisher Patrick Kenealy. ''Rich's considerable talents are in keeping with the large investments we are making in PC WORLD for 1991, and his experience will be welcomed by our customers and management team alike.''

Marino, age 41, was most recently the director of sales/national accounts

for PC MAGAZINE. Prior to joining that publication, Marino served for five years as senior vice president of the Consumer Magazine Division of the American Broadcasting Co., where he was responsible for sales and marketing operations for 15 publications.

Early in his tenure with ABC, Marino directed ad sales for HIGH FIDELITY and MODERN PHOTOGRAPHY. Before that, he was the national sales manager for the Media Systems Division at Harcourt Brace Jovanovich Inc.

''I am very pleased to be joining PC WORLD, which has evolved into the leading computer publication serving managers who use and buy PC technology to help solve their information needs of this audience better than any other publication, as evidenced by its readership of 2.3 million readers and its 44 percent increase in circulation over the past two years.

''I am looking forward to directing the team that shares this growth with PC market advertisers.''

Marino's ten-year career in publishing demonstrates a consistent record of impressive achievements. At PC MAGAZINE, he was responsible for the development and direction of the sales staff, significantly boosting advertising sales. At ABC Publishing Corp., he initiated measures that placed LOS ANGELES as the 1 city and regional magazine in ad pages, and SAN FRANCISCO FOCUS as 5 nationally.

Marino's hiring by PC WORLD is part of a series of investments and improvements IDG is making in its flagship PC market magazine including increasing the circulation staff, hiring additional editorial and marketing managers, and implementing a computerized production and layout system.

PC WORLD is a subsidiary of IDG Communications, the world's leading publisher of computer-related newspapers and magazines with more than 135 publications in 44 countries. IDG Communications is part of International Data Group, the world's leader in providing information services on information technology.

SALT LAKE CITY (JULY 26) BUSINESS WIRE--First Security Corp. (OTC/NASDAQ:FSCO) will acquire Pacific First Financial Corp.'s Utah operations (formerly the Utah operations of American Savings & Loan) under an agreement signed Wednesday.

The acquisition will be a $3.25 million cash transaction, and is subject

to the approval of the applicable regulatory agencies. Spencer F. Eccles, First Security's chairman and chief executive officer, and Dr. Jerry E. Pohlman, Pacific First's chairman and chief executive officer, made the joint announcement.

Pacific First purchased American Savings and its Willamette Savings (Oregon) subsidiary in June from the Resolution Trust Corp. The Utah operations consist of 40,000 customer accounts with deposits of about $240 million and 17 offices in 13 communities.

Eccles said that Pacific First's (American Savings') Utah operations will be combined with First Security Bank of Utah. First Security Bank of Utah currently operates 93 offices in 52 communities statewide.

American Savings, which has operated branch offices in both Utah and Oregon, was placed under federal conservatorship as part of the program enacted by Congress to rescue savings and loans nationwide. As conservator the Federal Deposit Insurance Corp. and later the Resolution Trust Corp. conducted the everyday management of American Savings from February 1989 until its acquisition by Pacific First this June.

Pacific First is a wholly owned subsidiary of Royal Trustco Ltd. of Toronto. The parent company has assets under administration of more than CDN$140 billion and operates financial service companies throughout Canada the United Kingdom, Europe, the Caribbean and Asia, in addition to the western United States.

First Security Corp. is the largest financial services organization headquartered in the Intermountain West. It is the oldest continuously operating multi-state bank holding company in the United States. First Security operates 182 full-service banking offices in Utah, Idaho, Oregon and Wyoming. Other subsidiaries include a leasing company, two insurance companies, an investment management firm and a discount brokerage operation.

MOUNTAIN VIEW, CA (JULY 26) BUSINESS WIRE - Software Publishing Corp. (NASDAQ:SPCO) and Computer Support Corp. have settled their copyright infringement dispute.

Both companies also agree that Software Publishing's new Harvard Graphics

2.3 release was not part of the dispute.

As part of the resolution, Computer Support Corp. and Software Publishing Corp. have agreed to mutually agreeable licenses. Customers of both companies can continue to use existing products without violating any proprietary rights.

Software Publishing Corp., one of the original personal computer software companies, is a leading international supplier of business productivity software for the IBM Personal Computer and compatibles.

The company develops and markets software in four product families: entry-level products through the PFS:First Series; products for the business professional through the Professional Series; graphics and specialty products through the Harvard Series; and full-featured word processing software through the OfficeWriter Series.

MURFREESBORO, TN (JULY 25) BUSINESS WIRE - National HealthCorp L.P. (ASE:NHC), one of the nation's largest long-term health care chains, announced second quarter income rose 54 percent to $5,413,000 from $3,505,000.

Revenues for the three months ended June 30 rose 22 percent to $39,518,000 from $32,485,000 for the same period last year. Earnings per unit climbed up 53 percent to 78 cents compared with 51 cents for the same period last year.

For the six months, revenues increased 19 percent from $64,746,000 to $77,240,000. Income rose from $6,752,000 to $8,870,000, a 31 percent increase. Earnings per unit climbed to $1.27, up 30 percent from 98 cents.

Earnings and revenues for the second quarter include a one-time gain of $1,864,000 or 27 cents per unit from the sale of a health care center in Canton, N.C.

NHC President Andy Adams said highlights of the quarter included the opening of one health care center and the purchase of another. National Healthcare Center of Merritt Island in Florida opened its 120 beds this month. The company's purchase was Joplin Health Care Center in Missouri. This 126-bed center had been managed by NHC since 1982.

NHC, a publicly traded limited partnership, now operates 72 health care centers with 8,707 beds. NHC's other services for the nation's elderly include Alzheimer's units, retirement apartments and homecare.

#90206b0611 07/25/1990 ~Business Wire

IRVINE, Calif.(JULY 25) BUSINESS WIRE - AST Research Inc. (NASDAQ:ASTA) Wednesday announced record sales of $151.8 million, for the fourth quarter ended June 30, 1990 and $533.8 million, for the 1990 fiscal year.

This compares with sales of $123.5 million, for the fourth quarter of fiscal year 1989 and $456.5 million, for fiscal year 1989. The company also announced a plan to repurchase shares of the company's common stock.

Net income after taxes was $15.2 million, for the fourth quarter of fiscal year 1990, compared with $2.5 million, for the prior year period. Primary earnings per share were $1.18, for the fourth quarter of fiscal year 1990, and 98 cents, on a fully diluted basis. This compares with earnings per share of 21 cents, for the same period last year.

The company reported net income for fiscal year 1990 of $35.1 million, compared with a net loss for fiscal year 1989 of $7.5 million. Primary earnings per share were $2.86, for fiscal year 1990, and $2.41 on a fully diluted basis. This compares with a net loss of 64 cents per share, for fiscal year 1989.

Total sales increased 17 percent, in fiscal 1990 over the prior year including a 30 percent increase in international sales. Fiscal 1990 sales of personal computer systems increased by more than 40 percent, compared with the prior year.

''The key marketing, product and international expansion strategies adopted during the year successfully contributed to this record financial performance,'' said Safi Qureshey, AST president and chief executive officer. ''We also are pleased with AST's operating improvements which have resulted in an excellent balance sheet. AST intends to use its resources to continue to develop new products and expand distribution into new world markets.''

AST's cash position of $92.3 million, at June 30, 1990, has increased by $73.8 million, from the $18.5 million reported at June 30, 1989. Inventories were reduced to $73.5 million, for fiscal year 1990, compared with $91.6 million, reported in the preceding fiscal year.

In the most recent quarter ended June 30, 1990, the company's overall gross profit margins continued to improve due to both increased sales of the higher-margined Premium 386 and i486 products. The improved results are indicative of the greater acceptance of AST's Cupid-32 architecture, which allows users to upgrade easily to higher-performance systems.

In June 1990, the company called for the redemption of $47.5 million in convertible subordinated debentures. Conversion was partially achieved in June 1990 and was completed on July 3, 1990. The transaction was recorded in the company's consolidated financial statements assuming the conversion had been completed as of June 30, 1990.

This conversion has resulted in the issuance of approximately 3 million shares in common stock and will eliminate more than $4 million in future annual interest expense.

The company also reported that the board of directors has authorized the purchase from time to time in the open market of up to 1.5 million shares of AST common stock.

''We believe this repurchase plan represents an attractive investment for the company,'' Qureshey said.

This week AST announced price reductions from 4 to 26 percent on select models of its Premium line of Cupid-32 personal computers, including 386SX 386 and i486-based desktop and tower configurations.

''The price reductions are intended to extend AST's leadership position in advanced personal computer technologies by introducing high-performance products that offer customers excellent value,'' Qureshey said.

During fiscal 1990, AST introduced 12 new personal computer systems and three new enhancement board products. AST now offers a full line of 286, 386SX, 386 and i486 desktop and tower configurations featuring ISA (Industry Standard Architecture) and EISA (Extended Industry Standard Architecture) bus technologies. In May 1990, the company was the first in the industry to introduce a personal computer based on the new 33-MHz Intel i486 microprocessor.

AST is a leading worldwide manufacturer of high-performance computing solutions. AST's award-winning computers range from cost-effective Bravo systems to the 386-based and i486 line of personal computers, including the new EISA bus architecture.

AST is the developer of the patent-pending Cupid-32 architecture, which eliminates obsolescence in its Premium line of personal computers. Cupid-32 computer systems may be upgraded to higher-performing microprocessors with the simple exchange of an innovative plug-in

processor card.

AST Research corporate headquarters are located at 16215 Alton Parkway, P.O. Box 19658, Irvine, Calif., 92713-9658. Telephone: 714/727-4141.

SUNNYVALE, CALIF. (JULY 25) BUSINESS WIRE - MIPS Computer Systems Inc. (NASDAQ:MIPS) Wednesday announced financial results for the second quarter ended June 30.

Revenue for the second quarter increased 75 percent to $39,584,000 from the $22,590,000 reported for the second quarter of 1989. Revenue for the first six months of 1990 was $71,811,000 compared with $43,052,000 for the first six months of 1989, an increase of 67 percent.

Net income per share for the quarter was 16 cents, an increase over a net loss per share of 11 cents and net income per share of 8 cents from continuing operations reported for the comparable period of 1989.

Product revenue for the second quarter was $28,263,000, an increase of 73 percent from the $16,358,000 reported for the second quarter of 1989 and 50 percent from the first quarter of 1990. Technology revenue increased 82 percent to $11,321,000 from the $6,232,000 reported for the second quarter of 1989 and decreased modestly from the $13,434,000 reported in the first quarter of 1990.

Income from continuing operations and net income for the second quarter of 1990 was $4,021,000, a 151 percent increase over income from continuing operations of $1,601,000 reported for the comparable period of 1989.

Income from continuing operations and net income for the first half of 1990 was $7,517,000, or 30 cents per share, up from income from continuing operations of $2,837,000 and a net loss of $1,228,000, or a per-share loss of 6 cents, reported for the first half of 1989.

MIPS Computer Systems Inc. is a leading supplier of technology based on RISC, including computer systems, optimizing compilers and technology products. MIPS manufactures and markets a line of high-performance computer systems based on RISC, from desktop workstations to deskside and data center servers.

MIPS sells its systems through OEM, VAR and reseller channels, and to system integrators worldwide. The company also licenses its technology to semiconductor companies, which supply components for the embedded control and computer markets.

MILPITAS, CA (JULY 25) BUSINESS WIRE - Linear Technology Corp. (NASDAQ:LLTC), a leading independent manufacturer of high-performance linear integrated circuits, Wednesday announced that net sales for its fiscal year ended July 1 were a record $75,620,000, an increase of 17 percent over net sales of $64,722,000 for the previous year.

The company also reported record net income for the year of $11,301,000, or 67 cents per share, an increase of 27 percent over the $8,902,000, or 53 cents per share, reported for fiscal 1989.

Net sales for the fourth quarter ended July 1, 1990, were a record $20,810,000, an 18 percent increase over net sales of $17,675,000 for the fourth quarter of the previous year. Net income for the quarter was $3,401,000, or 20 cents per share, compared with $2,388,000, or 14 cents per share, an increase of 42 percent over the fourth quarter of the previous year.

According to Robert H. Swanson, president and chief executive officer: ''Fiscal year 1990 was one of challenges and successes. We were challenged with a tentative semiconductor marketplace, yet we grew our business 17 percent and increased net income by 27 percent.

''Operating income as a percentage of sales was 20 percent for the year. We generated an additional $7 million in net cash even after spending roughly $3 million on repurchasing common stock and $2 million on settling outstanding patent litigation.

''In positioning future business, we introduced many new circuits and our products made inroads into several vibrant new markets, most notable of which are the laptop computers, disk drives and local area network products.''

Linear Technology Corp. was founded in 1981 as a manufacturer of high-performance linear integrated circuits.

Linear Technology products include operational, instrumentation and audio amplifiers; voltage regulators, references, comparators and converters; switched-capacitor filters; communications interface circuits; one-chip data acquisition systems; pulse-width modulators and sample-and-hold devices.

Applications for Linear Technology's high-performance circuits include laptop and desktop computers, computer peripherals, cellular telephones, electronic testers, industrial and medical electronic instruments, automotive controls, process controls, factory automation products and avionics.

For further information, contact Paul Coghlan at Linear Technology Corp., 1630 McCarthy Blvd., Milpitas, Calif. 95035-7487, phone 408/432-1900.

#90206b0621 07/25/1990 ~Business Wire

SUNNYVALE, CA (JULY 25) BUSINESS WIRE - Silvar-Lisco (NASDAQ:SVRL) Wednesday announced a loss of $176,000 on revenue of $2,550,000 for the

first quarter of fiscal 1991, ended June 30, 1990, compared with net income of $41,000 on revenue of $3,745,000 during last year's first quarter.

The loss per share was 2 cents based on 7,397,913 shares in this year's first quarter, compared with earnings of 1 cent per share based on 7,591,059 shares in the like quarter a year ago.

Silvar-Lisco President Tony Wainwright attributed the loss to a shortfall in U.S. sales. ''While I am disappointed that U.S. sales were below plan, I am encouraged that our products are increasingly demonstrating their superiority in benchmark tests run against competitors' offerings.

''Elsewhere, our sales are in line with our plans: increasing in the Far East and stable in Europe. We are optimistic that, through actions currently underway, our performance will improve in the U.S., even though there are long lead times to convert new prospects to sales.''

Wainwright added that in other areas Silvar-Lisco made solid progress during the quarter. The company announced several new products, including products with triple level metal capability for automated, timing-drive layout that will set new standards for the design of application-specific integrated circuits (ASICs).

Silvar-Lisco is a leading vendor of advanced CAD (Computer-Aided-Engineering) software products for the design of semi- and full custom integrated circuits. The company's products are marketed both domestically and internationally to integrated circuit manufacturers and large electronic systems manufacturers.

IRVINE, CA (JULY 25) BUSINESS WIRE - Resmaster, a new high-tech communications company, announced their acquisition by Comparator Systems Corp. (NASDAQ:IDID) Wednesday in a stock-exchange transaction giving Comparator 81 percent of Resmaster's common stock.

In their first phase Resmaster will be supplying reservation communications, credit-card authorization, communications management and other communications services to the travel and leisure industries in Mexico.

Resmaster's marketing in Mexico will be handled by Sat-Networks International (SNI), an elite team of communications experts who provide

an interpretive conduit between U.S. high-technology and international end users. SNI is considered to be at the technological forefront of communications in Mexico, the Caribbean and the Pacific Rim.

Sat-Networks International is filed as an international communications common carrier in the United States, and recently delivered $300,000 worth of communications hardware to a Mexican university system.

Revenues at Resmaster, from their Mexican business, are expected to be $1.5 million by the end of the first year. Resmaster expects to be making further announcements, in approximately 30 days, on contracts with large airline corporations in the United States.

PROVO, UT (JULY 25) BUSINESS WIRE - Novell Inc., developer of NetWare systems software products, Wednesday announced a non-exclusive licensing agreement with Federal Technology Corp. (FTC) under which Novell will transfer its EXOS intelligent Ethernet controller technology, the EXOS trademark and current EXOS business to FTC.

Novell will retain ownership of the current EXOS technology.

Products immediately transferred to FTC include: the EXOS 201 and 301 series for Multibus systems; the EXOS 202 and 302 series for VMEbus systems; the EXOS 203 series for Q-bus systems; the EXOS 204 and 304 series for UNIBUS systems. Additional products scheduled to be transferred before the end of October 1990 include: the EXOS 205 series for PC-bus systems; and the EXOS 215 series for Microchannel architecture systems.

The agreement continues Novell's move away from the hardware business and advances its commitment to networking software development. Licensing the EXOS line to FTC lets Novell focus its development resources on NetWare and other software solutions. FTC's strengths in hardware connectivity promise EXOS customers ongoing product enhancements and assure current users a continued high level of service and support.

The EXOS line was originally developed and marketed by Excelan Inc. with whom Novell merged in 1989. EXOS controllers established and maintained a reputation for reliability throughout the 1980s.

Federal Technology Corp., a leading national network communications company, specializes in providing complete networking solutions including systems integration, connectivity products and on-site service for both government and the private sector. Federal Technology is a long-term supplier of products and services to Novell and to Novell's customer base. Federal Technology can be reached by calling 1-800-FON-4LAN (366-4526).

Novell Inc. is the leading independent provider of open, high-performance network computing software products. The company's NetWare network operating system has become a standard for personal computer-based local area networks.

#90206b0627 07/25/1990 ~Business Wire

BELLEVUE, WA (JULY 25) BUSINESS WIRE - First Mutual Savings Bank (NASDAQ:FMSB) Wednesday reported increased second quarter net income.

The bank also announced that the recent purchases by its Employee Stock Ownership Plan (ESOP) of 10.1% of First Mutual's outstanding common stock

and a change in accounting treatment will reduce its capital in the third quarter.

For the period ended June 30, the bank's net income increased to $373,000, or $.26 per share, compared to $283,000, or $.20 per share, in the second quarter of 1989. For the first half of 1990, First Mutual's net income totaled $839,000, or $.59 per share, compared to $684,000, or $.49 per share, in the like period a year ago. The bank's return on average equity was 11.6% for the first six months of 1990.

''The bank posted a strong first half despite the extraordinary expenses forced upon us by the proxy contest this spring and a second quarter change in accounting treatment,'' said Bruce F. Baker, president. ''Higher net interest income, better interest margins, increased lending activity, and a lower cost of wages and benefits all contributed to the second quarter increase in net income.''

During the second quarter, First Mutual changed its accounting treatment of the 'gain on the sale of loans' from a method that has been used for many years, to a more conservative accounting treatment that is now being adopted by the thrift industry.

Baker said he expects this change will have a depressing effect upon earnings for a few years but thereafter will cause earnings to increase.

Net interest income after provision for loan losses increased 23% to $1,216,000 compared to $987,000 in the second quarter a year ago. Non-interest expense was $1,355,000 compared to $1,271,000 in the second quarter of 1989.

''We have paid off $13 million of high-cost Federal Home Loan Bank borrowings since the first of the year while we increased deposits by $10.2 million. This helped First Mutual increase its net interest margin to 2.73% from 2.03% for the same quarter last year,'' Baker noted.

''During the second quarter, First Mutual's loan originations increased to $30.5 million compared to $18.8 million in the like period last year. The bank's loan servicing portfolio grew to $341 million in the first six months of 1990 from $314 million at June 30, 1989,'' Baker added.

Shareholder equity in First Mutual increased to $14.6 million and book value grew to $10.47 per share compared to $9.96 at the end of the second quarter a year ago.

The bank had total assets of $178.1 million at June 30, 1990. First Mutual's net worth ratio of 8.2% is comfortably above the FDIC regulatory minimum of 6%.

The bank stated that it has lent its Employee Stock Ownership Plan (ESOP) $1.5 million and the ESOP has purchased 139,600 shares or 10.1% of First Mutual's outstanding common stock in recent weeks. For reporting purposes, the dollar amount of shares purchased by the bank for the ESOP are deducted from the bank's capital in the quarter the purchase is made. The ESOP acquired $686,000 worth of stock in the second quarter. However, had all the recent ESOP stock purchases occurred prior to June 30, the bank's net worth ratio at June 30, 1990, would have been 7.74%.

Baker also announced that the bank has determined to make a change in the third quarter in the method of applying an accounting principle for reporting in the future.

He said this will require a one-time charge on First Mutual's books at that time to implement a change in the method of valuing the bank's 'deferred servicing rights' for loans serviced by the bank for others.

''The precise effect of this change will take some weeks to calculate, but we expect that the change will reduce the bank's assets by less than one percent and capital (shareholder's equity) by less than ten percent,'' Baker stated.

He explained that the method First Mutual has been using in applying this accounting principle is one that has been used by the thrift industry for many years, but there have been recent changes in the industry to a more precise and conservative accounting methodology.

''This change will have the effect of stating our deferred servicing rights more conservatively and will actually increase earnings in future years,'' Baker noted. ''We think this new accounting treatment makes good sense and is consistent with our prudent management.''

Headquartered in Bellevue, First Mutual Savings Bank operates five full service branches in the Seattle metropolitan area known as the ''Greater Eastside.'' The FDIC-insured savings bank derives a significant portion of its income from mortgage banking operations and also originates small commercial property loans.

ARLINGTON, VA (JULY 24) BUSINESS WIRE - USAir Group Wednesday reported operating income of $59 million for the second quarter of 1990 on revenues of $1.7 billion.

Results compare with operating income of $201 million on revenues of $1.7 billion for the like period of 1989.

USAir Group had a pre-tax profit of $15 million for the second quarter. This compares with a pre-tax profit of $175 million for the second quarter of 1989.

The company had a net loss of $75 million for the second quarter. This compares with net income of $101 million for the second quarter of 1989.

Second quarter 1990 net results were negatively affected by a tax provision of $90 million which includes the offset of a portion of the $134 million tax credit recorded in the first quarter of the year. The first quarter tax provision was computed based on then projected annual earnings.

Loss per share for the second quarter was $1.86 on 44.8 million shares, which compares with earnings per share of $2.29 on 43.9 million shares for the like period of 1989.

For the first half of 1990, the loss per share was $2.92, which compares with earnings per share of $2.65 in the like period of 1989.

USAir, the principal subsidiary of USAir Group, had operating income of $42 million on revenues of $1.6 billion for the second quarter. Pre-tax profit was $23 billion. After offsetting a portion of the first quarter tax credit, the company reported a net loss of $25 million.

These results compare with second quarter 1989 operating, pre-tax and net income of $187 million, $194 million, and $114 million, respectively, on revenues of $1.6 billion.

For the first six months of 1990 USAir had an operating loss of $120 million, pre-tax loss of $125 million and net loss of $92 million on revenues of $3 billion. This compares with operating, pre-tax, and net income of $242 billion, $247 million, and $145 million, repectively, on revenues of $3 billion for the like period of 1989.

CALABASAS, CA (JULY 25) BUSINESS WIRE - Tekelec, a leading supplier of ISDN, transmission and SS7 signaling test equipment, has signed up with Pacific Bell to become a major Centrex IS Integrated Services Digital Network (ISDN) customer, and the first California business to install Extended ISDN.

''Tekelec is clearly committed to leading edge technology, not only in terms of test equipment development, but also as sophisticated users of advanced communications capabilities,'' stated Peter N. Vicars, Tekelec president and chief executive officer. ''We are pleased that Pacific Bell is able to supply us with ISDN services and we look forward to extending our relationship both as a customer and vendor.''

Extended ISDN is a high-capacity digital T1 circuit that brings Centrex IS service from west Los Angeles to Pacific Bell's Calabasas Central Office. The T1 lize/is then connected to eight ISDN Basic Rate 2B + D lines for delivery to Tekelec.

Tekelec plans to dedicate Centrex IS lines to different departments within the company to serve a variety of uses including file transfer, electronic mail and screen sharing. Future ISDN connections will be made to Tekelec offices in North Carolina, Ohio, Tokyo and the United Kingdom.

''We expect that Centrex-IS will save us both time and money through current applications like file transfer between departments and offices as well as through potential applications susch as video conferencing,'' said

Philip Alford, Tekelec's chief financial officer.

This installation was also a learning experience for Pacific Bell. ''By meeting Tekelec's needs with Centrex IS applications we've learned some important information that will make it easier for us to meet future business demands,'' said John Lacey, Pacific Bell account executive.

Recognized as a leading test equipment manufacturer, Tekelec's product line encompasses testing of data protocols (ISDN, X.25), transmission services and equipment (T1, Fractional 1, DDS, T3), signaling (SS7) and emerging intelligent network applications. Its products are marketed worldwide with subsidiaries in Japan and the U.K.

For more information, contact Tekelec, 26580 W. Agoura Road, Calabasas, California, 91302; phone 1-800/TEKELEC; fax 818/880-6993.

ALISO VIEJO, CALIF. (JULY 25) BUSINESS WIRE - Revenues and earnings of Armor All Products Corp. (NASDAQ:ARMR) declined in the first fiscal quarter ended June 30, Kenneth C. Hicken, chairman, president and chief executive officer, reported today.

Sales fell 7 percent to $32,992,000 from $35,357,000 and net income dropped 64 percent to $2,007,000 from $5,632,000. Earnings per share dropped 63 percent to 10 cents from 27 cents in the comparable period last year.

Hicken attributed the decline in revenues to heavy retail inventory levels affecting all of the company's principal product lines and extremely poor weather conditions in many parts of the United States and Canada. Sales abroad showed a 19 percent increase in the quarter, accounting for 13 percent of revenues, up from 10 percent in the year-earlier period.

A shift in the sales mix to lower margin products contributed to an 8 percent increase in cost of sales in the face of the 7 percent decline in revenues, Hicken added. In addition, higher levels of cooperative advertising, promotional and display allowances contributed to a 24 percent increase in selling, general and administrative expense.

Armor All Products is the nation's leading supplier of automotive appearance chemical products. In addition to the Armor All brands, the

company sells a variety of products under the Rain Dance (R), Rally (R) and No.7 (R) brand names.

CARLSBAD, CA (JULY 25) BUSINESS WIRE - International Totalizator Systems Inc. (NASDAQ/NMS:ITSI) is calling for redemption on Sept. 4, 1990, its 10 percent convertible subordinated debentures due 2003.

The redemption price is 100 percent of the principal amount plus interest accrued to the redemption date. At June 30, 1990, just under $2.7 million of the original $5.2 million issue made in February 1988 remained outstanding.

Holders of the debentures have the option of electing to convert their debentures into common shares of the company at the conversion rate of $3.00 per share. As the current market price of the company's common shares is approximately twice the conversion price, ITS expects that most, if not all, of the outstanding debentures will be converted.

Should that occur, long-term debt on the company's balance sheet would be reduced by 90 percent, thereby increasing the company's ability to comfortably finance future growth. ITS anticipates that the results of the conversion should be known at the end of August.

International Totalizator Systems Inc., with headquarters in Carlsbad, was founded in 1978 and went public in 1981. ITS has a global presence in the design, manufacture and marketing of customized applications for computerized wagering, lotteries and automated travel industry products.

WHITTIER, CA (JULY 25) BUSINESS WIRE - The board of directors of American Toxxic Control announced that an option to purchase 72 million shares of common stock and one million shares of preferred stock had been exercised for $1.6 million.

These two options represent approximately 47 percent of the company fully diluted.

The board of directors also approved settlement agreements with substantially all of American Toxxic Control's creditors and a restructuring agreement with Merrill Lynch Business Capital and BBU Inc., the company's senior lenders. The restructuring agreement cured all outstanding defaults with the senior lenders.

The company also announced the resignations of Ski Milburn as chairman of the board and chief executive officer and Paul Whittle as assistant chief executive officer. Richard J. Heckmann was elected chairman and chief executive officer.

Heckmann led the shareholder group who filed a beneficial owner report (13D) with the Securities and Exchange Commission in May and who negotiated the option to acquire control of the company.

American Toxxic Control also announced its total revenues for the year ended March 31, 1990 were $25,141,000 with a net income of $383,000. Comparable amounts for the year ended March 31, 1989 were total revenues of $17,636,000 with a net loss of $2,590,000.

Currently there are 200 million shares of common stock, authorized and issued, and one million shares of preferred stock convertible into an additional 40 million shares of common stock. Shareholder approval is required to increase the authorized common stock so that the preferred may be converted into common.

American Toxxic Control Inc. stock is traded on the NASDAQ system in the over-the-counter market with the symbol ATCX.

CUPERTINO, CALIF. (JULY 25) BUSINESS WIRE - Tandem Computers Inc.(NYSE:TDM) Wednesday announced that Hermans Groep of Soest, the Netherlands, has selected Tandem NonStop CLX midrange systems to automate its operations.

Hermans Groep is a Dutch retailing giant with annual revenues of over $475 million and more than 4,000 employees. This merchandising application, provided by DACOS Software GmbH, will use the Tandem NonStop SQL distributed relational database management system.

Hermans anticipates that the Tandem based system will optimize its flow of merchandise, and provide better customer service, and enhance its competitive position. Hermans selected the NonStop CLX systems because of their ability to operate outside of the computer room environment. Fault tolerance and ease of expansion also weighed heavily in the decision.

DACOS Software GmbH, a Tandem Alliance partner based in St. Ingbert, West Germany, is supplying its Dispos package. The Dispos package provides a stock monitoring, ordering, and supply system, with MIS and accounting interfaces.

With over 108 supermarkets, 23 liquor stores, and a growing number of discount stores trading under the Kom & Koop (Come & Buy) name, Hermans is one of the most successful retailers in the Netherlands. Over the next three years, Hermans expects to improve and expand its outlets and introduce new systems.

Tandem manufactures and markets computer systems and networks for online transaction processing, large database applications, and the UNIX system marketplace. Company headquarters are located at 19333 Vallco Parkway, Cupertino, Calif. 95014. Telephone number is 408/725-6000.

SAN JOSE, CA (JULY 25) BUSINESS WIRE - Piiceon, a Fortune 1000 third-party memory manufacturer, Wednesday introduced ten serial/parallel MicroChannel I/0 boards for IBM PS/2 models 50, 50Z, 55SX, 60, 65SX, P70, 70 and 80.

The I/0 boards offer combinations of serial and parallel ports never before available.

Piiceon's vice president of sales and marketing.

Serial ports allow customers to connect modems, serial printers, plotters and terminals to their IBM PS/2 system, while parallel ports typically connect dot matrix, laser, high-speed line printers and page printers to the IBM PS/2.

Piiceon's IBM PS/2 Microchannel Boards range in price from $105.00 for a board with one parallel port, to $395.00, for a board with a combination of 4 serial and 2 parallel ports.

Piiceon's I/0 boards are competitively priced and conform to all IBM PS/2 Microchannel specifications, while fully supporting DOS, ZENIX and UNIX and OS/2. They are designed, manufactured and tested in-house using state-of-the-art manufacturing technology and stringent quality control procedures.

Piiceon is located at 1996 Lundy Ave., San Jose.

Piiceon Inc. is the largest subsidiary in Dynatech Corp.'s specialty computer and broadcast group. Dynatech (NASDAQ:DYTC), a Fortune 1000 company, was named one of the 101 best performing companies in America by Chicago's Probus Publishing.

HOUSTON (JULY 25) BUSINESS WIRE - Medical Innovations Inc. ((NASDAQ:MIXX) (common stock) MIXXW (Class A warrants) and MIXXZ (Class B warrants)) Wednesday announced extension of the exercise period for the company's Class A warrants (NASDAQ:MIXXW), formerly due to expire Sept. 30, 1990.

The new expiration date of the Class A warrants will be announced at a later date, according to Judy D. Lynch, president and chief executive officer.

The Class A warrants were first issued for trading in the over-the-counter market Nov. 30, 1988, separately and as units with shares of common stock and Class B warrants, and were admitted on the NASDAQ system June 23, 1989. Each Class A warrant entitles the holder to purchase one share of Medical Innovations Inc. common stock for $1.50. Each Class B warrant entitles the holder to purchase one share of common stock for $2.25, and expires on Sept. 30, 1991. Neither the Class A nor Class B warrants are currently exercisable.

Medical Innovations Inc. specializes in providing Home Infusion Care (intravenous therapies especially for immunosuppressed patients (i.e., cancer and AIDS), and through innovation has become one of the leaders in developing care protocols for these patients.

Company operations are located in Houston, Livingston, N.J. (the New York metropolitan area) and Richmond Va.

#90206b0650 07/25/1990 ~Business Wire

LAGUNA HILLS, CA (JULY 25) BUSINESS WIRE - Newport Pharmaceuticals International Inc. (NASDAQ:NWPH) announced Wednesday results for its second quarter ended June 30, 1990.

The company reported revenue for the second quarter of $14,524,000 and a net loss of $2,193,000 compared with revenue of $9,445,000 and net income of $15,000 for the same period last year. For the six months ended June 30, 1990, the company had revenues of $27,850,000 and a net loss of $2,594,000 compared with revenues of $18,988,000 and net income of $282,000 for the same period last year.

Revenues of the company's subsidiary America's Pharmacy Inc. (API) increased by 82 percent in the second quarter and by 76 percent for the six months vs. the same periods of 1989. These increases reflect continued growth at API as a result of the addition of new customers and the increased utilization by existing customers.

A significant factor in the growth is the acquisition of Delivered Pharmacy Services from Lincoln National Life Insurance Corp. in September 1989. Revenues from API continue to represent over 85 percent of the company's total revenues.

A significant portion of the second-quarter net loss consists of a $1,264,000 non-cash, non-operating charge relating to the successful completion of the exchange of 25 percent of the company's outstanding 10 percent Senior Secured Convertible Notes for common stock in April 1990.

Second-quarter results also include significant amounts of legal expenses relating to the class-action suit pending against the company, certain non-recurring relocation costs and consulting fees and certain costs associated with the annual shareholders meeting and proxy solicitation conducted annually in the second quarter.

In comparison to the current year, the company's net income for the second quarter and six months ended June 30, 1989, had included extraordinary gains of $79,000 and $244,000 respectively, relating to the repurchase of the company's notes in open-market transactions. -0-

#90206b0652 07/25/1990 ~Business Wire

STAMFORD, CT (JULY 25) BUSINESS WIRE - Pitney Bowes Inc. Wednesday reported second-quarter 1990 revenue of $774.2 million, an increase of 12 percent from $693.6 million in the second quarter of 1989.

Second-quarter 1990 net income was $60.4 million, or 76 cents per share, a decline of 2 percent from $61.8 million, or 78 cents per share, in the second quarter of 1989.

Second-quarter 1990 revenue included $370.1 million from sales, up 12 percent from $329.8 million in the second quarter of 1989; $289.3 million from rentals and financing, up 12 percent from $258 million; and $114.8 million from support services, up 9 percent from $105.8 million.

For the six-month periods ended June 30, revenue in 1990 was $1.53 billion up 13 percent from $1.352 billion in 1989, and income from continuing operations in 1990 was $120.1 million, or $1.51 per share, up 4 percent from $115.7 million, or $1.46 per share in 1989.

Net income for the period in 1990 was $120.1 million, or $1.51 per share.

Net income for the period in 1989 was $181.3 million, or $2.29 per share, and included the effect of the adoption of Statement of Financial Accounting Standards No. 96, ''Accounting for Income Taxes,'' which increased 1989 income by approximately $66 million, or 83 cents per share.

Pitney Bowes is a $2.9 billion multinational manufacturing and marketing company which provides mailing, shipping, copying, dictating and facsimile systems; item identification and tracking systems and supplies; mailroom, reprographics and related management services; and product financing.

#90206b0653 07/25/1990 ~Business Wire

SAN FRANCISCO (JULY 25) BUSINESS WIRE - Paced by its drug distribution business, McKesson Corp. set new first quarter highs in revenues and net income in the fiscal period ended June 30, the company reported Wednesday.

For the third consecutive quarter revenues topped the $2 billion level, up 11 percent from the year ago period while net income increased 8 percent to $25.9 million from $24 million. Fully-diluted earnings per share were 56 cents, up 2 percent from 55 cents in the same quarter a year earlier. Per share earnings were based on 45.4 million average shares outstanding, up from 44.4 million a year ago.

Commenting on the first quarter results, Alan Seelenfreund, chairman and chief executive officer, and Rex R. Malson, president and chief operating officer, noted that four of the company's five business segments reported gains in operating profit, more than offsetting a sharp decline in the profitability of the company's Armor All Products subsidiary.

''We are especially pleased by the continued strong performance of the Drug Distribution and Service Merchandising units and the excellent profit recovery of PCS,'' the company's third-party prescription claims processing unit.

''The first quarter operating results are ahead of plan,'' Seelenfreund and Malson said, ''and we are confident that we will show good progress over the balance of the year.''

Drug distribution revenues increased 13 percent to $1.7 billion and operating profit also grew 13 percent to $38.6 million. Results were strong in all customer segments -- independents, hospitals and chain stores. Operating profit as a percentage of revenues, excluding bulk sales to chains, was unchanged at 3.0 percent from the same quarter a year ago and was up from the 2.8 percent level for all of last year. Drug distribution accounted for 84 percent of first quarter revenues and 62 percent of operating profit.

Service Merchandising revenues were up 4 percent to $212.4 million while operating profit rose 40 percent to $5.9 million. A strong performance in the Midwest operation and improvement in the unit's West Coast business offset a decline in the Northeast as a result of a sharp drop in volume with a major customer now operating under Chapter 11 bankruptcy proceedings.

Reflecting increases in the number of cardholders under third-party prescription programs and improvements in productivity, PCS reported operating profit of $5.0 million, up 163 percent from a year earlier. Revenues were down 7 percent to $21.6 million. Prior year results include the company's Pharmaceutical Data Services unit sold in March 1990.

On a comparable basis, revenues in the quarter were up 13 percent. Operating profit in the year-ago quarter was impacted by expenses related to the company's bid to process claims for the Medicare program, which was subsequently terminated. PCS reported a 4 percent increase from a year ago in the average number of cardholders covered in the quarter to 8.5 million and a 4 percent rise in claims processed to 23.8 million.

Revenues of McKesson's bottled water operations increased 3 percent in the quarter to $60.2 million and operating profit was up 2 percent to $8.5 million. Operating profit in the current quarter was impacted by start-up expenses associated with a significant increase in new customers, implementation of a new customer service program designed to reduce customer turnover, expenses for the introduction of a new 3-gallon home-delivery bottle and a one-time cost associated with a collective bargaining election in Southern California, where employees rejected union representation.

Armor All reported a 7 percent decline in revenues to $33 million and a 59 percent decline in operating profit to $4.1 million. The decline in revenue reflects heavy retail inventory levels and extremely poor spring weather conditions in many parts of the country. Profits were impacted by higher promotional and advertising expenses and a shift in the product mix shipped in the quarter.

#90206b0656 07/25/1990 ~Business Wire

MOBILE, AL (JULY 25) BUSINESS WIRE - QMS, Inc. (NYSE:AQM) Wednesday reported its third consecutive record-setting quarter this fiscal year.

Both revenues and net profit after taxes set new third quarter records for the Company. Sales for the quarter ended June 29, 1990 were $69,742,000,

an increase of 29 percent over third quarter fiscal 1989 sales of $54,020,000.

Net profit for the third quarter of fiscal 1990 increased over 51 percent to $3,738,000, or 34 cents per share, compared with $2,472,000, or 22 cents per share, for the same period a year earlier. Including this quarter's results, QMS has now accumulated $1.28 in earnings per share over the last 12 months.

Sales for the nine months ended June 29, 1990 were $201,626,000 compared with $154,662,000 for the first nine months of fiscal 1989. Net profit after tax for the period was $10,667,000, or 97 cents per share, compared with $5,474,000, or 49 cents per share for the first three quarters of fiscal 1989. Included in the results for the first three quarters of fiscal 1989 was $753,000, or 7 cents per share, in extraordinary income resulting from utilization of a portion of IMAGEN Corporation's net operating loss carryforwards.

International sales were a significant factor in the third quarter results according to James L. Busby, QMS president and chief executive officer. ''Our international operations contributed nearly 40 percent of this quarter's revenue,'' Mr. Busby stated.

''We expected European sales to be strong in the third fiscal quarter, which precedes the traditional European holiday period. European operations actually exceeded our expectations for the quarter, and were particularly successful with sales of the QMS ColorScriptTM 100, QMS-PSR 810, QMS-PS 820 and the turbo versions of these PostScriptR products.

''During the third quarter we introduced and began shipping our first products designed specifically for the Japanese market, the QMS ColorScript 100 Models 10J and 40J. These products are generating a great deal of interest and we expect to see profit contribution from them during the fourth fiscal quarter.

''We are also pleased with the quality of our North American sales and service organizations, which include operations in the United States and Canada. QMS ColorScript 100 printers and QMS-PS 2200 series higher-speed PostScript printers are doing well in these channels, which are continuing to provide significant contributions to profit.

''Early in July we introduced the first of a series of new products featuring artificial intelligence. This initial product, the QMS-PS 410, is an entry level offering which will be available through our retail channel in the United States and through European distributors. We are excited about the benefits and value our new architecture provides to customers, and are currently working to extend it to higher-performance products.''

QMS, Inc. is a leader in the rapidly expanding nonimpact print systems market and is a major producer of enhancement products for impact printers. The Company offers a wide selection of laser and thermal transfer printers of electronic publishing, office automation, advanced imaging and automatic identification applications.

#90206b0659 07/25/1990 ~Business Wire

SAN FRANCISCO/NEW YORK (JULY 25) BUSINESS WIRE - Pacific Telesis Group (NYSE:PAC) and Cellular Communications Inc. (CCI) (NASDAQ:COMM) today announced that they have signed an agreement to combine their cellular telephone interests in Ohio and Michigan into a new joint venture equally owned by the two companies.

The combined entity would create one of the country's three largest regional cellular systems. It will cover almost 15 million POPs (the population of the licensed area) in a 27,000 square mile area that includes Cincinnati, Cleveland, Columbus, Dayton, Detroit and Toledo.

Prior to closing, CCI will spin off to its shareholders two new public companies comprising CCI's international activities and CCI's long distance/microwave business. After closing, CCI will spin off to shareholders a third public company comprising CCI's Puerto Rican cellular interests.

At closing Telesis will purchase 5% of CCI's stock for $39 per share and will have the right to increase its percentage ownership over a period of time. Beginning 5 1/2 years after closing, Telesis will have the right to acquire the remainder of CCI's stock at appraised private market value.

If Telesis does not exercise this right, it may be obligated to pay a 'make-whole' payment to CCI shareholders under certain circumstances. This innovative transaction structure was designed to enable both parties to capture the benefits of rapidly consolidating their midwest operations.

PacTel Cellular currently offers service in the greater Detroit/Toledo area under the name Cellular One. It also operates in four other top twenty U.S. markets - Los Angeles, San Francisco, San Diego, and Atlanta. PacTel Cellular has more than 443,000 subscribers in an area covering more than 30 million POPs. PacTel Corporation and PacTel

Cellular are subsidiaries of Pacific Telesis Group, a worldwide diversified telecommunications corporation based in San Francisco.

CCI is the leading provider of cellular service in the state of Ohio and also operates in Puerto Rico. It does business under the name Cellular One in both of these markets where it has a total of more than 88,000 subscribers. The company is based in New York City.

FRAMINGHAM, MA (JULY 25) BUSINESS WIRE - Aritech reported that revenues for the second quarter ended June 30, 1990 increased 19 percent to $27,500,000 compared with $23,100,000 in the same period in 1989.

Operations for the quarter resulted in a profit of $23,000, or $.01 per share, compared with $557,000, or $.19 per share for the second quarter last year.

Revenue for the six months ended June 30, 1990 was $48,900,000 compared with $48,200,000 in the prior year. Operations for the six month period resulted in a loss of $973,000, or $(.32) per share, compared with a profit of $1,117,000, or $.37 per share, in 1989.

The second-quarter and six-month results for 1989 have been restated, for comparative purposes, to reflect the July 7, 1989 sale of the North American Distribution Division. In addition, activities for 1990 reflect the January 2, 1990 acquisition of ITEC Security Products (Ireland), Ltd.

Aritech is a leading manufacturer of electronic security equipment.
Below is a summary of unaudited comparative results.

SUNNYVALE, CA (JULY 25) BUSINESS WIRE - Amdahl Corp. (ASE:AMH) Wednesday announced that net income for the three months ended June 29, 1990, amounted to $46,326,000, or 42 cents per share, up from $32,807,000, or 30 cents, in the same period last year. Revenues rose to $519,109,000 in the second quarter a year ago.

Through the first six months of 1990, net income totaled $76,230,000, or 69 cents per share, on revenues of $1,025,873,000. This compares to net income of $78,402,000, or 72 cents per share, and revenues of $940,955,000 in the first half of 1989. Demand continued to be strong during the quarter for both the 5890 and 5990 series of mainframe computers and for

the company's line of data storage products.

As had been anticipated, gross profit margins also improved. According to John C. Lewis, chairman and chief executive officer, the improvement primarily reflects reductions in product costs that typically occur as product lines mature. Operating expenses in the quarter were higher than for the same period last year because of increased investments in new product development and expansion of the company's marketing and sales force.

Although encouraged by the current quarter's results, Lewis cautioned that the market is in a period of speculation about upcoming new product announcements that will be followed by a transition to new generations of mainframes. He nevertheless noted that Amdahl has continued to expand its customer base during the first half of 1990 and that he believes demand for the company's products will remain strong.

With annual sales in excess of $2 billion, Amdahl is a major supplier of large-scale data processing systems and peripherals, data communications products, software, and educational and consulting services.

MEMPHIS, TENN. (JULY 25) BUSINESS WIRE - Concord Computing (NASDAQ/NMS:CEFT) reported third quarter net income of $1,272,386 vs. $905,681 last year, an increase of 40 percent.

Net revenue for the quarter was $9,621,984 up 24 percent from $7,737,918 last year. On a per share basis, the net income for the quarter was 36 cents per share as against 26 cents for the same quarter last year. Net income as a percentage of net revenue was 13 percent.

Exceptionally large increases were achieved by some of the company's divisions while some increased slightly and others decreased. Bank Card Services continued to show the largest growth and was up 54 percent over last year.

Trucking Services revenue also showed a significant increase of 51 percent. Check Services revenue grew by 10 percent. The revenue from EFT Services was down 23 percent from last year due to the loss of a major customer and Terminal Product revenue which continues to be less than 10 percent of total revenue was down 20 percent for the quarter.

Net income for the first nine months was $3,445,121 vs. $2,485,981 last year, an increase of 39 percent. Net revenue for the nine months was $27,035,226 up 25 percent from $21,618,542 last year. On a per share basis, the net income for the nine months was 98 cents per share as against 71 cents for the same period last year.

#90206b0672 07/25/1990 ~Business Wire

PHOENIX (JULY 25) BUSINESS WIRE - Phoenix-based America West Airlines (NASDAQ:AWAL; PSE:AWA) reported a second quarter 1990 net income of $6,141,000, or 29 cents per common share.

During the same period in 1989, the carrier reported net income of $3,032,000, or 14 cents per common share. The results for the second quarter of 1990 include a loss of $1,005,000 related to the disposition of certain assets.

America West also reported year-to-date earnings at $3,563,000, or 18 cents per common share. This corresponds to the six month 1989 net income of $13,101,000, or 64 cents per common share. For the three months and six months ended June 30, 1990, income tax expense of $1,294,000 and income tax benefit resulting from utilization of operating loss carryforwards of $1,232,000 were recorded, respectively.

Al Frei, senior vice president of finance and chief financial officer for the airline said, ''We are extremely pleased with the second quarter results.'' He continued, ''The $20,292,000 operating profit, produced from very strong traffic gains, compares extremely favorably to the $10,956,000 operating profit for the corresponding quarter last year.''

The company reported a second quarter, 1990 vs. 1989, rise in revenue passenger miles of 49.9 percent on a 33.4 percent capacity increase. Concurrent with the revenue increase, fuel prices dropped 6.3 percent to 60.84 cents per gallon compared to the 1989 quarter. ''Fuel prices during the second quarter 1990 were more than 10 cents per gallon lower than during the first quarter of the year,'' Frei stated.

Frei added, ''We anticipate the continuation of these strong traffic patterns throughout 1990. Passenger response to our high quality product has been excellent, particularly in some of our newer markets such as Boston, San Francisco, Dallas/Fort Worth and Honolulu. These continued increases in traffic, combined with stable fuel prices,should enable America West to remain profitable during the balance of the year.''

America West, the nation's 10th largest airline, operates an all-Boeing fleet of over 92 aircraft including 747s, 757s, 737s and de Havilland Dash 8s. The average age of the carrier's fleet is approximately six years. America West is currently the No. 1 carrier in on-time performance and holds the national championship in this category for 1989, 1988 and since the Department of Transportation began mandatory reporting in 1987.

TEMPE, ARIZ. (JULY 25) BUSINESS WIRE - MicroAge Inc. (NASDAQ:MICA) reported net income of $1.3 million for the third fiscal quarter ended

June 30, 1990, a 60 percent increase, compared to $809,000 in the third fiscal quarter of 1989.

Earnings per share were reported at 29 cents for the third fiscal quarter, a 61 percent increase over 18 cents per share in the comparable quarter of fiscal 1989. Revenue for the quarter was $160.0 million, a 72 percent increase over $92.9 million reported in the third fiscal quarter of 1989.

Net income for the first nine months of fiscal 1990 was $4.9 million, a 59 percent increase over $3.1 million in the like period

of the prior year. Earnings per share were $1.10, a 57 percent increase over 70 cents reported in the first nine months of fiscal 1989. Revenue for the nine-month period ended June 30, 1990 was $453.0 million, a 74 percent increase over $260.8 million reported for the comparable period in fiscal 1989.

President and Chief Executive Officer Jeffrey D. McKeever stated: ''Our increase in revenue is primarily a result of product sales to new network locations. The company continued to successfully recruit new franchisees and dealers to its network.

''At June 30, 1990, the MicroAge Network was comprised of 732 locations, an increase of 71 locations over the number reported at March 31, 1990 and an increase of 422 locations over the number reported at June 30, 1989.''

McKeever continued: ''During the quarter, Olivetti Holding N.V. sold its 30 percent stake in MicroAge stock in several privately placed transactions. As part of this transaction, the company repurchased 127,188 shares and 208,333 shares were purchased by the MicroAge Inc. Retirement Savings and Employee Stock Ownership Plan (ESOP).

MicroAge markets and distributes information technology products and services through an international network of 732 franchised, dealer and company-owned locations.

BAKERSFIELD, CA (JULY 25) BUSINESS WIRE - Freymiller Trucking Inc. (NASDAQ:FRML) Wednesday announced its sixth consecutive quarter of record revenues and improved earnings.

For the three months ended June 30, 1990, revenues increased 24 percent to $20,668,000 and net income was higher by 9 percent at $579,000, or 24

cents per share, compared with revenues of $16,631,000 and net income of $533,000, or 22 cents per share, for the second quarter of last year.

For the six months ended June 30, 1990, revenues improved 22 percent to $39,754,000 and net income rose 17 percent to $968,000, or 40 cents per share, compared with revenues of $32,476,000 and net income of $827,000, or 34 cents per share for the same period a year ago.

Barry D. Plost, president and chief operating officer of Freymiller Trucking, stated that ''we are optimistic about the earnings trend set through our emphasis on the transportation of more temperature-controlled freight and the development of an all-encompassing customer base.''

Freymiller Trucking is one of the largest temperature-controlled truckload carriers in the United States, specializing in the transportation of temperature-controlled shipments and time-sensitive freight to all 48 contiguous states as well as Canada and Mexico.

SEATTLE (JULY 25) BUSINESS WIRE - The Goodwill Games have come to Seattle and the locally based Aldus Corp. is doing its part to make the international athletic competition a success.

Through extensive use of two donated software programs, Aldus PageMaker 4.0 and Aldus FreeHand 2.02, Goodwill Games organizers are able to produce a wide variety of printed material that ranges from letterhead and business cards to a glossy souvenir magazine.

One of the biggest challenges for the Games' organizers is the production of the 60-80 page daily program, which contains information about the previous day's activities and results. The program will be printed in two sections: the ''outer wrap,'' and event results.

The four-color outer wrap, printed in advance, features 32 four-color pages with information about competitors and that day's events. The event-results section will include 32-40 black-and- white pages with results from the previous day's events, and short articles. Aldus PageMaker is being used exclusively to create the daily programs via desktop publishing.

''Goodwill Games publications could hardly be done without the use of PageMaker,'' said Dave Ciuba, Desktop Publishing Consultant for The Goodwill Games. ''The ease and versatility of this program allows us to do the work quickly in-house, instead of relying on outside vendors. The new features in version 4.0 make the production of these daily publications easy. But our real reason for choosing a desktop solution is the time savings we realize with PageMaker.''

Other Goodwill Games materials that will be created with Aldus software include The Goodwill Games Guide and ticket-order form, the athletes' competition guide, the souvenir magazine, a four-color Goodwill Games Marathon entry form, a wrestling brochure, invitations to parties and events, and letterhead and business cards.

''Building relationships in the athletic arena as well as in the corporate arena is an integral part of developing international understanding,''

said Paul Brainerd, Aldus president. ''By working together with the Goodwill Games, I am confident that greater international camaraderie will be the result.''

Aldus Corp. (NASDAQ:ALDC) creates computer software that helps people throughout the world effectively communicate information and ideas. Aldus distributes its products through a worldwide network of more than 16,000 dealers and distributors.

WAYNE, N.J. (JULY 25) BUSINESS WIRE - GAF Corp. reported Wednesday second quarter net income of $5.5 million after interest expense of $46.1 million as compared wth pro forma second quarter 1989 net income of $3.2 million, which reflected $47.7 million of interest expense.

The company's results exclude the sales and profits of its surfactant chemicals business, which the company transferred on February 12 to Rhone-Poulenc Surfactants and Specialties L.P., a newly formed limited partnership (affiliated with Rhone-Poulenc, S.A.), in which the company is a limited partner.

Prior year results have been restated to exclude the sales and profits of the surfactant chemicals business and to reflect the related impact on interest expense and other income items. Non-cash charges to income were $22.9 million and $22 million, respectively, for the second quarters of 1990 and 1989, consisting of goodwill amortization, depreciation, and non-cash interest charges.

The company's second quarter results marked its twenty-sixth consecutive quarter of increased income from its operations, with segment income from operations increasing $6.3 million (14 percent) to $50.1 million from last year's $43.8 million.

The company's chemicals business registered its thirtieth consecutive quarter of increased income from operations, while building materials posted a 30 percent gain in income from operations over the same period last year.

GAF, a Fortune 500 company, is a leading manufacturer of specialty chemicals and building materials. The company was acquired on March 29, 1989 in a leveraged buyout transaction by a group of GAF executives led by Chairman Samuel J. Heyman.

#90206b0688 07/25/1990 ~Business Wire

NORWICH, CT (JULY 25) BUSINESS WIRE - Norwich Financial Corp. (NASDAQ: NSSB) Wednesday reported 1990 second quarter net income of $765,000, or 15 cents per share compared to $135,000, or 2 cents per share earned in the second quarter of 1989.

Norwich Financial Corp. also announced that the board of directors declared a regular quarterly cash dividend of 5 cents per share payable Aug. 21, 1990 to stockholders of record as of Aug. 7, 1990.

Daniel R. Dennis Jr., chairman, president and chief executive officer stated that the improvement in performance for the second quarter reflects a lower provision for loan losses following the company's aggressive reserving action taken in the first quarter of 1990, which substantially increased its loan loss reserve in relation to non-performing assets.

The $16.5 million provision for loan losses taken in the first quarter of 1990 resulted in a $14.3 million loss for that period and a net loss for the six months ended June 30, 1990 of $13,539,000.

Net income for the six months ended June 30, 1989 was $1,543,000. The provision for loan losses in the second quarter of 1990 was $1 million compared with a provision of $2.25 million in the second quarter of 1989 resulting in a reserve for loan losses at June 30, 1990 of $19.4 million compared to $20.5 million at March 31, 1990.

In the second quarter, non-performing loans and foreclosed properties increased to $35.2 million, or 6.58 percent of total loans and foreclosed properties from $31.8 million, or 5.85 percent at March 31, 1990.

Non-performing assets to total assets at June 30, 1990 were 5.27 percent compared to 4.75 percent at March 31, 1990.

Net charge-offs for the second quarter of 1990 totaled $2.2 million compared with $3 million for the first quarter of 1990. The net interest margin (taxable equivalent) for the quarter ended June 30, 1990 equalled 3.27 percent compared to 3.47 percent for the first quarter of 1990 and 3.80 percent for the three months ended June 30, 1989.

The company's ratio of the allowance for loan losses to total non-performing assets stood at 55.1 percent as of June 30, 1990 compared to 64.4 percent as of March 31, 1990.

The company's equity/asset ratio, or capital, is 11.38 percent as of June 30, 1990, and its primary capital/asset ratio is 13.88 percent. "These ratios continue to remain well above peer group averages and the company continues to be one of the most highly capitalized banks in the state." Dennis stated.

Book value per share increased from $14.55 at March 31, 1990 to $14.60 at June 30, 1990. Total loans declined to $519 million at June 30, 1990 from $530 million at March 31, 1990. Total deposits remained at $520 million from March 31, 1990 to June 30, 1990.

Norwich Financial Corp. is a registered bank holding company whose principal subsidiary is The Norwich Savings Society, a $668 million FDIC-insured savings bank which operates 14 banking offices throughout eastern Connecticut.

NEW YORK (JULY 25) BUSINESS WIRE - The Board of Directors of ASARCO Incorporated (NYSE:AR) Wednesday declared a regular quarterly dividend on the common stock of 40 cents per share payable September 3, 1990, to stockholders of record at the close of business on August 9, 1990.

Asarco increased its quarterly dividend to 40 cents per share on April 1, 1989, after paying 30 cents in the first quarter of 1989 and 20 cents in each of the previous three quarters. The dividend on common stock was restored in November, 1987, at 10 cents per share after not having been paid since the third quarter of 1984. It was increased to 20 cents per share in the second quarter of 1988.

ASARCO Incorporated, headquartered in New York City, is one of the world's leading integrated producers of nonferrous metals, principally copper, silver, lead, zinc and gold. Asarco also produces specialty chemicals, minerals and other industrial products and provides environmental services. Asarco had 1989 sales of $2.2 billion.

HOUSTON (JULY 25) BUSINESS WIRE - Tenneco Inc. Wednesday reported second quarter net income of $206 million, or $1.61 per common share compared with $180 million, or $1.38 per common share for the second quarter of 1989, an increase of 17 percent in earnings per share.

Operating income (pre-interest and pre-tax) was $442 million for the quarter compared with $371 million for the like period of 1989. Revenues for the second quarter were $3.6 billion, essentially the same as those recorded in 1989's second quarter.

Net income for the first half of 1990 was $340 million or $2.64 per common share compared with $289 million, or $2.20 per share for the like period in 1989, a rise of 20 percent in earnings per share. Operating income totaled $757 million compared with $643 million for the first six months of 1989. Revenues were $7.2 billion compared with $7 billion in the like period of 1989.

The company said that five of its six divisions showed improvement compared with 1989's second quarter. While J I Case earnings were lower for the quarter, Tenneco is confident that Case will show significant improvement for the full year.

The quarterly dividend increase of four cents reported earlier in July raised the quarterly dividend rate to 80 cents per common share, or $3.20 annually.

WOOSTER, OH (JULY 25) BUSINESS WIRE - FirstFederal Financial Services Corp. (NASDAQ:FFSW), the holding company for First Federal Savings and Loan Association of Wooster, reported net earnings of $609,082 or 58 cents per share for the second quarter of 1990, compared with $378,629, or 36 cents per share for the second quarter of 1989.

For the six months ended June 30, 1990, net earnings were $1,109,838 or $1.06 per share, compared with $843,869, or 80 cents per share, for 1989.

Net interest income totaled $4.13 million for the first six months of 1990 vs. $3.89 million in the first half of 1989. The primary items improving the company's net interest income were lower interest expense for borrowings and increased yields on the portfolio of adjustable rate mortgages.

The company's net interest rate spread for the six months ended June 30, 1990, increased to 2.41 percent as compared to 2.08 percent for the same period in 1989.

Total operating expenses remained essentially the same for the three month period ended June 30, 1990, as compared to the same period in 1989. For the six month period, operating expenses increased by $65,000 or 2.1 percent over the same period in 1989.

Shareholders' equity at June 30, 1990, was $25.7 million or $24.49 per share. The company's equity to assets ratio was 8.00 percent. First Federal Savings and Loan Association continues to exceed all fully phased-in capital requirements as set forth by the Office of Thrift Supervision.

The company's board of directors has declared a five percent common stock dividend and a 12 cents per share cash dividend payable to shareholders of record as of Aug. 2, 1990. Both dividends will be paid on Aug. 22, 1990.

FirstFederal Financial Services Corp.'s assets totaled $321 million at June 30, 1990. Its principal subsidiary, First Federal Savings and Loan Association, operates eight offices in the north central Ohio counties of Wayne, Ashland, Medina and Richland.

LISLE, IL (JULY 25) BUSINESS WIRE - Molex Inc. (NASDAQ:MOLX, MOLXA), a global electronic connectory company, Wednesday paid a dividend of one share of Class A common stock for each share of its common stock and Class B common stock outstanding.

Payment was made to stockholders of record as of June 29.

At the same time, Molex increased its regular quarterly cash dividend to one cent per share, payable July 25, to all holders of common stock and Class B common stock.

After the July 25 distribution of Class A common stock, the board of directors intends to continue an adjusted quarterly cash dividend of one-half cent per post-dividend share for all three classes of common stock, the company said.

Note: Molex common stock is traded on the NASDAQ National Market System under the symbol MOLX. Effective July 25, Molex Class A common stock will be traded on the NASDAQ National Market System under the symbol MOLXA.

Molex stock is also traded on the Second Market of the Paris Stock Exchange and on the London Stock Exhange.

LOVELAND, OH (JULY 25) BUSINESS WIRE - Baldwin Piano & Organ Co.'s net earnings for the three months ended June 30, 1990, increased 30 percent to

$523,000 from $402,000 a year ago.

Earnings per share increased 50 percent to 15 cents from 10 cents per share last year. Baldwin's sales for the three months ended June 30, 1990, decreased 11 percent to $26,400,000 from $29,524,000 a year ago.

For the six months ended June 30, 1990, Baldwin's net earnings increased 11 percent to $1,491,000 from $1,339,000 last year. Earnings per share increased 21 percent to 41 cents from 34 cents a year earlier. Sales decreased 8 percent to $56,159,000 from $61,239,000 in the prior year.

The increase in Baldwin's net earnings in the second quarter and the first six months of 1990 compared to the same period of 1989 was primarily the result of lower interest costs and reduced selling and administrative expenses.

(In thousands, except earnings per share)

#90206b0701 07/25/1990 ~Business Wire

NEW ORLEANS (JULY 25) BUSINESS WIRE - The Louisiana Land and Exploration Co. (NYSE:LLX) (''LL&E'') Wednesday announced unaudited consolidated net earnings for the second quarter of 1990 of $6.4 million or 23 cents per share.

After a $2.8 million extraordinary charge related to the early retirement of debt, net earnings in 1989's second quarter totaled $5.5 million (18 cents per share).

The company said that exceptionally strong results from its refining and marketing operations and higher production of crude and condensate nearly offset the impact of sharply lower crude oil and natural gas prices and seasonal declines in natural gas deliveries on second quarter earnings

from petroleum operations.

LL&E's refining and marketing operations generated pretax operating profits, before the allocation of overhead and interest costs, of $12.5 million in 1990's second quarter as compared to $1.7 million in the year-earlier period.

Higher foreign volumes led to an increase of over a percent in LL&E's crude and condensate production during the second quarter. This revenue gain, however, was more than offset by a decline of more than 15 percent in crude and condensate prices.

Second quarter domestic natural gas prices were down nearly 23 percent to $1.52 per thousand cubic feet refecting weaker spot market prices and the expiration of some premium priced contracts.

As a result of substantially improved prices for the Dutch North Sea gas production of LL&E's 50 percent-owned affiliate, CLAM Petroleum Co., worldwide average natural gas prices were down by only 5 percent. Natural gas sales volumes were also down about 4 percent mainly as a result of weak demand in the United States.

LL&E's net earnings from petroleum operations were up over 20 percent in 1990's first half to $19.7 million (70 cents per share). In the year earlier period, LL&E reported net income of $26.1 million (87 cents per share) after a $12.5 million after-tax gain on the sale of its Hawaiian real extate assets and the previously mentioned extraordinary charge.

The company attributed the increased earnings from petroleum operations to improved refining and marketing results and higher crude and condensate production.

The company said that its activities continued to be financed with internally generated funds. Cash flow from operating activities amounted to $44.4 million in 1990's second quarter. Long-term debt, including current maturities, stood at $375 million at June 30, 1990, down nearly $5 million from the year end 1989 level.

CLEVELAND (JULY 25) BUSINESS WIRE - Eaton Corp.'s board of directors Wednesday increased the quarterly dividend on the company's outstanding common stock from 50 cents per share to 55 cents per share.

The increased dividend is payable Aug. 24 to shareholders of record on Aug. 6, 1990.

James R. Stover, Eaton chairman and chief executive officer, said, ''The increased dividend is a reflection both of the strength of Eaton's performance in weak markets and of the board's desire to provide our shareholders with a yield comparable to that of our peers.'' Eaton has increased total dividend payments to shareholders every year since 1983 and has paid dividends on common shares annually since 1923.

With 42,000 employees in 20 countries, Eaton Corp. is a manufacturer of highly engineered products serving automotive, industrial, commercial and defense markets. Principal products include truck transmissions and axles engine components, electrical equipment and controls. For the first six months of 1990, Eaton's net income was $107.3 million, or $2.97 per share, on sales of $1.9 billion.

TULLAHOMA, TN (JULY 25) BUSINESS WIRE - First Federal Savings Bank of Tennessee (NASDAQ:FTSB) reported net earnings of $114,787 for the fourth quarter ended June 30, 1990, and net earnings for the year of $362,150.

''While 1990 has been a difficult year, and results are not what we perhaps would have hoped, considerable progress was made during the fourth quarter, particularly in view that First Federal recorded a loss in the previous quarter as a result of having to add to reserves for possible loan losses,'' said Murray Brown, president and chief executive officer.

For the fourth quarter a year ago, First Federal had a net earnings of $295,427. For the previous year, First Federal recorded earnings of $1,000,007.

In other major categories, First Federal recorded increases.

#90206b0717 07/25/1990 ~Business Wire

MARLBORO, MA (JULY 25) BUSINESS WIRE - Data Translation announces the DT2856 Line Scan Processor, the only IBM PC AT-compatible interface board designed especially for high speed acquisition and processing of data from line scan cameras manufactured by industry-leaders EG&G Reticon and Loral Fairchild.

Until now, designers of inspection systems using line scan cameras were required to design custom camera interfaces, because no standard interfaces were available. Data Translation's DT2856 Line Scan Processor board dramatically lowers the cost of automating inspection applications, and offers increased functionality and user friendliness over previously-available configurations.

System costs formerly required a capital expenditure of $30,000 to $50,000 with much of the cost going to development of customized camera control and clocking hardware. A PC AT, configured with the DT2856 line scan processor and a line scan camera, can be up and running for as little as $10,000 to $15,000.

The unique DT2856 is a one slot, low cost, comprehensive line scan camera interface and real-time image processor board for the PC AT, designed to a specification developed with the cooperation of the two leading line scan camera manufacturers. The board's programmable camera interface and control circuitry, data correction features, and processing capabilities

make it the only complete line scan interface
 ever developed.

Historically, line scan inspection systems were developed on expensive computer platforms rather than the affordable PC AT, and developers commonly were forced to design custom interface boards, cabling, and software.

Popular applications for line scan cameras include inspection of lumber, textiles, steel and any other material which speed by a camera in web-feed or continuous mode.

The DT2856 Line Scan Processor board is bookable now; first shipments begin Oct. 17, 1990. Standard delivery is 1 week ARO, thereafter. U.S. list price, quantity 1, is $3,995. OEM and Volume discounts are available.

Software, in the form a calibration/setup utility (including source code), and driver and routine package that support all board operations from programs written in Microsoft C, is shipped with each DT2856 at no additional charge.

Data Translation is a world leader in the design, manufacture, and marketing of high performance image processing, data acquisition, and array processing computer boards and software.

BARTLESVILLE, OK (JULY 25) BUSINESS WIRE - Phillips 66 Natural Gas Co. and Marathon Oil Co. have signed a contract with Ishikawajima-Harima Heavy Industries Company Ltd. (IHI) of Tokyo for IHI to construct two liquefied natural gas (LNG) vessels.

These vessels will utilize IHI's SPB product containment system, which is a self-supporting prismatic tank fabricated from aluminum. Among the advantages of this design are greater safety, easier maintenance and better maneuvering ability.

The new vessels will replace the Phillips and Marathon LNG carriers Arctic Tokyo and the Polar Alaska. The vessels carry LNG production from the Phillips and Marathon LNG plant in Kenai, Alaska, to contract customers in Japan -- Tokyo Electric Power Co., Inc. and Tokyo Gas Co., Ltd.

Phillips is operator of the Kenai LNG plant, while Marathon Oil Co. operates the two LNG vessels. Phillips has a 70 percent interest -- and Marathon 30 percent -- in the sales and facilities.

The new carriers will have a capacity of 87,500 cubic meters of LNG. The first vessel is scheduled to be delivered in mid 1993 and the second at the end of 1993. The Arctic Tokyo and Polar Alaska are Liberian-registered vessels with product capacities of 71,500 cubic meters. The vessels are being replaced to provide additional product capacity. They have been carrying LNG from Kenai to Tokyo since 1969.

The cost of the new vessels was not disclosed.

Phillips 66 Natural Gas Co. is a wholly owned subsidiary of Phillips Petroleum Co.

Marathon Oil Co. is a wholly owned subsidiary of USX Corp.

IHI is a major Japanese conglomerate involved in various heavy construction and shipbuilding enterprises.

#90206b0724 07/25/1990 ~Business Wire

PLYMOUTH, MA (JULY 25) BUSINESS WIRE)--Plymouth Five Cents Savings Bank (NASDAQ:THFI) Wednesday reported a net loss of $3,973,000, or $1.73 per share for the three months ended June 30, 1990 as compared to net income of $193,000, or 8 cents per share for the same quarter last year.

For the six month period ended June 30, 1990 the bank reported a net loss of $5,451,000, or $2.37 per share as compared to net income of $143,000, or 6 cents per share for the six months ended June 30, 1989. The loss for the quarter and the six month period was primarily attributable to an increased provision for possible loan losses.

As previously announced, the bank added $3,840,000 to its provision for possible loan losses during the second quarter of 1990, as compared to $84,000 for the same period in 1989. For the six month period ended June 30, 1990, the provision for possible loan losses was $5,460,000 as

compared to $114,000 for the six month period ended June 30, 1989.

Total non-performing assets were $19.7 million at June 30, 1990 as compared to $15.2 million at March 31, 1990 and $14.4 million at Dec. 31, 1989. ''Our efforts continue to focus on the resolution of problems in the loan portfolio and on establishing adequate reserves based on economic conditions,'' Chassey said. The bank's total allowance for loan losses at June 30, 1990 was $7,708,000, which represents 2.9 percent of its total loan portfolio and 45.6 percent of its non-accrual loans at that time.

Total assets at June 30, 1990 were $322,881,000 and deposits were $235,935,000. Total stockholders equity equaled $23,647,000, or 7.3 percent of assets. Book value per share was $10.28.

The Plymouth Five Cents Savings Bank is a Massachusetts chartered savings bank organized in 1855 which conducts business from offices in Plymouth, Manomet, West Plymouth, Kingston, Duxbury, Marshfield, Middleboro and Bridgewater. Deposits are insured in full by the Federal Deposit Insurance Corp. and the Mutual Savings Central Fund Inc.

#90206b0726 07/25/1990 ~Business Wire

LONDON (JULY 25) BUSINESS WIRE - Lasmo plc, the international oil and gas exploration and production company, Wednesday announced two transactions that add to the company's North Sea exploration portfolio and substantially increase the Company's interest in UK Block 16/12a, which contains the Birch, North Birch and Elm oil discoveries.

In the first transaction, Lasmo has agreed, subject to certain approvals, to purchase the share capital of Placid Oil Company (United Kingdom) from Placid Oil Company. The principal asset held by Placid UK is a 22.97 percent working interest in Block 16/12a which lies between the Brae and Miller Fields to the north and the T-Block fields to the south.

Ten wells have been drilled in Block 16/12a resulting in three significant oil discoveries in the Elm, Birch, and North Birch fields. The discovery wells in each of these fields tested oil at rates of 4,288, 8,964 and 12,472 barrels of oil per day, respectively. Placid UK also owns interests in five other North Sea blocks which complement Lasmo's existing interests in those, or adjacent, blocks.

In the second transaction, Lasmo is to acquire the 26.74 percent working interest in Block 16/12a held by Occidental in return for a swap of acreage which includes 8.32 percent of Lasmo's interest in the undeveloped Chanter Field in Block 15/17. The transaction is subject to the approval of the Secretary of State for Energy and to the rights of certain partners.

Together with its existing interest, the two transactions will increase Lasmo's ownership in Block 16/12a to 58.85 percent. Lasmo's interest in the Chanter Field is reduced from 28.32 percent to 20.00 percent. Lasmo views these transactions as a - more - - 2 - further step in rationalizing its North Sea interests following the major acquisition of Thomson North Sea for L358 million in March 1989. Two other deals were announced by LASMO earlier this year as part of this process.

John Hogan, Managing Director of Lasmo North Sea, said: ''We are pleased to acquire more acreage and the additional exploration drilling potential that this offers. In particular, a number of oil discoveries exist in Block 16/12a which offer potential for early development and production through the extensive infrastructure in the area.

Lasmo plc, with operations in 16 countries, reported 1989 revenues of L263 million ($425 million at year-end exchange rates). Lasmo shares trade on London's International Stock Exchange and in the US in ADR form (symbol 3LSMOY on the electronic OTC Bulletin Board). Shares are quoted on the SEAQ International System and prices may be accessed on the Reuters Equities 2000 service under the symbol LSMR.L, and on Quotron under the symbol LSMRU.EU.

#90206b0735 07/25/1990 ~Business Wire

HASBROUCK HEIGHTS, NJ (JULY 25) BUSINESS WIRE - At the annual meeting of stockholders, Jos. F. Bradway Jr., chairman of RMS International Inc. (ASE:RMS), Wednesday reported increased income for the second quarter and six months ended June 30, 1990.

Net sales for the second quarter of 1990 were $3,018,000 compared with $3,242,000 in the same quarter last year. The 6.9 percent decrease in sales was primarily due to orders that could not be shipped and billed as a result of late shipments from certain suppliers of RMS. In the second quarter, RMS had a backlog of approximately $300,000 of such orders.

Net income for the second quarter was $52,800, or 3 cents per share, compared with a net loss of $235,800, or 15 cent per share, in the second quarter of 1989. The improvement in earnings was primarily at RMS and was due to higher margins and lower interest and general and administrative costs.

For the first six months of 1990, net sales were $5,695,000 compared with $6,763,000 in the same period of 1989. Net income for the period increased to $54,000, or 3 cents per share, compared with a net loss of $449,700, or 29 cent per share, in the first six months of 1989.

At the company's annual meeting held today, stockholders elected the following directors: Jos. F. Bradway Jr., chairman and chief executive officer; Charles T. Connor, manager of cash and forecasting, Conrail Corp.; John de Elorza, president, John de Elorza Associates; Arthur A. Fink, former vice chairman of RMS and William A. Searles, Locust Investment Management Inc.

RMS International Inc. is a distributor of passive RF electronic devices for the cable television industry and a manufacturer of standby power supplies. In December 1988, the company acquired Color Optic Displays Inc., a designer, manufacturer and marketer of high quality clear plastic literature displays. RMS' stock is traded on the American Stock Exchange under the symbol RMS.

#90206b0737 07/25/1990 ~Business Wire

EL DORADO, AR (JULY 25) BUSINESS WIRE - Murphy Oil Corp.'s (NYSE:MUR) net income for the second quarter of 1990 was $35.5 million, $1.04 a share, compared to $16.8 million, 49 cents a share, earned in the second quarter of 1989, Jack W. McNutt, president, announced Wednesday.

Earnings for the quarter benefited from a $17.3 million gain, 51 cents a share, from sale of the diving business. An extraordinary credit from utilization of a financial net operating loss carryforward was offset by an equivalent increase in the provision for income taxes, so it had no effect on net income.

Net income for the six months ended June 30, 1990, was $57.5 million, $1.69 a share, compared to $23.2 million, 68 cents a share, earned in the first half of 1989. Earnings for the first half of 1990 benefited from gains on asset sales of $20.2 million, 60 cents a share.

An extraordinary credit from utilization of a financial net operating loss carryforward was offset by an equivalent increase in the provision for income taxes, so it had no effect on net income.

Crude oil and gas liquids production averaged 41,896 barrels a day compared to 43,274 in 1989. Natural gas production averaged 244.9 million cubic feet a day, up from 238.2 million in 1989. Refinery crude runs were 113,801 barrels a day compared to 119,694 a year ago. Petroleum product sales were 127,676 barrels a day, essentially unchanged from 1989.

EDEN, NC (JULY 25) BUSINESS WIRE - Fieldcrest Cannon Inc. (NYSE: FLD) announced sales and earnings figures for the second quarter of 1990.

A loss of $6.1 million, or 58 cents per share was incurred in the quarter compared to net income of $7.7 million, or 74 cents per share earned in the second quarter of 1989.

Sales for the second quarter of 1990 were $316.3 million compared to $346.4 million in the second quarter of 1989, a decrease of 9 percent. Bed and bath division sales decreased 12 percent from the 1989 level. Carpet and rug division sales increased one percent from prior year sales.

For the first six months of 1990, sales were $590.7 million compared to $642.7 million in the corresponding period a year ago. The net loss for the first six months of 1990 was $5.7 million, or 55 cents per share compared to net income of $10.7 million, or $1.04 per share last year.

Fieldcrest Cannon Inc. manufactures and markets bed and bath products under the Fieldcrest, St. Marys, Royal Family, Monticello and private brand labels. Carpet and rug division products include high quality woven and tufted carpets and rugs marketed under the Karastan, Bigelow, Sanford, Cannon and private brand labels.

Fieldcrest Cannon Inc. common stock is traded on the New York Stock Exchange under the symbol FLD.

CANTON, MA (JULY 25) BUSINESS WIRE - Bay State Gas Co. (NYSE:BGC) Wednesday announced that earnings for the 12 months ended June 30, 1990 increased to $1.98 per share from the $1.83 reported a year ago.

For the nine months ended June 30, earnings increased to $2.31 from the $2.24 reported last year.

The company reported a net loss of $0.22 per share for the third quarter ended June 30, 1990 compared to a loss of $0.05 per share for the year-earlier period. Bay State Gas frequently reports losses for the third and fourth quarters due to the seasonal decline in demand for natural gas heating.

MELBOURNE, FL (JULY 25) BUSINESS WIRE - The Pascall Medical Corp., a wholly-owned subsidiary of Pascall Group Inc. (OTC), has received FDA approval for the SPIVE (Special Purpose IV Entering) needle system.

This approval now allows the company to formally take orders and sell the product to the market.

The SPIVE needle system was designed and developed to be used in conjunction with an IV administration set or syringe for delivery of a secondary drug or heparin flush through an implanted catheter. This device protects all healthcare facility workers from being accidentally stuck by an exposed needle as the needle shield is in place at all times from initial use through disposal.

Over 50 percent of all reported ''needle sticks'' occur at the catheter site, threatening the administrator with a number of infectious diseases especially AIDS and Hepatitis B.

Marketing for the SPIVE needle system was launched in Washington at the APIC (Association for Practitioners of Infection Control) Convention and was extremely well received. The company received over 300 leads in less than six hours of exhibit time.

There were over 1000 in attendance representing over 6000 health care facilities across the United States to Central America and the Caribbean. With FDA approval the company will now aggressively follow-up on the leads.

Final production arrangements are underway and high volume production is expected before the end of the year.

SUNNYVALE, CA (JULY 25) BUSINESS WIRE - IKOS Systems Inc. Wednesday announced the initial public offering and trading of its common stock beginning July 25, on NASDAQ under the trading symbol IKOS.

The initial public offering price for the 3,117,000 shares of IKOS Systems' common stock was $6.50 per share. The company sold 2.5 million shares and the selling shareholders sold 617,000 shares. The company has approximately 10,748,694 outstanding after the offering.

The net proceeds from the offering will be added to working capital for general corporate purposes, including research and development, retirement of oustanding debt, and expansion of its current facilities.

The offering is being co-managed by Alex. Brown & Sons Inc. and Montgomery Securities.

IKOS develops, markets and supports high-performance hardware-assisted systems for the simulation of application-specific integrated circuits (ASICs) and ASIC-based electronic systems. The company's systems can be integrated with a variety of electronic design automation tools and workstations to design ASICs produced by all major manufacturers.

DALLAS (JULY 25) BUSINESS WIRE - Texas Instruments (NYSE:TXN) is launching a multimillion dollar advertising campaign aimed at America's parents to not only make them more aware of the importance of their children's education in today's competitive global economy, but also of how TI's Tools For Learning help students to master the basics.

''There are several reasons why TI has decided to embark on this major advertising program,'' said Gary Rado, vice president and manager, Consumer Products Division. ''Excellence in education is more important to our future than ever. Our children and students face significant challenges in becoming successful, competing players in tomorrow's world. Because of these changes, our newest generation must be our smartest generation to compete globally.

''We want to demonstrate TI's support of education and of the vital role that America's teachers have in educating our children. However, we also want to point out that America's teachers can't do it alone; they need the help of America's parents.

''And, finally, we want to acknowledge the role that teachers and other educators have played in the development of TI's educational and calculator products and how these Tools For Learning help support and supplement the education our children get in school.''

Texas Instruments has a long history of working with teachers and other educators to develop tools for learning that utilize high technology for educational purposes. Based upon proven learning principles, each tool on TI's Learning Path (TM) addresses a specific area of learning that can

begin as early as infancy.

TI's classroom calculators support the curriculum guidelines of the National Council of Teachers of Mathematics. TI calculators are being used or evaluated for use by school districts in every state in the nation.

Texas Instruments, headquartered in Dallas, is a high-technology company with sales and manufacturing operations in more than 30 countries. TI develops, manufactures and markets semiconductors, defense electronics systems, software productivity tools, computer systems and peripheral products, industrial automation and control systems, electrical controls, metallurgical materials, and consumer electronics products.

WASHINGTON DULLES INTERNATIONAL AIRPORT (JULY 25) BUSINESSWIRE - WorldCorp (NYSE:WOA) Wednesday announced results for the second quarter ended June 30.

For the period, operating revenues were $76 million, a 30 percent increase over the $58.4 million reported in the second quarter of 1989.

Net loss for the period was $1.5 million or 12 cents per share on a fully diluted basis, compared to net income of $6.5 million or 45 cents per share on a fully diluted basis for the second quarter of 1989. Fully diluted shares for the second quarter of 1990 totalled 13 million compared to 16.5 million shares in the prior year's period.

Due to the quarterly loss, only primary shares outstanding are used in the earnings per share calculation for 1990.

The company also announced that despite a $7.6 million decrease in working capital from a positive $3.1 million to a negative $4.5 million during the second quarter, the company's cash and short-term investments total approximately $18.9 million today. The company is considering a number of actions to improve its liquidity and significantly reduce costs.

WorldCorp, through its subsidiaries World Airways and Key Airlines, is a leading worldwide provider of customized air transportation for commercial and governmental customers.

ROTTERDAM, The Netherlands (JULY 25) BUSINESS WIRE - Royal Nedlloyd Group an international leader in integrated transport and logistics services, today announced that it has reached agreement with three Dutch financial institutions for conversion rights on existing subordinated debt totalling Dfl 159.5 million.

Under the agreement, designed to gradually strengthen shareholders' equity the semi-annual repayments of the subordinated debt will be made by issuing new ordinary shares at a price related to the then-prevailing market price. The agreement will cover repayments from 1990 through 1997. No other changes have been made to the terms and conditions of the subordinated loans.

Based on the current market price, Nedlloyd's issued share capital would increase annually by between 0.5 percent and 2 percent depending on the amount due in a given year.

Royal Nedlloyd Group is an international leader in integrated land, sea and air transport and logistic services. Nedlloyd's shares are listed on the Amsterdam and Frankfurt Stock Exchanges and trade in ADR form in the US (symbol 3NEDGY on the electronic OTC Bulletin Board). Nedlloyd may be accessed on the Quotron system under the symbol NEDLN.EU and the Reuters Equity 2000 system under the symbol NYLN.AS.

RICHMOND, VA (JULY 25) BUSINESS WIRE - James River Corp. (NYSE: JR) announced Wenesday that its European affiliate, JA/MONT N.V., has acquired Cartellas S.A. and Achaia S.A. of Athens, Greece.

The two companies, being sold by the Panopoulos family, primarily produce consumer hygienics products marketed under the Delica brand name in Greece. Cartellas S.A. and Achaia S.A. posted 1989 sales of $33.5 million and $7.2 million, respectively.

With production facilities in Athens and Patras, these companies together represent the second largest tissue producer in the Greek market, occupying a 15 to 20 percent share.

The acquisition of Cartellas S.A. and Achaia S.A., the first made by JA/MONT, reflects the growing importance of the Greek market within Europe. As a result of this transaction, these Greek companies will benefit from the technological, financial, production, and marketing expertise of JA/MONT.

In addition, the new companies will provide the venture with strong marketing and distribution channels, complimentary product offerings, as well as serve as the basis for future expansion in the Greek market. JA/MONT expects to continue existing operations.

JA/MONT N.V., formed earlier this year, is a part of a joint venture group which combined James River's European hygienics interests with those of Gruppo Ferruzzi of Italy and Nokia Corporation of Finland. With operating locations in France, the U.K., Italy, Spain, Finland, Norway, Belgium, the Netherlands, Ireland, and Turkey, the joint venture group expects sales of $1.6 billion in 1990.

James River Corp., with headquarters in Richmond, is an integrated manufacturer of pulp, paper and converted paper and plastic products, with sales of approximately $6 billion for its fiscal year which ended April 29 1990.

SPARTANBURG, SC (JULY 25) BUSINESS WIRE - Synalloy Corp. (ASE:SYO), a producer of specialty chemicals, dyestuffs, stainless steel pipe, vessels and process equipment, announced that second quarter sales of $25,258,000 were a new record and up 14 percent from last year.

Net income of $1,513,000 or 41 cents per share was down 9 percent on a per share basis compared to last year, but more than double the 20 cents per share earned in this year's first quarter.

The factors which depressed first quarter margins have abated, and the company very quickly returned to plan in the second quarter. Both the Metals and Chemical Divisions set new quarterly sales records. As expected, the Metal Division's operating earnings declined 28 percent from last year when rising stainless steel prices produced unusually high margins from inventory profits.

The Chemical Division, on the other hand, had a 38 percent increase in operating income and continues to increase its contribution to overall

profit.

Based on current conditions, the second half is expected to produce a continuation of the good operating results achieved in the second quarter.

HERNDON, VA (JULY 25) BUSINESS WIRE - David C. Lucien, president and chief executive officer of TEMPEST Technologies Inc. (NASDAQ: TTOI) announced Wednesday that net income for the three months ended June 30, 1990 was $4,000, or 0 cents per share, compared with $231,000, or 3 cents per share for the comparable period ended June 30, 1989.

Reveneus for the three months ended June 30, 1990 were $2,105,000 as compared with revenues of $2,685,000 for the three months ended June 30, 1989.

Lucien stated: ''Revenues and earnings decreased as compared to the same period last year primarily due to the continued softness in the TEMPEST marketplace.''

TEMPEST Technologies Inc., a publicly held company headquartered in Herndon, designs and manufactures modifications for computer and peripheral equipment to comply with military standards and TEMPEST specifications established by the U.S. Government. Its shares are traded on the NASDAQ under the symbol TTOI.

BASKING RIDGE, NJ (JULY 25) BUSINESS WIRE - Hooper Holmes Inc. (AMEX:HH), the healthcare and health information services company Wednesday reported record earnings for both the second quarter and six months ended June 30.

Net income for the three months ended June 30 was up 15 percent to $851,000 or 28 cents per share compared to $740,000 or 24 cents per share for the same period last year. Net income for the six months ended June 30 was $1,441,000 or 47 cents per share compared to $1,212,000 or 40 cents per share for the same period last year, an increase of 19 percent.

Revenues for the three months ended June 30 were $25.7 million as compared

to $19 million a year earlier. Revenues for the six months ended June 30 were $48.7 million compared to $37.8 million for the period ended June 30.

James M. McNamee, president and chief executive officer said, ''The revenues for the second quarter of 1990 were at an annualized rate of over $100 million, a significant milestone for the company. Recent acquisitions of Ivene, an infusion therapy company, and Talent Tree, a Massachusetts healthcare services company, contributed $1.4 million of revenue in the second quarter.'' McNamee added, ''Our actions to properly position the company in the marketplace are beginning to show results in significantly increased revenues combined with the potential for improved operating margins.''

Additionally, the board of directors declared a quarterly dividend of $.085 per share to shareholders of record as of August 10, payable on August 24. This dividend marks the forty-seventh (47th) consecutive quarterly dividend payment.

#90206b0777 07/25/1990 ~Business Wire

ROCHESTER, NY (JULY 25) BUSINESS WIRE - Rochester Gas and Electric Corp. (RG&E) Wednesday (July 25) reported earnings for the three-, six- and 12-month periods ended June 30, 1990.

Earnings per share for the second quarter of 1990 were one cent compared with five cents for the same period in 1989.

For the six month period ending June 30, per-share earnings were 74 cents compared with 91 cents for 1989. For the 12 month period, earnings were $1.92 per share compared with $1.86 for 1989.

The decrease in second quarter earnings is primarily attributed to the impact of unseasonably mild weather on electric and gas customer revenues.

The weather in the second quarter was 11 percent warmer than the same quarter last year. Part of the quarter is normally cool enough to generate significant revenue from spaceheating customers.

The first six months of 1990 were 13 percent warmer than the first half of 1989.

Natural gas consumption during most of the 1990 heating season declined significantly due to the mild weather. Total terms of gas sold and transported decreased by 10.7 percent for the second quarter and 9.7

percent for the six months ending June 30.

The impact of the mild weather on electric use was less noticeable. This is because RG&E has relatively few electric spaceheating customers.

However, the weather limited growth in kilowatt-hour sales among all electric customers to a modest 1.5 percent for the quarter and .5 percent for the first six months of 1990.

The company has added more than 3,300 electric customers over the past 12 months.

DOVER, NH (JULY 25) BUSINESS WIRE - Seacoast Savings Bank (NASDAQ:SSBA) announced on July 19, 1990, the adoption of a plan to create a bank holding company to control the bank.

Under the plan, the bank holding company, Seacoast Capital Corporation, would become the parent of Seacoast Savings Bank and the shareholders of the bank would receive one share of the common stock of Seacoast Capital Corporation for each share of the bank's common stock. The holding company formation will be subject to shareholder and regulatory approvals.

The special shareholders meeting to consider the holding company formation is currently scheduled for Aug. 28, 1990.

Joseph M. Sarno, executive vice president of the bank, stated, ''The holding company structure will provide additional flexibility through both its charter and corporate organization. The charter of the holding company will provide Seacoast Capital Corporation with a greater ability to attract potential investors and to facilitate affiliations with other financial institutions.

''The bank will continue its present business as a wholly owned subsidiary of Seacoast Capital Corporation and no significant changes in the directors, officers or other personnel of the bank are planned as a result of the holding company formation.''

Seacoast Savings Bank is an FDIC-insured financial institution headquartered in Dover, N.H. As of March 31, 1990, the bank had $109 million in assets and a capital ratio of approximately 12 percent.

#90206b0788 07/25/1990 ~Business Wire

VANCOUVER, B.C. (JULY 25) BIZWIRE - Jack W. Kendrick, President of Bunker Hill Mining Co. Inc. (TSE:BNH) (VSE:BNH) (NASDAQ:BNKRF), announced Wednesday second quarter earnings of $903,231 (U.S. dollars) or $0.06 per share on gross concentrate sales of $4,898,117. This compares to a net loss of $343,759 or $0.02 per share for the same quarter a year ago.

The first six months of 1990 ended with net income of $1,359,934 or $0.09 per share versus a net loss of $957,552 or $0.06 per share for the first six months of 1989.

Kendrick said, ''This favorable result is attributable to an operating rate in excess of 2,000 tons per day, improved metallurgical recovery, lower costs, and higher metal prices.''

Kendrick also announced that Bunker Hill's ore reserve development program was achieving its objective of adding reserves to the downward extension of the Quill ore deposit. The Quill deposit is currently being mined from selected stope locations between 9-1/2 level and 14 level, a vertical distance of approximately 900 feet. Recently, two exploration diamond

drill holes collared on 16 level, 400 feet below 14 level, established the downward extension of the Quill orebody.

Drill hole No. 6122, vectored to intercept the Quill horizon extension at its widest true width, contains a 107.3 foot intersection which averages 6.32 percent zinc and 1.3 percent lead. Drill hole No. 6119, vectored at an oblique angle to seek the distal limit of the Quill, contains a 24.7 foot intersection averaging 2.97 percent zinc and 1.05 percent lead.

The downward extension of the Quill orebody has been firmly established at the 16 level and indications of a further extension to the 17 level are being investigated. Traditionally, based on actual mining experience, the Quill orebody contains approximately 5,300 minable tons of ore per vertical foot.

WASHINGTON (JULY 25) BUSINESS WIRE - Washington Gas Light Co. Wednesday announced that net income applicable to common stock was $47.4 million for the twelve months ended June 30, 1990, a 12 percent increase from the similar period last year.

Earnings per average share of common stock were $2.44, representing an increase of 14 cents per share from the prior year. This 6 percent increase in earnings per share resulted in spite of a 6 percent increase in the number of average common shares outstanding.

During the most recent 12-month period, earnings were positively affected by a 2.6 percent increase in customers' meters and rate relief granted the comapny in all of its major jurisdictions.

These factors more than offset the effects of lower firm therm sales caused by 6 percent warmer weather and increases in operation, maintenance and interest expenses.

For the three months ended June 30, 1990, a seasonal net loss of 25 cents per average common share was recorded. This represents a greater loss of 1 cent per share compared to the same period ended in 1989.

HUNTSVILLE, AL (JULY 25) BUSINESS WIRE - Intergraph Corp. (NASDAQ:INGR) in conjunction with Intergraph Canada Ltd., today announced the award of a contract from the City of Edmonton Police Service for a computer-assisted dispatching (CAD), communications, and records management system.

The project, named OSCAR (Operational Support Communications and Records System), ''is a well-defined plan embodying the city's proactive approach to policing, information management and community service,'' notes Dr. Roger Coupland, director of Intergraph's Dispatch Management Systems Division.

The contract, estimated at $5 million (Canadian) represents the first Canadian installation of Intergraph's Dispatch Management System. It is also the first project for the company in which the ability to provide integrated, state-of-the-art capabilities for records management was paramount in system selection.

Gordon MacLean, superintendent of the Edmonton Police Service information division added, ''Intergraph was best able to demonstrate integrated computer-assisted dispatching, interactive map displays, and comprehensive records management specifically designed for police service requirements.''

Joint Commitment to Technology

Edmonton officials have long been recognized as innovative in the application of computer technology for municipal operations and management. A decade ago, Edmonton Police Service was the site of the first Canadian installation of a computer-assisted dispatching system.

The automation of dispatching procedures has streamlined operations and allowed personnel to concentrate on providing a responsive, customer-oriented strategy of police involvement in the community.

Much internal development work by the department resulted in the current functionality of the complaint handling and dispatch (CHAD), and records management (PROBE) systems, which will be enhanced and incorporated into OSCAR.

Jim Meadlock, chief executive officer of Intergraph emphasizes: ''Intergraph, in partnership with Edmonton, is committed to ensuring the success of OSCAR. This contract continues a long-standing strategic alliance between Intergraph and the City of Edmonton, as leaders in applying and integrating technology.''

Shared Experience in Graphic Applications

A long-term Intergraph customer, the City of Edmonton is recognized as having developed one of the most comprehensive and effective geographic information systems (GIS) in the world. The installation of an Intergraph computer-aided mapping system in 1978 initiated the Geographic Base Information System (GBIS) project.

Today, Edmonton utilizes a complete base map, capturing an area of over 700 square kilometers, documenting a population of over 600,000, and encompassing registered subdivision plans, tax parcels and utilities infrastructure.

The selection of Intergraph's computer-assisted dispatching and records management technology for the Edmonton Police Service represents the city's continued commitment to incorporating computer graphics and geographic information into all phases of city operations and management.

Merv Swan, general manager and chief operating officer of Intergraph Canada Ltd., comments: ''We're very pleased about this new opportunity to expand our relationship with Edmonton. The Edmonton Police Service researched and defined a very detailed specification which integrated CAD, mapping, management of records and reports, and interfaces to a variety of law enforcement and municipal information sources.

''Intergraph was identified as the company best equipped to completely and directly address distributed data integration and management requirements. We are very comfortable with that challenge and look forward to implementing a system unequalled anywhere in the world.''

GIS Integration Offers Broad Perspective

The ability of Intergraph's Dispatch Management System to effectively and smoothly utilize Edmonton's geographic database provides graphic integration advantages. Police dispatchers can monitor multiple incidents determine appropriate response personnel based on beat assignments and proximity, and route response resources effectively using interactive map

displays provided as an integral element of the system. Investigative personnel can track criminal activity and determine patterns geographically.

Management and planning personnel can more effectively schedule shift assignments, route patrol activity, and allocate resources based on geographically deliniated boundaries.

Records take on new meaning when geographically associated. For example, Canadian provinces and cities maintain very detailed and accurate records on handgun registration, which can be associated via relational database technology and geographic coordiates to emergency event locations. The existence of firearms at a resident can be critical information to a police officer responding to an incident at that address.

Technology for the Future of Policing

Integration is a key goal for the Edmonton Police Service, and one of Intergraph's key strengths. The company brings over 20 years of experience to the role of system integrator for the OSCAR project -- tying together discreet databases and equipment from multiple vendors into one efficient, integrated network.

Currently the CHAD database provides an automated control mechanism for recording all activity associated with a ''call for service.'' The PROBE system was designed to extract / copy certain data elements from CHAD to form the nucleus of records management.

Criminal investigation and analysis functions have been partially automated and are expected to be completely tied into the proposed OSCAR system.

Additional capabilities identified for future OSCAR enhancements include the ability to digitally integrate documents generated by other departments and agencies through scanning technology, and the automation of field-generated reports using portable or mobile computers.

Capitalizing on the latest in relational database technology, the OSCAR system will enhance and unify the CHAD and PROBE databases. This will provide access to incident information and historical records for all patrol, administrative and investigative personnel who ''need to know,'' while maintaining a high level of system security.

A Distributed System Solution

The system platform for the OSCAR project is Intergraph's latest line of high-performance UNIX file servers and workstations. The configuration includes:

-- eight Dispatch Workstations (five with dual 27-inch and three with dual 19-inch graphics display monitors)

-- seventeen single-screen 19-inch Calltaker Stations, and eight additional single-screen, 19-inch graphics workstations for map users, investigative personnel, and remote division users

-- four Series 6000 InterServe Networked file servers for the OSCAR incident database and communication with other national, provincial, and municipal databases

-- complete calltaking, dispatching, records management, and network communications software

-- relational database technology to implement and manage historical records and provide analysis tools

-- interface software to allow communication with an existing network of mobile data terminals in Edmonton Police Service's fleet

The system also includes a multitude of terminals, ouput devices, and networking and communications products to link functions, divisions, and information sources. The network will allow effective, fast communication between the system's estimated 350 users whether accessing the network from centralized, divisional, or mobile locations.

Superintendent MacLean concluded: ''Our goal through OSCAR is to provide all of the information necessary, where and when it is needed. We need the best technology, the best information, and the best people to meet our overall goal, which simply stated, is to be the best.''

Detailed project planning and implementation jointly managed in Huntsville the Calgary headquarters of Intergraph Canada, and on-site in Edmonton is scheduled to begin in July, with completion targeted for year-end 1991.

Background Information

Intergraph Corp. offers a product line ranging from microprocessor modules to workstations and complete application - specific systems for mapping and geographic information systems, computer-aided engineering design, manufacturing and publishing.

A ''Fortune 500'' company, Intergraph is the world's largest company dedicated to developing and manufacturing interactive computer graphics systems.

Intergraph is a registered trademark of Intergraph Corp. Other brand and

product names are trademarks of their respective owners.

The Dispatch Management System is an aid to qualified personnel in making emergency decisions. It does not replace human judgement. Emergency electrical equipment is subject to failure. Backup should be provided.

COCONUT GROVE, Fla. (JULY 25) BUSINESS WIRE - WATSCO, INC. 1/8ASE: WSOA3/8 Wednesday announced record revenues and earnings for the second quarter and six months ended June 30, 1990.

In the three months ended June 30, 1990, revenues increased 12 percent to a record $28,335,000 from $25,227,000 last year. Net income from continuing operations increased 21 percent to a record $663,000 from $548,000. Primary earnings per share increased to $.33 from $.29, while fully diluted earnings per share increased to $.29 from $.26.

In the first half of 1990, revenues rose to a record $51,284,000, up from $44,480,000 in the first six months of 1989. Income from continuing operations increased to $1,132,000, up from $983,000 in the comparable period last year. Primary earnings per share increased to $.58 from $.52, while fully diluted earnings per share increased to $.51 from $.47.

The increases in revenues and earnings of the Company were primarily a result of increased sales of the Company's Gemaire Distributors subsidiary the largest independent distributor of residential air conditioning equipment and related parts and supplies in Florida.

Watsco participates in the climate control industry through Gemaire and various manufacturing subsidiaries which produce components under the Watsco, Cam-Stat and Rho Sigma brand names. The Company also participates in the personnel services industry through Dunhill Personnel System, Inc.

Dunhill provides permanent placement and temporary personnel services through 279 franchised and company-owned offices in 41 states and the District of Columbia.

COCONUT GROVE, FL (JULY 25) BUSINESS WIRE - WATSCO, INC. 1/8ASE: WSOA3/8 announced that it expects to file with the Securities and Exchange Commission today a Registration Statement relating to a public offering of 1,750,000 shares of Class A Common Stock of which 1,500,000 will be offered by the Company and 250,000 will be offered by certain selling shareholders.

The managing underwriters are Kidder, Peabody & Co., Inc. and Raymond James & Associates. The offering is expected in August of 1990. The net proceeds of the proposed offering are anticipated to be used principally to help finance the previously announced $31,000,000 acquisition of privately-held Heating & Cooling Supply, Inc., the largest independent distributor of residential air conditioning equipment and related supplies in California. Watsco participates in the climate control industry through Gemaire Distributors, Inc., the largest independent distributor of residential central air conditioning equipment in Florida, and various manufacturing subsidiaries which produce components under the Watsco, Cam-Stat and Rho Sigma brand names.

The Company also participates in the personnel services industry through Dunhill Personnel System, Inc. Dunhill provides permanent placement and temporary personnel services through 279 franchised and company-owned offices in 41 states and the District of Columbia. A registration statement relating to the Class A Common Stock as filed with the Securities and Exchange Commission has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective.

This communication does not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any State in which such offer, solicitation or sale would be unlawful prior to the registration or qualification under the securities laws of any such State.

Prospectuses may be obtained from Kidder, Peabody & Co. Incorporated, New York City, New York and Raymond James & Associates, Inc., St. Petersburg, Florida.

#90206b0815 07/25/1990 ~Business Wire

CAMBRIDGE, MA (JULY 25) BUSINESS WIRE - The Seattle Goodwill Games

Organizing Committee has designated Lotus Development Corp. as the official software supplier for the 1990 Goodwill Games taking place in Seattle, July 20 through August 5.

Lotus products, including 1-2-3 and Agenda, are playing a pivotal role in the planning, management, and operation of the games. Held concurrently with the Goodwill Arts Festival, the Goodwill Games have received the full support of the United States Olympic Committee and promises to be the largest sporting event and arts festival planned in North America for the next decade.

The Games feature the world's top 2,500 athletes from more than 50 countries, competing in 21 sporting events throughout the state of Washington. The Games employ the unique top eight format, in which only the top eight individuals or teams in each event are invited to participate, ensuring a highly competitive environment.

Lotus 1-2-3 and Lotus Agenda, the award-winning personal information manager, are being applied to the Game's extensive organizational and logistical planning challenges. Lotus 1-2-3, for example, is being used to meet the budgeting, forecasting, statistical analysis, and financial management needs of the Games.

''We've used Lotus 1-2-3 for basically any and every kind of financial analysis, information storage, information retrieval, and information manipulation,'' said Bob Cowan, vice president of finance and administration for the Goodwill Games. ''It's the only spreadsheet that we've used during the entire history of the Games.''

Agenda is being used to coordinate and organize the thousands of details surrounding all aspects of event management, including contractors, volunteers, security, transportation, medical, construction and purchasing.

''For example, within a 36-hour period the Husky stadium event manager, John Ryan, was faced with organizing a staff of 1,000 people for the men's marathon, welcoming ceremonies, the women's marathon, and track and field events. In total, these events would involve coordinating over 4,000 athletes and 100,000 visitors.

''It makes all the difference in the world to actually sort by vendor, by contractor, by date, and time so that people aren't stepping all over each other. In particular, Agenda is exemplary because it allows us to see the immediate impact of even the smallest detail,'' said Richard Lockard, an event manager for the Seattle Organizing Committee.

Lotus personnel have been involved with the computerization of the Goodwill Games since December 1989. There are 600 personal computers in use at Games Headquarters, the international broadcast center and at event

locations throughout Seattle and the state of Washington.

''Lotus has been very involved with the Games, from start to finish, in the planning, operations and tallying of race results,'' said Doug Anderson, Lotus' northwest regional manager. ''With Lotus' increased emphasis on the global marketplace, our participation in this event helps to underscore our position as a worldwide software and information services supplier.''

Lotus will issue a TV news feed on July 25 at 2 p.m. EDT from the Games. Satellite coordinates are: Telstar 301, Transponder 10 V, Channel 19, Audio 6.2 and 6.8. Tape copies are also available through Ken Maas at Lotus Development Corp. in Cambridge, Mass.

Lotus Development Corp. is the leading provider of applications software for personal computers and information services delivered on CD-ROM, and is a worldwide supplier of applications software for workstations, minicomputers and mainframes.

#90206b0816 07/25/1990 ~Business Wire

MATTITUCK, NY (JULY 25) BUSINESS WIRE - North Fork Bancorp (NYSE:NFB) Wednesday reported that net income for the three months ended June 30 was $3.2 million, or 36 cents per share.

This compares with net income of $5 million, or 53 cents per share for the 1989 second quarter.

For the six months ended June 30, net income was $6.8 million or 76 cents per share, as compared with $10.2 million or $1.10 per share for the first half of 1989.

The decrease in earnings quarter over quarter is mainly attributable to the loan loss provision charged to earnings during the 1990 second quarter. ''We have followed through on our plan to record special provisions as long as general economic conditions warrant such action,'' said Kanas. A special provision of $1.5 million was charged to earnings during the second quarter of 1990.

The provision for loan losses was $2.3 million in the 1990 second quarter vs. $550,000 for the same period a year ago. The provision increases the

allowance for loan losses to $12 million, or .96 percent of total loans. Net charge offs were $1.6 million for the quarter or .13 percent of total loans, compared with $632,000 or .05 percent of total loans for the first quarter of 1990 and $173,000 or .01 percent for the 1989 second quarter.

The level of non-performing assets stabilized in the 1990 second quarter, decreasing slightly to $47.5 million, or 3.79 percent of total loans, net of unearned income, and ORE, from $48.9 million or 3.98 percent at March 31.

Taxable equivalent net interest income was $17.7 million for the quarter, up from $17.2 million for the second quarter of 1989. For the first half of 1990, net interest income on a taxable equivalent basis was $35.3 million, up from $33.8 million for the 1989 first half. The net interest margin for the second quarter was 4.07 percent down from 4.41 percent for the 1989 second quarter mainly due to the interest foregone on non accrual loans during the period.

Excluding securities gains, other operating income for the second quarter remained consistent with that of the prior year period, aggregating $1.9 million and $1.7 million for 1990 and 1989, respectively. For the six months ended June 30, 1990 and June 30, 1989, other operating income exclusive of securities gains was $3.7 million.

Operating expenses as a ratio of average assets continued to decline to 2.41 percent for the six months ended June 30, 1990 as compared with 2.48 percent for the comparable prior year period. For the 1990 second quarter, this ratio was 2.45 percent, slightly decreasing from the prior year second quarter ratio of 2.46 percent. ''The success of our cost cutting measures is evidenced by the continued decrease in the ratio of operating expense to average assets,'' said Kanas. ''This decrease was accomplished despite costs incurred on our Westward expansion and the opening of two new branch locations in the first half of 1990. We intend to continue to make improvement in this area by implementing further cost containment measures over the balance of the year.''

At June 30, total assets were $1.9 billion and deposits aggregated $1.5 billion. Shareholders equity of $144 million was equivalent to 7.6 percent of total assets, or a book value of $16.10 per share.

North Fork Bancorporation is the holding company for North Fork Bank & Trust Company and Southold Savings Bank. North Fork Bank & Trust is a commercial bank operating through 26 branch locations in Suffolk and Nassau Counties. Southold Savings Bank is an eight branch savings bank operating in Suffolk County.

#90206b0825 07/25/1990 ~Business Wire
ORLANDO, FL (JULY 25) BUSINESS WIRE - With the re-opening of the completely refurbished north tower in June, the 760-room Twin Towers Hotel and Convention Center, located at the entrance to Universal Studios Florida, nears completion of a $29 million renovation.

''We've almost finished putting together a brand new hotel,'' said Managing Director John Holmes. ''In addition to the refurbished guest rooms and corridors of the north and south towers, the pool area and landscaping renovations are now fully complete,'' said Holmes. The refurbished south tower, marble-accented lobby and lobby bar were opened in January.

Perhaps the most visible change is the addition of attractive neon lights completely outlining the hotel's exterior.

''We've designed the lighting to complement the atmosphere created by Universal Studios Florida, our new neighbors,'' said Holmes.

Holmes also stated that Aug. 9, the Twin Towers Hotel and Convention Center will open its two restaurants, a lounge and a pool bar.

Palm Court, a 375-seat, full-service restaurant, will offer both menu service and an upscale buffet complete with chefs on line at breakfast, lunch, and dinner. A Sunday brunch also will be offered. A 40-seat deli, the Citrus Shop, will be open 24 hours a day.

Everglades, a 160-seat lounge offering live entertainment, will feature late-night food service and a different themed activity nearly every evening. And the renovated pool area will be sporting a new pool bar.

Several other changes have been made. For guest security and safety, each room and suite has been equipped with an electronic locking system and a modern fire and life safety system, including smoke detectors and voice evacuation speakers. Another new feature is 24-hour room service.

The renovation's final phase, to be completed by September, includes the convention center. Featuring 58,000 square feet of meeting space, including a 23,000 square foot exhibit hall, it is the fifth-largest hotel banquet space in Orlando.

Located just 15 minutes from Orlando International Airport and less than 20 minutes from the area's most popular attractions, the Twin Towers Hotel and Convention Center is within camera shot of Universal Studios Florida and the Hard Rock Cafe Orlando. Hotel guests staying in rooms that face west have a bird's eye view of the attraction/production studio.

For reservations and/or more information, contact Twin Towers Hotel and Convention Center, 5780 Major Blvd., Orlando, Fla. 32819; telephone 800/327-2110.

#90206b0827 07/25/1990 ~Business Wire

STAMFORD, Conn. (JULY 25) BUSINESS WIRE - Re Capital Corp. (the ''Company'') reported net income for the quarter ended June 30, of $2,487,000 or 36 cents per share as compared with $2,235,000 or 33 cents per share, for the second quarter of 1989.

Net income for the six months ended June 30 was $4,783,000 or 70 cents per share, compared with $4,263,000 or 62 cents per share for the comparable period of the prior year.

Net premiums written and net premiums earned for the second quarter of 1990 were $23,754,000 and $23,399,000, respectively, vs. $19,944,000 and $20,831,000 for the second quarter of 1989.

Net premiums written and net premiums earned for the first half of 1990 were $46,491,000 and $46,597,000, respectively vs. $40,950,000 and $42,706,000 for the first half of 1989.

The statutory combined ratio for the second quarter and six months ended

June 30, was 99.1 percent and 98.7 percent respectively, compared with 97.3 percent and 97.9 percent for the 1989 second quarter and six month period, respectively.

The effective tax rates of 16.8 percent and 16.9 percent for the quarter and six months ended June 30, respectively, and 14.5 percent and 14 percent for the comparable prior year periods result principally from the effects of tax-exempt interest income.

In the second quarter and six months ended June 30, the effective income tax rate was negatively impacted by 1.2 percent and 2.3 percent, respectively, as a result of computing income tax expense based on the alternative minimum tax provisions of the tax law.

Cash flow from operations aggregated $16,883,000 in the first half of 1990 compared to $9,942,000 in the first half of 1989.

The company's shareholders' equity and Re Capital Reinsurance Corporation's statutory surplus, respectively, amounted to $96,213,000 and $79,422,000 at June 30, compared with $88,035,000 and $73,335,000 at June 30, 1989.

The company shareholders' equity per share at June 30, was $14.81 compared with $13.48 at June 30, 1989.

#90206b0829 07/25/1990 ~Business Wire

ATLANTA (JULY 25) BUSINESS WIRE - Advanced Telecommunications Corp. (NASDAQ/NMS:ATEL) (ATC) Wednesday announced results for its first quarter ended June 30, 1990.

Net income increased to $6,297,000 for the three months ended June 30, 1990, from $6,025,000 in the prior year.

Earnings per share rose 15 percent to 30 cents per share, up from 26 cents per share for the three months ended June 30, 1989. Revenues totaled $81,379,000 in the current quarter compared with $83,092,000 for the same period a year ago.

Net income in the current quarter was reduced by approximately $600,000, or 3 cents per share, by a one-time charge reflecting the payout of a severance agreement during the quarter.

Volume growth was strong with billed minutes of use increasing by 10.3 percent to $393.6 million. Revenue growth was impacted by rate reductions

reflecting a combination of competitive pressure on pricing and the migration of existing customers to lower priced products.

Commenting on the quarter, ATC's chairman, Stephen E. Raville, stated, ''ATC has clearly demonstrated that it can produce substantial earnings gains in a weak pricing environment. This attests to the benefits of our focused regional marketing strategy and highly efficient operating network.

''The outlook for ATC is very positive. Unit volume in July has been at record levels, and we expect to report strong sales and earnings growth for the September quarter. We are confident that, with our continuing year-to-year volume increases and stabilizing prices in the industry, fiscal 1991 will be a record year for ATC.''

ATC, headquartered in Atlanta, is one of the largest publicly held long distance carriers in the United States. It provides domestic and international long distance telephone services to business and residential customers in the rapidly growing markets of the Southwest and Southeast.

The company's strategy has been and continues to be one of strengthening its position as one of the country's leading regional long distance carriers. The common stock of ATC is traded in the National Market System under the NASDAQ symbol ATEL.

#90206b0833 07/25/1990 ~Business Wire

HOUSTON (JULY 25) BUSINESS WIRE - Stewart Information Services Corp. earned $0.9 million, or 23 cents per share, in the second quarter of 1990 as compared to earnings of $1.1 million, or 27 cents per share, in the second quarter of 1989.

The second quarter of 1989 included an after-tax gain of $1.1 million, or 26 cents per share, resulting from the sale of municipal bonds.

For the first six months of 1990, Stewart lost $0.7 million, or 17 cents per share, compared to a loss of $2.8 million, or 68 cents per share, for the same period last year. The improvement in 1990's earnings was primarily the result of an increase in revenues from higher real estate activity in many of the company's markets and from higher average revenue rates. Revenues also increased because of new offices opened, particularly in the Dallas-Fort Worth area.

Orders for the second quarter of 1990 were up 13 percent from 1989's second quarter. In comparison with year-earlier totals, orders for the

month of June 1990 were up nine percent and for the first 15 working days of July were unchanged. The lower rates of increase in recent weeks may be the result of a nationwide decline in housing activity, although the number of orders received is not necessarily indicative of future revenues.

Stewart's primary business is title insurance. The company issues policies on homes and other real property in all 50 states, the District of Columbia and Canada through over 2,600 issuing locations. In issuing a policy, and as one process, the title is first searched, examined and then closed. Stewart's customers include homebuyers and sellers, attorneys, builders, developers, lenders and real estate brokers.

The company also sells computer-related services and information to the real estate industry. Additionally, the company produces photogrammetric engineering products and geographic information systems for government and private entities, both domestic and foreign.

DALLAS (JULY 25) BUSINESS WIRE - Skylink America Inc. (NASDAQ:SKAI) Wednesday announced its financial results for the year ended April 30, reporting a net loss of $1,754,800, or 48 cents per share.

Skylink also announced it has completed a refinancing of substantially all of its debt with Farm Bureau Life Insurance Co.

The company reported the following results of operations:

	Three Months Ended April 30,		Year Ended April 30,	
	1990	1989	1990	1989
Revenues	$3,371,681	$ 334,613	$11,225,806	$ 8,312,656
Net income (loss)	$ (467,459)	$ (844,381)	$(1,754,800)	$ 1,266,798
Earnings (loss) per share	(13 cents)	(24 cents)	(48 cents)	47 cents

Edward R. McMurphy, president of Skylink America, stated, ''Revenues and earnings from the prior year were primarily generated from the sale of cable systems whereas current year results primarily reflect operations of free-to-guest and pay-per-view programming businesses. The fourth quarter included approximately $375,000 of depreciation and amortization charges.

''Interest expense increased to $223,745 in the fourth quarter of the current year as compared to $15,553 in the comparable period of the prior

year. The increase was due to additional indebtedness incurred in connection with acquisitions and the expansion of pay-per-view operations.

''Management is pleased that Farm Bureau has increased its investment in Skylink thereby enhancing the company's potential for growth. Farm Bureau's continued support of Skylink has enabled the company to make important acquisitions thereby becoming a significant player in our industry, and we believe Farm Bureau will continue to have a positive impact on the company's future.''

Skylink is engaged in the business of providing free-to-guest and pay-per-view programming services and selling pay-per-view equipment, as well as developing, operating and selling cable systems.

CLEVELAND (JULY 25) BUSINESS WIRE - Sealy Inc. announced Wednesday the appointment of three marketing executives to newly created positions, rounding out staffing of the company's new marketing group, led by David J. McIlquham, vice president, marketing.

The appointments, which were announced by McIlquham are as follows: Alicia G. Arnold was appointed director of marketing services; Gregory M. Barbe was appointed director of marketing - Sealy products; and Lee A. Shapiro was appointed director of marketing - Stearns & Foster.

Prior to coming to Sealy, Alicia Arnold served as an account executive, overseeing the Sealy and other advertising accounts, at Wyse Advertising in Cleveland. Before joining Wyse as an assistant account executive in 1986, Arnold worked in New York, for the advertising firm, BBDO Inc. Arnold received her bachelor's of science degree in mass communcations from Miami University in Oxford, Ohio.

Greg Barbe comes to Sealy from General Electric's G.E. Lighting division in Cleveland, where he worked in two associate brand manager positions. Previously Barbe worked at General Electric's G.E. Supply division in Bridgeport, Conn.

Barbe is a graduate of the University of Minnesota, in Minneapolis, and the Amos Tuck School at Dartmouth College where he received respectively, a bachelor's of arts degree in political science and a master's degree in business administration.

Shapiro joins Sealy after five years at Fisher-Price Toys outside Buffalo,

N.Y. in East Aurora, N.Y. where he served first as a marketing assistant and then as a marketing manager. Previously, Shapiro was employed with Western Publishing Co. Inc. of Racine, Wis.

He is a graduate of the University of Denver where he earned a bachelor's of science in business administration. Shapiro will relocate to Cleveland.

The company's new marketing group, under McIlquham, and the sales organization, led by Gary Fazio, report to R. James Alexy, senior vice president, sales and marketing. In the last 30 days five new management appointments have been made within the sales organization, all representing promotions from within Sealy.

Sealy Mattress Co., a wholly owned subsidiary of Sealy Corp., produces the complete Sealy line of mattresses including the world famous Posturepedic.

Other operations include: The Stearns & Foster Bedding Co., one of the oldest and largest premium-brand bedding manufacturers in the country; Advanced Sleep Products, a leading manufacturer and distributor of waterbeds; Sealy Furniture Co. and the Stearns & Foster Upholstery Furniture Co., manufacturers of convertible sofas; and Woodstuff Manufacturing Inc., a manufacturer of waterbed furniture.

#90206b0844 07/25/1990 ~Business Wire

KNOXVILLE, TENN. (JULY 25) BUSINESS WIRE - Third quarter financial results show that TVA has continued to reduce its operating and interest expenses through the fiscal year to date compared with the same period last year.

For the first nine months of the fiscal year, operating expenses were $65 million lower than the same period last year, a reduction of 3 percent. Interest expense was $146 million lower than the same period last year, a reduction of 10 percent.

''The third quarter results reflect the very strong financial performance that permitted us to recommend to the TVA board of directors last week that we continue our rate freeze for the third year in a row,'' said Bill Malec, TVA's chief financial officer.

Malec briefed board members on TVA's financial performance at a

preliminary rate review July 18. The board is expected to approve the rate freeze at its final rate review on Aug. 15.

Operating expenses for the third quarter, which ended June 30, were $807 million, compared with $756 million for the third quarter last year. Interest expense was $419 million, compared with $468 million for the third quarter last year.

TVA reduced its interest expense through an $8 billion refinancing earlier this fiscal year.

Total power sales for the quarter were 27.6 billion kilowatthours, up 4.5 percent from the corresponding quarter a year ago. Net income was $119 million, about the same as the third quarter last year.

For the 12 months ended June 30, 1990, operating expenses were $3,137 million -- 6 percent lower than the same period last year. Interest expense was $1,696 million -- 9 percent lower than the same period last year. Operating revenues for the same 12-month period were $5,298 million up from $5,182 million over the same period last year.

#90206b0847 07/25/1990 ~Business Wire

DALLAS (JULY 25) BUSINESS WIRE - A. H. Belo Corp. Wednesday announced financial results for the second quarter and six months ended June 30.

The media company's total revenues for the second quarter were $114.3 million, a 4.6-percent increase over the $109.3 million reported for the second quarter of 1989. Net earnings for the quarter were $8.5 million, compared with $9.7 million reported for the prior year.

This decline in earnings was the result of one-time litigation expenses incurred during the period to defend the company against a suit brought by one of its newspaper competitors in Dallas. The trial concluded in May with the jury finding in Belo's favor. Second quarter earnings per share were 45 cents, compared with the 48 cents for the comparable period last year. The litigation expenses reduced earnings per share in the quarter by approximately 10 cents. Average shares outstanding for the quarter were 19.1 million, down approximately 1.2 million shares from the prior year due to the repurchase of stock by the company.

Belo's publishing revenues, principally from The Dallas Morning News, were $62.9 million for the quarter, up 4.9 percent from the $59.9 million reported last year. Gains in the publishing division were primarily the result of continued growth in both retail and classified advertising, especially in the automotive category. Broadcast revenues were $51.4 million for the second quarter, 4.2 percent above the $49.4 million reported for the same period in 1989. Belo's Dallas television station contributed most of the gain during the quarter through continued strength in local advertising and a slight upturn in national spot buys.

The Dallas ABC affiliate sustained its No. 1 overall ratings position during the period and continued to benefit from the economic recovery underway in North Texas.

Revenues for the six months ended June 30, 1990 were $212.2 million, 5.9 percent above the $200.3 million reported for the first half of 1989. Net earnings for the six-month period were $11.3 million, compared with $12 million for the same period in 1989, and earnings per share were 59 cents, the same as last year. Dallas-based Belo owns The Dallas Morning News and Dallas-Fort Worth Suburban Newspapers Inc., publisher of seven community newspapers in the Dallas-Fort Worth area.

In addition, Belo owns and operates network-affiliated television stations WFAA-TV (ABC) in Dallas-Fort Worth; KHOU-TV (CBS) in Houston, Texas; KXTV CBS) in Sacramento, Calif.; WVEC-TV (ABC) in Hampton-Norfolk, Va.; and KOTV (CBS) in Tulsa, Okla. Shares of Belo Series A Common Stock are traded on the New York Stock Exchange, symbol BLC.

#90206b0848 07/25/1990 ~Business Wire
DALLAS (JULY 25) BUSINESS WIRE - A. H. Belo Corp., the Dallas-based media company, reported Wednesday that its board of directors declared a quarterly cash dividend of 13 cents for each outstanding share of Series A stock and Series B stock to be paid Sept. 7 to shareholders of record Aug. 10.

The new quarterly rate of 13 cents per share compares with a previous rate of 11 cents per share. The dividend was last raised in the second quarter of 1988 from 10 cents per share to 11 cents per share.

Belo Chairman and Chief Executive Officer Robert W. Decherd said, ''The company has experienced a recovery in its earnings over the past 18 months and we are pleased to be able to adjust the dividend payout to our shareholders accordingly.'' Belo owns The Dallas Morning News and Dallas-Fort Worth Suburban Newspapers, Inc., publisher of seven community newspapers in the Dallas-Fort Worth area.

In addition, Belo owns and operates network-affiliated television stations WFAA-TV (ABC) in Dallas-Fort Worth; KHOU-TV (CBS) in Houston; KXTV (CBS) in Sacramento, Calif.; WVEC-TV (ABC) in Hampton-Norfolk, Va.; and KOTV (CBS) in Tulsa, Okla. Shares of Belo Series A Common Stock are traded on the New York Stock Exchange, symbol BLC.

#90206b0849 07/25/1990 ~Business Wire
HOUSTON (JULY 25) BUSINESS WIRE - Tuboscope Corp. Wednesday announced financial results for the three months ended June 30, 1990.

The company reported net income of $802,000, or seven cents a share, for the second quarter of 1990, compared to a net loss of approximately $2.0 million, or 41 cents a share, for the second quarter of 1989. The increase in net income was primarily due to a 16 percent increase in revenue and a decrease in interest expense of $1.6 million.

In addition, the second quarter of 1989 included preferred stock dividends of $529,000, while there were no such dividends in the second quarter of 1990.

The company's revenue advanced to $30.45 million for the three months ended June 30, 1990 compared to $26.14 million for 1989. The majority

($3.4 million) of the increase ($4.3 million) was in the company's oilfield services division and was due primarily to an increase in domestic oil and gas drilling activity.

Pipeline services revenue increased $884,000 as the result of the rescheduling of part of a contract into the second quarter of 1990 from the first quarter of 1990 as previously reported.

The decrease in interest expense in the second quarter of 1990 was a result of the retirement of the company's bank debt on March 20, 1990 with proceeds from its initial public offering. Simultaneous with this offering all outstanding preferred stock was exchanged for common stock.

Headquartered in Houston, Tuboscope provides specialized services and products to the oil and gas industry worldwide.

The company provides inspection and coating services for oil country tubular goods (drill pipe, casing, and tubing), sells tubular connections, provides in-place inspection of oil and gas pipelines, and sells and leases inspection equipment to manufacturers of tubulars.

The company designs and manufactures its proprietary inspection and coating equipment and formulates and manufactures its own internal coatings.

The company's common stock is traded on the NASDAQ National Market System under the symbol ''TUBO''.

MANCHESTER, NH (JULY 25) BUSINESS WIRE - Amoskeag Bank Shares Inc. (NASDAQ:AMKG), a multi-bank holding company headquartered in Manchester, N.H., Wednesday reported a net loss of $13.2 million ($1.19 per share) for the second quarter ended June 30, 1990.

Net income for the second quarter of 1989 was $1.8 million (16 cents per share). For the first quarter of 1990, the net loss was $11.3 million. For the first six months of 1990, the company recorded a net loss of $24.5 million compared to a net loss of $15.8 million for the same period in 1989.

The continued planned contraction of the company's balance sheet resulted in total assets at June 30, 1990 of $1.8 billion, down $373 million, or 17 percent, from June 30, 1989 total assets of $2.2 billion. The primary

capital ratio at June 30, 1990 was 6.5 percent compared to 6.8 percent at March 31, 1990 and 7.9 percent at June 30, 1989. Total deposits were reduced by 9 percent from $1.6 billion at June 30, 1989 to $1.5 billion at June 30, 1990.

Compared with March 31, 1990, total non-performing assets increased 13 percent from $169 million to $191 million at June 30, 1990. The breakdown of the $191 million in non-performing assets includes $104 million of non-performing loans and leases, $19 million in other real estate owned, $54 million of in-substance foreclosures and a non-performing investment in a joint venture of $14 million.

In the second quarter of 1990, a provision of $8.6 million was made to the allowance for loan and lease losses compared with $10.6 million the previous quarter and $2.1 million for the second quarter of 1989.

The allowance for loan and lease losses at June 30, 1990 was $48.7 million compared with $45.8 million at June 30, 1989 and $48.2 million at March 31 1990. The allowance for loan and lease losses stands at 46.9 percent of non-performing loans and leases at June 30, 1990. Net charge-offs for the second quarter of 1990 were $8.1 million.

John L. Allen, president and chief executive officer, stated, ''The economy in New Hampshire has not as yet reversed the weakening trend of the past two years and continues to take its toll on Amoskeag and our industry. We continue to channel all of our efforts to improve and protect Amoskeag's position, but in turn-around will take time. The softness of the New England economy is reflected in further declines in real estate values as well as affecting non-real estate businesses and industries. The resulting deterioration in our loan values dictates that we take prudent charge downs in our portfolio.

During the second quarter, the FDIC and the State of New Hampshire Banking Department initiated and recently concluded examinations of the company's lead bank, Amoskeag Bank. In addition, during the same period the office of the Comptroller of the Currency completed a limited review at Bank Meridian N.A., another Amoskeag Bank Shares Inc. affiliate.''

COLORADO SPRINGS, CO (JULY 25) BUSINESS WIRE - SofTech Inc. (OTC:SOFT) has recently been awarded a task order to analyze the U.S.A.F. Space Command's Cheyenne Mountain Complex weapon systems for possible transition to an Open Systems Interconnection (OSI) environment.

They will be looking at possible alternatives, and evaluating the costs, risks and benefits of various approaches.

Air Force Logistics Command, together with Space Command, is taking a proactive look into the future and assessing how best to transition Cheyenne Mountain Upgrade (CMU) programs currently under development and support those programs in the most cost effective manner.

Interoperability and life cycle program costs are key program drivers. As the CMU programs become operational, Air Force Logistics Command and U.S. Space Command hope to leverage the technological advancements available to OSI conformant systems for increased functionality, while avoiding costly development programs.

Founded in 1969, SofTech Inc. is a publicly held company providing custom software design and development, systems engineering and integration services to government agencies and commercial companies. Headquartered in Waltham, Mass., the company employs approximately 700 people in 18 locations throughout the United States.

#90206b0872 07/25/1990 ~Business Wire
NEW YORK (JULY 25)) BUSINESS WIRE - Zemex Corp. Wednesday announced net income in the first six months of 1990 of $57,000 or 3 cents per share compared with a net loss of $590,000 or 33 cents per share in the first half of 1989.

Net income for the second quarter was $158,000 or 9 cents per share compared with a net loss of $233,000 or 13 cents per share in the same

period last year.

The company's industrial minerals operations, including the Crystal project have continued the performance improvement reported at the end of the first quarter of this year.

Metal powders earnings in the first half of 1990 have continued at about the same level as in the same period of 1989 in spite of softer conditions in the industries served. Construction is proceeding on schedule on the Atomized Steel Powder project and about half of total project funds are now committed. Start up of the new plant is planned for the first half of 1991.

Zemex successfully completed its rights issue on July 17, 1990, selling units with a value of $4 million to existing shareholders. This will significantly strengthen the company's financial position, facilitating continued growth and recovery of its earnings.

At the company's board meeting today directors voted to omit a third quarter dividend, in order that capital can be conserved for reinvestment in its operating businesses.

INDIANAPOLIS (JULY 25) BUSINESS WIRE - Italy's leading ultrasound manufacturer, Esaote Biomedica, has purchased the Indianapolis-based Biosound, a leading manufacturer and distributor of ultrasound equipment for diagnosis of cardiovascular disease, and formerly its joint venture partner in the highly successful Genesis series of ultrasound systems recently selected by NASA for the space shuttle program.

The biomedical sector of Finmeccanica -- the industrial high-technology holding company of Italy's major industrial group, IRI -- Esaote Biomedica with sales reaching $100 million in 1990, 60 percent from ultrasound, has purchased all outstanding shares of Biosound from two U.S. venture capital groups.

''This acquisition demonstrates Finmeccanica's strong commitment to both biomedical technology and the U.S. market,'' says Andrea Oberti, Biosound's new chairman of the board and general manager of Genoa-based Esaote.

He also notes that Biosound's management team will maintain their operating autonomy. ''In fact, we hope to add a strong international

marketing capability to Biosound's aggressive pursuit of technological joint ventures with other U.S. companies.'' Recently relocated to a new and expanded facility, Biosound will remain headquartered in Indianapolis.

Biosound President, Gerald A. Richardson, expresses enthusiasm concerning the new corporate alliance, ''Our synergy with Esaote gives us immediate access to their substantial research and development resources. Since Europe represents one of the world's fastest growing markets for diagnostic equipment, our relationship with Esaote will be of great strategic importance over the next decade.''

Finmeccanica directs the activities of over 60 companies in high technology sectors, including aeronautics and space, defense electronics and industrial process control systems. The group controls several companies in the United States, including Bailey Controls, Union Switch and Signal and Dee Howard.

IRI, Italy's largest industrial conglomerate, with 1989 sales reaching $49 billion and 475,000 employees, holds eleventh position on the FORTUNE 500 World's Biggest Industrial Corporation list.

MARKHAM, ONTARIO (JULY 25) BUSINESS WIRE - International Semi-Tech Microelectronics Inc. Wednesday announced that its subsidiary, Semi-Tech Microelectronics (Far East) Limited (''STMFE'') has completed its Rights Offering and Private Share Subscription Agreement in Hong Kong and has completed the first closing leading to the sale of 80 percent of Singer Taiwan by SSMC Inc., (''Singer'') to First Taiwan Investment and Development Inc. (''FTID'').

The combined Rights Issue of 1.388 billion shares at HK $0.60 together with the share placement of 195 million shares at HK $0.83 to Zoser Company Ltd., an independent third party, has been completed. The net cash proceeds from these transactions were CDN $73.0 million and CDN $24.2 million respectively. In addition, Singer Europe is now part of Singer as a result of these two transactions.

STMFE also completed the first closing of sale of Singer Taiwan to FTID pursuant to an agreement signed June 7. At the closing on July 7, STMFE received US $27 million in exchange for a 30 percent interest in Singer Taiwan. Two further closings are scheduled before February 1991, which will result in total proceeds to STMFE of approximately US $72 million in exchange for an 80 percent interest in Singer Taiwan.

James H. Ting, president and chief executive officer of International Semi-Tech Microelectronics Inc. said, ''We are very pleased with the support we received from the Hong Kong market. The subscription was almost 30 percent over subscribed reflecting the confidence of the Far East investors in the transformation of the Singer Company. Semi-Tech Microelectronics (Far East) Ltd. is now the largest industrial company in Hong Kong with shareholders' equity of approximately CDN $400 million. Despite the sale of Singer Taiwan, we will continue to have responsibility to manage the manufacturing facilities in Taiwan.''

International Semi-Tech Microelectronics Inc. is a Canadian public company whose shares are listed on the Toronto Stock Exchange, trading under the symbol ISE. It owns 41.5 percent of Semi-Tech Microelectronics (Far East) Limited, a public company listed on the Hong Kong Stock Exchange, symbol 448. SSMC Inc. is 100 percent owned by STMFE and its preferred shares are traded on NASDAQ, symbol SSMCP.

NASHVILLE (JULY 25) BUSINESS WIRE - Opryland USA Inc. has signed a letter of intent to acquire 100 percent of the stock of Country Music Television (CMT), the 24-hour country music video channel serving 11.5 million cable subscribers.

Opryland USA will sell a portion of CMT's stock to Group W Satellite Communications (GWSC). This announcement was made today by E.W. ''Bud'' Wendell, president and chief executive officer of Opryland USA Inc.; James William Guercio, president and chief executive officer, CMT; and Donald Mitzner, president, GWSC.

The terms of the multi-million dollar agreement were not disclosed. The purchase is subject to the negotiation of a definitive agreement by the parties as well as certain regulatory approvals. In addition, the tender offer must be accepted by the stockholders of CMT. GWSC's purchase of CMT equity from Opryland USA is contingent upon the approval of the board of directors of Westinghouse Electric Corp.

Opryland USA Inc. is a property of the Gaylord Broadcasting Co. which is based in Dallas. Country Music Television's majority stockholders are James William Guercio and The Sillerman Cos., a diversified New York communications management corporation.

Opryland USA and GWSC are responsible for the highly successful TNN: The

Nashville Network, which launched in March 1983 and now serves over 50 million cable television households. Opryland USA owns TNN; GWSC handles its marketing and distribution under a long-term agreement. TNN carries a wide variety of country music concerts and country lifestyle programs, including fishing, sports, travel, and talk shows. Among its most popular productions are Nashville Now and American Sports Cavalcade.

The management arrangement for CMT will be the same as TNN's. TNN will be responsible for CMT's programming, engineering and technical operations. GWSC will be responsible for ad sales, marketing, affiliate relations and public relations.

CMT was founded in Hendersonville, Tenn., in 1983 to telecast by satellite country music videos 24 hours a day. It has been responsible for the rise of such country stars as the Kentucky Headhunters, Clint Black, Prairie Oyster, and Alan Jackson.

Opryland USA is a diverse company involved in entertainment, broadcasting, and hospitality businesses. In addition to TNN: The Nashville Network, major components include Opryland, a music theme park; the Grand Ole Opry, a live country music radio show; and the Opryland Hotel. Opryland USA Inc. is a property of Gaylord Broadcasting Co., which is based in Dallas.

A division of Westinghouse Broadcasting Co. (Group W), GWSC is also a partner in Request Television, a pay-per-view service, and owns Home Team Sports, a regional sports network serving the Baltimore-Washington, D.C. area. In addition, GWSC's Operation and Engineering Group is the largest distributor of video programming in the country, providing satellite transmission for the CBS and ABC television networks as well as Arts & Entertainment, Lifetime, The Discovery Channel, and The Travel Channel.

GWSC and Opryland USA are also partners with Meredith Corp. in Country America, a successful consumer magazine featuring country lifestyle and country music information.

#90206b0893 07/25/1990 ~Business Wire

HIGH POINT, NC (JULY 25) BUSINESS WIRE - Carolina Bancorp Inc., the parent company of First Federal of the Carolinas, F.A., Wednesday reported net earnings for the quarter ended June 30, 1990, of $385,000 as compared

to $502,000 for the same quarter last year.

This is equivalent to 23 cents per share on a primary basis compared to 30 cents per share for the year-earlier quarter. On a fully-diluted basis, earnings per share were 20 cents compared to 28 cents for the same quarter last year.

Net earnings (loss) for the nine months ended June 30, 1990, were ($1,367,000) as compared to net earnings of $1,194,000 in the same nine month period last year. This is equivalent to (80 cents) per share on a primary basis compared to 71 cents per share for the year-earlier nine month period. On a fully-diluted basis, earnings per share were (70 cents) compared to 69 cents for the same period last year.

Earnings for the nine months ended June 30, 1990, include an extraordinary charge of $2,358,000 resulting from a change in the status of First Federal as a savings and loan for tax purposes.

Carolina Bancorp's assets increased to $301.6 million at June 30, 1990, from $297.6 million at the same date last year. Total loans at June 30, 1990, were $264.4 million, down from $265.0 million at June 30, 1989. Total deposits were $186.6 million compared to $232.3 million at the prior year quarter-end.

Stockholders' equity at June 30, 1990, amounted to $20.6 million, or 6.84 percent of total assets. In contrast with many other thrifts, Carolina Bancorp's superior equity position provides the company with greater stability and flexibility in its operations.

Carolina Bancorp is the parent holding company of First Federal of the Carolinas, F.A. Its common shares, of which there are presently 1,698,000 are quoted on the NASDAQ National Market System under the ticker symbol FFCA.

First Federal of the Carolinas, F.A. is a North Carolina savings and loan association headquartered in High Point. It conducts business n High Point, Jamestown, Thomasville and Greensboro in the Piedmont Triad; in Raleigh in the Research Triangle; in Jacksonville and New Bern on the coast; and in Fayetteville.

#90206b0896 07/25/1990 ~Business Wire

POUGHKEEPSIE, N.Y. (JULY 25) BUSINESS WIRE - Poughkeepsie Savings Bank, FSB (NASDAQ:PKPS) Wednesday reported a net loss of $6.8 million or $1.92

per share for the second quarter of 1990, compared with net income of $289,000 or $0.08 per share for the second quarter of 1989. The Bank had a net loss of $14.6 million or $4.11 per share for the six months ended June 30, 1990, compared with net income of $2.2 million or $0.61 per share for the same period in 1989.

Results for the second quarter and six months ended June 30, 1990, can be attributed primarily to additions of $5.8 million and $14.5 million, respectively, to the allowance for loan losses and the continued impact on net interest income of non-earning assets, largely commercial real estate-related.

Christoph H. Schmidt, chairman of the board and chief executive officer, said ''We continue to be adversely affected by the deterioration of commercial real estate markets in the Northeast and elsewhere. Our efforts have been and will continue to be directed toward working out problem loans and reducing the level of non-performing assets. However, this will not be easy nor will it be accomplished in a matter of weeks or months, given economic conditions and other factors beyond our control. As a result, we do not expect quarterly earnings in the near term.''

Shareholders' equity was $72.1 million at June 30, 1990. The bank's tangible capital, core capital and risk-weighted capital ratios were approximately 4.8 percent, 4.8 percent and 8.2 percent, respectively, all in excess of current and anticipated regulatory requirements.

The provision for loan losses was $5.8 million for the second quarter of 1990, compared with $509,000 for the second quarter of 1989. Net interest income before provision for loan losses was $6.3 million for the second quarter of 1990, compared with $8.7 million for the second quarter of 1989. The decrease is largely the result of the higher level of non-performing assets period over period and a reduction in average earning assets. Other income was $2.5 million for the second quarter of 1990, compared with $2.4 million for the same period of 1989.

Operating expenses were $11.2 million for the second quarter of 1990, compared with $10.1 million for the same period of 1989. The increase is attributable to non-recurring charges of approximately $1.6 million taken during the second quarter of 1990, related to depreciation adjustments, severance and organizational restructuring expenses.

The provision for loan losses was $14.5 million for the first six months of 1990, compared with $919,000 for the same period of 1989. Net interest income before provision for loan losses declined to $14.0 million for the first six months of 1990, from $18.3 million for the same period of 1989, again reflecting higher levels of non-performing assets, as well as a period-over-period reduction in average earning assets.

Operating expenses for the first six months of 1990 were $20.8 million, compared with $19.4 million for the same period of 1989. CONTACT: Poughkeepsie Savings Bank, Poughkeepsie Neil S. Lang, 914/431-6386 Kevin Timmons, 914/431-6291 by Morgen-Walke Associates, New York Edward Nebb/Bill Newbould, 212/986-5900

#90206b0903 07/25/1990 ~Business Wire

HOUSTON (JULY 25) BUSINESS WIRE - Sterling Chemicals Inc. (NYSE:STX) reported revenues and earnings for its third quarter ended June 30, 1990.

Third-quarter results:

Revenues for the third quarter were $139.2 million compared with revenues of $150.2 million for the third quarter of fiscal 1989, a decrease of 7.3 percent. Net income was $18.8 million for the quarter vs. $17.6 million for the same quarter of the previous fiscal year, an increase of 6.8 percent.

On a per-share basis, net income was 34 cents for the third quarter of fiscal 1990 vs. 30 cents for the third quarter of fiscal 1989, an increase of 13.3 percent.

In comparison with the second fiscal quarter of 1990, revenues for the third quarter improved from $117.1 million to $139.2 million and earnings per share improved from 20 cents to 34 cents, an increase of 70 percent.

On a year-to-date basis, revenues for the nine-month period ended June 30, 1990, were $344.2 million compared with revenues of $477.7 million for the same period of fiscal 1989, a decrease of 27.9 percent. Net income was $34.1 million for the nine-month period ended June 30, 1990, vs. $96.3 million for the same period in the previous fiscal year, a decrease of 64.6 percent.

On a per-share basis, net income was 62 cents for the nine-month period ended June 30, 1990, vs. $1.62 for the same period in fiscal 1989, a decrease of 61.7 percent.

Discussion of results:

Sterling's earnings from operations for the quarter just ended were essentially the same as the prior year's results. The additional 4 cents per share earned in the June 1990 quarter was attributable to the net effect of: (1) the receipt of insurance proceeds from the final settlement of the freeze-related problems that occurred in December 1989, partially offset by (2) the accrual for a portion of the styrene reactor turnaround currently underway. Styrene shipments were lower in the quarter

just ended vs. the prior year because of production inefficiencies with the above- mentioned reactor. However, the lower volume was offset by higher margins resulting from the tight supply of product that now exists in the marketplace.

The performances of acrylonitrile and acetic acid for the quarter just ended were primarily unchanged from the prior year. J. Virgil Waggoner, president and chief executive officer, stated that he was encouraged by the continued improvement in the company's financial performance in the third fiscal quarter compared with the previous two fiscal quarters. Waggoner indicated that the quarter-to-quarter improvement was primarily due to the relatively tight supply of styrene.

Waggoner noted that earnings for the quarter just ended were more than sufficient to cover the dividend paid Wednesday but indicated that Sterling's board of directors will continue to review the dividend policy in the future. Sterling Chemicals is a major producer of seven intermediate petrochemical products -- styrene monomer, ascrylonitrile, acetic acid, plasticizers, lactic acid, tertiary butylamine and sodium cyanide. Sterling Chemicals is based in Houston.

ANNOUNCEMENT:

On July 19, 1990, Mack Trucks Inc. announced that it has incurred a loss of approximately $63 million for the second quarter of 1990. The loss has caused violations of current ratio, cumulative net result and gross profit margin requirements under the terms of the MTI credit agreement and may result in defaults under such agreement.

WASHINGTON (JULY 25) COMTEX - The 8-K report filed at the SEC shows Electric Avenue Inc. announced that on July 18, 1990, Michael P. Olson, Electric Avenue Inc.'s chief financial officer and corporate secretary, resigned from those positions effective upon July 31, 1990.

-30- 428

#90206c0044 07/25/1990 ~Comtex

WASHINGTON (JULY 25) COMTEX - The 8-K report filed at the SEC shows on July 16, 1990, Care Plus Inc.(TICKER: CPLS) dismissed its independent auditors of the firm of BDO Seidman.

During Care Plus Inc.'s two most recent fiscal years and the subsequent interim period through July 16, 1990, Care Plus believes that there were no disagreements between those former auditors and Care Plus Inc., with but one exception.

During April and June of 1990, a disagreement developed between Care Plus Inc. and BDO Seidman with regard to certain stock awards granted to Care Plus Inc.'s executive officers as part of Care Plus Inc.'s Executive Earnings Participation and Executive Retention Program.

Subsequently, the awards were canceled and the entire program was terminated, subject to shareholder approval.

That disagreement was thereby resolved without discussion of the

disagreement with BDO Seidman on the part of the board of directors of Care Plus.

Care Plus Inc. authorized BDO Seidman to fully respond to inquiries of its successor regarding that recent disagreement.

#90206c0045 07/25/1990 ~Comtex

WASHINGTON (JULY 25) COMTEX - The 8-K report filed at the SEC shows Iowa First Bancshares Corp., the bank holding company possessive of 100% of the stock of First National Bank of Muscatine and First National Bank in Fairfield, announced that its Muscatine subsidiary increased its loan write-downs as well as its provisions for possible future loan losses.

Muscatine increased those write-downs and provisions by $1.5 million and increased its nonperforming loans by $2.5 million.

According to Iowa First Bancshares, the increases resulted from recent reviews of Muscatine by its regulators and reflect the same standards as similarly applied by other regulators in other areas of the country.

Muscatine officials reportedly expected, as of the July 26, 1990 date of this 8-K filing, a substantial portion of the nonperforming loans to be repaid.

They therefore expressed their beliefs that these actions taken by Muscatine did not reflect a deterioration of Muscatine's loan portfolio.

These provisions are expected to result in an Iowa First Bancshares loss for the second quarter of 1990.

The provisions served to reduce earnings projections by both Iowa First and Muscatine.

The executive office of Iowa First Bancshares Corp. is located at 300 East Second Street, Muscatine, Iowa 52761, and its telephone number is (319) 263-4221.

#90206c0046 07/25/1990 ~Comtex

WASHINGTON (JULY 25) COMTEX - The 8-K report filed at the SEC shows on July 16, 1990, Golden State Capital Corp. dismissed its former independent public auditors of the firm of Shelton, Smith and Townsend and engaged those of the firm of Solin and Associates P.C. in their stead.

According to the 8-K filing, since the inception of Golden State Capital on

Sept. 8, 1988, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles, with the singular exception that they were prepared under the assumption that Golden State Capital would continue as a going concern.

Also according to the filing, for the previous two fiscal years, there were no disagreements between those former auditors and Golden State Capital Corp.

Golden State Capital requested that Selton, Smith and Townsend furnish a letter to the Securities and Exchange Commission addressing their agreement with statements present in the 8-K filing.

#90206c0048 07/25/1990 ~Comtex

WASHINGTON (JULY 25) COMTEX - The 8-K report filed at the SEC shows Scientific Radio Systems Inc.(TICKER: SCRD) was notified by its creditor bank, Chase Lincoln First Bank, on June 14, 1990, of its default on its loan obligation.

The events of default listed were failure to make payments of interest and principal and failure to comply with various covenants of the loan agreement.

As per that default, Chase demanded payment of the loan balance in full in the sum of $2.95 million.

Concurrently, Chase requested that a meeting with Scientific Radio officials be held by June 22, 1990, to structure an orderly liquidation of the Scientific Radio's assets.

That meeting having been held, no immediate action was decided upon, pending further assesments of the situation.

-30- 965

#90206c0049 07/25/1990 ~Comtex

WASHINGTON (JULY 25) COMTEX - The 8-K report filed at the SEC shows on July 13, 1990, Lee Enterprises Inc.(TICKER: LEE) notified Nippon Paint Co. Ltd. of its intention to purchase Nippon's 50% share of NAPP Systems Inc. stock.

That notification to purchase occured under a joint venture agreement between Lee and Nippon.

The consideration for the purchase is set at $100 million.

Under the joint venture, Lee holds the remaining 50% share of NAPP, and will therefore gain complete ownership of NAPP via this buy-out dissolution of the joint venture.

The purchase as well as the purchase price were anticipated and provided for under the joint venture agreement.

Final closing of the purchase was set at approximately August 31, 1990. Lee, upon the July 13, 1990 date of the 8-K filing, was discussing financing arrangements for the purchase with institutional lenders for loans of up to $68 million.

WASHINGTON (JULY 25) COMTEX - The registration statement filed at the NASD shows in a prospectus dated July 20, 1990, Community Health Systems Inc. proposed an initial public offering of 1.8 million shares of Community Health Systems common stock at an estimated offering price of between $11.00 and $13.00 per share.

Community Health is engaged in the ownership and operation of ten acute care hospital facilities aggregating to 996 licensed beds. Community Health System Inc. was founded in 1985.

Proceeds from the proposed offering are to go to the repayment of debt and toward general corporate purposes.

The offering is being underwritten by both J. C. Bradford & Co. and Bateman Eichler, Hill Richards Inc.

The executive office of Community Health Systems is located at 14550 Torrey Chase Boulevard, Suite 450, Houston, Texas 77014, and its telephone number is (713) 537-5230.

WASHINGTON (JULY 25) COMTEX - The registration statement filed at the NASD shows Moorco International Inc. proposed an offering for the intial public sale of six million Moorco common shares, of which four million were to be offered by Moorco International Inc. and the remaining two million were to be offered by selling shareholders.

Moorco International is engaged in the manufacture of fluid measurement and pressure control products for the petroleum process and electric power generation industries.

Proceeds from the proposed offering are to go to the redemption of all outstanding shares of series B preferred stock, toward the prepayment of subordinated indebtedness and for general corporate purposes.

The proposed offering is being underwritten by those of the firm of Paine Webber Inc. as well as those of Wertheim Schroder & Co. Inc.

The executive office of Moorco International Inc. is located at Suite 2400, 2700 Post Oak Boulevard, Houston, Texas 77056, and its telephone number is (713) 993-0999.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (JULY 25) COMTEX - Treasury Secretary Nicholas Brady today made his priorities clear on the issue of economic growth vs. inflation and, without asking directly, urged the Federal Reserve Board to ease credit.

"We all have a common goal," Brady said. "To separate us into armed camps where one (Federal Reserve Board) is an armed guard fighting inflation and one (the administration) is an armed guard seeking growth, I don't think is the correct approach.

"The administration is concerned with growth," Brady continued. "The job of regulating monetary policy is the Federal Reserve's. "Whether or not a credit tightening is cause to worry more about inflation than growth at this time, I would question that."

Brady's remarks were made before the Senate Banking Committee, where he was testifying on the need to modernize the regulation of U.S. financial services.

Appearing before a House Banking subcommittee yesterday, Federal Reserve Chairman Alan Greenspan indicated the Fed is still troubled by the pace of inflation and an easing of credit is not imminent, despite a period of sluggish economic growth.

"We have seen less applications for credit," Brady confirmed. "I don't

know if the level of interest rates has much to do with the credit crunch. A lot of this is in the real estate area. There is a credit contraction."

When the Fed cuts interest rates, this stimulates the economy by making capital more easily available for business to borrow or invest. However, lower rates can also result in inflationary pressures to the economy.

Brady suggested that inflation is most prevalent in the service sector of the economy and implied a change in monetary policy would not adversely affect the inflation rate.

"Inflation is stronger in the area of services, particularly health care," Brady said. "I don't know if increasing or decreasing monetary aggregates would change health care (costs)."

As for the savings and loan crisis, Brady said the main culprit was a lack of capital.

"The principle reason for the S&L problem was a lack of capital in a system that had federally guaranteed deposits," Brady said. "I can't think of anything that exhibits less common sense."

Sen. Jake Garn (R-Utah) said he has heard conflicting reports on the cost of the S&L bailout, with some estimates as high as $500 billion to $1 trillion, but Brady said he believes the cleanup will run somewhere in the vicinity of $90 billion to $130 billion.

In another area, Sen. Alfonse D'Amato (R-N.Y.) expressed concern that computerized program trading benefitted large institutional investors at the expense of individual investors and was a cause of market volatility.

"Program trading is a system of executing large transactions," Brady said. "I don't think there is anything wrong with big volume connected to investment but what we don't want is when it is connected to speculation."

Brady said the Treasury's comprehensive study on the relationship of financial services activities to deposit insurance due to be completed by February, 1991, should be ready by year's end.

Until the report is finalized, he declined to make any specific recommendations, but said, "We will not propose changes to the financial services regulatory structure that would increase the taxpayers' exposure."

#90206c0054 07/25/1990 ~Comtex

WASHINGTON (JULY 25) COMTEX - The 8-K report filed at the SEC shows on May 24, 1990, Southern Land and Exploration Inc. executed a disposition

exchange agreement with the shareholders of Petroleum Drilling Inc.

That disposition agreement canceled the exchange agreement between those parties dated of Dec. 19, 1989.

According to the 8-K filing, "The disposition of the Petroleum Drilling, Incorporated ("PDI") shares of stock was occasioned as a result of PDI's inability to conform to and or perform under the previous exchange agreement. It was determined to be in the [Southern]'s best interest to dispose of the PDI exchange agreement and seek a new acquisition."

On May 24, 1990, William J. Ruhe, Jr. and F. Worthy Walker were appointed to the board of directors of Southern, replacing the five resigning members.

Mr. Ruhe was also appointed as president of the company, and Mr. Walker was appointed as secretary.

The executive office of Southern Land & Exploration Inc. is located at 6116 N. Central Expressway, Suite 800, Dallas, Texas 75206, and its telephone number is (214) 691-1514.

WASHINGTON (JULY 25) COMTEX - The 8-K report filed at the SEC shows on July 16, 1990, Asbestec Industries Inc.(TICKER: ASBS) agreed to a merger that will effect Project Development Group's 87% ownership of Asbestec.

Under the agreement, AP Acquisition Corp., a wholly-owned subsidiary of Asbestec, is to merge with and into Project Development, with Project Development as the surviving entity of the merger.

At the date of the agreement, Project Development held 43% of Asbestec.

With the agreement, shareholders of Project Development are to receive 10.5 million shares of Asbestec common stock as well as $10 million of Asbestec's convertible preferred stock.

Project Development is a closely-held, Pennsylvania asbestos abatement contractor engaged in the removal of asbestos from commercial, industrial and government buildings.

The terms of the merger were approved by the board of Asbestec. A meeting for shareholder approval of the agreement is to be scheduled on or about Sept. 18, 1990.

-30- 1199
#90206c0057 07/25/1990 ~Comtex
WASHINGTON (JULY 25) COMTEX - The 8-K report filed at the SEC shows On July 9, 1990, Strategic Information Inc. purchased from Master Protection Corp., at a purchase price of $1.83 million, substantially all assets along with the assumption of certain liabilities of Master's Safety Distribution Division and its Coulson Technical Services Division.

The purchase occured pursuant to a purchase and sale of assets agreement between the two companies dated of July 9, 1990.

The purchase price is subject to possible adjustment, based upon, among other things, the audited value of the sold divisions, as determined through independent audit by the independent auditors of Strategic Information.

The price was arrived at via arms-length negotiations between the parties.

The two division were acquired by Master from Henry's Safety Supply Co. on July 9, 1990, and were sold to Strategic at cost.

On July 9, 1990, Strategic assigned the assets and assumed the liabilities of the sold divisions to its SafetyMaster Corp. subsidiary.

SafetyMaster then followed by assigning the assets and assuming the liabilities of the Coulson Technical Services Division to its Coulson Technologies Inc. subsidiary.

Funds for the acquisitions were obtained from available cash as well as from short-term borrowing.

Those borrowings, in the amount of approximately $1.74 million, were obtained from Finevest Services Inc.

Repayment of the borrowings, Strategic anticipates, are to be made through a future private placement of equity.

BONN (JULY 25) - The West German BND secret service on Wednesday denied a television report that it supplied restricted equipment to China as part of a plan to spy on the Soviet Union.

On Tuesday the West German Panorama television program alleged that the BND had supplied highly-secret electronic equipment to China in breach of West German legislation.

Panorama alleged that the operation, code-named Pamir, was partially financed by the defense ministry out of funds earmarked for the Tornado fighter aircraft without the Bundestag federal parliament being informed.

The BND denied carrying out any actions without the government being informed.

The program alleged that the ministry was particularly interested in advanced Soviet instruments to locate and recognize radar activity.

Information on the Soviet systems would enable the West Germans to counteract them.

The information was most easily available in China since most of the Soviet systems installed in Europe along the western frontier of the Warsaw Pact countries had been disconnected.

The report alleged that the Bonn public prosecutor investigating an arms scandal had come across documents revealing breaches of regulations.

A spokesman for the prosecutor declined to comment saying the matter was confidential.

TAIPEI (JULY 25) - Taiwan Economics Minister Vincent Siew on Wednesday asked local businessmen to slow down trade and investment in China after Saudi Arabia switched diplomatic recognition from Taipei to Beijing.

Beijing had shown "obvious unfriendliness" toward Taiwan in wooing away Saudi Arabia, a 44-year diplomatic ally of Taiwan, Mr. Siew told reporters.

Local businessmen should "review their trade and investment plans following the suspension of official ties between Riyadh and Taipei, adjust the pace of doing business with the mainland, and take measures to safeguard the national interest," he said.

Mr. Siew acknowledged that the expansion of economic ties across the Taiwan Strait was an "unavoidable" trend and that the authorities here could not restrict it with laws or rules.

Another official had said on Tuesday that the Justice Ministry would propose removing restrictions on direct trade and investment in China in a draft law governing relations across the Taiwan Strait.

Taipei suspended diplomatic relations with Riyadh on July 22 after the Arab state recognized Beijing as the government of all of China. The Nationalist government here, ousted from China by the communists in 1949, still claims sovereignty over the mainland.

The Taiwan Textile Federation has postponed a trip to China scheduled for early August following the diplomatic switch.

Most members of the 60-member delegation had agreed it was not a proper time to meet Chinese officials, Federation chairman Chao Liang-fung said.

Since Taiwan partially lifted a travel ban to China in November 1987, hundreds of local traders and investors have moved operations to the mainland where labor is cheaper and raw materials are more easily accessible.

Indirect trade across the Taiwan Strait through transshipment in Hong Kong boomed to 3.4 billion U.S. dollars last year, a 28 per cent rise over 1988 and Taiwan businessmen have injected an estimated one billion dollars into the mainland economy despite a Taiwan government ban.

ULAN BATOR (JULY 25) - Mongolia said Wednesday that from next year trade would be carried out in hard currency, and invited the West to do business with the underdeveloped but resource-rich nation.

"Cooperation with foreigners is vital for our development," Trade and Cooperation Minister Bavun (eds: one name) told a press conference in the capital Ulan Bator.

"Ideology and politics will from now on be put to the side. We are ready to trade with the whole world without exception, in all sectors -- mining, livestock, and industrialization," he said.

In the last three months, foreign businessmen have flocked to this vast country of two million people nestled between China and the Soviet Union where reforms culminated this week in once-Stalinist Mongolia's first free elections.

They are coming from all nations with ideas ranging from selling Boeing jets to opening noodle factories.

"The possibilities are almost endless," said a representative of the French telecommunications firm Alcatel.

Mr. Bavun said that starting from next year trade transactions will be carried out in hard currency, instead of rubles, indicating Ulan Bator's seriousness in reforming seven decades of socialist economics.

Until last year, 90 percent of Mongolia's foreign trade was with East Bloc nations, 77 percent of it with the Soviet Union.

The parliament, or Great Hural, passed new legislation March 23 to attract foreign investment. The new joint venture rules were particularly liberal, allowing wholly owned foreign firms and tax breaks.

Ulan Bator has also lobbied to join the Asian Development Bank and is preparing to formally ask to join the International Monetary Fund with Japanese patronage. Japan is Mongolia's largest industrialised business partner.

Foreign delegations have been streaming through the Ulan Bator Hotel, a Stalinist-era building permeated with the smell of boiled mutton.

#90206d4680 07/25/1990 ~French/German News Agency
PARIS (JULY 25) - After a rash of recent speculation about Yves Saint

Laurent's health, an almost perceptible sigh of relief went up when he walked down the runway at the end of the presentation of autumn-winter haute couture lines on Wednesday.

The news on the eve of his ready-to-wear show last March that the great designer had collapsed with nervous exhaustion and was recuperating in hospital cast a shadow over fashion week.

Since then, rumors that he is dying of AIDS or cancer have been strenously denied by his financial mentor and friend Pierre Berge.

Mr. Laurent appeared in reasonable shape Wednesday, fatter than his last appearance on the catwalk in January, when he had been on a strict diet, but certainly not on death's door, albeit looking tired.

His devoted admirers were so relieved they forgot to give him the usual standing ovation.

The collection was vintage Yves Saint Laurent. From the man who invented the shift, he showed deceptively simple day dresses, with little round necks and long sleeves, skimming the hips to finish demurely on the knee, unadorned except by an occasional wide belt. The cut was everything, whether for a square-shouldered jacket or a plain velvet tunic or T-shirt.

Apart from a sprinkling of luxury furs, his favorite coat was three-quarters length, with huge batwing sleeves, that models clasped around themselves, cocoon-like. There was also a bolero version. They came in anything from wool and camelhair to suede and exotic python skin and multi-colored feathers.

For cocktails, suits were dressed up with panels of guipure and worn with frothy Chantilly lace blouses, with plunging necklines cut away from the breasts.

One dress in black Chantilly was precariously held together on one side by narrow two pink satin bows, giving an otherwise uninterrupted view from the ankle to the armpit. The influence of sexy underwear was quite pervasive.

Black lace was also layered over stiffer materials in strong colors like magenta and aniseed yellow.

#90206d4790 07/25/1990 ~French/German News Agency

TOKYO (JULY 25) - Texan oilman and corporate raider T. Boone Pickens demanded Wednesday that Toyota Motor Corp. explain what he said were very alarming documents allegedly illustrating its close ties to Koito Manufacturing Co. Ltd.

Mr. Pickens, in a letter released by his legal representative in Tokyo, said the documents contradicted a Toyota statement to U.S. Senator Richard Lugar last month that it did not seek to control Koito activities and policies.

The Texan oilman's Boone Co. owns 26 percent of Koito, a leading Japanese manufacturer of automotive lighting equipment, and has been waging a battle for more than a year to appoint directors to the company's board. Toyota, previously the second-biggest shareholder, now ranks second with 19 per cent.

In his letter to Toyota chairman Eiji Toyoda, Mr. Pickens said the documents obtained from the U.S. Senate showed evidence of strategies by Toyota and its "agents" in Washington to oppose his battle to gain board representation.

"The documents are very alarming and I would appreciate your response to my questions," Mr. Pickens said.

The Texan oilman, who stormed out of an annual meeting of Koito shareholders in Tokyo last month, accused Toyota earlier this year of trying to block an advertising campaign by Boone Co. in Japanese newspapers. He has also accused the Japanese car giant of forcing Koito to supply it with cheap parts.

Koito has long argued that Mr. Pickens is only interested in greenmail, the practice of cornerning shares in a company in an attempt to frighten other parties into buying them back at a higher price.

#90206d4990 07/25/1990 ~French/German News Agency

TOKYO (JULY 25) - Japan's Nakabayashi Co. Ltd., the country's largest manufacturer of bookbinders and its second-biggest stationery concern, began selling recycled paper products Wednesday, a company official said.

The official said the launch of five new products, ranging from notebooks to paper used by photocopiers and computers, followed a similar move by its larger rival Kokuyo Co. Ltd.

Sales are targetted at only 100 million yen (675,000 dollars) in the first year, however, due to higher production costs.

Nakabayashi's sales of notebooks and other paper products came to almost 200 million dollars last year, more than 70 percent of total sales, while sales by Kokuyo were around 360 million dollars, about a third of overall turnover.

Environmentalists frequently attack Japanese paper manufacturers for their extensive global logging activities, while Japan itself is largely insensitive to demands to recycle forest products such as disposable chopsticks.

LAGOS (JULY 25) - Chris Maduabrochukwu Okolie, a magazine editor arrested for publishing a letter by a millionaire suspected of involvement in a coup attempt here, was released Tuesday after more than six weeks in detention,
local newspapers said Wednesday.

Mr. Okolie, editor-in-chief of Newbreed magazine, was arrested June 8 and his publication shut down after he published a letter allegedly written by Great Ovedje Ogboru.

Government sources said Mr. Ogboru, a Nigerian millionaire businessman, is suspected of having financed a bloody coup attempt against President Ibarahim Babangida on April 22.

In the letter addressed to the presidency and published in the last edition of the magazine, Mr. Ogboru, now at large, denied his involvement in the coup.

NEW DELHI (JULY 25) - Some 32,253 Sri Lankan Tamil refugees have reached the southern Indian state of Tamil Nadu since June, it was announced Wednesday.

The state's director general of police, P. Dorai, also said 2,010 refugees had arrived Tuesday in boats.

There were fears that more refugees may flee to India with the intensification of fighting between Sri Lankan soldiers and Tamil militants in the north and eastern regions of the island.

Dorai said a strict watch was being maintained in coastal areas to prevent infiltration by militants from Sri Lanka.

#90206d5220 07/25/1990 ~French/German News Agency

ViennaEast Berlin (JULY 25) - East German Prime Minister Lothar de

Maiziere showed the first sign of compromise Wednesday which could end a crisis threating to break up his grand coalition.

De Maiziere, speaking to reporters during a working visit to Vienna, said he saw a chance for meeting demands of the Social Democrats in his cabinet by making an adjustment to the rules for all-German elections planned for December 2.

So far, de Maiziere's Christian Democrats have insisted that the election goes ahead before East and West Germany unite, as this would give smaller parties - including their German Social Union allies - a chance of representation in the new all German parliament.

However in remarks to reporters in Vienna Wednesday, de Maiziere said he would now consider unification first and then elections, provided there could be a lowering of the five percent minimum vote parties must poll to get candidates into parliament.

The five percent hurdle, which has always applied in West Germany, would have meant no chance of election for the German Social Union or - at the other end of the political spectrum - for the Pds, the party of East Germany's former communist rulers.

A session due Thursday of the joint parliamentary committee of the two Germanys is now expected to consider de Maiziere's compromise proposal, amid indications the Social Democrats will agree to it.

WARSAW (JULY 25) About 60 Laotian students have have been staging a sit-in outside their country's embassy here for the past five days to press a call for democratic reforms in Laos.

From their tented camp in front of the embassy building, the protestors, students in Poland and Czechoslovakia, also called for the departure of Vietnamese troops from Laos, the right to freedom of association and union organisation and the abolition of censorship.

The students threatened to stage a hunger strike if their demand to see embassy officals was not met by Saturday, a Polish student here said.

"After years of communist oppression, the people of Laos wish to follow the example of countries in central and eastern Europe," a student press communique said, calling on all students from Laos in Europe to join their protest.

#90206d5250 07/25/1990 ~French/German News Agency
BEIJING (JULY 25) - Minister of state in the British Foreign Office, Francis Maude, met for an hour here Wednesday with Prime Minister Li Peng and said later the talks were ''encouraging'' with regard to Hong Kong.

Maude indicated that he also raised with Li the possibiity that Britain might resume credits to China if it can reach agreement with fellow Western governments on the move.

British business leaders have been pushing for a restoration of full trade ties with China after more than a year of E.C. sanctions following the June 1989 crushing of pro-democracy demonstrations in Beijing.

The European Community, which last year barred all high-level contacts with China's hardline leaership, authorised Maude's trip to Beijing to allow him to discuss details of the scheduled return of Hong Kong to Chinese sovereignty by Britain in 1997.

Among the aspects which Maude said he and Li spoke about was London's decision to grant British passports to an estimated 225,000 Hong Kong Chinese before the crown colony reverts to China.

BANGKOK (JULY 25) - A building collapsed near here late Wednesday, killing at least two people and trapping more than 30 others, police said.

The five-storey factory producing plastic shampoo bottles collapsed in Samut Prakan province 25 kilometers (15 miles) southeast of here, police said, adding that they suspected faulty construction as the cause.

-30- 543
#90206d5390 07/25/1990 ~French/German News Agency
JOHANNESBURG (JULY 25) - African National Congress leader Nelson Mandela Wednesday denied the ANC was plotting armed insurrection and stressed the organisation was committed to a peaceful settlement in South Africa.

Speaking at a press conference here, Mr. Mandela also denied reports that the ANC's main ally, the South African Communist Party (SACP), had masterminded such a plot without his knowledge or that of other senior ANC officials.

"There is no such plot. The members of the ANC National Executive Committee (NEC) as well the entire membership of the ANC is unanimous on the question of working with the government...towards peace," he said.

Up to 40 guerrillas have been arrested after infiltrating the country in recent weeks, while several arms caches have been discovered.

Newspapers claimed the infiltration was at the instance of the SACP, which was planning to seize power should talks with the government break down.

But in a statement released at the press conference, the ANC leadership, which includes SACP members, reaffirmed the "necessity to move forward as soon as possible towards a negotiated transformation of South Africa into a non-racial democracy".

The leadership accused the media of creating "hysteria" over the infiltration of guerrillas, which Mr. Mandela blamed on organisational problems stemming from the fact his organization won legal status only last February after a 30-year ban.

Because it lacked "well-functioning machinery", the ANC had not managed to reach every member affected by the Groote Schuur Minute, a commitment to peace issued by the government and ANC after they held ground-breaking talks in early May.

He said many ANC members "are still operating according to the old instructions. We have been trying to reach all of them...it is not an easy task."

The statement by the ANC leadership said "regardless of any problems that may have arisen", talks with the government scheduled for August 6 remained on track.

The ANC delegation would comprise five senior NEC members: Mr. Mandela, ANC deputy president; secretary general Alfred Nzo; SACP president Joe Slovo; commander of the ANC's armed wing Umkhonto we Sizwe, Joe Modise; and international affairs head Thabo Mbeki.

The delegation would present proposals concerning the removal of remaining obstacles to full-scale constitutional negotiations, as well as the suspension of the ANC's armed struggle at the Pretoria talks, the statement said.

Mr. Mandela listed the issues still to be resolved as: the return of exiles, release of political prisoners, an end to political trials, lifting the state of emergency in Natal Province, and repealing repressive laws.

Not until those obstacles had been removed would the ANC suspend its armed struggle, he said, but added: "You don't go into negotiations if you are not prepared to compromise."

The NEC statement warned, however, that the continued detention of people under security laws was seriously undermining efforts to create a climate conducive to negotiations.

"Such arrests should stop and those detained should be released immediately and unconditionally," the statement said.

It also expressed concern at an eruption of violence at Sebokeng black township, south of here, since Sunday in which up to 30 people have died.

"It is important that senior government representatives enter into discussions with democratic organisations in the area to find a comprehensive solution to the conflict," the statement said.

Violence between ANC-aligned groups and Inkatha has seen over 3,000 people killed since 1986, most of them in Natal Province.

The leadership's statement said that in an effort to stem the Natal killings, the ANC had decided to set up a committee "to pay special and continuous attention to this issue".

The committee would comprise four NEC members, it added.

#90206d5500 07/25/1990 ~French/German News Agency

JOHANNESBURG (JULY 25) - South Africa's beleaguered gold mines could benefit from tension between Iraq and Kuwait, with added bonuses for the collieries, Chamber of Mines economist Francois Viruly said here Wednesday.

Gold gained around four dollars an ounce at the start of the week after

reports that Iraq and Kuwait had moved troops close to their common border, amid charges by Baghdad that Kuwait had weakened the oil price by breaking their Organisation of Petroleum Exporting Countries (OPEC) quota, and stolen oil from disputed border wells.

"Gold is often held as a hedge on inflation," Mr. Viruly said. If the oil price edged up enough to create inflationary pressures and expectations then gold could end closer to the Chamber of Mines' original estimate of 395 dollars an ounce for the year than to its revised figure of 375 dollars an ounce.

But "we don't feel that at the moment it could escalate to that extent," he said. An OPEC meeting in Geneva Wednesday was expected to centre on the Gulf dispute.

The strength of sterling and rumours about British and Japanese interests rates were still having a more significant effect on the market, he said.

The coal industry would feel the effects of Gulf tension first, he said.

"There are a number of power stations which can switch from oil to coal, so if the oil price should start to rise there's a chance that electricity producers could start switching to coal."

#90206d5530 07/25/1990 ~French/German News Agency

FRANKFURT (JULY 25) - The West German Commerzbank group expects 1990 to be a year of record profits despite heavy costs in East Germany, bank president Walter Seipp said here on Wednesday.

The first six months showed an increase of 17.5 percent in consolidated operating profits relative to client business compared with the same period of last year, to a total of 611 million Deutsche marks (381 million dollars).

Overall performance including trading in currencies and financial instruments "rose by more than 10 percent", Mr. Seipp said without giving further figures.

Mr. Seipp said that consequently the bank was thinking about increasing its capital.

He noted that since Monday shares in the bank were quoted on stock markets in Madrid and in Barcelona, becoming the first foreign stock to be quoted in Spain.

-30- 1032
#90206d5600 07/25/1990 ~French/German News Agency
ABU DHABI (JULY 25) - The United Arab Emirates (UAE) denied Wednesday a U.S. State Department report that the two countries were conducting joint military maneuvers in the Gulf.

"There are no joint military maneuvers or exercises between UAE and American military forces and all reports and comments to date on the matter are an unjustified exaggeration," an official spokesman quoted by the WAM news agency said amid rising tensions between Iraq and Kuwait.

On Tuesday, the Pentagon said U.S. Navy ships were conducting "short notice" exercises with the UAE in the Gulf and State Department spokeswoman Margaret Tutwiler said U.S. forces were engaged in a "small-scale exercise" but gave no further details.

But the UAE spokesman -- who did not specify whether the maneuvers were held in conjunction with another country -- said the emirates conducted routine military exercises this time of year to improve its forces' capabilities.

He said Ms. Tutwiler's announcement referred to "a pre-arranged technical training program that is unrelated to the current situation in the region."

The U.S. Navy currently has six vessels in the Gulf -- four frigates, a destroyer and a command ship.

Reports of the exercises came in the wake of week-long Iraqi denunciations of Kuwait -- and to a lesser extent the UAE -- for what Baghdad says is the emirate's attempt to undermine the Iraqi economy by surpassing its OPEC-assigned oil production quota and keeping prices depressed.

#90206d5630 07/25/1990 ~French/German News Agency
BRUSSELS (JULY 25) - Foreign Minister Mark Eyskens called Wednesday for radical Palestinians in Lebanon to release a Belgian family held hostage since 1987, and said Belgium was willing to free a convicted Arab terrorist from prison in return.

''I appeal to reason and to the hearts of the hostage-takers,'' Eyskens said at a press conference in Brussels.

The minister reiterated the government's willingness to meet the demands of Abu Nidal's Fatah Revolutionary Council (Frc) and discharge Palestinian Said Nasser from prison as soon as the extremist group frees the captive Belgian family.

Emmanuel Houtekins, his wife Godelieve Kets and their two children have been in Frc hands since November 1987, when guerrillas captured their pleasure yacht during a cruise off the Israeli coast.

Two other people taken prisoner at the same time, Jacqueline Valente of France and Belgian Fernand Houtekins, were released by the Frc on April 11, but the group said Emmanuel Houtekins and his family would remain hostage until Nasser came free from prison.

The Palestinian is serving a life sentence for a 1980 grenade attack in Antwerp that claimed the life of a Jewish child. Under Belgian law, Nasser becomes eligible for parole on Friday.

Eyskins expressed regret that ''tensions'' within the Fatah Revolutionary Council were extending the plight of the hostages, and said Belgium would welcome the assistance of any country able to help in the situation.

#90206d5670 07/25/1990 ~French/German News Agency

NEW DELHI (JULY 25) - India plans to export defence equipment worth more than 79 million dollars in the current fiscal year, raising its sales in the international arms bazaar by more than 32 million dollars over last year.

Minister of State for Defence Raja Ramanna told a parliamentary watchdog committee Wednesday that the export target for the year which began in April was 79.41 million dollars worth of equipment including a wide range of military products.

The exports would include Dornier aircraft made under West German licence, spares for Soviet-designed MiG fighter planes and other weapons systems, the minister said.

Mr. Ramanna said the government had also given the green light to the defence ministry to export "battlefield management systems," adding that the equipment would be sold directly to governments and not to private arms dealers.

A wide range of products manufactured under licence, particularly items of Soviet origin, would be exported and an agreement for such a transaction had been reached with Moscow, officials attending the meeting quoted him as saying.

He said a deal had also been struck with British Aerospace and Aerospatiale of France, under which the two would buy spares including accessories for Jaguar and Mirage fighter aircraft valued at 53 million dollars.

India has already exported Dornier aircraft to Mauritius and sold artillery gun barrels worth eight million dollars to Yugoslavia as part of the year's first export package, he said.

Indian-made defence goods valued at 47 million dollars were exported during fiscal 1989-90 to several regional buyers, Mr. Ramanna said, adding that New Delhi tried to boost arms exports by participating in defence exhibitions in Turkey, Iraq and Singapore.

TOKYO (JULY 25) - Japan's lipstick imports increased 2-12 times in three years to 3.72 billion yen (25 million dollars) in 1989, customs officials said Wednesday.

The figure was 60 percent more than in 1988.

France took the lion's share of the market, providing 63 percent of lipstick imported last year, followed by the United States with 16.3 percent.

The French product was also the most expensive at an average of 33,100 yen (220 dollars) per kilogram against 7,900 yen (53 dollars) for British lipstick and 5,100 (34 dollars) for American, the customs officials said.

#90206d5710 07/25/1990 ~French/German News Agency

DUSSELDORF, West Germany (JULY 25) - West German retail giant Metro said Wednesday it was considering abandoning its option on a 20 percent stake in sports goods concern Adidas, 80 percent of which has recently been bought by Bernard Tapie of France.

Metro had agreed to take the 20 percent share of Adidas held by Suzanne and Adophe Dassler, the children of late Adidas chief Horst Dassler, but no date for the deal had been fixed.

French group Bernard Tapie Finance announced earlier this month that it had acquired 80 percent of Adidas from Horst Dassler's four sisters.

Metro said Wednesday it was holding talks with the Tapie group on lifting its option on the 20 percent stake.

Details of bank financing totalling 1.6 billion francs (296 million dollars) for the Tapie acquisition of the 80 percent stake in Adidas were meanwhile revealed in Paris on Wednesday, showing that two Japanese banks will provide 400 million francs (74 million dollars).

Under the arrangements the Tapie group will borrow one billion francs (185 million dollars) during two years and will issue shares or bonds to increase its capital by 600 million francs.

The SDBO bank, a subsidiary of Credit Lyonnais and the lead manager of the loan package, said that the financing arrangements for the purchase of 80 per- cent of the Adidas shares had been completed.

The SDBO and Credit Lyonnais would provide 550 million francs (101 million dollars), the Phenix banking subsidiary of the French AGF insurance company 250 million francs, the BNP bank 200 million francs, the Bank of Tokyo 250 million francs, the Long Term Credit Bank of Japan 150 million francs and the two German banks used by Adidas, Bayerische Vereinsbank and Hypobank, would each provide 100 million francs.

The Credit Agricole bank, which had been hesitant to participate, was expected to take part in a second stage of financing intended to re-finance the initial bank loans totalling 1.6 billion francs.

COLOMBO (JULY 25) - Up to 8,000 members of the Sri Lanka security forces are poised for a major assault on the northern Jaffna peninsula, the main Tamil guerrilla base, military officials said.

"We are resting our troops prior to the attack," one military officer said, adding the onslaught was expected to being within the next 48 hours.

Preparations for the massive assault on Jaffna, stronghold of Tamil militancy, were completed when security forces Tuesday wrested control of the strategic Killinochchi-Paranthan-Elephant Pass axis after days of heavy fighting.

The officials said the forces now controled the 100-kilometer (62-mile) stretch of road up to the pass from Vavuniya, a major army and air force base to the south.

"Almost all our air force planes and helicopters are massed in Vavuniya to take part in the attack on Jaffna," another official said. He said about 7,000 to 8,000 troops would take part in the offensive along different fronts.

Jaffna is the home of most leaders of the dominant Tamil guerrilla group, the Liberation Tigers of Tamil Eelam (LTTE), including its legendary leader, V. Prabhakaran.

Military analysts here said the battle for the control of Jaffna would be hard and bitter as the LTTE, unlike in the east where they withdrew in the face of advancing troops, would stand and fight.

"The fall of Jaffna to the troops would be a big blow to the Tigers' image of invincibility," one analyst said.

TOKYO (JULY 25) - Japan's Fujutsi Ltd. will market vaccines capable of combating 50 different kinds of computer viruses, industry sources said Wednesday.

The vaccines, being developed by Japan's largest computer maker, are primarily intended for use with Fujutsi personal computers, but they can also be used with other brand computers, the sources said.

Some 80 different kinds of computer viruses have been detected so far worldwide.

A computer virus is a type of program that can destroy software as well as hardware.

The "Friday the 13th Virus" is known as the most lethal computer virus. It was created by hackers seeking to eliminate data in computers.

Fujitsu's vaccines are expected to cost the price of a floppy disc, plus postage.

JOHANNESBURG (JULY 25) - Gold shares soared on the Johannesburg Stock Exchange Wednesday on the back of tension in the Gulf between Iraq and Kuwait, and after a drop in U.S. interest rates.

The All Gold index gained 3.5 per cent or 55 points, from 1547 to 1602, a 17 per cent rise on the 1370 registered on June 14, when the gold price hit a four-year low of 339.50 dollars an ounce.

Wednesday's closing fix in London was 372.75, breaking through the psychologically important barrier of 370 dollars an ounce, below which half of South Africa's 31 gold mines operate at a loss, according to the Chamber of Mines.

AMMAN (JULY 25) - A senior Jordanian official said Wednesday that the dispute between Iraq and Kuwait is aimed at convincing Arab Gulf creditors to write off 30 billion dollars in loans to Iraq incurred during its war with Iran.

The official said Jordan, which was seeking to keep the conflict from being internationalised, has contacted Baghdad and Gulf Arab states to ''contain the situation in a peaceful manner.''

He said that a senior Kuwaiti official told the Jordanian government that his country was prepared to write off Iraq's debt ''provided that Iraq agrees to ratify the border agreement between the two countries.''

Kuwait, he explained, ''wants to link the debt issue to a recognition by Iraq of the present borders.'' However, he went on, ''Iraq rejected the Kuwaiti proposal and insists that the Rumeileh area, which is rich in oil resources, belongs to Iraq''.

#90206d6170 07/25/1990 ~French/German News Agency
SIDON, LEBANON (JULY 25) - The Israeli army on Wednesday pounded the south Lebanese village of Jarjouh killing at least three people and injuring four as rival Shiite militias used a lull in fighting to reinforce their positions, security sources said.

The bombing by Israeli forces and their allied South Lebanon Army (SLA), at the rate of several shells a minute, lasted an hour Wednesday afternon and came from positions overlooking Jarjouh in Israel's self-declared "security zone," they said.

Earlier, the Israeli army deployed north of the security zone near positions held by Palestinian guerrillas trying to separate the rival Shiite Moslem militias, police said.

About 15 Merkeva tanks and 100 troops equipped with 155 and 175 millimeter guns deployed near Kfarhoune north of the security zone and five kilometers (three miles) from positions held by combatants from the mainstream Fatah movement of the Palestine Liberation Organization.

The Israeli move came a day after Soviet-made Katyusha rockets fired from the Iqlim al-Touffah region hit the town of Marjayoun, which serves as Israeli headquarters in the security zone.

Some 500 PLO fighters are stationed further west in Iqlim al-Touffah in a bid to end artillery duels between the pro-Syrian Amal movement and Iranian-backed Hezbollah for control of Lebanon's Shiite community.

Another Israeli unit of 15 tanks and 100 troops was dispatched Wednesday morning to another sector of the security zone across from Hezbollah bases in the Bekaa Valley, police said.

The Shiite factions on Wednesday bolstered their positions in southern Lebanon, taking advantage of a lull in a 10-day-old battle that has killed 89 people and left 280 wounded, security sources said.

Dozens of additional Amal and Hezbollah fighters, carrying arms and ammunition, moved into the Iqlim al-Touffah region east of here.

Fundamentalist Hezbollah forces seized the village from Amal militiamen last week and have been resisting offensives by the pro-Syrian forces to re-take the community, 20 kilometers (12 miles) east of here.

The inter-Shiite clashes, part of a two-year-old struggle for control over Lebanon's Shiite Moslem community, have continued despite the deployment of Fatah fighters as a buffer force.

A Fatah source said contacts with Hezbollah "through mutual friends" aimed at replacing pro-Iranian forces in Jarjouh with PLO units had been unsuccessful.

In a related development, the government of Syrian-backed President Elias Hrawi announced its decision Wednesday to deploy the Lebanese army in areas where the inter-Shiite fighting has been raging.

But the statement gave no details on the date or practical application of its proposed deployement. Mr. Hrawi's authority is not recognized by Christian military leader Michel Aoun whose own forces control much of

east Beirut and the surrounding suburbs.

LONDON (JULY 25) - Six oil workers were missing in the North Sea on Wednesday after a helicopter ferrying them to an Shell oil platform 180 kilometres east of the Shetland Islands went down just 100 metres short of the facility.

Rescue teams that set out from the platform immediately after the crash were able to pull seven people out of the sea near the crash site, but heavy fog foiled attempts to locate the missing six.

The copter, a Sikorski operated by British International Helicopters, floated on its side for a time after the crash and then sank in the 150-metre-deep waters of the North Sea. The cause of the accident was not known.

BAYREUTH, WEST GERMANY (JULY 25) - Czechoslovak President Vaclav Havel and his West German counterpart Richard von Weizsaecker were among the prominent guests attending the opening of the annual Bayreuth opera festival here Wednesday.

Havel was given an unusual red-carpet welcome at the opera house by Weizsaecker and Bavarian state Premier Max Streibl.

Thousands of onlookers lined the road leading to the hall to catch a glimpse of the Czechoslovak playwright, who was repeatedly jailed at home before last year's velvet revolution that toppled the communist Prague rulers.

Onlookers clapped and chanted ''Bravo, bravo'' as Havel stepped out of his limousine.

Other prominent figures among the 2,000 guests at the premier of Richard Wagner's Flying Dutchman were West German Foreign Minister Hans-Dietrich Genscher.

Dieter Dorn, director of the Munich Kammerspiele theatre, made his debut here with his new production of Wagner's romantic opera. Musical director is Giuseppe Sinopoli.

NAIROBI (JULY 25) - A forest fire is threatening Rwanda's mountain gorillas, officials in Kigali contacted by telephone from here said Wednesday.

The mountain gorillas are unique to a volcanic mountain range running along northern Rwanda's border with Uganda and Zaire. They were made famous by Diane Fosse, a U.S. scientist who lived there and studied them until she was murdered in 1985.

The fire broke out in Uganda and spread into Rwanda, the officials said. Soldiers are helping forest rangers and local people fight the blaze.

The gorilla population, estimated at 400, is in no immediate danger, the officials said, as the gorillas were moving away from the fire, which was still more than 30 kilometres (18 miles) from their sanctuary in a Rwandan game park.

#90206d6250 07/25/1990 ~French/German News Agency
ALAMEDA, CA (JULY 25) - U.S. Coast Guard inspectors who raided the South Korean tanker Bum Dong expecting to find drugs instead uncovered eight stuffed sea turtles of an endangered species and five tons of coral from protected Philippine waters.

"We've never seen this amount of coral before," said Rick Ellison, chief of U.S. Customs inspectors on the San Francisco waterfront. "This is unique."

Some 1,100 blooms of coral and eight stuffed green sea turtles -- one more than three feet (one meter) long -- were seized from the ship last week. But no charges were filed and the vessel was allowed to set sail for Korea.

Scott Pearson of the U.S. Fish and Wildlife Service said the eight turtles were valued at between 3,000 dollars and 5,000 dollars and the coral was believed to be worth 30,000 dollars.

The Coast Guard raid was launched after U.S. Customs received a tip that the tanker, hauling coconut oil, was carrying drugs.

#90206d6310 07/25/1990 ~French/German News Agency
WASHINGTON (JULY 25) - The United States and the Soviet Union are closer to an agreement on ending the 12-year war in Afghanistan, but a dispute over the interim role of Afghani leader Najibullah is still blocking an accord, U.S. officials said Wednesday.

Abc television reported late Tuesday that the two sides had agreed that Najibullah would retain the presidency up to the time of elections, although some of his powers would be handed over to a committee made up of representatives of the rebel mujahedin.

Spokesmen at the State Department and the White House said the issue would be discussed in detail next week when Secretary of State James Baker meets his Soviet counterpart Eduard Shevardnadze in Irkutsk.

They said the superpowers had discussed Afghanistan at almost every meeting, and had narrowed their differences considerably. But a full agreement was still elusive.

A final settlement is expected to include an immediate cease-fire, an end to U.S. and Soviet shipments of arms and supplies, and free elections supervised by the United Nations.

#90206d6410 07/25/1990 ~French/German News Agency

MOSCOW (JULY 25) - Indian Prime Minister Vishwanath Pratap Singh flew to Soviet Uzbekistan on Wednesday after agreeing with President Mikhail Gorbachev to sign a ''large-scale'' new economic treaty when the Soviet leader next vists New Delhi.

Tass news agency said Singh held discussions with Uzbek President Islam Karimov after his arrival in Tashkent, the first leg of a tour which was also due to take him to Kukhara and Samarkand.

During discussions with Gorbachev and other officials in Moscow earlier this week, both sides backed a strengthening of scientific and technical cooperation and for an expansion of joint ventures.

Gorbachev reportedly also ''expressed complete understanding and support'' for New Delhi in its policies in troubled Kashmir, where the Indian government is trying to crush a separatist Moslem revolt.

Both favoured extending the 19-year-old Indo-Soviet treaty on peace, friendship and cooperation. Its 20th anniversary next year would be marked with appropriate political, cultural and economic initiatives, Tass said.

The agency said in a separate report that Soviet Foreign Minister Eduard Shevardnadze and his Indian counterpart Inder Kumar Gujral conferred Wednesday in Moscow on international issues and found their positions ''identical or approximately so'' on most questions.

Concrete topics included security in the Pacific-Asian region, the Afghanistan conflict and the crisis in Cambodia, where the ministers urged

free and fair elections as part of a comprehensive settlement, Tass said.

LONDON (JULY 25) - Women competitors will be allowed to wear two-piece costumes for the first time at a British swimming meet when the British National Championships start in London on Thursday.

FINA, swimming's world governing body, changed their rules regarding swimwear for competitions last year and the British Amateur Swimming Association has approved a new two-piece Lycra costume which was modelled on Wednesday at the Crystal Palace swimming pool.

FINA's revised rules now state only that the costumes should be of "good moral taste" in the eyes of the meet officials.

Liz Hartley, the referee for this week's championships, said after inspecting the costume: "We will be quite happy for it to be worn tomorrow if any girl wants to.

"We want to make sure that, when the girls wear the costume it will stay in one place. There have been problems in the past with bikinis coming off when people have been swimming in the sea."

Great Britain international Lucy Findlay was one of three girls to try out the new suit at Crystal Palace pool and she also gave her approval.

Findlay said: "I was a bit worried what might happen when I dived in. But there was no problem and you don't get the same sort of drag feeling around the stomach that you do with the one-piece.

"I think a lot of the girls will wear them because it makes a change."

BRINDISI, Italy (JULY 25) - Twenty-four Albanian refugees, part of the thousands evacuated from embassies in Tirana two weeks ago, have begun a hunger strike near here to dramatize their demand to emigrate to West Germany.

The group, surrounded by their wives and children, started fasting Tuesday night in the main square of the Restinco refugee camp, outside this southern city.

Strikers said they refused to live in the barracks of the former military base any longer and wanted to be allowed to leave for a new life in West

Germany.

Many of the Albanians brought to Europe have already left their initial ports of arrival to resettle in various countries, including West Germany.

About 800 housed at Retinco arrived in Brindisi on July 13.

They were among more than 5,000 Albanians who holed up in Western and East European embassies until authorities in Tirana allowed them to leave Albania.

Amnesty International representatives have questioned the refugees here to obtain information on political persecution in Albania.

#90206d6460 07/25/1990 ~French/German News Agency

GENEVA (JULY 25) - OPEC ministers meeting here have reached a consensus on boosting crude oil prices to at least 20 dollars a barrel, Iranian Minister of Petroleum Gholamreza Aghazadeh said Wednesday.

"Everybody agrees on a miminum of 20, maybe increasing to more than 20," he told reporters after a 45-minute meeting of OPEC's market monitoring committee.

The committee meeting is to be followed on Thursday by a conference of ministers from all 13 members of the Organization of Petroleum Exporting Countries.

The Geneva talks are taking place amid a bitter dispute between Iraq and fellow OPEC members Kuwait and the United Arab Emirates (UAE) over oil production prices and levels.

Both Iraq and Kuwait have mobilized troops along their disputed border and the United States and UAE began "short-notice" naval maneuvers in the Gulf on Monday.

However Egyptian President Hosni Mubarak said in Cairo Wednesday that Iraq and Kuwait would meet in Saudi Arabia next weekend and that their verbal hostilities would end from THursday.

The OPEC "basket" of seven crudes is currently selling for more than 17 dollars a barrel, well down on its 1990 high of 20.56 dollars in January.

OPEC members had been seeking to boost prices to at least 18 dollars a barrel, but Mr. Aghazedeh said that at least 20 dollars a barrel was now the target.

"I think 20 is acceptable to all of the countries. Some countries want more than that," he said.

UAE Oil Minister Mana Saeed Al-Otaiba also said there was a consensus on 20 dollars a barrel but that he would not go above that level.

Iraq, burdened with a heavy debt from its eight-year war with Iran, has been seeking a price of 25 dollars a barrel, but has only publicly received Libyan support for the proposal.

To achieve a 20 dollar a barrel price, OPEC members would have to strictly adhere to production quotas.

OPEC officials said that setting quotas and a time-frame for their application would be the subject of the ministerial conference, opening Thurday.

Iraq's deployment of 30,000 troops along the border with Kuwait is seen by analysts here as an attempt to pressure Kuwait into respecting its output quota of 1.5 million barrels a day (mbd).

Iraq has criticized both Kuwait and the UAE for pumping oil well above their allocated quotas, contributing to a glut and driving down prices.

According to a senior OPEC official, three production proposals are under consideration.

The ministers are to consider maintaining an output ceiling of 22.5 mbd until October 1, or to the end of the year, or until the end of the first quarter of next year, he said.

Mr. Aghazadeh, the Iranian minister, said he wanted a production ceiling of 22.491 mbd for the rest of the year.

Indonesian Minister of Mines and Energy Ginandjar Kartasasmita said Wednesday that OPEC production was currently more than 23 mbd.

OPEC secretary-general Subroto briefed reporters after the committee meeting but did not release production reports for the past few months.

He said that two countries, which he declined to name but which are believed to be Kuwait and the UAE, had not filed output figures.

Kuwaiti Oil Minister Rasheed Salem Al-Ameeri said Wednesday before the committee meeting that he would not be "insisting" on a quota increase.

"But I'm looking into the possibility of that," he said. "This has to be taken into consideration."

Mr. Al-Ameeri did not address the dispute between his country and Iraq, which has also accused Kuwait of stealing oil and encroaching on Iraqi territory.

The Egyptian president Mr. Mubarak has been attempting to mediate in the dispute between Iraq and Kuwait, as has Arab League secretary-general Chedli Klibi.

#90206d6520 07/25/1990 ~French/German News Agency

JOHANNESBURG (JULY 25) - The African National Congress Wednesday announced a boycott of white firms in east Transvaal from Friday in protest against "right-wing vigilantes" believed to have killed two people and wounded 20 in black townships in past weeks.

East Transvaal ANC secretary Joe Nkuna told a news conference the boycott would last until September 12 in eight towns viewed as bastions of the extreme-right, and until August 29 elsewhere.

More action could follow if a spate of right-wing terrorist activities continued.

Two ANC supporters have died and more than 20 have been injured in the attacks, Mr. Nkuna said.

"We want to pressurize the white businessmen so that they pressurize the government," said Jackson Mthembu, spokesman for the east Transvaal United Democratic Front, an organisation linked to the ANC.

The ANC wants the government "to dismantle, disarm" the extreme right and force authorities in the targeted towns to allow ANC demonstrations.

It is also calling for multiracial local councils to be set up, and a consituent assembly to draw up a new constitution.

Speakers at the press conference made it clear they thought the right-wing militants from the Zulu Inkatha party of Chief Mangosuthu Gatsha Buthelezi an ANC rival group, and also comprised white ultra-conservatives.

Mr. Nkuna said he believed these groups were responsible for incidents which left an unspecified number of casualties between Sunday and Tuesday in Wesselton, a township in Ermelo, 140 kilometres (about 90 miles) east of Johannesburg.

He said Inkatha members arrived for the attacks from Natal Sunday.

#90206d6540 07/25/1990 ~French/German News Agency
LONDON (JULY 25) - British Defense Secretary Tom King, acknowledging the reduced military threat from eastern Europe, announced sweeping defense cuts Wednesday including the withdrawal of an army division from West Germany.

The move, coupled with the abolishing of another division based in Britain, amounted to a reduction by more than half in the size of the British Army of the Rhine (BAOR) and was part of an overall reduction in military personnel of around one-fifth.

The cutbacks come at "a time of opportunity and hope for change, yet without putting at risk the safe protection of our country nor neglecting fair consideration of those whose task that is," Mr. King said in the House of Commons.

"Our aim is an orderly and planned transition to the new world now unfolding," he added.

Mr. King said the number of Royal Air Force bases on West German soil would be cut from four to two while fighter squadrons in West Germany would be reduced from 15 to nine with the abolishing of four Tornado fighter-bomber squadrons and two Phantom squadrons.

Other reductions included a cutback in army personnel from 160,000 to 120,000 men, in navy and marine personnel from 63,000 to 60,000 and in air force personnel from 89,000 to 75,000.

"We believe that the new force structures we envisage can give us strong and reliable defences in changing circumstances and at an affordable cost " Mr. King said, adding that the expected budgetary savings from the cuts would be announced by Chancellor of the Exchequer John Major in his autumn address to the Commons.

The changes, contained in a five-month defense strategy review entitled "Options for Change," would be implemented over a five- to seven-year period and would be contingent on a Conventional Forces in Europe agreement in Vienna and the swift withdrawal of Soviet troops from eastern Europe, Mr. King said.

He said Britain planned to retain "robust" defenses despite the cuts and added that plans for four new nuclear-equipped submarines would go ahead as scheduled.

But while Britain's three aircraft carriers would be kept with updated Harrier fighters, the navy's destroyer-frigate fleet was to be reduced

from 48 to 40 ships, Mr. King said.

"The aim is smaller forces, better equipped, properly trained and housed and well motivated," Mr. King said, adding that "they will need to be flexible and mobile and able to contribute both in NATO and, if necessary, elsewhere."

Britain would continue to provide forces in the Falkland Islands, Cyprus, Gibraltar and Belize for as long as necessary and in Hong Kong until the colony is handed over to China in 1997, he added.

A spokesman for the opposition Labour Party greeted the announced cuts as "a first useful step" but said the process of force reduction would be "far longer and more extensive" than that outlined by Mr. King.

Mr. King admitted that "tough decisions" lay ahead but rejected charges of "extreme cowardice" in not making further cuts and said the leadership of Prime Minister Margaret Thatcher and former defense secretary Michael Heseltine was "an absolute turning point that opened up the possibility now for the wonderful changes we have seen happen" in eastern Europe.

He also dismissed "worrying rumours" that the cutbacks could cost one in two servicemen their jobs and said the reductions would produce "significant savings" in years to come.

He also rejected accusations that the planned cutbacks, which come hard on the heels of an announcement last month that Britain was scrapping orders for delivery of 33 new Tornado fighters, would make no significant savings.

The reductions were in line with the goals set at the NATO summit here earlier this month, he said.

DANANE, Ivory Coast (JULY 25) - A Red Cross truck carrying medical supplies and water pumps Wednesday crossed from Ivory Coast into Liberia, where fighting has intensified for the capital Monrovia.

It was the first time a Red Cross shipment had been allowed to cross the border since rebels opened a seven-month-old fight to unseat President Samuel Doe.

The supplies were being sent to Fendell University 14 miles (23 kilometers) north of Monrovia where at least 20,000 displaced Liberians have sought refuge.

Many of the refugees had started to leave last week because a lack of water

and medication. An AFP correspondent touring behind rebel lines said there was a risk of malaria and dysentery at the overcrowded campus.

On Sunday, a team of three doctors from Medecins Sans Frontieres (MSF-Doctors without Borders) entered Liberia with medical supplies for a hospital at Gbarnga 120 miles (200 kilometers) north of Monrovia.

They were also to set up the MSF's first mobile medical unit in rebel-held areas. MSF also has a team inside the besieged capital.

A team from the Paris-based Aide Medicale Internationale has also set up a clinic near the Liberia-Ivory Coast border.

Since National Patriotic Front of Liberia (NPFL) rebels led by Charles Taylor attacked a Liberian border post 30 kilometers (18 miles) west of here December 24, more than 60,000 people have fled to the Ivory Coast, while an estimated 200,000 others have taken up refuge in Guinea and Sierra Leone.

More than 5,000 people, most of them civilians from rival tribes, have died in the rebellion.

#90206d6690 07/25/1990 ~French/German News Agency

NEW YORK (JULY 25) - New York can be stressful for the young urban professional (Yuppie) struggling up the corporate ladder. For his dog, too, waiting all those long lonely hours inside a towering glass and steel cage can gnaw at the sanity.

For them, veterinarian Jo Sporn has come to the rescue, opening what he bills as the city's first day-care center for dogs.

It's located in a chic upper east side neighborhood near Central Park.

It's called Yuppy Puppy.

There, dogs can lounge away the hours in amiable company, under medical supervision and with an attentive staff catering to their every whim.

The price is 20 dollars a day -- 30 if the dog stays the night -- and there is no shortage of guests.

Mr. Sporn says he grosses 175,000 a year from a clientele that includes actors and Wall Street wizards.

On a given day, some 20 dogs - mostly the poodles and terriers preferred by well-heeled apartment dwellers - frollick at the center.

The sociability is not by chance. Mr. Sporn puts perspective guests through a careful screening and training process to make sure their canine personalities don't clash.

So far, only five pets have been rejected.

The air-conditioned center offers music, television, folding cots for naps and optional grooming services ranging from 40 to 70 dollars.

Yuppie Puppy also provides an atmosphere "where the dogs can exercise their sexuality in harmony," so long as they have been sterilized, says Mr. Sporn, indicating a pair of playful poodles in the garden.

Owners, who often come for their pets after picking up the kids at school, are not allowed beyond the waiting room.

Each dog's leash hangs on a gilt nail. Under his picture.

LONDON (JULY 25) - The democratic changes in Europe over the past year and the resulting warming of East-West relations should translate into more help for developing countries, the new Commonwealth secretary-general said here Wednesday.

"The ending of the Cold War and the military wind-down expected to flow from it will release resources from which from which nations and international organizations concerned with development could hope to draw in their developmental efforts," Chief Emeka Anyaoku of Nigeria said.

Speaking to reporters, Mr. Anyaoku warned against "the increasing political and economic marginalization of Third World countries" and said the Commonwealth under his leadership "can never accept, and will strongly resist any tendency to marginalize" developing nations.

Mr. Anyaoku, elected as secretary-general at the Commonwealth heads of government summit in Kuala Lumpur last October, said progress toward democracy had been made in South Africa and added that it was his "fervent hope" that South Africa would soon rejoin the Commonwealth.

He also expressed hope that the Commonwealth could give a "healing touch" to ethnic, racial and nationalist conflicts in various parts of the world over the coming decade but admitted that the Commonwealth could do little to mediate unless asked to do so by heads of government involved.

#90206d7010 07/25/1990 ~French/German News Agency
GENEVA (JULY 25) - Libyan Oil Minister Fawzi Shakshuki said Wednesday that his country should receive any increase in oil production quotas decided at OPEC talks here.

Mr. Shakshuki also criticized fellow OPEC member the United Arab Emirates (UAE) for not abiding by its oil output quota set in November 1989.

"They (the UAE) don't accept their quota. They should. They signed the agreement," he said.

Mr. Shakshuki said that Libya should be the beneficiary of any decision to raise quotas at the OPEC ministerial conference opening here Thursday.

"If there is an increase, Libya will ask for it," he said.

At the same time, the Libyan minister said he opposed raising OPEC's oil output ceiling above 22 million barrels a day (mbd).

Five Gulf countries -- Iraq, Kuwait, Qatar, Saudi Arabia and the UAE -- agreed at a July 10-11 meeting in Jeddah, Saudi Arabia, to a ceiling of 22.5 mbd during the next few months to push OPEC crude prices to at least 18 dollars a barrel.

The Jeddah agreement, which had been expected to provide a framework for the OPEC talks here, also called for raising the UAE's quota to 1.5 mbd.

Libya, which along with Iraq is seeking to raise oil prices to 25 dollars a barrel, has been seeking an output quota equivalent to that of Kuwait -- 1.5 mbd.

Libya's current quota is 1.233 mbd.

The UAE's quota is 1.095 mbd, but its output this year has been closer to 2.0 mbd.

Iraq has criticized the quota-busting by Kuwait and the UAE, and has massed troops along the Iraqi-Kuwaiti border.

GENEVA (JULY 25) - The Soviet Union has rejoined the De Beers organization which sells almost all the world's diamonds, signing a five-year contract with the Anglo-South African company after a 17-year break, the Swiss subsidiary of De Beers said Wednesday.

The contract, signed Wednesday by Valery Rudakov, head of the Soviet precious metals administration and Nicholas Oppenheimer, vice-president of De Beers Centenary AG, gives the Soviet Union an immediate one-billion dollar advance on its future deliveries of stones.

The total value of the deal is estimated at five billion dollars over the five years.

The Soviet Union is the world's second biggest producer of gem-quality diamonds after Botswana. Its production is between 10 and 14 million carats per year.

In spite of the country's long absence from the Central Selling Organization, the De Beers diamond selling unit, the company noted that Moscow had consistently avoided policies which would have undermined the market.

The De Beers statement said that the Soviet Union had accumulated a stock of stones which it wished to sell without disturbing the market. Renewed membership of the CSO, which acts as a world regulator, would make this possible.

VIENNA (JULY 25) - Austria and Czechoslovakia are to begin talks next week on ways to reduce safety risks in Czechoslovakian nuclear power plants, some of which are close to the Austrian border, Chancellor Franz Vranitzky said here Wednesday.

The talks are to be at expert level, but Mr. Vranitzky said he would also raise the issue with Czechoslovakian President Vaclav Havel when he meets him Thursday in Salzburg, where both men will be attending the opening of the Salzburg festival.

Mr. Vranitzky on Wednesday presented to the cabinet a report on Czechoslovakia's nuclear plants, which experts say present serious safety risks.

The security measures at the Bohunice plant, about 100 kilometers (60 miles) northeast of Vienna, for example, are at the same level of those at an East German plant at Greifswald which has been closed down because they were inadequate.

The Austrian government protested to Czechoslovakia in May over the construction of a 4,000 megawatt nuclear plant at Temelin in southern Bohemia, close to the Austrian border.

Vienna has asked the Czechoslovakian authorities to allow Austrian and international experts, including those from the International Atomic Energy Agency (IAEA), to inspect the Bohunice plant.

The economy ministry said Monday that Austria was willing to provide free electricity to Czechoslovakia to compensate for the loss of supply while Bohunice is shut down for the reactors to be checked.

Such a move would cost Vienna some 63 million schillings (5.7 million dollars) a week, according to Austrian experts.

AUCKLAND, New Zealand (JULY 26) - Increasing killing of seals by fishing fleets off New Zealand threatens the credibility of Prime Minister Geoffrey Palmer on environmental issues, the Greenpeace ecology group charged Thursday.

A spokesman for the environmental group, Mike Hagler, noted that the premier had been an outspoken critic of the killing of marine mammals by Japanese and Taiwan drift-net fishing fleets around the world.

"But his failure to act when seals are dying in his own waters makes his concern appear more like hollow rhetoric and political grandstanding," Mr. Hagler said.

"He'd better stop talking and do something, as his credibility is on the line."

Fisheries Minister Ken Shirley announced Wednesday that up to 650 fur seals -- once endangered but now plentiful -- may have died in the nets of vessels fishing for a popular local fish known as hoki (Latin name macruronus novaezealandiae) off the country's South Island.

The fleet of 50 to 60 boats, mainly Japanese and Soviet, also gut and head their catch at sea and dump about 10,000 tonnes of offal at the fishing ground each year.

Research in Alaska has indicated that the dumping of so much offal on spawning grounds prevented spawning the following season, Mr. Hagler said.

The activist said Greenpeace did not want the hoki catch stopped, but he said there was urgent need for research into why so many seals are being killed. He believes a total of 2,000 seals will die this season.

Greenpeace wants to place observers on the ships but, Mr. Hagler said, New Zealand's Ministry of Agriculture and Fisheries will not cooperate.

Conservation Minister Phillip Woolaston said companies were already changing their fishing techniques and this had had a marked effect in reducing seal catches.

"Our concern is that the government is letting the issue of seal deaths lie because it is an important fishery with lots of jobs and exports," Mr. Hagler said.

"But that is not an excuse for the degradation of the marine environment."

TOKYO (JULY 26) - Mitsubishi Motor Corp. (MMC) said Thursday it was considering building new car assembly plants in Japan to boost domestic production capacity.

But Mitsubishi officials said MMC, Japan's third biggest carmaker, was undecided on details of the plan.

Their remarks followed a report in the Nihon Keizai Shimbun that Mitsubishi Motor had decided to invest 200 billion yen (1.3 billion dollars) to build two new plants in Japan for car assembly and engine production.

The daily said the move was the latest in a series of massive investment plans by major Japanese carmakers to increase domestic production capacity.

Under the plan, MMC's new plants are expected to start operation in 1995, with production capacity at 200,000 to 300,000 units of engines and passenger cars, the daily said.

Mazda Motor Corp. and Nissan Motor Co. said last year they would boost production capacity at their plants while Honda Motor Co. and Toyota Motor

Corp. have recently announced their production-boosting plans, it noted.

LIMA (JULY 25) EFE - Two people were injured in three bomb attacks by suspected leftist guerrillas on offices of the independent Change 90 movement just days before the party's leader president-elect Alberto Fujimori takes office.

Police said the two were injured in three separate attacks on party premises in the capital late Tuesday.

No group has so far claimed responsibility.

The attacks came four days before president-elect Alberto Fujimori was scheduled to take office and replace incumbent President Alan Garcia.

More than 20,000 people have been killed in political violence since the Maoist +Shining Path+ guerrilla group took up arms in 1980.

Another smaller group, the Tupac Amaru Revolutionary Movement, began fighting in 1984.

Meanwhile, authorities reported that the leader of Peru's Jewish community Jacobo Hasson, suffered hand injuries when he was hit by machine-gun fire in a failed kidnapping attempt in Lima Tuesday.

Three street vendors were also wounded in the attack.

Authorities said they suspected the kidnapping attempt had been carried out by members of the Palestinian extremist group, Abu Nidal, adding that Hasson had previously had problems with the group although no further details were given.

MANILA (JULY 25) EFE - Rescue workers searched Wednesday for a U.S. Navy aircraft and two crew members who disappeared during routine training exercises over the South China Sea.

The missing aircraft took off late Tuesday from an aircraft carrier of the U.S. Navy's Seventh Fleet, based in Subic bay, northwest of Manila.

The rescue workers believe the plane crashed in the sea, some 800 km southeast of Manila.

BENALMADENA, SPAIN (JULY 25) EFE - A group of young Spaniards hope to get their names in the Guinness Book of World Records by mixing a giant 1,700-liter rum cocktail in a swimming pool, organizers of the event said Wednesday.

Members of the Puerto Marina club in the southern coastal resort of Benalmadena, 480 km south of Madrid, plan Saturday to stir together 400 liters of rum and 1,300 liters of lemon juice in a swimming pool to make the world's largest cocktail.

The drink, which the club hopes will make it into the famous book of records, will then be tested by the organizers and spectators.

BERNE (JULY 25) EFE - Three Cubans who sought asylum in the Swiss embassy in Havana have abandonded the mission of their own accord, a Swiss Foreign Ministry spokesman said Wednesday.

The spokesman said that Cuban authorities had promised the Swiss government that the refugees, who entered the embassy late Sunday, would not suffer reprisals for their action.

Eighteen Cubans remain holed up in the Spanish embassy in Havana, while four others are hiding in the Italian embassy compound.

The Cuban government has said that it will not allow the asylum-seekers to leave the Communist island.

MADRID (JULY 25) EFE - A concert by American pop idol Madonna is back on track after her promotion company has agreed to pay dlrs 250,000 in debt to Spain's Atletico de Madrid football club, officials announced Wednesday.

Jesus Gil, president of Atletico de Madrid, said Tuesday that he would not let the singer use the Vincente Calderon stadium because her promotion company owed his club the money.

But on Wednesday, the promotion company for Madonna's +Blond Ambition+ tour gave the football club cheques that should clear the debt in the next few days.

When he threatened to ban Madonna from the stadium, Gil said he was no great fan of the seductive singer because he was a Roman Catholic.

Madonna has been criticized for making sacrilegeous use of Roman Catholic imagery in her songs and videos.

Madrid (JULY 25) EFE - Spain's trade deficit for the first six months of the year grew by 6.8 per cent on the same period last year, the Customs Department reported Wednesday.

The overall deficit for January-June 1990 was 1,769 billion pesetas (dlrs 17.69 billion).

Total imports during the first six months were worth 4,553 billion pesetas (dlrs 45.53 billion), an increase of 7.1 per cent on the same period last year.

Total exports were worth 2,784 billion pesetas (dlrs 27.84 billion), 7.2 per cent up on the first six months of 1989.

Fastest-moving Spanish exports were livestock, drinks, tobacco, spectacles and optical goods, photographic equipment, music and watches.

Imports of plastics, wood, paper and footwear registered the highest rates of growth.

#90206e0030 07/25/1990 ~Latin America New Agency

LUSAKA (JULY 25) EFE - Zambian President Kenneth Kaunda announced Wednesday that the country's referendum on instituting a multi-party political system set for October 17 would be put off until August 13 next year.

Speaking at a press conference in the capital, Kaunda said the postponment of the referendum date was to allow the registration of voters who have become elegible since 1972, when a one-party state was declared.

The postponment is being seen by observers as a major concession to the opposition as it will give more time for their supporters to enroll.

Kaunda added that Lt. Gen. Christon Tembo, charged with leading the June 30 failed coup, is to be pardoned along with three other Armed Forces officers also implicated.

Edward Shawarma, jailed for life following an attempt to overthrow Kaunda in 1980, is also to be freed, the president said.

Kaunda added that the state of siege imposed on Lusaka province would be lifted.

Zambia has been under a state of siege since independence in 1964, when Kaunda came to power in the former British colony of Northern Rhodesia.

However, Kaunda accused supporters of a multi-party state of +sowing the seeds of hatred in the country, so as to get support in the referendum+.

+The last 25 years of United National Independence Party rule have been positive,+ Kaunda said, stressing his refusal to step down following food riots in June and the abortive coup attempt of the same month.

The food riots were prompted by a government decision to double the price of corn meal.

At least 30 people were killed in the disturbances, some 200 injured, and over 1,000 arrested.

#90206e0032 07/25/1990 ~Latin America New Agency

Guatemala City (JULY 25) EFE - The Army is top of a list of institutions accused of abusing human rights in Guatemala so far this year, State Prosecutor for Human Rights Ramiro de Leon Carpio said Wednesday.

The state prosecutor's office had received 67 accusations during the first six months of 1990 that the Army had violated human rights, including several claims involving financial corruption, abuse of power and illegal

detentions, de Leon said.

The police took second place on the list with 46 allegations, including abuse of power, threats, torture, corruption and murder.

The prosecutor's office recommended that culprits in the police be sacked and charged for their crimes, Dr Leon said.

In third place was the Civil Defense Committee with 12 accusations, the report said.

Military spokesman Col. Carlos Fernando Duran, said the prosecutor's report was under Army investigation but that most of the claims were false.

The report was released on the same day that unidentified gunmen shot dead a Guatemalan opposition parliamentary deputy.

Otto Rolando Ruano Reyes of the centrist opposition National Center Union (UCN) was gunned down near the town of San Jose Acatempa, 91 km east of the capital, along with another UCN member.

Some 2,000 people were kidnapped and killed in political violence in 1989, according to human rights groups.

The U.S. State Department and the Inter-American Human Rights Commission have both condemned Guatemala for its poor human rights record.

MANILA (JULY 25) XINHUA - THE PHILIPPINE GOVERNMENT, PLAGUED BY THE JULY 16 STRONG EARTHQUAKE, IS PLANNING TO NEGOTIATE WITH FOREIGN CREDITORS ON A NEW DEBT REDUCTION PROGRAM SO THAT THE COUNTRY COULD MOVE FASTER IN REHABILITATION WORK.

IN AN AMBUSH INTERVIEW AFTER TONIGHT'S CABINET MEETING, FINANCE SECRETARY JESUS ESTANISLAO SAID THAT PRESIDENT CORAZON AQUINO TODAY ORDERED THE DEPARTMENT OF FINANCE TO HAVE DEBT RELIEF TALKS ON A COUNTRY-TO-COUNTRY BASIS TO FOREIGN GOVERNMENTS, MAINLY TO THE PARIS CLUB MEMBER COUNTRIES.

ESTANISLAO ALSO SAID THAT THE PRESIDENT WILL MAKE APPEAL TO FOREIGN CREDITORS TO EASE THE TEAMS AND CONDITIONS OF THEIR DEBTS.

MEANWHILE, PRESIDENTIAL SPOKESMAN ADOLFO AZCUNA TOLD REPORTERS THAT WITH RESPECT TO THE EARTHQUAKE, THE GOVERNMENT CAN ASK FOREIGN COUNTRIES TO GIVE THE PHILIPPINES DEBT RELIEF, "NOT JUST THE USUAL DEBT RELIEF THAT THEY HAVE GIVEN IN NORMAL TIMES BUT MORE IN VIEW OF THE DEVASTATION OF THE EARTHQUAKE."

AZCUNA SAID THE CABINET DISCUSSED VARIOUS FORMS RANGING FROM THE SUSPENSION OF DEBT SERVICE TO OUTRIGHT CONDONATION.

IN A RELATED DEVELOPMENT, BOTH CHAMBERS OF THE PARLIAMENT HAVE PASSED RESOLUTIONS PROPOSING A TWO-YEAR SUSPENSION OF PAYMENT ON THE COUNTRY'S 26.5 BILLION U.S. DOLLARS FOREIGN DEBTS.

ACCORDING TO A REPORT ISSUED TODAY BY THE NATIONAL DISASTER COORDINATING COUNCIL, AS OF JULY 24, THE JULY 16 KILLER EARTHQUAKE, THE STRONGEST ONE IN MORE THAN 20 YEARS IN THE COUNTRY, KILLED 1597 PEOPLE. THE TOTAL DAMAGE TO PROPERTIES HAS REACHED 15 BILLION PESOS (652.17 MILLION U.S. DOLLARS).

LONDON (JULY 25) XINHUA -- BRITAIN'S QUEEN ELIZABETH HAS TAKEN LEGAL ACTION TO PREVENT THE PUBLICATION OF A BOOK BY A FORMER ROYAL HOUSEHOLD OFFICIAL DESCRIBING INTIMATE DETAILS OF LIFE IN THE ROYAL HOUSEHOLD, A BUCKINGHAM PALACE SPOKESWOMAN SAID TODAY.

THE BOOK, ENTITLED "COURTING DISASTER," CONTAINS BEHIND-THE- SCENES REVELATIONS INCLUDING HEAVY DRINKING AND ILLICIT SEX AMONG ROYAL EMPLOYEES. IT ALSO INCLUDES A PICTURE OF THE QUEEN IN BED, DRESSED IN A BEDJACKET, ACCORDING TO A REPORT IN THE RIGHT-WING BRITISH PAPER, THE DAILY TELEGRAPH.

MALCOM BARKER, THE AUTHOR, WAS EMPLOYED AT THE PALACE FROM 1980-83 AS A CLERK TO THE MASTER OF THE ROYAL HOUSEHOLD.

THE PALACE SAID BARKER HAD BROKEN AN UNDERTAKING OF CONFIDENTIALITY HE SIGNED WHEN HE JOINED THE QUEEN'S STAFF.

YESTERDAY, THE QUEEN'S LAWYERS SOUGHT AN INJUCTION BANNING THE BOOK IN BRITAIN FOLLOWING THE PUBLICATION OF EXCERPTS IN THE FRENCH MAGAZINE, PARIS MATCH.

A SPOKESMAN FOR THE BOOK'S PUBLISHERS SAID THE INJUCTION HAD BEEN SERVED ON THE FIRM, PREVENTING PUBLICATION OF THE BOOK, OR EXCERPTS FROM THE BOOK IN ANY FORM.

"MALCOM BARKER ... CANNOT UNDERSTAND THE NEED FOR BLATANT CENSORSHIP OF HIS ROLLICKING REVELATIONS," THE SPOKESMAN SAID.

THE QUEEN LAST RESORTED TO THE LAW IN 1988 TO PREVENT A FORMER MAID FROM PUBLISHING A BOOK ON HOW THE ROYAL FAMILY SPENT THEIR ANNUAL HOLIDAY IN SCOTLAND.

#90206k0001 07/25/1990 ~Japanese News Agency

TOKYO (JULY 25) KYODO - SUMITOMO BANK SAID WEDNESDAY IT WILL ESTABLISH, IF AUTHORIZED BY U.S. MONETARY AUTHORITIES, A WHOLLY OWNED SUBSIDIARY IN NEW YORK TO CENTRALLY SUPERVISE ITS U.S. FIVE AFFILIATES' NONBANKING ACTIVITIES.

THE FIVE AFFILIATES ARE TWO EXISTING NONBANKING FIRMS - SUMITOMO BANK CAPITAL MARKETS INC. AND SUMITOMO BANK OF NEW YORK TRUST CO. - AND THREE NEW COMPANIES, TO BE SET UP IN NEW YORK, WHICH ARE TO ENGAGE IN SECURITIES LEASING AND INVESTMENT ADVISORY BUSINESS, A SUMITOMO BANK SPOKESMAN SAID.

THE INVESTMENT BY THE JAPANESE COMMERCIAL BANK, THE FIRST SUCH ATTEMPT IN THE JAPANESE BANKING INDUSTRY, IS ESTIMATED TO COST 320 MILLION DOLLARS, HE SAID.

THE APPLICATION HAS ALREADY BEEN FILED WITH THE U.S. FEDERAL RESERVE BOARD AND SUMITOMO IS EXPECTED TO FORM THE MANAGEMENT AND SERVICING COMPANY BY THE END OF THE YEAR.

THE FIVE AFFILIATES ARE TO BE OWNED 90 PERCENT BY SUMITOMO BANK AND 10 PERCENT BY THE PROJECTED HEADQUARTERS COMPANY WHICH ALSO WILL SERVE AS A HOLDING COMPANY FOR THE NEW FIRMS.

#90206k0022 07/25/1990 ~Japanese News Agency
SEOUL (JULY 25) KYODO - SOUTH KOREA MARKED UP THE FIRST MONTHLY SURPLUS IN ITS TRADE ACCOUNT THIS YEAR IN JUNE, REFLECTING RECOVERY IN EXPORTS AND A SLOWDOWN IN IMPORT GROWTH, THE GOVERNMENT SAID WEDNESDAY.

THE GOVERNMENT SAID THE JUNE TRADE SURPLUS AMOUNTED TO 235 MILLION U.S. DOLLARS, AS EXPORTS SURGED 4.7 PERCENT FROM A YEAR EARLIER TO 5,686 MILLION DOLLARS, AGAINST A 2.3 PERCENT RISE IN IMPORTS, WHICH CAME TO 5,451 MILLION DOLLARS.

EXPORTS SHOWED A MARKED INCREASE IN SUCH ITEMS AS SHOES, ELECTRONICS PRODUCTS, AND MACHINERY.

THE JUNE SURPLUS, HOWEVER, STILL LEFT THE CUMULATIVE TRADE ACCOUNT IN THE JANUARY-JUNE PERIOD IN THE RED BY 2,771 MILLION DOLLARS, IT SAID.

-30- 847
#90206k0055 07/25/1990 ~Japanese News Agency
TOKYO (JULY 25) KYODO - AMERICAN HONDA MOTOR CO., A SUBSIDIARY OF HONDA MOTOR CO. OF JAPAN, HAS MOVED ITS POWER EQUIPMENT DIVISION FROM CALIFORNIA TO ATLANTA, GEORGIA, HONDA ANNOUNCED WEDNESDAY.

LARGE MARKETS IN THE SOUTHEASTERN COAST OF THE U.S. AND PROXIMITY TO HONDA POWER EQUIPMENT MFG., INC. IN NORTH CAROLINA MOTIVATED THE RECLOCATION OF THE DIVISION, IT SAID.

THE DIVISION SELLS GENERAL APPLIANCES SUCH AS LAWN MOWERS, TRACTORS,

GENERATORS, AND PUMPS.

-30- 621
#90206k0063 07/25/1990 ~Japanese News Agency
TOKYO (JULY 25) KYODO - TOSHIBA CORP., A MAJOR JAPANESE ELECTRIC MACHINERY AND ELECTRONICS MAKER, SAID ITS SINGAPORE SUBSIDIARY WEDNESDAY BEGAN PRODUCTION OF COLOR DISPLAY MONITORS FOR COMPUTER TERMINALS.

TOSHIBA SINGAPORE PTE. (TSP) HAS STARTED MANUFACTURING 17-INCH DISPLAY MONITORS AND PLANS TO ADD 15-INCH PRODUCTS TO ITS LINE IN AUGUST 1990, TOSHIBA OFFICIALS SAID.

TOSHIBA PLANS TO MANUFACTURE 40,000 UNITS FOR THE FIRST FISCAL YEAR AND HOPES TO BOOST THE NUMBER TO 120,000 BY FISCAL YEAR 1992.

TOSHIBA HAS LAUNCHED OVERSEAS PRODUCTION TO BEEF UP ITS MANUFACTURING CAPACITY TO BETTER MEET THE GROWING DEMAND FOR WORKSTATIONS, PROJECTED TO RISE BY 20 PERCENT ANNUALLY, THE OFFICIALS SAID.

-30- 870
#90206k0069 07/25/1990 ~Japanese News Agency
TOKYO (JULY 25) KYODO - THE RECENT GROWTH IN SOVIET ARREARS IN PAYMENTS FOR IMPORTS FROM JAPAN CAME TO A HALT IN JUNE, TURNING AROUND FROM A SIX-MONTH EXPANSIONARY TREND, A TRADE ORGANIZATION SAID WEDNESDAY.

UNPAID IMPORT BILLS OWED BY SOVIET TRADING ORGANIZATIONS TOTALED 446 MILLION DOLLARS AT THE END OF JUNE, NEARLY FLAT FROM THE 444 MILLION DOLLARS AT THE END OF MAY, ACCORDING TO THE JAPAN ASSOCIATION FOR TRADE WITH THE SOVIET UNION AND SOCIALIST COUNTRIES OF EUROPE.

THE FINDINGS WERE BASED ON A SURVEY OF 15 MAJOR JAPANESE TRADING HOUSES OVER PAYMENT DELAYS OF 60 DAYS OR MORE AFTER SHIPMENTS, SAID THE ASSOCIATION, WHICH GROUPS PRIVATE COMPANIES DOING BUSINESS WITH THE EAST BLOC NATIONS.

ACCORDING TO THE SURVEY, THE NUMBER OF SOVIET CONCERNS WITH DELAYED PAYMENTS VALUED AT 1 MILLION DOLLARS OR MORE WAS 24 AT THE END OF JUNE, DOWN FROM 25 AT THE END OF MAY.

PROMSYRIOIMPORT, THE SOVIET TRADE CONCERN HANDLING STEEL AND OTHER INDUSTRIAL RAW MATERIALS, WAS THE LARGEST DEBTOR AMONG THEM, WITH ITS PAYMENT DELAYS TOTALING 169 MILLION DOLLARS.

SOYUZCHIMEXPORT, THE SOVIET CORPORATION SPECIALIZING IN CHEMICAL IMPORTS, CAME SECOND WITH 151 MILLION DOLLARS IN ARREARS ON DEBTS OWED TO THE JAPANESE.

ASSESSING THE STATISTICS, ASSOCIATION OFFICIALS TRACED THE FLAT GROWTH IN PAYMENT DELAYS PARTLY TO THE HESITANCY AMONG MAJOR TRADING HOUSES TO DO BUSINESS WITH SOVIET CONCERNS SINCE THIS SPRING.

AS ANOTHER FACTOR, THEY ALSO POINTED OUT THAT SOVIET DEBTORS MAY HAVE BEGUN PAYMENT ON SOME IMPORT CONTRACTS AFTER WARNINGS FROM JAPANESE EXPORTERS.

THE SOVIET PAYMENT PROBLEM HAS CAST A SHADOW OVER TRADE BETWEEN JAPAN AND THE SOVIET UNION, KEEPING EXPORTS TO THE SOVIET UNION ON THE WANE.

BUT AN OFFICIAL AT ONE MAJOR TRADING HOUSE SAID THAT SOVIET PAYMENT DELAYS APPEAR UNLIKELY TO INCREASE AGAIN BECAUSE SOVIET FOREIGN-EXCHANGE CONDITIONS HAVE BEEN IMPROVING. ''I BELIEVE THIS PROBLEM IS PASSING ITS PEAK,'' HE SAID.

-30- 2135

#90206k0072 07/25/1990 ~Japanese News Agency

TOKYO, JULY 25 KYODO - SANYO SPECIAL STEEL CO. ANNOUNCED WEDNESDAY IT HAS TEAMED UP WITH KANEMATSU CORP., A MAJOR JAPANESE TRADING COMPANY, TO SET UP A JOINT VENTURE SPECIALIZING IN THE PRODUCTION OF COLD FINISHED STEEL BARS IN THAILAND.

SANYO ESTABLISHED THE PRODUCTION BASE IN SOUTHEAST ASIA WITH A VIEW TO CUTTING LABOR COSTS AND MEETING THE REGION'S GROWING DEMAND, SANYO OFFICIALS SAID.

THE VENTURE, SKJ METAL INDUSTRIES CO., WILL BE THE FIRST OVERSEAS PRODUCTION BASE FOR BOTH SANYO AND KANEMATSU.

THE BANGKOK-BASED SKJ WILL ALSO BE FINANCED BY THAILAND'S BIGGEST STEEL MAKER, THE PINTHONG GROUP, AND KANEMATSU'S OVERSEAS SUBSIDIARY, WATANA INTE-TRADE CO., THE OFFICIALS SAID.

PINTHONG AND KANEMATSU WILL EACH BUY A 33 PERCENT STAKE IN SKJ, CAPITALIZED AT 54 MILLION BAHT, WITH KANEMATSU AND WATANA TOGETHER HOLDING A 34 PERCENT STAKE, THEY SAID.

SKJ PLANS TO CONSTRUCT PRODUCTION FACILITIES IN AN INDUSTRIAL PARK APPROXIMATELY 30 KILOMETERS SOUTHEAST OF BANGKOK AT A COST OF 1 BILLION YEN, SCHEDULED TO BE COMPLETED BY SEPTEMBER OF NEXT YEAR.

COLD FINISHED BARS ARE USED IN THE PRODUCTION OF CONSUMER ELECTRONIC GOODS AND SMALL SHIPS.

THE VENTURE WILL TURN OUT 300 TONS OF FINISHED BARS MONTHLY, HALF OF WHICH

WILL BE SOLD TO JAPANESE FIRMS IN THAILAND, THE OFFICIALS SAID. THE OTHER HALF WILL BE DESTINED FOR EXPORT TO OTHER SOUTHEAST ASIAN COUNTRIES.

SKJ IS TARGETING ANNUAL SALES OF 1.5 BILLION YEN.

-30- 1614

#90206k0079 07/25/1990 ~Japanese News Agency

HONG KONG (JULY 25) KYODO - THE VALUE OF HONG KONG'S TOTAL EXPORTS IN JUNE GREW 8.6 PERCENT OVER THE SAME MONTH LAST YEAR TO 53,041 MILLION HONG KONG DOLLARS, OFFICIAL FIGURES SHOWED WEDNESDAY.

THE GROWTH WAS LED BY A 14.4 PERCENT INCREASE OVER JUNE 1989 IN THE VALUE OF PRODUCTS FROM CHINA AND OTHER MARKETS THAT WERE REEXPORTED FROM HONG KONG.

THE VALUE OF REEXPORTS FOR JUNE 1990 WAS 34,196 MILLION HONG KONG DOLLARS, ACCORDING TO THE FIGURES RELEASED BY THE GOVERNMENT'S CENSUS AND STATISTICS DEPARTMENT.

HONG KONG'S JUNE DOMESTIC IMPORTS SHOWED A SMALL DECREASE OVER THE SAME MONTH LAST YEAR, FALLING 111 MILLION DOLLARS, OR 0.6 PERCENT, TO 18,845 MILLION DOLLARS.

IMPORTS GREW BY 3.9 PERCENT OVER JUNE 1989, TO REACH 52,021 MILLION DOLLARS, LEAVING A VISIBLE TRADE SURPLUS OF 1,020 MILLION DOLLARS, COMPARED WITH A DEFICIT OF 1,212 MILLION DOLLARS IN JUNE 1989.

COMMENTING ON THE FIGURES, A GOVERNMENT SECRETARIAT SPOKESMAN SAID WEDNESDAY THE EXPORT RISE WAS LARGELY ATTRIBUTABLE TO THE STRONG GROWTH IN REEXPORTS OF CHINA ORIGIN.

THE CONTINUED SLUGGISH PERFORMANCE OF HONG KONG'S DOMESTIC EXPORTS IS DUE IN PART TO THE RELOCATION OF HONG KONG'S MANUFACTURING INDUSTRY ACROSS THE BORDER IN CHINA, BUT ALSO PARTLY BECAUSE OF THE RELATIVELY HIGH RATE OF INFLATION IN THE TERRITORY, ANALYSTS SAY.

HONG KONG'S KEY INFLATION INDICATOR, THE CONSUMER PRICE INDEX (A), SHOWED A SLIGHT EASING IN JUNE, FALLING TO 9.1 PERCENT, ACCORDING TO OFFICIAL FIGURES PUBLISHED TUESDAY.

THE 9.1 ANNUAL INCREASE IN THE CPI (A) COMPARES TO A YEAR-ON- YEAR FIGURE OF 9.4 PERCENT IN APRIL AND 9.3 PERCENT IN MAY.

THE CPI (A) IS BASED ON THE EXPENDITURE PATTERNS OF 50 PERCENT OF THE HOUSEHOLDS SPENDING 2,000 TO 6,499 HONG KONG DOLLARS A MONTH.

THE HANG SENG CPI, WHICH COVERS THE WEALTHIER 10 PERCENT OF HOUSEHOLDS IN

THE TERRITORY, SHOWED AN ANNUAL INFLATION RATE AT THE END OF JUNE UNCHANGED FROM A YEAR EARLIER AT 11.3 PERCENT, ACCORDING TO FIGURES RELEASED TUESDAY.

-30- 2157

#90206k0085 07/25/1990 ~Japanese News Agency

TOKYO (JULY 25) KYODO - FUJITSU LTD. IS DEVELOPING SOFTWARE FOR MIXED VACCINES CAPABLE OF COMBATING 50 DIFFERENT KINDS OF COMPUTER VIRUSES, AND PLANS TO COMMERCIALIZE THESE VACCINES FOR USE BY GENERAL CUSTOMERS WITHIN THE YEAR, COMPANY SOURCES SAID WEDNESDAY.

THE VACCINES BEING DEVELOPED BY FUJITSU ARE PRIMARILY INTENDED FOR USE WITH FUJITSU'S PERSONAL COMPUTERS, BUT THEY CAN ALSO BE USED IN OTHER COMPANIES' MODELS TO COMBAT VIRUSES FOUND IN THE BASIC MS-DOS OPERATING SYSTEM, THE SOURCES SAID.

A COMPUTER VIRUS IS A KIND OF PROGRAM THAT CAN DESTROY OTHER SOFTWARE AND HARDWARE, BASICALLY RENDERING THE INFECTED MACHINE USELESS. SOME 80 DIFFERENT KINDS OF VIRUSES HAVE BEEN DETECTED WORLWIDE, INCLUDING THE POTENT ''FRIDAY-THE-13TH'' VIRUS.

FOLLOWING THE DISCOVERY OF ''FRIDAY-THE-13TH'' IN MACHINES FOUND IN FUJITSU'S OFFICE, THE COMPANY HAS TAKEN MEASURES TO COMBAT THE VIRUSES BY DEVELOPING VIRUS DETECTION PROGRAMS THAT IT DISTRIBUTED ON JULY 3, SAID THE SOURCES.

THE USE OF THIS DETECTION PROGRAM LED TO THE FACT THAT GENERAL USERS ARE ALSO BEING PLAGUED BY COMPUTER VIRUSES. THIS FACTFINDING HAS SPURRED FUJITSU TO EMBARK ON FULL-SCALE MEASURES ALSO EFFECTIVE FOR COMBATING OTHER TYPES OF COMPUTER VIRUSES WHICH MAY APPEAR, COMPANY SOURCES SAID.

THE VACCINES CURRENTLY UNDER DEVELOPMENT BY FUJITSU ARE FITTED WITH VIRUS INFECTION PREVENTATIVE SOFTWARE CAPABLE OF SPECIFYING SOME 50 TYPICAL COMPUTER VIRUSES BY ANALYZING COMMANDS WHICH ARE EXECUTING PROGRAMS OF DIFFERENT VIRUSES. THE VACCINES ARE ALSO FITTED WITH COMPUTER VIRUS ERADICATION SOFTWARE.

''FRIDAY-THE-13TH,'' FOR EXAMPLE, IS THE MOST LETHAL OF ALL VIRUSES BECAUSE IT CANNOT BE ERADICATED. BUT FUJITSU'S VACCINES CAN COMBAT NEALY ALL OTHER COMPUTER VIRUSES, COMPANY SOURCES SAID.

THE PRICES OF FUJITSU'S VACCINES ARE EXPECTED TO BE THE PRICE OF THE FLOPPY DISKETTES ON WHICH THEY ARE PROGRAMMED PLUS POSTAGE TO THE CUSTOMERS.

-30- 2113

#90206k0087 07/25/1990 ~Japanese News Agency

TOKYO (JULY 25) KYODO - THE JAPAN CHEMICAL FIBERS ASSOCIATION SAID WEDNESDAY ALL NATIONS, INCLUDING THOSE WITH TRADE SURPLUSES, SHOULD BE ALLOWED TO MAINTAIN CONTROLS OVER TEXTILE IMPORTS TO SAFEGUARD THEIR HOME INDUSTRIES.

THE ASSOCIATION'S DEMAND WAS CARRIED IN A REQUEST SUBMITTED TO JAPAN'S MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) AND COMES AT A TIME WHEN WORLD TRADE NEGOTIATORS ARE CURRENTLY GATHERED IN GENEVA TO IRON OUT DIFFERENCES ON SUCH ISSUES AS FARM, SERVICE, AND TEXTILE TRADE.

THE VALUE OF NET TEXTILE IMPORTS TO JAPAN, WHICH BECAME A NET IMPORTER OF TEXTILE GOODS IN 1986, INCREASED TO 9.7 BILLION DOLLARS IN 1989, INDUSTRY SOURCES SAID.

A NUMBER OF TEXTILE EXPORTERS HAVE INSISTED THAT NATIONS, LIKE JAPAN, WITH A CURRENT ACCOUNT SURPLUS SHOULD NOT BE ALLOWED TO HAVE IMPORT RESTRICTIONS, THEY SAID.

IN RESPONSE TO SUCH DEMANDS, THE ASSOCIATION SAID ALL COUNTRIES SHOULD BE PERMITTED TO MAINTAIN CONTROLS OVER IMPORTS.

THE CRITERIA FOR SUCH CONTROLS SHOULD BE BASED ON AN OBJECTIVE MEASURE SUCH AS THE VALUE OF A NATION'S TOTAL NET IMPORTS AND EXPORTS, IT SAID.

-30- 1276

#90206m0001 07/25/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 25) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2)MONEY & ECONOMY.

IN THE NEWS:

The COMMERCE DEPARTMENT reports that durable goods orders for June fell a surprising 3.2%. Analysts were expecting a 1% rise following the 4% surge in May.

The Nikkei closed virtually unchanged, down one point. ... The FT 100 is up 13.7. ... Even after the withdrawal of the Liberal party from the East German coalition, the Dax index is up 3.56. ... U.S. automakers saw a 13% decline in domestic sales during mid-July, compared to a year ago. ... Confirming the advance word it put out last week, SEARS, ROEBUCK says second-quarter earnings fell 29% from the same quarter last year. ... The LABOR DEPARTMENT reports wages and salaries rose 4.7% for the 12 months ended June 30. ... The BANK OF JAPAN announces that it is not tightening credit. ... MORGAN STANLEY's earnings dropped 48% in the second quarter and SALOMON BROTHERS' profits fell 53%.

WHAT'S AHEAD:

At 10 a.m. EDT, Treasury Secretary NICHOLAS BRADY will testify before the Senate Banking Committee on modernization of the financial services industry, and will focus on deposit insurance reform. ... At 10 a.m. EDT, the SEC will meet to consider whether to halt trades of NYSE baskets when the Dow has moved more than 50 points. ... EASTERN AIRLINES says the company and some managers will be indicted soon for aircraft maintenance violations. ... CHRYSLER plans to raise prices on its restyled 1991 minivans by as much as 12%, but lower prices on some of its less popular car lines. ... Budget negotiators hope to exchange deficit reduction packages this week, a sign that the talks may be about to get more serious.

FROM THE BULLS:

"Today was a very narrow recovery," says EUGENE PERONI of JANNEY MONTGOMERY SCOTT. He says that because the blue chips are outperforming the secondaries, investors must be selective, but overall, he sees the market continuing up. According to Peroni, Monday's decline may have caused "short-term damage," but "there's been no damage to the basic uptrend." He sees support at 2850 and thinks this correction is a buying opportunity. (FNN "Marketwrap", 7/24)

The intra-day downside risk in the market is in the 2800 area, says ANDREW ADDISON of the "Addison Report." Strength in the oil stocks should help keep the market above that level. "I don't see that the averages have great downside risk from here. I think that's going to be the surprise and I expect to see the market move higher today." (FNN "World Business Update", 7/25)

FROM THE BEARS:

Monday's drop "was a mini-sample of last October's panic," according to GENE JAY SEAGLE, director of technical research at GRUNTAL & CO. "It's an unhealthy sign that people are so skittish." ("Investor's Daily", 7/25)

STOCK MARKET:

"Overall, our risk is roughly a 10% overall correction from the July highs " says BERNADETTE MURPHY of M. KIMELMAN & CO. "At this point in time, that would seem to be the most on the downside." (CNBC "Market Wrap-Up", 7/24)

"If people didn't get nervous [during program plunges] they wouldn't have blood in their veins," says RON DORAN of C.L. KING & ASSOCIATES. "You're never used to a market taking the rug out from underneath you," says DAN WILLIAMS of DILLON READ & CO. "But you have to sit back, let the market

do what it wants and then work from the new level." ("USA Today", 7/25)

"The damage that's been done in the key leading institutional issues has been incredible," says RALPH BLOCH, chief technical analyst at RAYMOND JAMES & ASSOCIATES. "One leading issue after another has been taken out and shot." He says that skittish portfolio managers even took profits in fundamentally strong stocks to offset the losses in the issues that disappointed. "They're panicking. They're saying, 'Let me get some black ink to offset the blood.'" (Reuters, 7/24)

Index arbitrage and the accompanying program trading make it "difficult to assess what is the trend and what isn't," according to MONTE GORDON, director of research at DREYFUS CORP. "A fair amount of damage was done in the action we've had these past couple of days," says Gordon. "It will take a little while for the market to sort of settle down" into a range of 2800-3200, says Gordon. He says the market will definitely test 3000 again. (CNBC "Market Wrap-Up", 7/24)

"Without the oils, the Dow did nothing," says CHRISTOPHER PEDERSEN, director of trading at TWENTY-FIRST SECURITIES, noting the sharp rise of CHEVRON, EXXON and TEXACO yesterday amid renewed prospects of armed conflict in the Mideast. Explaining yesterday's relative calmness in the market following Monday's volatility, Pedersen says, "The professionals are getting use to knowing how to handle these one-day blips." (WSJ, 7/25)

"Monday was a rout and upset me, and I am sure many other investors," laments ALAN SHAW of SMITH BARNEY, HARRIS UPHAM & CO. But he says yesterday's reversal was "a positive." He says uncertainty in the Middle East helped boost oil prices, and therefore supported oil stocks, giving the market a shot in the arm. "The market will probably begin to do some backing and filling for a while," predicts Shaw, who sees the market trading in a 100 point range around its current 2922 level. ("Investor's Daily", 7/25)

In the OTC market, "people are taking profits, but new investors are very hard to find," says PETER DaPUZZO, co-head of world-wide equities for SHEARSON LEHMAN HUTTON. "The easy money is out of the market now. It will take a lot of work by analysts and portfolio managers to make money." (WSJ, 7/25)

"After the drubbing that stocks took [Monday] there's a natural instinct for investors to come back and do some bargaining hunting," says RANDELL MOORE, executive editor of "Blue Chip Financial Forecasts." But he's not convinced the market is ready to resume its summer rally because interest rates are still too high. ("USA Today", 7/25)

"It doesn't appear that professional investors ... were overly concerned about what happened [Monday]," says STEVEN EINHORN of GOLDMAN SACHS. (FNN

"Marketwrap", 7/25)

"A lot of people felt that Monday's steep decline and recovery was the start of something serious on the downside," says WILLIAM LeFEVRE of ADVEST INC. LeFevre disagrees, saying Monday was "a one-day event," largely caused by index arbitrage, Street-speak for program trading. (NYT 7/25)

"The bottom line is that investors will not tolerate earnings disappointments," says JOSEPH DeMARCO, managing director in charge of equity trading at MARINVEST. "The glue of the market has been energy stocks - they are the only industry that is reporting good earnings." (WSJ, 7/25)

JOHN SHAD, former chairman of DREXEL BURNHAM LAMBERT says, "The recent cloud that has come over the question of the survival of Drexel has been the announcement that the FDIC and the Resolution Trust Company are going to look into the relationship between Drexel and 700 troubled S&L's and the magnitude of that" will determine the firm's future. Shad is optimistic it will survive, but says it will never regain its former stature. (CNN "Moneyline", 7/24)

STOCK TIPS:

INTERPUBLIC GROUP is the U.S.'s largest group of ad agencies. PETER GRENNAN, director of stock index futures at SHEARSON LEHMAN HUTTON, likes the company because it derives 60%-75% of its revenues overseas, the fastest growing segment of the ad business. For similar reasons, Grennan likes oil-services giant SCHLUMBERGER which gets 80% of its business overseas. JOHNSON & JOHNSON is another pick by Grennan; he expects their earnings per share to grow at 17%-20% over the next three to five years. (CNN's "Business Day", 7/25)

"The only [oil] stock we are recommending at the moment, on the basis both of its fundamentals and its value, is ATLANTIC RICHFIELD," says BERNARD PICCHI, oil analyst for SALOMON BROTHERS. In an oil group trading at 20 times earnings, the stock stands out for its relative value, says Picchi. "It has the largest reserve base and the largest source of production in the United States." (CNN "Business Day", 7/25)

ALCO STANDARD "has very good support around the 34 to 35 area," according to EUGENE PERONI JR. of JANNEY MONTGOMERY SCOTT. He says a buying opportunity was created by the recent problems in the market, which have driven the stock down from around 37 to yesterday's close of 35 1/4. He says Alco could go to 42 within six months. He also likes McDERMOTT INTERNATIONAL, which has benefitted from the oil market. He sees the upside around 35 to 38, up from its most recent 31 3/4 close. (FNN "Marketwrap", 7/25)

WRIGLEY'S earnings have risen for eight years and are estimated to increase 13% this year. ANDREW ADDISON of the "Addison Report" says the stock broke out of a seven month base when it crossed 57. "It's now moved back down and is consolidating its gains ... It's an excellent conservative purchase at current levels and has generated upside predictions, in my work, to the upper 60s." Addison also repeats his recommendation of 3M. He likes the company's tremendous position overseas and the stock's ability to make new highs in the choppy market. Buy on dips to the low-80s and look for an upside potential of 110, says Addison. (FNN "World Business Update", 7/25)

#90206m0002 07/25/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (JULY 25) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

JOHN LILLEY of MMS INTERNATIONAL says that a combination of factors, including "general uneasiness about the Nikkei, general uneasiness about Japanese [interest] rates and general concern about the stock scandal" have made the currency market somewhat more bullish on the dollar. "Not strongly dollar bullish, but slightly," says Lilley. (FNN "World Business Update", 7/25)

Dollar trading yesterday was eclipsed by major activity in the pound, culminating in the dollar ending mixed and the pound down sharply. "Fundamentally, there are no real reasons why the pound should fall," says DAVID JAQUES, senior corporate trader at BARCLAYS BANK in New York. "A decline like this overall isn't something that should be a surprise" in light of Britain's economic troubles. "But the actual timing of this move didn't have any explanations." (WSJ, 7/25)

"I see nothing in the actions we have taken in recent days which in any way alters our particular policy path," says FED CHAIRMAN ALAN GREENSPAN in testimony to the monetary policy subcommittee of the House Banking Committee. ("The Washington Post", 7/25)

"It's really not very well understood, but the Fed doesn't expand the money supply directly," points out TIM SCALA of SEQUOR GROUP. Scala says individual banks must actually loan the funds that have been made available to it in order to expand the money supply. Therefore the Fed must "pre-empt" any possible credit tightening, taking action before the crunch manifests itself. Scala says this scenario recently played itself out and led to the slight easing. (FNN "Marketwrap", 7/25)

"Last week he [FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN] looked a little soft on inflation: This morning, he tried to take a somewhat harder line," says DAVID BLITZER, chief economist at STANDARD & POOR'S. "I think he's making a lot more noise about the possibility of a credit crunch than the numbers hold up," and using that as an excuse to bring about further easing, says Blitzer. He says the cut was politically motivated. (FNN "Marketwrap", 7/25)

ELLIOTT PLATT of DONALDSON, LUFKIN & JENRETTE says Greenspan's comments yesterday should help ease market anxieties. "It took away from any negatives he created when he seemed to be wavering" in the fight against inflation, says Platt. ("The Washington Post", 7/25)

FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN's second round of testimony before the House Banking Committee left bond traders and analysts less than impressed. "He's trying to stick his finger in the dam," says KRISTIN FOSTER, an economist at CITICORP INVESTMENT BANK. "Why should they [market players] believe the Fed's any tougher on inflation now than it was a week ago? The damage was already done last week when Greenspan failed to justify the reason for the Fed's ease." The market derived little comfort from Greenspan's assurances Tuesday that the Fed remains committed to an anti-inflationary policy. (Reuters, 7/24)

"He's virtually eliminated the risk of tightening," says WILLIAM SULLIVAN, senior vice president at DEAN WITTER REYNOLDS INC. "The Fed is clearly predisposed to easing in here." However, the earliest juncture for another easing would be September, says Sullivan. (Reuters, 7/24)

The bond market was effected by selling left over from Monday, as traders unwound positions developed in response to the stock market decline. ROBERTA OLSON, fixed-income portfolio manager at BANC ONE ASSET MANAGEMENT CORP., explains, "Too many people were wounded. They are sitting back and assessing the situation. It's completely related to the stock market." Bond investors had been focusing on supply and the Federal Reserve when suddenly stocks took center stage. "It has forced a lot of people to reassess what fundamental issues we should be looking at now," says Olson. (WSJ, 7/25)

JOSEPH LIRO of S.G. WARBURG SECURITIES says the employment cost index, which rose 5.2% in the second quarter, "was not a number that makes people confident that inflation will fall below 4% in the next 12 months." Even with that bad news on the inflation front, Liro thinks the Fed will ease by Fall. "That helps short-term rates, but not bonds. The long end has problems with these inflation numbers." (NYT, 7/25)

"We have become very dependent upon foreign investors in all of our markets. Since we now have less demand for U.S. securities than in past

years, this explains why we have not had better and more sustained bond market rallies following positive economic news," says BRIAN FABBRI, chief economist for MIDLAND MONTAGU. U.S. bond yields, he adds, "are too high considering economic growth has slowed and the Fed has eased. Yet, bond yields are much higher now than they were in December. That's because we have had sparse demand for our securities." (WSJ, 7/25)

THE ECONOMY:

A "USA Today" poll finds 41% of the 813 consumers surveyed say they have postponed major purchases, or will be doing so, because they're worried about the economy. Other findings: 51% expect the economy to continue expanding at about the same pace, 14% think it will get better and 34% think it will get worse. ("USA Today", 7/25)

IN WASHINGTON:

"I think we've gotten through the stage of people making political points " says VICE PRESIDENT DAN QUAYLE, regarding the budgetary process. "I think a lot of that is out of everyone's system and we're now down to the hard decisions that have to be made and we will see if we can do it." ("Nightly Business Report", 7/24)

#90206p8321 07/25/1990 ~PR Newswire

NEW YORK (JULY 25) PR NEWSWIRE - Savvy travelers know how much to tip in Tokyo, the maximum stay in Melbourne, and whether a visa is required to visit Cairo.

Now, even the occasional traveler can become a more sophisticated one just by picking up the phone.

By dialing 1-900-WEATHER, American Express' telephone weather information source for more than 600 U.S. and worldwide destinations, travelers can also access helpful travel information for foreign countries. Each foreign city has its own set of helpful hints.

Callers to 1-900-WEATHER can choose to hear international travel information after listening to current weather conditions and a three- day Accu-Weather(R) forecast for the destination they've selected.

Here are some helpful travel tips from 1-900-WEATHER: -- In East Germany, tipping is officially discouraged. However, it is widely practiced, with tips of 5-10 percent expected by waiters, taxi drivers and other service workers.

-- For emergency assistance in Seoul, South Korea, dial 112 from any local

telephone. In Tokyo, the emergency assistance number is 110.

-- With a valid passport and visa, visitors are allowed to stay in Australia for six months, but tourists may be asked to show onward or return tickets.

-- Many foreign countries, including Czechoslovakia, Hong Kong, and Brazil, run on 220 volt current that require converter plugs to run personal care appliances. Converter plugs are not necessary for other countries, including Japan and Canada.

1-900-WEATHER costs 75 cents per minute and can be accessed from most touch-tone phones. (Some businesses, hotels and all pay phones currently block access to 900 numbers.)

1-900-WEATHER is a service of American Express Travel Related Services Company, Inc., a family of travel, financial, insurance, data-processing and communications businesses, and a wholly owned subsidiary of the American Express Company.

CONTACT: Laura Gross or Kevin Sullivan of American Express, 212-640-3902, or Megan Svensen or Kent McKamy of McKamy & Partners, 212-684-4880, for American Express.

#90206p8324 07/25/1990 ~PR Newswire

SIMI VALLEY, CA (JULY 25) PR NEWSWIRE - Datron Systems Inc. (NASDAQ: DTSI) today reported results for the first quarter ended June 30, 1990.

Revenue for the first quarter was $8,391,000 down 21 percent from $10,595,000 reported for the first quarter of fiscal 1990. Net income in the first quarter was $170,000 or 6 cents per share versus $866,000, or 28 cents per share for the same period last year. Backlog as of June 30, 1990, including approximately $22 million in backlog from the recently acquired operations of Transco Products, was $55 million compared with $36 million on the same date last year.

"Results for the first quarter were affected by expected lower margins from fixed price contracts at Datron Systems division and an unexpected shortfall in shipments of radio products at Trans World Communications Inc.," stated David A. Derby, president and CEO. "However, sales for the rest of the year, which will include those from recently acquired Transco Products Inc., will be up substantially with earnings per share expected to be at or above last year's levels for the final three quarters. The following year we expect margins to approach our traditional levels on higher sales," he added.

Datron Systems Inc. is a leading designer and manufacturer of specialized radio and satellite communications systems and high-quality microwave products for military, governmental and commercial use worldwide.

#90206p8326 07/25/1990 ~PR Newswire

HARLEYSVILLE, PA (JULY 25) PR NEWSWIRE - Harleysville Group Inc. (NASDAQ: HGIC), a regional insurance holding company, today reported record second quarter revenues and earnings.

Second quarter net income increased 12 percent to $6.2 million, compared with $5.6 million during the second quarter of 1989. For the first six months of 1990, net income climbed 12 percent to $11.4 million, compared with $10.1 million in 1989. On a per share basis, net income rose 9 percent to $0.83 in the second quarter, compared with $0.76 in the same period of 1989. For the six-month period, net income per share totaled $1.52, compared with $1.38 per share in 1989. The higher earnings were achieved despite a $0.04 per share after-tax charge in each quarter resulting from auto insurance legislation enacted in New Jersey earlier this year. Realized investment gains had virtually no impact on net income in the 1989 and 1990 periods.

Investment income increased 21 percent in the second quarter to $10.7 million, compared with $8.9 million in 1989. For the corresponding six-month periods, investment income rose 22 percent to $21 million in 1990 from $17.2 million in 1989. Continued strong cash flow and a higher income yield from investments are the primary contributors to the growth in investment income.

"Our strong growth in investment income, which continues to fuel our earnings, has been accomplished without any holdings in non-investment grade securities," explained Bradford W. Mitchell, chairman of the board and chief executive officer of Harleysville Group. "In fact, the average investment quality of our bond portfolio is rated double A by the bond rating agencies."

Second quarter earned premiums grew 8 percent to $72.8 million, compared with $67.3 million during the second quarter of 1989. For the corresponding six-month periods, earned premiums increased 8 percent to $145.2 million in 1990 from $134.0 million in 1989. The increase is due in part to strong premium growth from subsidiaries in New England and the Southeast.

Total revenues in the second quarter were up 9 percent to $83.9 million,

compared with $76.8 million in the second quarter of 1989. For the six months, total revenues climbed 10 percent to $167.2 million in 1990 from $152.6 million in 1989.

Stockholders' equity increased 16 percent to $171.5 million ($22.72 per share) at June 30, 1990, up from $148.2 million ($20.08 per share) at June 30, 1989. The trailing 12-month return on stockholders' equity at June 30, 1990, was 15 percent.

Harleysville Group's statutory combined ratio was 103.6 percent in the second quarter, compared with 103.4 percent posted in the second quarter of 1989. The combined ratio for the second quarter compares favorably with the 106 percent ratio reported in the first quarter of 1990. For six months, the combined ratio was 104.8 percent, compared with the 102.3 percent ratio during the first six months of 1989. The higher combined ratio for six months is due primarily to the increased assessments related to involuntary automobile coverages in New Jersey and somewhat higher losses in the workers compensation line of business.

"During the second quarter, much of our attention and actions have been focused on the new auto insurance legislation in Pennsylvania and New Jersey," Mitchell commented. "While we have not yet been granted adequate rate levels in Pennsylvania, we have appealed the state Insurance Department's rejection of our recent rate increase request and are awaiting their ruling on that appeal. We continue to explore other options that would minimize the impact of the Pennsylvania auto segment on the rest of our business."

Harleysville Group Inc. is a regional holding company for four property and casualty insurers whose marketing territory encompasses the entire East Coast. The companies include: Atlantic Insurance Company of Savannah, Harleysville Insurance Company of New Jersey, Huron Insurance Co. and Worcester Insurance Co. Harleysville Group also manages the operations of Berkshire Mutual Insurance Group, headquartered in Pittsfield, Mass., the financial results of which are not consolidated into Harleysville Group at the present time.

OGDEN, UT (JULY 25) PR NEWSWIRE - Thiokol Corp. (NYSE: TKC) announced today that it has received approvals necessary for a stock repurchase program.

"At current price levels, we believe Thiokol stock represents an attractive investment oppportunity for the company," said U. Edwin Garrison, Thiokol president and chief executive officer. "Such a stock repurchase program will increase earnings per share and enhance the company's future financial flexibility."

The buyback of Thiokol shares was approved by the company's board of directors and approval for up to 5 percent stock repurchase has been received from the Internal Revenue Service. A ruling request was filed with the IRS on May 18. Approval by Morton International was also received in accordance with the spin-off agreement between Thiokol and Morton.

Thiokol is a $1.2 billion Utah-based corporation with approximately 11,500 employees at 11 major facilities nationwide. Thiokol is a leader in a broad range of research, high technology, manufacturing and support services. The company is active in areas of solid propulsion systems, ordnance and composite products for the space and defense industries.

#90206p8339 07/25/1990 ~PR Newswire

MILPITAS, Calif., (JULY 25) PR NEWSWIRE - Linear Technology Corp. (NASDAQ: LLTC), a leading, independent manufacturer of high- performance linear integrated circuits, today announced that net sales for its fiscal year ended July 1, 1990 were a record $75,620,000, an increase of 17 percent over net sales of $64,722,000 for the previous year. The company also reported record net income for the year of $11,301,000 or $0.67 per share, an increase of 27 percent over the $8,902,000 or $0.53 per share

reported for fiscal 1989.

Net sales for the fourth quarter ended July 1, 1990 were a record $20,810,000, an 18 percent increase over net sales of $17,675,000 for the fourth quarter of the previous year. Net income for the quarter was $3,401,000 or $0.20 per share, compared with $2,388,000 or $0.14 per share an increase of 42 percent over the fourth quarter of the previous year.

According to Robert H. Swanson, president and CEO, "Fiscal year 1990 was one of challenges and successes. We were challenged with a tentative semiconductor marketplace, yet we grew our business 17 percent and increased net income by 27 percent. Operating income as a percentage of sales was 20 percent for the year. We generated an additional $7 million in net cash even after spending roughly $3 million on repurchasing common stock and $2 million on settling outstanding patent litigation. In positioning future business, we introduced many new circuits and our products made inroads into several vibrant new markets, most notable of which are the lap top computers, disk drives and local area network products."

Linear Technology Corp. was founded in 1981 as a manufacturer of high performance linear integrated circuits. Linear Technology products include operational, instrumentation and audio amplifiers; voltage regulators, references, comparators and converters; switched-capacitor filters; communications interface circuits; one-chip data acquisition systems; pulse-width modulators and sample-and-hold devices. Applications for Linear Technology's high performance circuits include lap top and desk top computers, computer peripherals, cellular telephones, electronic testers, industrial and medical electronic instruments, automotive controls, process controls, factory automation products, and avionics.

TEL AVIV, Israel (JULY 25) PR NEWSWIRE - Laser Industries Limited (AMEX: LAS) announced today that pursuant to its consent solicitation and exhange offer, as of the close of business on July 24, 1990, holders of $4,283,000 aggregate principal amount of its 8 percent convertible subordinated debentures due 2006 had delivered consents to the proposed amendments and $3,465,000 aggregate principal amounts of debentures were tendered for exchange into ordinary shares at the rate of 115 ordinary shares together with cash equal to the accrued interest for each $1,000 principal amount of debentures.

Consents from the holders of at least a majority ($6,606,000) of the aggregate principal amount of debentures outstanding are required in order for the proposed amendments to become effective.

The company also announed today that it had determined to accept for exchange into its ordinary shares any and all of its debentures tendered pursuant to its consent solicitation and exchange offer.

The expiration date for the tender of additional debentures and the granting of consents has been extended to 5 p.m., New York City time, on July 31, 1990. Debentures tendered may be withdrawn and consents revoked at any time prior to the expiration date.

PaineWebber Inc. is acting as financial advisor to the company in connection with the consent solicitation and exchange offer and D.F. King & Co. Inc. is acting as its information agent.

BUFFALO, NY (JULY 25) PR NEWSWIRE -- Comptek Research, Inc. (AMEX/BSE: CTK) today announced financial results for its first fiscal quarter ended June 29, 1990.

Revenues for the first quarter were $11,944,000, up 13 percent from $10,526,000 in the same period a year ago. Net income for the three-month period increased 10 percent to $338,000 from $308,000. On a per share basis, net income was $0.16, compared with $0.14. The company's backlog on June 29, 1990, was $40,031,000, up nearly 17 percent from the same date last year when the backlog was $34,300,000.

At June 29, 1990, the company's current ratio was 5.0:1 versus 4.6:1 the same date last year. Shareholders' equity was $13,100,000 or $6.14 per share.

The company declared the quarterly cash dividend of $0.05 per share, payable Sept. 5, 1990 to shareholders of record on Aug. 16, 1990.

Comptek Research, Inc., with 13 offices and subsidiary locations in the U.S., develops Command, Control, Communications and Intelligence systems and Electronic Warfare systems, primarily for the Department of Defense. Related activities include providing specialized technical services and manufacturing precision electronics.

(JULY 25) PR NEWSWIRE - This Thursday, July 26, Landmark Savings Association (AMEX: LSA) will provide approximately $500,000 in federal subsidies to Garfield Jubilee Association for the renovation of 29 housing units in Garfield, one of the city's debilitated areas.

At a ceremony at 5022 Kincade St. in Garfield, Landmark's senior vice president and chief real estate lending officer Thomas J. Finnegan will present the subsidy to William Foster, executive director of Garfield Jubilee Association, the agency responsible for the rehabilitation program. Also present will be James D. Roy, president, Federal Home Loan Bank of Pittsburgh. The ceremony is scheduled for 11 a.m.

The subsidy is part of the newly created Affordable Housing Program (AHP). In 1990, the AHP will provide $3.7 million for low- and moderate-income housing projects in Pennsylvania, West Virginia and Delaware.

5022 Kincade St. is one of the housing units slated for rehabilitation. Photographers and camera crews will be permitted to shoot both the inside and outside of the project.

#90206p8349 07/25/1990 ~PR Newswire
SAN MANUEL, AZ (JULY 25) PR NEWSWIRE -- Magma Copper Co. (AMEX: MCU) today announced record production, sales and net income for second quarter 1990. Net income for the quarter was a record $23.4 million, or $.56 per common share, on a fully diluted basis, compared to $13 million, or $.32 per common share, assuming full dilution,
for second quarter 1989, and $11.7 million or $.28 per common share, assuming full dilution, for first quarter 1990.

Second quarter 1990 net income increased 80 percent over the same period in 1989, despite a 4 percent decrease in copper prices.

The average revenue per pound of copper sold for second quarter 1990, including rod conversion premiums, was $1.18, compared to $1.23 for the second quarter 1989, and $1.13 per pound in the first quarter 1990.

Net income for the six months ended June 30, 1990 was $35.1 million or $.84 per common share assuming full dilution, compared to $35.8 million or $.88 per common share assuming full dilution for the six months ended June 30, 1989.

Net cash provided by operating activities for second quarter 1990 was $60 million, partially because of a significant decrease in inventories, compared to $32.7 million for the same period in 1989, and $12.6 million for first quarter 1990.

The cash balance at June 30, 1990 was $108 million, compared to $60 million at March 31, 1990.

The rehabilitation of the high-grade Magma Mine at Superior, Ariz., which was closed in 1982, is proceeding on schedule to begin production in the fall of 1990, supplying approximately 30 million pounds of copper annually.

Magma Copper Co. operates mines, concentrators and solvent extraction/electrowinning plants at San Manuel, Superior and Miami, Ariz., as well as a smelter, electrolytic refinery and rod plant at San Manuel.

BEVERLY HILLS, CALIF. (JULY 25) PR NEWSWIRE - Columbia Savings and Loan Association (NYSE: CSV) announced today that it had entered into an agreement to sell its portfolio of high yield securities to Gordon America L.P., a partnership associated with Gordon Investment Corporation, for a purchase price of $3 billion. The $3 billion purchase price represents a premium over current book value of the securities. Gordon America will pay $300 million in cash and execute a $2.7 billion note bearing interest at a rate of 10.5 percent per annum, which will be secured by the securities purchased. In addition, Gordon America will pay a facility fee of up to $50 million depending on the term of the loan. The agreement is subject to various corporate and regulatory approvals.

Edward G. Harshfield, president and CEO of Columbia, stated, "We are pleased that the auction process started several months ago has concluded successfully. Columbia, together with its financial advisor, the First Boston Corporation, received expressions of interest from over 50 potential investors. More than 30 entered into confidentiality agreements. Eight qualified bidders then undertook extensive due diligence investigations of the portfolio. From that group, Gordon America made the proposal that was financially superior and we have now completed definitive agreements which are satisfactory to Columbia in all respects."

Harshfield added, "We appreciate the straightforward and highly professional manner in which Gordon America conducted itself. Given the necessity of selling our high yield bond portfolio as mandated by FIRREA, I believe this transaction will enable us to maximize the value to be received from a sale of the entire portfolio. This process was open and fair. The results will speak for themselves."

Columbia is a California-chartered savings and loan association with 29 offices in Southern California.

#90206p8351 07/25/1990 ~PR Newswire

NEW YORK (JULY 25) PR NEWSWIRE - Avon Products Inc. (NYSE: AVP) reported a 20 percent increase in net income on a 2 percent increase in sales for the second quarter of 1990.

The beauty products company earned $47.5 million in the second quarter, up from $39.5 million in the second quarter of 1989. Earnings per share were up 21 percent to 68 cents on a primary basis and up 20 percent to 65 cents on a fully diluted basis, compared with 56 cents and 54 cents for the second quarter last year.

Sales in the second quarter were $793.3 million, compared with $777.7 million in the second quarter last year. Excluding the 1989 sales of Parfums Stern, which was sold in January, Avon sales were up 6 percent.

"Our second quarter strength reflects continuing profit improvement in U.S. operations and a continued reduction in interest expense," said James E. Preston, chairman and chief executive officer, "and we expect 1990 to be another good year for Avon."

Avon U.S. had a 29 percent increase in pretax profit for the second quarter on a 2 percent increase in sales. The division is continuing to benefit from the cost reduction measures begun last year, said Preston.

Sales of the U.S. division have been improving in 1990, following a softening in the last half of 1989, and Preston said the improvement is expected to continue through the year.

Avon International had a 10 percent increase in second quarter sales, but a 5 percent decrease in pretax profit. Adjusted for a 1989 value-added tax refund in the U.K., international pretax profits were up 15 percent in the second quarter.

Second quarter sales and profits in Latin America and in the Pacific Rim

continue to show strength, more than offsetting softness in earnings in Europe and the impact of a stronger dollar on Japanese results.

Consolidated unit sales, excluding Parfums Stern, were even with 1989. International units were up 2 percent, which was on top of a 25 percent increase last year. U.S. units were down 1 percent.

For the first half of 1990, net earnings were up 37 percent to $62.7 million, compared with $45.7 million in the first half of 1989. Sales were $1.5 billion in the first half of the year, compared with $1.48 billion in the same period last year. Earnings per share for the first half of 1990 were up 55 percent to 79 cents on a primary basis, compared with 51 cents last year.

Avon reduced its debt to $645 million on June 30, down from $1.09 billion at the end of the second quarter last year, and $838 million at year-end.

NEW YORK (JULY 25) PR NEWSWIRE - British Airways (ADS - NYSE: BAB) today applauded a U.K. ruling which gave the green light to the airline's bid to take a 20 percent shareholding in Sabena World Airlines.

Earlier the Monopolies and Mergers Commission (MMC) declared in their report that there would be substantial benefits for consumers from the proposed Brussels hub-and-spoke operation and that the joint venture for intercontinental services would increase choice.

In a statement, British Airways said: "We welcome this very positive decision from the MMC. It is a victory for the customer and for competition.

"The MMC has rejected the arguments of those who were opposed to the deal -- those opponents who only wanted substitution and were not interested in competition.

"Sabena World Airlines can now press ahead with greater confidence in implementing the plans which will provide benefits for travelers within Europe, especially in the U.K. regions."

The new regional airline will link 75 European cities. It will serve 12 regional U.K. cities -- Manchester, Glasgow, Edinburgh, Belfast, Norwich, Bristol, Cardiff, Birmingham, Southampton, East Midlands, Leeds-Bradford and Newcastle, as well as four London airports: Heathrow, Gatwick, Stansted and London City.

British Airways added that it was confident that the European Community competition authorities would also respond positively to the pan European initiative to give better and more varied services to the European customer.

#90206p8353 07/25/1990 ~PR Newswire

ATLANTA (JULY 25) PR NEWSWIRE - National Healthcare Inc. today announced the promotion of four executives to officers of the Atlanta-based hospital management corporation.

Vernon H. Blick III was named vice president, business office operations; Stan C. Broadway, vice president, third party reimbursement; James L. Caswell, vice president, hospital human resources; and Kenneth D. Hawkins, vice president-controller.

The promotions were based on contributions the men have made in the operational and financial restructuring of the corporation. Their efforts contributed to increased cash flow, recruitment and retention of top quality personnel, improved relationships with third party payors, and enhanced operating systems.

Blick, a 22-year industry veteran, has reduced accounts receivable by 33 percent, achieved a 20-day reduction in days outstanding, and established procedures to monitor and maximize cash flow resulting in improved management of accounts receivables for National Healthcare's 19 hospitals. Before joining the company in February 1989, Blick held management positions at Charter Medical, American Medical International and Hospital Affiliates International.

As liaison to third party payors, Broadway has made significant advances during his 19-month tenure with National Healthcare. He instituted corporate-wide procedures related to third party reimbursement, established systems to manage contractual calculations at each facility to ensure consistent financial reporting, and set up corporate appeal procedures, all resulting in improved management of third party issues. Broadway has 18 years of experience in the healthcare industry, and has worked for Charter Medical, Hospital Corporation of American and Blue Cross & Blue Shield.

In the past three years at National Healthcare, Hawkins developed and implemented corporate financial procedures, and accounting policies and systems, including corporate budget and cash management procedures. He participated in the company's restructuring efforts by coordinating the company's exchange offer for its 14.5 percent subordinated debentures and insurance of its 25 percent preferred stock.

National Healthcare Inc. is an Atlanta-based corporation which provides healthcare services to communities through ownership or management of general acute care hospitals and related healthcare services.

PITTBURGH (JULY 25) PR NEWSWIRE - Landmark Savings Association (AMEX: LSA) reported net income of $2.0 million or $.83 per common share for the second quarter of 1990 compared to $1.0 million or $.44 per common share for the same period in 1989.

Net income for the six months ended June 30, 1990, was $3.7 million or $1.55 per common share compared to $2.3 million or $.96 per common share for the first six months of 1989. The higher net income in the second quarter of 1990 was the combined result of higher net interest income, lower non-interest expenses, higher fee income, higher net gains on sales of loans, securities and loan servicing, and a gain on the sale of a branch office. In addition, Landmark made substantially higher provisions for credit losses and accrued higher income taxes during the second quarter compared to the same period in the prior year.

Net interest income increased 16 percent to $7.7 million for the second quarter of 1990 compared to $6.7 million for the same period in 1989. Landmark's interest rate margin continued to improve and averaged 2.34 percent during the second quarter of 1990 compared to 1.70 percent for the same quarter in 1989. Reductions in the cost of deposits and borrowings and the upward repricing of variable rate loans were the primary reasons for the improvement in the margin. J. Richard Eshleman, president and chief executive officer, stated, "I am pleased that our interest rate margin has reached this level with only a slight decrease in our retail deposit base during a time of increased rate competition and adverse thrift industry publicity."

Provisions for credit losses were $2,069,000 for the second quarter of 1990 compared to $550,000 for the same period in 1989. Net charge-offs during the quarter ended June 30, 1990, were $1.0 million compared to $688,000 in the second quarter of 1989. The higher net provisions reflect the company's previously stated intention of increasing general loan loss reserves and the downgrading in the classification of a large commercial business loan.

Landmark Savings Association is a Pennsylvania state-chartered, publicly owned savings association with assets of approximately $1.5 billion. It is the 171st largest thrift institution in the United States. Landmark common stock is listed on the American Stock Exchange (AMEX), trades under the symbol "LSA," and is reported in the financial press as "LdmkSv."

IRVINE, CA (JULY 25) PR NEWSWIRE - National Health Care Systems Inc. (NASDAQ: NHCS) reported today earnings of $314,000 or $.07 per share for the six month period ended June 30, 1990, a 74 percent increase over the same period last year.

Revenues for the quarter ended June 30, 1990, were $3,200,000 compared with $2,400,000 for the second quarter last year, a 34 percent increase. Net income for the quarter rose 30 percent to $163,000 or $.04 per share. Carl E. Bozzo, National Health Care's chief executive officer said, "We are committed to achieve long-term growth and we continue to concentrate our efforts on marketing and product development. As a result, we have seen enrollment in our plans increase from 176,000 members at this time last year to over 245,000 members currently."

Revenues for the six months ended June 30, 1990, increased 47 percent to $6,327,000 from $4,290,000 last year. Net income was $314,000 or $.07 per share for the six month period compared to $180,000 or $.04 per share last year. "The tremendous growth we have experienced over the past several quarters is expected to continue," said Bozzo. "We are currently negotiating with several large employer groups to provide our plans to their employees. These new contracts should bring continued significant improvements in revenues and earnings during the later part of 1990 and into 1991."

National Health Care Systems Inc. owns and operates DentiCare, a capitated prepaid dental plan operating throughout California. The company offers its prepaid dental benefit packages to employer groups as well as individuals and small groups as an alternative to indemnity insurance. DentiCare currently has over 2,000 contracting dentists and over 245,000 subscribers in their plans.

#90206p8362 07/25/1990 ~PR Newswire

IRVINE, CA (JULY 25) PR NEWSWIRE - Helionetics Inc. (AMEX: ZAP) announced today that on August 6 it expects to deliver to the Internal Revenue Service a customized $1.5-million power conversion system for what it will be the largest installation of its type in the world.

The rotary uninterruptable power system (RUPS), which will be installed in the IRS financial distribution facility in Martinsburg, Va., consists of three large one-megawatt motor generators in parallel operations. The total amount of energy supplied by the units would be sufficient to provide a town of 500 families with all its power needs.

The company was awarded the $1.5 million IRS contract in October 1989 for the power conversion system, which was manufactured by CPP, one of Helionetics' two power divisions.

David D. Mathisen, general manager of the company's power conversion operations, said, "We are very gratified that Helionetics was awarded such an important contract. Not only does it confirm our leading edge position in the power conversion equipment market, but it offers the potential for significant follow-on business."

Helionetics' product lines are designed around state-of-the-art 32-bit micro-processors and include vector, scalar, parallel and graphic processors which find applications in computer-aided design (CAD), modeling, simulation and three-dimensional fluid dynamics. The company also designs and manufactures solid-state and rotary power conditioning systems and hi-tech printed wiring boards.

CONTACT: David D. Mathisen of Helionetics, 714-261-8313, or Eugene G. Heller of Silverman, Heller Associates, 213-208-2550, for Helionetics.

COSTA MESA, CA (JULY 25) PR NEWSWIRE - Parker Automotive Corp. (NASDAQ: PKRA, PKRAW) today announced the signing of a major distribution agreement for the United Kingdom and the Republic of Ireland with a new affiliated company of Peacock and Archer Ltd. of Leek, Staffordshire. The agreement calls for shipments of approximately five million dollars in CarbonClean products, annually, over the next three years.

Peacock and Archer Ltd. (P & A) is a leading supplier of hydraulic systems throughout the U.K. and Ireland, servicing the entire geographical region through a three-hundred member distribution network. The new affiliate company will be named P & A Automotive Ltd., and will be located in Congleton, Cheshire. Alec Archer, P & A principal, will personally manage the new company.

"Recently the British Ministry of Transport adopted new regulations calling for annual emissions checks on all passenger and commercial vehicles," said Michael E. Parker, chairman of the board and chief executive officer of Parker Automotive. Parker went on to say, "P & A is the established partner we have been seeking to help us succeed in making CarbonClean part of the Transport Ministry's program. They have the distribution capabilities, the expertise and reputation in the repair industry throughout the country and throughout Ireland," added Parker. CarbonClean is a family of patented products that cleans harmful pollutants from the fuel systems of internal combustion engines. As a result of the cleaning process, exhaust emissions are dramatically reduced

engine performance and economy are restored, and overall operating efficiency improves.

This announcement closely follows the execution of a similar distribution agreement covering Asia, and signifies the company's continued success in establishing a quality distribution network for its CarbonClean products throughout the world. To date, the products are distributed in over 50 countries. Domestically, CarbonClean products are approved, and in some cases marketed, by major oil companies, auto makers and tool companies.

Parker Automotive Corp. is headquartered in Costa Mesa. Manufacturing facilities are in Fountain Valley, Calif., and sales offices are maintained worldwide.

NEW YORK (JULY 25) PR NEWSWIRE - At his first appearance before New York security analysts, Jack C. Goldfrank, newly elected president of Mead Imaging, gave his evaluation late yesterday of the outlook for the color copier market in general and Mead's Cycolor(R) technology.

Goldfrank said that he's been impressed with Cycolor technology which he characterized as a "major breakthrough in color imaging" and still quite new.

"Cycolor copier products have been on the market just a little over one year now, and we are learning more about the market every day," Goldfrank said. "One factor is clear -- the market for color copiers is growing much more slowly than the industry experts, and we, have been projecting." Even so, Goldfrank noted that Brother International's Cycolor Copier had moved into the number two position in color copier placements in the United States market by the end of last year.

In order to define Cycolor's sustainable strategic competitive position, Mead Imaging is in the midst of a detailed study, Goldfrank said. The study will evaluate the basics of the Cycolor business and will include updated assessments of growth trends, production costs and new applications of Cycolor technology for such devices as computer and video printers.

"The study is helping us assess how best to adapt the structure and size of Mead Imaging to market conditions as they develop," Goldfrank said. In responding to present market conditions Mead is also putting tight controls on discretionary expenses, he added.

The company will continue to push image quality to new levels. "Make no mistake, Cycolor quality is very good, especially considering the low hardware price and high reliability. But it's not the standard by which other systems are judged. Our goal is to become the world leader in image quality," Goldfrank said. Mead Imaging is also working more closely than ever with its hardware partners on product enhancements and market development, he added.

Three companies -- Brother, Gestetner Corporation and Seiko Mead -- are selling color copiers based on the use of Mead's Cycolor products. Sharp Corporation of Japan is also developing its version of such a copier. In addition, Noritsu America Corporation and Seiko Mead offer 35mm slide printers using Cycolor products.

Mead Imaging is a division of the Mead Corporation (NYSE: MEA), a major forest products and electronic publishing company, based in Dayton, Ohio.

CONTACT: Sharon Williamson of Mead Corporation, 513-495-3535.

#90206p8371 07/25/1990 ~PR Newswire

NEW YORK (JULY 25) PR NEWSWIRE - Norfolk Southern Corporation (NYSE: NSC) today reported second-quarter net income of $155.9 million, or 95 cents per common share, 10.2 percent lower than the second-quarter record of $173.7 million, or 99 cents per common share, earned in 1989.

Net income for the first half of 1990, $296.1 million, or $1.79 per common share, was the second-highest first half on record, down 3.7 percent from the $307.5 million, or $1.74 per common share, earned in the 1989 period. Both the first half and second quarter comparisons reflect the $13.6 million after-tax gain in April 1989 from the sale of a portion of Norfolk Southern's Trailer Train holdings. They also reflect the impact on earnings per share of Norfolk Southern's continuing stock purchase program.

"Second-quarter coal revenues continued strong," said Arnold B. McKinnon, chairman, president and chief executive officer, "posting a 7.2 percent gain over last year's second quarter. Merchandise revenues, on the other hand, declined by 3.2 percent, with only chemicals posting an increase."

Transportation operating revenues for the second quarter were $1.18 billion, a record for a second quarter and up 0.4 percent over the $1.17 billion in the comparable 1989 quarter. Railway operating revenues of $964.1 million were 0.9 percent higher than the $955.7 million in the second quarter of 1989. Motor carrier revenues were down 1.5 percent, from $218.5 million in 1989 to $215.3 million this year.

For the first half of 1990, total transportation operating revenues of

$2.32 billion were 1.4 percent higher than the $2.29 billion the previous year. First-half railway operating revenues of $1.92 billion increased 2.1 percent over the $1.88 billion in the previous year, while motor carrier revenues of $399.5 million declined 1.9 percent from the $407.2 million in the 1989 first half.

Total transportation operating expenses for the second quarter of 1990 were $951.9 million, up 1.1 percent from the $941.4 million last year. Railway operating expenses for the quarter increased 1.7 percent, while motor carrier expenses declined 0.8 percent. For the first six months, total transportation operating expenses increased 1.6 percent over the previous first half, with railway expenses up 2.1 percent and motor carrier expenses down 0.2 percent.

The railway operating ratio -- the percentage of revenues that goes into operating the railroads -- was 76.5 for the second quarter, compared with 75.9 in 1989, and was 77.3 for the first half in both years.

HARRISBURG, PA (JULY 25) PR NEWSWIRE - First Harrisburg Bancor Inc. (NASDAQ-NMS: FFHP) (FHB), parent company of First Federal Savings and Loan Association of Harrisburg, reported a second quarter loss of ($636,000) or ($.80) per share.

This compares to 1989 second quarter income of $438,000 or $.55 per share. The result was caused by a $2.4 million addition to loan loss and other reserves.

For the first half of the year, FHB reported a loss of ($347,000) or ($.44) per share, compared to a profit of $930,000 or $1.18 per share in 1989.

Robert H. Trewhella, president and chief executive officer, noted the addition to loan losses was in response to a recent examination by the Office of Thrift Supervision. In addition, Trewhella stated that the Pennsylvania legislature recently enacted amendments to the Pennsylvania Business Corporation law which strengthened and broadened existing antitakeover laws for Pennsylvania corporations. As part of these amendments, corporations were provided with the opportunity to elect not to be covered by certain provisions of the new law if board of director action were taken by July 26, 1990. The board of directors of the company voted recently to opt out of all permissible provisions of the new law as

they determined that the provisions were not in the best interest of the stockholders.

The board of directors declared a regular dividend of $.08 per share payable Aug. 15, 1990, to shareholders of record Aug. 3.

First Harrisburg Bancor is a Pennsylvania chartered stock company trading on the NASDAQ National Market System, under the symbol "FFHP."

#90206p8376 07/25/1990 ~PR Newswire

MINNEAPOLIS (JULY 25) PR NEWSWIRE - Network Systems Corporation (NASDAQ: NSCO) today announced unaudited results for the three months ended June 30 1990. Revenues for the period were $40,439,000, up 16 percent from revenues of $34,928,000 for the 1989 second quarter. Net income for the period was $5,334,000, or $.18 per share, up 49 percent from $3,585,000, or $.12 per share, earned in the comparable 1989 period.

Revenues for the six months were $76,138,000, up 17 percent from $65,163,000 for the equivalent 1989 period. Net income for the period was $9,239,000, or $.31 per share, a 75-percent increase over the $5,277,000, or $.18 per share, earned in the first half of 1989.

Revenues from product sales were $28.8 million, up 15 percent from $25.0 million for the quarter last year. Gross margins on product sales increased to 67 percent from 65 percent last year. Product sales include approximately $14 million of HYPERchannel-DX compared with $8 million in the June quarter a year ago. Service revenues, including maintenance contracts on installed equipment, increased 18 percent to $11.6 million from $9.9 million in 1989. The gross margin on service revenue was 29 percent, a slight decline from the 30 percent margin of a year ago.

"A strong performance from our subsidiaries, including record performances from the United Kingdom and Canada, were largely responsible for the revenue gains in the quarter," said Lyle D. Altman, president and chairman.

Network Systems Corporation, based in Minneapolis, makes high-performance data communications systems. The company's stock is traded on the NASDAQ National Market System.

MIDLAND, MICH. (JULY 25) PR NEWSWIRE - Dow Corning reported today sales and profits for the second quarter of 1990. Sales were $421.8 million, up 3 percent from the $410.5 million in the second quarter of 1989. Earnings of $40.4 million were reported, down 8 percent from $43.9 million.

"Sales were up, but only modestly," stated Edward Steinhoff, vice president and chief financial officer. "Europe has provided healthy growth, but in other parts of the world sales have been held back by slow demand for our products and weak local currencies. In the U.S., sales related to the automotive, construction and defense industries were particularly slow."

He added, "Expenses have increased as we start up major new laboratory and plant facilities critical to our long-term position."

Dow Corning is presently adding to its global research and development capabilities with new research centers in Midland, and in Yamakita, Japan.

A major increase in basic silicone capacity is now in the start-up phase in Carrollton, Ky. The company is also completing production capacity increases at several other of its plant sites around the world.

For the six months ending June 30, sales were $835.3 million, up 4 percent over the $799.9 million. Net income was $82.9 million, down 2 percent from the $85.0 million earned during the same period in 1989.

TAMPA, FL (JULY 25) PR NEWSWIRE - Due to a tight energy supply and high electricity demand throughout Florida, Tampa Electric Company is urging its customers to reduce their electricity use.

The company said it currently has the capacity to meet its customers' needs, but because of tight energy supplies throughout the state, the company urges voluntary conservation.

Among the conservation steps being urged by Tampa Electric: -- All residential and business customers are asked to raise their thermostats five degrees and to keep thermostat settings constant. -- Keep refrigerator and freezer doors closed. -- Minimize use of major appliances. -- Turn off water heaters, if possible, and all unncessary -- outdoor lighting, and pool and sprinkler pump systems. -- Keep cooking and bathing to a minimum.

NEW YORK (JULY 25) PR NEWSWIRE - King World Productions, Inc. (NYSE: KWP) today announced that its new newsmagazine strip currently titled "Only Yesterday" has been renamed "Instant Recall." "Instant Recall" will make its broadcast debut on Sept. 3, 1990.

"Instant Recall" is a King World production, hosted by news veteran John Palmer. Av Westin, senior vice president of reality based programming for King World, is co-executive producer of the show.

"Instant Recall" is a newsmagazine focusing on significant events past and present or on intense personal experiences told in a first person account by the actual participants in the event. Through a kaleidoscope of music and news, "Instant Recall" will provide viewers with stories reconstructed in a whole new perspective with incredible power and immediacy.

King World is the leading distributor of first run programming, including "Wheel of Fortune," "Jeopardy!," and "The Oprah Winfrey Show," the three highest rated series in first run syndication, and "Inside Edition," the eighth highest rated syndicated strip, which the company also produces. King World also distributes its own library of 68 feature films and 210 television programs, and through its barter subsidiary, Camelot

Entertainment Sales, Inc., sells national advertising for King World and the Disney Company television programming. In addition, King World is the owner of WIVB-TV, the CBS affiliate in Buffalo, N.Y.

SALT LAKE CITY (JULY 25) PR NEWSWIRE - Centurion Mines Corp. (NASDAQ: CTMC) reports today that it is into the 1990 exploration field season, and Centurion and Crown Resources Corp. (NASDAQ: CRRS), are involved in a large scale exploration program on Centurion's properties. At the present, approximately 20 geologists and geological assistants are engaged in full time exploration activities utilizing the most advanced geochemical, geological, and geophysical techniques available. Preliminary results from these tests are very favorable. Several large previously unknown zones of significant gold and silver mineralization have been discovered. Spenst Hansen, chief executive officer, says the company is excited about the direction that it is taking.

Summary The Centurion/Crown exploration work has already identified several highly perspective locations, each of which has an excellent possibility of containing gold ore deposits greater than one million ounces. An aggressive drilling program will begin in August, as soon as drill rigs are available. The management of both Centurion and Crown believes that the present exploration programs have a high probability of success. Centurion has contributed its properties to the venture, and Crown is contributing the necessary funding to explore these lands with the most advanced scientific methods available. Both companies are also contributing business and technical direction provided by their management and technical staffs. The two companies are working well together.

According to Hansen, Centurion is participating in an aggressive and exciting mineral exploration program that contains some of the best exploration properties anywhere, is now adequately funded, and is prospering with additional management and technical talent. The company expects the present business arrangement with Crown Resources to be highly beneficial to both Centurion and Crown, and expects major discoveries to be announced as the result of the current joint efforts.

#90206p8393 07/25/1990 ~PR Newswire

NEW YORK (JULY 25) PR NEWSWIRE - Witco Corporation (NYSE: WIT) today reported net income for the second quarter of 1990 of $23,278,000, or 98 cents per common share, compared to net income of $23,247,000, or 97 cents per common share, for the same period of 1989.

Net sales of $403,308,000 for the second quarter of 1990 decreased approximately two percent as compared to net sales of $413,423,000 for the same period of 1989. Included in net income for the second quarter of 1990 was $4,780,000, or 19 cents per common share, from the sale of land.

Net income for the first six months of 1990 was $37,812,000, or $1.61 per common share, a decrease of 13 percent compared to net income of $43,501,000, or $1.83 per common share for the same period of 1989.

Net sales of $798,556,000 for the first six months of 1990 decreased approximately two percent compared to net sales of $812,969,000 for the comparable prior year period. Included in net income for the first six months of 1989 was $3,110,000, or 12 cents per common share, from the sale of a product line.

"Though business was flat," Witco Chairman William Wishnick said, "we are encouraged by the second quarter improvement of both sales and net income over those of the prior two quarters." Witco manufactures specialty chemical and petroleum products and engineered materials with annual sales of approximately $1.6 billion.

#90206p8396 07/25/1990 ~PR Newswire

WILMINGTON, DE (JULY 25) PR NEWSWIRE - Du Pont (NYSE: DD) reported second quarter net income of $694 million, or $1.02 a share, compared with $714 million, or $1 a share, earned in the second quarter of 1989. While net income was slightly lower, the increase in earnings per share reflects a lower average number of common shares outstanding.

"Our performance overall was encouraging considering the continued weakness in the U.S. economy," said Edgar S. Woolard Jr., Du Pont chairman. "We expect this weakness to persist in the near term, so we continue to emphasize cost improvement programs as a means to improve profitability."

Total company sales for the quarter were $9.6 billion, four percent above sales of $9.3 billion in the same period last year. Combined sales for industrial products, fibers, polymers, and diversified businesses increased three percent, reflecting a four percent increase in selling prices with a one percent decline in volume. U.S. prices for these businesses were up four percent and prices in other regions were up three percent. U.S. volume decreased five percent, while volume in other regions increased six percent.

"The increase in volume from business outside the U.S. was almost entirely from growth in European markets," said Woolard. "This lends support to a key goal of expansion in Europe to double business by the mid-1990s."

Earnings increased in the Petroleum and Coal segments, while decreases were recorded in the other segments. Benefits from higher refined product margins, somewhat offset by lower crude oil prices, aided the Petroleum segment. Coal's earnings were higher as the second quarter of 1989 was adversely affected by unauthorized work stoppages by the United Mine Workers of America.

Industrial Products segment earnings decreased, reflecting lower sales of chloroflurocarbons (CFCs), and increased spending on the development of environmentally safe alternatives to CFCs. Lower demand and competitive price pressures in other industrial chemicals were also factors in the lower earnings.

Fibers segment earnings decreased, reflecting costs associated with the phaseout of the "Orlon" business and lower demand for apparel fibers in the U.S., carpet fibers in the United States and Canada, and nylon industrial yarn in several regions.

Earnings for the Polymers segment were lower, primarily due to costs associated with previously announced business restructurings, partly offset by improved earnings in Europe and strength in the automotive refinish market.

#90206p8401 07/25/1990 ~PR Newswire

WALTHAM, MASS. (JULY 25) PR NEWSWIRE - Thermo Instrument Systems Inc. (AMEX: THI) announced today that its Finnigan Corporation subsidiary is introducing a benchtop drug-testing system that is expected to set new standards for accuracy in human drug testing.

The company will unveil its ITS40(tm) Witness System at a news conference this morning in San Francisco (10:30 a.m. PDT), site of the American Association of Clinical Chemists convention.

The new system combines Finnigan's sensitive ITS40 gas chromotograph/mass spectrometer (GC/MS) with proprietary Witness(tm) software, the only programming developed specifically for the $230 million-per-year drug-testing market. Laboratories use GC/MS instruments to confirm positive drug-test results.

As corporate drug testing increases -- more than half of the Fortune 500 companies now have testing programs, according to the U.S. Chamber of Commerce -- laboratories are working overtime to meet demand, and accuracy is becoming a critical issue. The ITS40 Witness System addresses these concerns by rapidly and economically analyzing a sample's full mass spectra.

Most workplace testing laboratories use GC/MS to generate a partial mass spectrum for drug identification, a technique known as "selected ion monitoring" (SIM), which is the current standard for human testing. Surprisingly, routine drug tests performed on racehorses use a more accurate method called full spectrum technology.

Finnigan Corporation is the world's leading maker of mass spectrometers. Thermo Instrument Systems develops, manufactures and markets analytical instruments used to detect and monitor air pollution, radioactivity, complex chemical compounds, and toxic metals and other elements in a broad range of liquids and solids. The company also provides environmental science and engineering services, laboratory-based testing, and nuclear health physics services. Thermo Instrument Systems is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

TROY, Mich. (JULY 25) PR NEWSWIRE - Kelly Services, Inc. (NASDAQ: KELYA, KELYB), the nation's largest temporary help firm, today announced sales and earnings for the second quarter of 1990.

Terence E. Adderley, Kelly Services President and CEO, announced that sales for the quarter ended July 1, 1990, reached $368 million, an increase of 7 percent over the $343 million reported for the corresponding period in 1989.

Net earnings of $18.2 million were virtually unchanged from the $18.1 million reported for the second quarter of 1989. Earnings per share amounted to 60 cents in both periods.

"Generally, we were pleased with the second quarter considering the continued softening of the economy and the competitive pricing pressures that existed," said Adderley.

Comparative sales and earnings for the second quarters of 1990 and 1989 were:

EXTON, PA (JULY 25) PR NEWSWIRE - Intelligent Electronics (NASDAQ: INEL), the largest network of computer resellers in North America, announced today that it has signed an agreement to distribute the full line of Sun

Microsystems Inc.'s (NASDAQ: SUNW) computer products through authorized resellers in its network.

Sun products will be marketed through IE's recently announced Advanced Systems Division, which was created specifically to provide assistance to IE centers in purchasing, marketing, selling and supporting distributed computing solutions.

The addition of Sun, representing the first major enhancement to ASD's product line, will provide significant opportunities to IE centers. "Our resellers have been migrating toward client-server technologies," said IE President Michael R. Shabazian. "The addition of Sun will allow our network to provide and support leading edge Unix solutions to their customers."

"The timing is right for a strategic relationship," he said because of the market focus of IE's resellers and Sun's price performance ratios. "Most of our dealers serve small and mid-sized businesses," Shabazian noted. "Their existing customer base will be well served through the breadth of solutions available on Sun's Unix platform."

While he expected the number of Sun-authorized resellers in the IE network to increase due to the new agreement, Frank Slovenec, vice president of sales and marketing responsible for IE's Advanced Systems Division, emphasized that several IE dealers are currently Sun authorized.

Markets on which ASD will focus through its Sun products include mechanical CAD, electronic publishing, and business productivity applications.

More than 930 computer resellers belong to the Intelligent Electronics network, which is comprised of the three chains of Todays Computers Business Centers (TCBC), Entre' Computer Centers and Connecting Point of America Inc.

#90206p8408 07/25/1990 ~PR Newswire

CHARLOTTE, NC (JULY 25) PR NEWSWIRE - First Union National Bank is helping its customers speak the language of the international marketplace. First Union customers can now maintain domestic interest-bearing accounts in foreign currencies.

Prior to January 1, 1990, the Federal Reserve Board prohibited U.S. banks from offering domestic deposit accounts denominated in a foreign currency. Since the repeal of the Federal Reserve Board's regulation, First Union

has been offering the account to corporate customers. This month, First Union added an account for individuals due to strong demand.

"In our initial customer survey, we encountered a positive response from our natural market -- the small- to middle-market corporations with international business ties," said Louis A. "Jerry" Schmitt Jr., First Union senior vice president and head of the North Carolina bank's funds management division.

"Now we are pleased to offer individuals the ability to diversify their assets and take advantage of higher interest rates that may be available abroad," Schmitt said.

The accounts are similar to U.S. dollar money market accounts and have normal FDIC insurance. The interest rate depends on the type of currency deposited and the account balance. Currently, First Union's accounts are available in eight currencies: Australian dollars, British pounds, Canadian dollars, French francs, German marks, Italian lire, Japanese Yen, and Swiss francs.

The foreign currency money market account offers many benefits to corporations. Customers can maintain deposits, pay bills and receive payments without the expense of converting their currency to U.S. dollars. First Union's account pays interest on the full amount of foreign currency deposits maintained once a minimum deposit requirement has been met.

Since the foreign currency accounts are managed domestically, many of the operational problems related to holding a foreign currency account abroad have been alleviated. Prior to the availability of this domestic account, moving money overseas often involved time-consuming paperwork and the inconvenience of dealing with different time zones. Now customers can call during normal banking hours to initiate a transaction.

The account also gives customers the additional advantage of purchasing their foreign currency in larger aggregate amounts, which reduces their foreign exchange costs. Customers can keep the unused portion on deposit and earn interest.

First Union Corporation (NYSE: FTU FTUpr) reported assets of $38.4 billion as of June 30, 1990 and operates 779 banking offices in North Carolina, South Carolina, Georgia, Florida and Tennessee.

#90206p8415 07/25/1990 ~PR Newswire

NEW YORK (JULY 25) PR NEWSWIRE - Morgan Stanley & Co. Incorporated, as lead manager of the underwriting group, announced the public offering today of 875,000 shares of common stock of Healthcare Services Group, Inc. (NASDAQ-NMS: HCSG) at a price of $24.75 per share. All of the shares are being sold by the company.

The net proceeds from the sale of the shares will be used to fund the company's continued growth, to provide additional working capital and for general corporate purposes.

The company, headquartered in Huntingdon Valley, Pa., provides housekeeping, laundry and linen services to long-term care facilities, including nursing homes and retirement complexes. The company renders such services to approximately 415 facilities in 34 states.

ARLINGTON, VA. (JULY 25) PR NEWSWIRE - Joseph V. Junod has been appointed director/customer programs in the Newspaper Division of Gannett Co., Inc. (NYSE: GCI).

Junod was formerly managing editor/publications for Gannett. The announcement of Junod's appointment, which is effective Aug. 6, was made today by Gary L. Watson, president of the Community Newspaper Division, and Brian J. Donnelly, president of the Metro Newspaper Division.

In his new role, Junod will work closely with the Gannett newspapers to assist in strengthening customer-oriented programs and services in all departments.

"Over the past year, we've raised the consciousness about making customer satisfaction a primary objective in the '90s," Watson said. "Joe Junod will be the point person in working with our newspapers in implementing programs that make it possible to achieve this goal."

Junod, 43 joined Gannet in 1977 as a reporter and later line editor at the Fort Myers (Fla.) News-Press after holding similar positions at newspapers in Pennsylvania, North Carolina and Tennessee. In 1979 he joined the Ithaca (N.Y.) Journal as city editor, and in 1980 was appointed managing editor. Junod was assistant news editor of the Honolulu Star-Bulletin from 1985 to 1986. He came to corporate headquarters in Arlington in 1986 to serve as Gannett's representative to the Commission on the Bicentennial of the U.S. Constitution, chaired by retired U.S. Supreme Court Chief Justice Warren Burger.

In 1987, Junod was named managing editor/publications of Gannett, with responsibility for production of the company's annual report, company magazine and other internal and external publications.

Gannett is nationwide news and information company that publishes 83 daily newspapers, including USA Today, and 54 non-daily publications, including USA Weekend, a newspaper magazine. It operates 10 television stations, 15 radio stations, Gannett News Services and the largest outdoor advertising company in North America.

Gannett also has marketing, television news and program production, research satellite information systems and a national group of commercial printing facilities. Gannett has operations in 41 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong, Singapore and Switzerland.

SHELTON, CT (JULY 25) PR NEWSWIRE - Data Switch Corporation (NASDAQ: DASW) announced today that it has entered into a joint technology development and marketing agreement with Proteon, Inc., a producer of local area networking (LAN) and internetworking products.

Under terms of the agreement, Data Switch will incorporate Proteon technology and products into its lines of data processing and communications switching and control systems. Data Switch will announce and market in the fall LAN and internetworking products resulting from the new relationship.

"The trend toward total solutions," said Robert G. Gilbertson, Data Switch president and chief executive officer, "demands that a company's many departmental networks be integrated into the corporate computing structure to maximize availability, connectivity and cost-effectiveness of all information processing resources. Our direction is to offer single-source integrated LAN hardware and network software products that allow the data center manager to interconnect and control dissimilar LANs, including token ring and Ethernet.

"Our decision to form this relationship," Gilbertson added, "reflects our commitment to the LAN management business, and Proteon is clearly a pioneer and leader in emerging LAN and internetworking technologies."

Commenting for Proteon, Patrick Courtin, president and chief executive

officer, said: "We see the agreement as an opportunity to extend our LAN and internetworking expertise in keeping with the well- established Data Switch approach of providing the data center manager with comprehensive, enterprise-wide network management."

Proteon is a leading supplier of token ring PC LANs and internetworking products, such as routers, network interface cards and intelligent wire centers. The company recently introduced the p4100+ Bridging Router, which is the first multi-protocol router to provide 16-megabit/second backbone connectivity and IBM-compatible source routing.

Data Switch is in the business of managing connectivity and availability of large data centers, with products including channel and communications switches, host networking systems, channel extenders and network management products.

CONTACT: Linda L. Bachmann of Data Switch, 203-926-1801; or Maureen MacGregor of Proteon, 508-898-2136.

NEW YORK (JULY 25) PR NEWSWIRE - Corroon & Black Corporation (NYSE: CBL) today reported its results for the second quarter and six months ended June 30, 1990.

Net income for the second quarter of 1990 was $10,052,000, or $.51 per share, compared with net income in the second quarter of 1989 of $6,554,000 or $.35 per share. The 1990 figure includes a recovery of $3.4 million, or $.17 per share, of prior years' state income taxes.

Net income for the first six months of 1990 was $21,491,000, or $1.09 per share, compared with net income in the first six months of 1989 of $19,083,000, or $1.03 per share.

Revenue for the second quarter of 1990 was $118,521,000, compared with $118,482,000 for the second quarter of 1989. Revenue for the first six months of 1990 was $243,113,000, compared with $246,346,000 for the first six months of 1989, a decrease of 1 percent.

Second-quarter and six-month 1990 revenues were affected by a decline in premiums from the Corporation's life insurance company subsidiary. The decrease notwithstanding, that subsidiary remained profitable, and continues, as it did in the first quarter, to reap the benefits of having been reorganized in 1989. The life insurance company's revenues in the second quarter and first six months of 1990 were down $3,400,000 and $8,400,000, respectively, but operating expenses were also reduced, which resulted in increases in net income of $800,000 and $1,600,000,

respectively, over the same periods in 1989.

On June 4, 1990, Corroon & Black Corporation and Willis Faber p.l.c. announced a definitive agreement to merge to form one of the world's four largest insurance brokerage companies, to be known as Willis Corroon plc. The proposed transaction, which is subject to the approval of the shareholders of both corporations, will be effected through an issue of 7.8 Willis Corroon ordinary shares for every share of Corroon & Black common stock. Completion of the merger is expected in the third quarter of 1990.

Corroon & Black Corporation, headquartered in New York City, is one of the world's largest full-service insurance intermediaries, providing insurance brokerage, risk management services, reinsurance brokerage, and employee benefits, compensation, and actuarial consulting to individuals, local governments, professions, business, and industry. It has subsidiaries across the United States and affiliated offices throughout the world. The Corporation was founded in 1905 in New York City.

DALLAS (JULY 25) PR NEWSWIRE - Following a thorough review of several advertising agencies, Southwest Airlines' chairman of the board, chief executive officer and president, Herbert D. Kelleher, announced the retention today of incumbent GSD&M for creative advertising services. Camelot Communications, Inc. of Dallas, will continue to provide general marketing and media services.

Kelleher commended all the finalists for "outstanding strategy, imaginative creative proposals, and all-out effort." He noted that "GSD&M was selected by the review committee due to its 10-year track record of creative for Southwest Airlines and its excellent response to the review challenge." Kelleher also said, "GSD&M will be increasing their creative capacity to handle our business."

Southwest achieved the Department of Transportation's "major airline" status in 1989, when it posted revenues in excess of $1 billion. In addition, Southwest has one of the best on-time, baggage-handling, and customer satisfaction records in the airline industry. The carrier flied 100 Boeing 737 jets to 30 cities in 14 states and is the eighth largest independent airline in the United States based on number of customers boarded.

WAUKESHA, WI (JULY 25) PR NEWSWIRE - Hein-Werner Corp. (AMEX: HNW) today reported results for the second quarter ended June 29, 1990. Net sales decreased 10 percent to $26.8 million from $29.7 million in the year earlier quarter. Net income declined 39 percent to $506,000 from $832,000 in last year's second quarter. Earnings per common share decreased 46 percent to $.26 per share from $.48 per share.

Weighted average shares outstanding were 1,950,000 in the current quarter as compared to 1,736,000 in the second quarter of 1989.

For the six months ended June 30, 1990, net sales decreased 12 percent to $53.7 million from $61.2 million. Net income declined 48 percent to $994,000 from $1.9 million in the year-ago period. Earnings per share decreased 46 percent to $.51 per share from $.95 per share.

Joseph L. Dindorf, president and chief executive officer, said, "Record sales in Europe were recorded for the first half of 1990. Corporate gross margins for the period were the best in nearly three years. European and fluid power operations made excellent contributions to overall results, while automotive service equipment sales in North America continued to be soft."

Dindorf added, "Despite soft economic conditions domestically, Hein-Werner continues to invest in new product development, engineering and marketing which will better position the company when market conditions improve."

Hein-Werner Corp. is a leading worldwide manufacturer and marketer of collision repair, automotive service and fluid power equipment. The company has manufacturing operations and sales offices in the United States, Canada, Mexico and Europe, with distribution channels throughout the rest of the world.

#90206p8425 07/25/1990 ~PR Newswire

DALLAS (JULY 25) PR NEWSWIRE - EDS registered a 19-percent increase in net income and an 18-percent rise in earnings per share in the second quarter and signed major new business during the period, the global information technology services company announced today.

EDS, which is based in Dallas and has operations in 27 countries, said that for the quarter ended June 30, 1990, net income rose $20.4 million to $125.3 million, compared to $104.9 million in the corresponding period last year. Second-quarter revenue increased from $1.38 billion a year ago to $1.46 billion in 1990, an increase of $78.4 million.

The earnings of EDS (Electronic Data Systems Corporation), a wholly owned subsidiary of General Motors Corporation (NYSE: GM), are used to calculate the earnings per share of General Motors Class E common stock (NYSE symbol GME). Earnings per share increased $0.08 in the second quarter, from $0.44 a year ago to $0.52 in 1990.

"EDS had an excellent quarter, and we anticipate having a very good year," said Les Alberthal, EDS chairman, president and CEO. "We continue to look aggressively for new areas of growth."

Highlighting the second quarter were two agreements in energy- related industries, where EDS is the largest provider of information technology services.

In May, the Westmoreland Coal Company of Philadelphia awarded EDS a 10-year contract to handle all of the company's data-processing and communications operations. Under the agreement, EDS will develop and maintain Westmoreland's financial and business systems. Westmoreland is the nation's 15th largest coal producer and sixth largest coal exporter.

The following month, EDS was awarded a five-year contract to implement and operate an information system for the Westar Transmission Company, a subsidiary of American Oil and Gas Corporation. Westar, one of the largest intrastate gas pipeline companies in Texas, operates a 4,600-mile pipeline network in the Southwest. EDS will process information for the company's gas measurement, contract, pricing, volume allocations, gas purchasing, sales and transportation systems.

NEW YORK (JULY 25) PR NEWSWIRE - Medicis Pharmaceutical Corp. (NASDAQ: MDRXU, MDRXA, MDRXW), a newly public company specializing in dermatological products, announced today that it has obtained an exclusive license to market two unique dermatological products, a generic version of Retin-A(R) and two late stage acne research compounds. The agreement was reached with Syosset Laboratories Inc., a privately owned New York based manufacturer of physician dispensed dermatological products. In addition to the generic Retin-A product, whose application is in the final stages of FDA review, Medicis has acquired exclusive rights to a unique topical

antibiotic prescription product used in the treatment of acne and a special anti-bacterial prescription product used in the treatment of pseudo folliculitis barbae and shaving irritation. Medicis will proceed on completing the necessary clinical trials for the other two innovative late-stage acne research products. Medicis, through this agreement also has a non-exclusive right to market all other Syosset products.

"The anti-acne products give Medicis a strong presence in the $300 million acne market. Dermatologists see more patients for the treatment of acne than for any other condition. Combined with our own unique products Medicis now has a comprehensive line to assist dermatologists in treating millions of acne patients," said Jonah Shacknai, chairman and chief executive officer.

"In addition, the Retin-A formulation if approved by the FDA, will provide Medicis with an explosive opportunity to compete in the $150 million Retin-A market now controlled by Ortho Pharmaceutical Corp.," Shacknai added.

Medicis expects to have the anti-acne formulations in the marketplace this fall. The launch of these products will follow the August introduction of the Theraplex(TM) family of skin moisturizers and therapeutic shampoos. With its 20 person sales force focused entirely on the dermatology market, Medicis believes this agreement will add significantly to its sales in the fiscal year ended June 30, 1991.

Medicis Pharmaceutical Corp. became a public company on March 28, 1990 through the sale by D. H. Blair & Co., Inc. of 1.457 million units, each unit consisting of 6 shares plus 6 class A and class B warrants. The company raised $10.1 million from the offering and noted at that time that it "would use these proceeds to establish a sales force in dermatology, to begin a marketing campaign for its five new products, to repay short-term debt, to conduct research and development and to add to working capital."

Shacknai pointed out that "These dermatological products combined with the launch of our own Theraplex(TM) line in August, places us substantially ahead of our business plan."

MELBOURNE, FL (JULY 25) PR NEWSWIRE - The Department of the Air Force, Munitions Systems Division, Eglin Air Force Base, Fla., has awarded Harris Corporation (NYSE: HRS) a contract to produce advanced electronic warfare aircrew training systems to train combat crews. The initial value of the contract is $33.6 million, with options that could increase it to more

than $100 million.

The three-year contract will be completed by the Harris Government Communication Systems Division in Melbourne, Fla. The division is part of Harris' Electronic Systems Sector.

Under the contract, Harris will supply the Air Force with radar emitter units and master control groups, which make up the Mini-Multiple Threat Emitter Simulator (Mini-Mutes) systems. The portable systems will be used at various Air Force training sites.

The Mini-Mutes will help train combat crew members by simulating ground-based threat situations the crews might encounter. The system emits signals to the aircraft's own radar tracking equipment and allows the crews to practice proper response and evasion tactics in the mock situation, and provides feedback for scoring purposes.

Harris Corporation, with worldwide sales of more than $3 billion, is focused on four major businesses: advanced electronic systems, communications, semiconductors, and an office-equipment distribution network.

#90206p8431 07/25/1990 ~PR Newswire

DETROIT (JULY 25) PR NEWSWIRE - Consolidated net income of General Motors Acceptance Corporation for the second quarter of 1990, which includes the results of GMAC's financing, insurance and mortgage operations, totaled $302 million, compared with $269 million for the same period a year earlier, John R. Edman, chairman, announced today. For the first six months of 1990, consolidated net income totaled $638 million, compared with $625 million recorded a year earlier.

Net income from financing operations amounted to $267 million for the second quarter, compared with $224 million in 1989. The increase was due principally to lower borrowing costs in the United States. Insurance operations contributed $35 million in the 1990 period compared with $45 million earned in 1989. Lower underwriting income accounted for most of the decrease.

In the first six months of 1990, GMAC earned $568 million from financing operation and $70 million from insurance activities. Financing income was $32 million higher in the 1990 period compared to last year, while insurance results were $19 million lower.

Average borrowing costs in the United States were 8.60 percent in the second quarter of 1990 compared with 9.28 percent last year. This decline was due to lower short-term borrowing costs, which averaged 8.18 percent in the second quarter compared with 9.62 percent last year. Medium- and long-term debt averaged 9.00 percent vs. 8.87 percent in 1989.

GMAC financed or leased 541,000 new cars and trucks in the United States in the second quarter of 1990 and 1,067,000 for the first six months. This compares with 711,000 and 1,238,000 vehicles, respectively, during the prior year periods. Outside of the United States, 173,000 new vehicles were financed during the quarter, down 19,000 units from a year ago. Retail installment and lease financing contracts purchased worldwide totaled $11.8 billion in the second quarter and $22.9 billion during the first half, down $2.6 billion and $2.3 billion, respectively, from the corresponding 1989 periods.

Total earning assets were $103.0 billion at June 30, 1990, compared with $101.1 billion a year ago. Total finance receivables outstanding were $91.6 billion, compared with $88.2 billion a year ago. Retail and lease receivables outstanding totaled $75.3 billion at the end of June, compared with $73.0 billion at June 30, 1989.

#90206p8432 07/25/1990 ~PR Newswire

SCARBOROUGH, ME (JULY 25) PR NEWSWIRE - Hannaford Bros. Co. (NYSE: HRD), Northern New England's largest food retailer, today announced increased sales and earnings for the second quarter and six-months ended June 30, 1990. For the second quarter Hannaford achieved net sales and other revenues of $418,352,564, an increase of 12.1 percent over the $373,126,372 reported for the same period last year. Consolidated net earnings for the quarter amounted to $12,177,180, as compared to $10,713,567 for the same quarter in 1989, an increase of 13.7 percent. Consolidated net earnings per common share for the second quarter this year were 61 cents as compared to 55 cents last year.

During the first six months of 1990, net sales and other revenues increased by 12.6 percent from $721,151,424 in 1989, to $812,271,318 this year. Consolidated net earnings for the first half were $22,001,654. This represents an increase of 14.1 percent over last year's first half earnings of $19,290,442, before the cumulative effect of a change in inventory accounting. Consolidated net earnings per common share were $1.11 this year as compared to 99 cents last year before the effect of the accounting change. This year's net earnings represented an increase of 4.0 percent from net earnings of $21,164,442 in the first half last year. Last year's first half net earnings reflected $1,874,000 (net of income taxes of $1,239,000) for the cumulative effect of an inventory accounting change for periods prior to 1989. Consolidated net earnings per share were $1.11 for the first half this year as compared to $1.09 last year after reflecting 10 cents per share for the inventory accounting change.

James L. Moody, Jr., chairman and chief executive officer said, "Our second quarter results were excellent. We are pleased with our sales gains in light of a sluggish economy in Maine, New Hampshire and Massachusetts. Our earnings continued to increase in the quarter at a rate close to our long-term goal despite the economic slowdown and the increased expenses associated with the start-up of our new distribution center in Schodack, N.Y., which opened in June. It should also be noted that our earnings increase in the second quarter last year was exceptionally high (up 52 percent), thereby making this year's comparative increase even more difficult to obtain."

LAPEER, MI (JULY 25) PR NEWSWIRE - Durakon Industries, Inc., manufacturer

of the Duraliner pick-up truck bedliner, announced today that it has entered into an agreement with American Aftermarket Inc. to sell and distribute Durakon products in the eastern United States.

As part of the agreement, American Aftermarket Inc. has purchased Durakon's distribution rights in the eastern United States as well as various lease-hold and other assets of 11 Durakon company-managed warehouses. American Aftermarket Inc. will sell and distribute Durakon products as well as other truck accessories.

The Durakon warehouse operations included in the agreement are located in Albany, N.Y.; Boston; Charleston, W.Va.; Westland and Grand Rapids, Mich.; Baltimore; Philadelphia; Atlanta; Lakeland and Fort Lauderdale, Fla., and New Orleans.

"We entered into this agreement as part of our strategy to distribute Durakon products through independent distributors rather than through company-owned warehouses," said David Laro, president of Durakon Industries, Inc.

This agreement is similar to Durakon's recently announced agreement with Custom Truck of California, Inc., and with Monroe Truck Equipment of Wisconsin to become independent distributors for Durakon products.

Ken Thompson, president of American Aftermarket Inc. said, "We're excited with this new agreement and the opportunity to represent Durakon in the Eastern United States."

Durakon Industries, Inc. is the world's leading manufacturer and distributor of truck bedliners and rollback carriers. A publicly held company, it is traded on the NASDAQ National Market System.

HOUSTON (JULY 25) PR NEWSWIRE - Duddlesten Realty Acquisition Fund I has purchased its second Houston multi-family property, according to Donald K. Reed, president of Duddlesten Realty Advisors, Inc. The $100 million acquisition fund was announced this March by Houston-based Duddlesten Realty Advisors, Inc. and Province, R.I.-based Paul Revere Life Insurance Company.

The fund has purchased the 288-unit Teal Garden Apartments and plans extensive renovations. "We intend to spend about $1.5 million to renovate the project, which will upgrade it to a class A property," Reed said. Teal Garden, at 5100 FM 1960 West, currently has about a 90

percent occupancy.

The seller was New York-based Home Life Insurance Company. Bob Rauch, Rauch-King Associates, represented the seller and Reed represented the buyer in the transaction. Duddlesten Management Corporation, a sister company of Duddlesten Realty Advisors, will manage the property.

In March, Duddlesten Realty Advisors, Inc. and Paul Revere Life Insurance Company announced the formation of Duddlesten Realty Acquisition Fund I and the purchase of the 192-unit Sunscape Apartments, a class A property in the Clear Lake area.

The acquisition fund plans to acquire approximately $100 million of Houston-area multi-family properties over a two-year period. The fund is believed to be the first in which funds are committed by a single investor to a local operator prior to identifying the properties to be acquired. Funding for Duddlesten Realty Acquisition Fund I was arranged by Sonnenblick-Goldman Corporation, a New York-based real estate investment banker.

Duddlesten Realty Advisors, Inc. was established three years ago to provide the services of disposition and acquisition of income-producing real estate for its institutional clients. The company also provides financial consultation, investment analysis and marketing expertise.

NEW YORK (JULY 25) PR NEWSWIRE - A center to advance diagnostic imaging - one of medicine's newest and most promising frontiers - will be opened at the Massachusetts General Hospital (MGH).

The establishment of the center was reported today with the announcement that Sterling Drug Inc. will provide more than $18 million over a six-year period for the center's support.

Scientists and physicians at the new Center for Imaging and Pharmaceutical Research (CIPR) will seek to improve patient care through the development of pharmaceuticals that will facilitate high-technology diagnostic procedures such as magnetic resonance imaging (MRI), magnetic resonance spectroscopy (MRS), positron emission tomography (PET), and ultrasonography (US).

Announcement of the collaborative effort was made by Dr. James Thrall, radiologist-in-chief at MGH and professor of radiology at Harvard Medical

School, and Dr. Eugene Cordes, president of the Sterling Research Group.

Thrall said that a search has been initiated for a director of the center and other staff members. The director will be chosen by a Harvard Medical School Committee and will also be named professor of radiology at Harvard Medical School.

"The study of imaging devices and pharmaceutical imaging agents represents a very exciting topic in medical research today," said Thrall. "Imaging technology is becoming an increasingly powerful and cost-effective tool for medical diagnosis and treatment. It is accurate, safe, and applicable to all organ systems and disease processes."

Cordes said, "CIPR is one of several new strategic initiatives that Sterling has taken to build and strengthen its presence in the area of diagnostic imaging."

The agreement preserves for MGH and its scientists their academic freedom to choose research projects, and to decide when to publish research results in scientific journals of their own choosing.

Working at the new center will be a multidisciplinary team of MGH basic scientists and clinicians. Representing the areas of radiology, pharmacology, physics, chemistry, physiology, engineering, statistics, and epidemiology, researchers at the center will study interactions of various pharmaceuticals, healthy and diseased tissue, and non-invasive diagnostic procedures. They will also work on the development of new and better drugs for use with the diagnostic imaging modalities.

CONTACT: John H. Wood, (212) 907-3002, or Terry G. Kelley, (212) 907-3009, both of Sterling Drug.

DALLAS (JULY 25) PR NEWSWIRE - Grace Drilling Company, a subsidiary of Grace Energy Corporation (NYSE: GEG), led the U.S. onshore contract drilling industry in the number of deep wells drilled in 1989, according to the industry's recent annual deep well survey published by Petroleum Engineer International. Grace Drilling completed 28 wells at depths greater than 15,000 ft. in the United States in 1989 -- more than any other contractor.

Although 63 contractors were active in deep onshore drilling last year, Grace Drilling's 28 wells represent one out of every 10 of the 307 deep wells drilled in the U.S. Grace Drilling completed deep wells in Texas, Louisiana, Mississippi, Oklahoma, New Mexico, Wyoming and Utah.

"We are pleased by the confidence shown in us by the operators. We were able to work 145, or about 80 percent, of our rigs in 1989. More than 90 percent of our rigs have worked in the last two years," stated Richard A. Zartler, president of Grace Drilling. "With activity picking up, the industry will need contractors who can deliver well-maintained equipment with top talent to run it. We're confident that the second half of 1990 will be as good as or better than the first half."

Grace Drilling Company is active in turnkey, footage, and daywork operations. Grace Drilling set the pace in land drilling, with 183 drilling rigs in the United States.

Grace Energy Corporation, headquartered in Dallas, is a diversified energy holding company whose subsidiaries are engaged in supplying services and equipment to the petroleum industry; in the exploration for and development of oil and natural gas; and in coal mining.

BURLINGTON, ONT (JULY 25) PR NEWSWIRE - The board of directors of Laidlaw Inc. (NASDAQ: LDMFB) has appointed Donald K. Jackson its chief executive officer effective Aug. 1, 1990. Jackson joined Laidlaw on Aug. 1, 1989, as executive vice president and became its president in November 1989, assuming responsibility for the company's operating divisions.

The board of directors also appointed Peter N.T. Widdrington to the position of chairman of the board. Widdrington has been a director of Laidlaw since 1986. He is chairman of the board of John Labatt Limited.

Michael G. DeGroote remains a director of Laidlaw and will continue in an advisory capacity to the chief executive officer and other senior executive officers of the company.

Laidlaw Inc. is a diversified service company. It is the third largest waste services company in North America, operating in 24 states and seven Canadian provinces. The passenger services group is North America's largest school bus operator, operating in 20 states and three Canadian provinces.

LUMBERTON, NC (JULY 25) PR NEWSWIRE - Southern National Corporation (NASDAQ-NMS: SNAT) announced today it is investing $500,000 as a limited partner in a low-income housing development for the elderly in Sanford.

As part of its ongoing commitment to meeting the requirements of the Community Reinvestment Act, Southern National as a limited partner has entered into a limited partnership with Raleigh developers George F. Marshall and Gordon L. Blackwell to provide apartment housing for senior citizens at the old Carolina Hotel in downtown Sanford.

As a limited partner, Southern National is making the principal investment in the project. However, the project will be managed and operated through the Marshall-Blackwell Group in Raleigh.

"This is a project we feel extremely proud to be part of," said Chairman Hector MacLean. "It's an excellent opportunity for us to help a community care and look after its own."

The hotel, which has been renamed the Sanford Makepeace Apartments, is part of Sanford's Historic District. It is being renovated at a cost of about $1.8 million. The second, third and fourth floors of the hotel have been remodeled into 24 one-bedroom apartments. The first floor will provide a lobby for incoming traffic and commercial rental space for leasing.

A ribbon-cutting ceremony has been planned for 3 p.m., Sunday with the general public invited to attend Open House at 4 p.m.

The developers of the property are Millard Stallings, Daniel Heavner and T.W. Shirley of Smithfield.

ADDISON, IL (JULY 25) PR NEWSWIRE - Hako Minuteman, Inc. (NASDAQ-NMS: HAKO), today reported net income for the second quarter ended June 30, 1990, was down 43.5 percent to $503,000, or 14 cents per share, from $890,000, or 24 cents per share, in the comparable 1989 period. Net sales were $7,438,000, a 17.7 percent decrease from $9,039,000 in the 1989 second quarter, the best three month period in the company's history.

For the six months ended June 30, 1990, net income was $1,142,000, or 31 cents per share, down 28.8 percent from $1,604,000, or 44 cents per share, in the 1989 first half. Net sales were off 9 percent to $15,221,000 from $16,751,000 in the comparable 1989 period.

Jerome E. Rau, president and chief executive officer, said that, as was expected, the soft economy continued to affect the company's business in the second quarter.

"This had a dramatic and unexpected effect on the asbestos abatement industry with the result that sales volume in the 1990 second quarter was only about 50 percent of the volume in the year earlier period, decreasing sales of our asbestos abatement products and resulting in a less favorable product mix."

Net income in the 1990 second quarter was also affected by lower sales volume, higher sales promotion expenses, and increases in allowances for uncollectible accounts. Rau said this was offset, somewhat, by a more timely and accurate method used for product costing.

He said the company remains confident that sales for the 1990 second half will increase significantly due to the introduction of two new compact automatic scrubbers which are priced competitively and have been well received by customers as well as new business that should ship in the latter part of the year.

Dividend Declared The board of directors has declared a dividend of 5 cents per share on the company's common stock, payable Aug. 15, 1990, to shareholders of record on July 30, 1990. Hako Minuteman paid an initial dividend of 5 cents per share on Nov. 15, 1988, and has paid quarterly dividends of 5 cents per share since that time.

Headquartered in Addison, Hako Minuteman, Inc., manufactures one of the most complete lines of commercial and industrial vacuums, floor and carpet care equipment and chemical cleaning and coating products in the United States and Canada.

CONCORD, MA (JULY 25) PR NEWSWIRE - Nuclear Metals, Inc., (NASDAQ: NUCM), Concord, Mass.-based manufacturer of specialized metal products, today announced financial results for the third quarter ended June 30, 1990.

Net income for the quarter was $384,000 or 15 cents per share on average

shares outstanding of 2,409,887. This compares with a net income of $717,000 or 28 cents per share on average shares outstanding of 2,623,843 for the third quarter of fiscal 1989.

Sales for the third quarter were $12,993,000 up from $11,849,000 for the third quarter last year.

Net income for the nine-month period was $676,000 or 27 cents per share compared to a net income of $1,642,000 or 63 cents per share for the same period a year earlier.

Nine-month sales were $34,128,000 compared to the same period last year of $36,125,000.

Backlog at the end of the third quarter was $21.3 million compared to the third quarter 1989 ending backlog of $22.3 million.

HERZLIA, ISRAEL (JULY 25) PR NEWSWIRE - Scitex Corporation Ltd. (NASDAQ: SCIXF) today announced that its board of directors had voted to recommend to the shareholders of the company at an extraordinary general meeting to be held on Aug. 24, 1990, in Herzlia to increase the authorized share capital of the company and to approve the distribution of a stock dividend (bonus shares) at the rate of one share for each share of the company held as at the close of business on Aug. 24, 1990. The board of directors has determined that the record date for receiving notice and voting at the said general meeting be the close of business on July 27, 1990. If the proposed action is approved by the shareholders, the shares of the company will be traded post-stock dividend beginning Monday, Aug. 27, 1990.

The company believes that the stock dividend will contribute towards broadening the company's equity ownership base.

Scitex Corporation Ltd. designs, develops, manufactures, markets and services interactive computer imaging systems used primarily in the printing and publishing industries. Scitex products are also used in the cartographic and textile industries, as well as for certain applications in the printed circuit board manufacturing and seismic exploration industries. Scitex operates marketing, sales and service divisions in North America, Europe and Japan.

NORTH FALMOUTH, MA (JULY 25) PR NEWSWIRE - Benthos, Inc. (OTC/Pink Sheets) today announced sales of $5,634,000 for the nine months ended July 1, 1990, a decrease of about 10 percent as compared with sales of

$6,251,000 for the first nine months of last year. Net income for the nine months of fiscal 1990 was $82,000 or 10 cents per share as compared with $313,000 or 31 cents per share for the comparable period of fiscal 1989.

Third quarter sales for fiscal 1990 were $2,020,000, about equal to sales in the second quarter, although lower than sales of $2,394,000 for the third quarter of last year. Net income for the third quarter was $47,000 or 6 cents per share as compared with net income of $156,000 or 15 cents per share in the same quarter of last year. Order backlog at the end of the third quarter was $2.6 million as compared with $2.0 million at the same time last year.

Benthos, Inc. designs, manufactures, sells and services oceanographic equipment for underwater exploration and defense, and electronic inspection equipment for the on-line testing of the seal integrity of food beverage, medical, and petrochemical consumer packages.

SUNNYVALE, CALIF. (JULY 25) PR NEWSWIRE - Weitek Corp. (NASDAQ: WWTK) today announced that its 3172 SPARC math coprocessor is the standard floating point unit in Sun Microsystem's newest SPARC workstation, the SPARCstation IPC. The IPC is the first fully configured color RISC workstation priced below $10,000. With this design win, Weitek's floating point units are standard in Sun's entire line of industry-leading

SPARCstation desktop workstations.

The Weitek 3172 SPARC coprocessor, designed specifically for Sun, is derived from Weitek's 3170 coprocessor, a standard Weitek product used in the SPARCstation 1+. Weitek's 3172 SPARC floating-point unit delivers 1.7 double precision Linpack MFLOPS (million of floating-point operations per second) when used in the 25 MHz SPARCstation IPC. The 3172 is also used in Sun's 20 MHz SPARCstation SLC, where it delivers 1.2 MFLOPS. Both 3172-based Sun workstations deliver the highest floating-point performance for machines in their respective price ranges, with entry prices under $10,000 for the IPC and under $5,000 for the SLC.

"This design win demonstrates our continuing ability to meet the needs of the market for high performance numerics in cost-sensitive applications," said Arthur J. Collmeyer, president of Weitek.

Weitek is the leading supplier of high-performance numeric processing solutions, and developed the first single-chip floating-point coprocessors for the SPARC architecture. The company's VLSI circuits and development tools power a broad range of computer systems from minisupercomputers and engineering workstations to desktop computers and page printers.

WASHINGTON (JULY 25) PR NEWSWIRE - Craig E. Weatherup, president and chief executive officer of Pepsi-Cola Company, announced today at a national press conference the formation of the largest minority-controlled Pepsi-Cola franchise in the United States.

The new $60 million soft drink franchise -- Pepsi-Cola of Washington, D.C. L.P. -- serving the metropolitan District of Columbia and a portion of Prince Georges County, Md., will be operated under an historic partnership that unites Pepsi with two prominent businesspeople: Earl G. Graves, one of the nation's leading entrepreneurs and publisher of Black Enterprise magazine, and Earvin "Magic" Johnson, 11-year veteran of the National Basketball Association's Los Angeles Lakers.

"Pepsi-Cola has long been committed to building a company and a workplace rich in cultural and ethnic diversity," said Weatherup. "Today's announcement marks the latest milestone in that tradition."

Weatherup has been a driving force behind Pepsi's acclaimed minority business and educational initiatives, including the Pepsi-Cola Minority Business Enterprise (MBE) program, which has resulted in Pepsi spending more than $325 million on products and services offered by minority- owned

businesses in the last eight years.

Weatherup continued: "As we enter into this unique partnership of Graves and Johnson with Pepsi, we do much more than consummate another important business deal. Rather, this partnership is indeed a reaffirmation of Pepsi-Cola Company's commitment to broaden substantially the level of our involvement with the minority business community."

Commenting further on the announcement, Weatherup called the Pepsi-Graves-Johnson partnership a powerful combination matching precisely the right individuals to the right opportunities.

"We are pleased by the two principals we were able to attract to this new partnership," noted Weatherup. "Both Earl Graves and Earvin Johnson possess the business acumen, name recognition and prominence that are sure to serve the best interests of Pepsi and the D.C. community."

PHILADELPHIA (JULY 25) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) is investing $3.9 million to upgrade sections of its lines in Massachusetts.

The work, scheduled to be completed this summer, includes the installation of 38,300 crossties and the surfacing (raising and smoothing) of almost 100 miles of supporting railbed.

The project, part of Conrail's capital program for 1990, is being conducted along sections of the Boston Line, between Boston and Albany, N.Y.; the Framingham Secondary, between Mansfield and North Framingham; the Athol Industrial Track, in Springfield; and the Fitchburg Secondary, between Fitchburg and Framingham Center.

Commodities carried on these lines include: automobiles, auto parts, chemicals, coal, feeds, fertilizers, grain, lumber, paper products, sand, and steel. Conrail's high-speed, high priority TrailVan intermodal trains carrying a wide variety of consumer goods, Massachusetts Bay Transportation Authority commuter trains and Amtrak intercity passenger trains also use the Boston Line.

"Conrail's capital program enables us to provide safe, reliable and customer-responsive service," said James A. Hagen, Conrail's chairman, president and chief executive officer. "Projects such as this maintain the sound track structure essential to Conrail's ability to compete in the transportation marketplace."

#90206p8470 07/25/1990 ~PR Newswire

FREMONT, MICH. (JULY 25) PR NEWSWIRE - Gerber Products Company (NYSE: GEB) today announced (unaudited) record sales and earnings for the first quarter ended June 30, 1990. Net earnings for the quarter increased 16.6 percent to $31,267,000 from $26,817,000, while earnings per share rose 18.6 percent to $.83 from $.70 on slightly lower shares.

Sales for the quarter rose 12.1 percent to $295,906,000 from $263,887,000 for the comparable quarter last year.

Al Piergallini, chairman, president, and chief executive officer said, "Results for the quarter were favorably impacted by strong baby food volume gains. Successful baby food promotions and increased distribution in the first quarter contributed to a volume increase of 6 percent. While we are certainly pleased at these results, there are indications that some of this increase may have resulted from advance buying by our customers. Consequently, the second-quarter baby food volume is expected to be comparable to the previous year. Nevertheless, for the full year, we are projecting volume gains to be in excess of those projected for the industry.

"Operating expenses for the Apparel Group increased at a lower rate than sales, resulting in a substantial improvement in operating income. The International Division and Gerber Life likewise reported substantially higher revenues and operating income.

We are delighted to start the year with such a strong showing. Our efforts to improve productivity throughout the organization are continuing and are expected to contribute to another record year," Piergallini concluded.

NEW YORK (JULY 25) PR NEWSWIRE - Morgan Grenfell Group PLC and Gleacher & Co. today announced the formation of Gleacher Morgan Grenfell Inc. (GMG), through which they intend to conduct all their U.S. merger and acquisition business and corporate advisory services as well as cross-border transactions between the United States and the rest of the world.

Morgan Grenfell is a leading international merchant bank which became a

member of the Deutsche Bank Group in December 1989. Morgan Grenfell is one of the foremost London merger and acquisition and advisory firms and has responsibility for the development of Deutsche Bank's merger and acquisition business throughout the world. In addition to its U.K. and German presence, Morgan Grenfell maintains local teams across Continental Europe and in Japan, Southeast Asia and Australia.

Gleacher & Co., formed in January 1990 by Eric Gleacher, formerly world-wide head of mergers and acquisitions at Morgan Stanley & Co., is a financial advisory firm specializing in merger and acquisition assignments with a current staff of 20. Gleacher & Co. has been retained in a number of transactions and recently served as financial advisor to ConAgra Inc. in connection with its announced agreement to purchase Beatrice Company from Kohlberg Kravis Roberts for $3.3 billion, one of the largest U.S. transactions announced in 1990.

John Craven, chairman of Morgan Grenfell Group and a member of the board of managing directors of Deutsche Bank, said: "The formation of GMG represents an important step in the development of our global M&A business. The advantages for our clients are substantial, combining the M&A experience and contacts of Gleacher & Co. in the United States and the skills and reach of Morgan Grenfell and Deutsche Bank elsewhere in the world, particularly in Europe. We will now be able to service clients all around the world to the highest standard -- a necessity as the advisory business becomes increasingly complex and international."

Eric Gleacher will join the board of directors of Morgan Grenfell Group, and representatives of Morgan Grenfell and Deutsche Bank will join the board of GMG.

In addition to GMG, Morgan Grenfell's interests in the United States will continue to include the securities brokerage business of C.J. Lawrence, Morgan Grenfell Inc., the institutional investment management business of Morgan Grenfell Capital Management Inc., and the project advisory business of Morgan Grenfell Capital Financing Co.

PHILADELPHIA (JULY 25) PR NEWSWIRE - O'Brien Energy Systems, Inc. (AMEX: OBS), a leading energy project developer, announced today that lawsuits have been filed to resolve contractual disputes with its turnkey general

contractor, Hawker Siddeley Power Engineering, Inc., concerning O'Brien's New Jersey cogeneration projects.

"Construction is expected to be complete by late August at Newark and December at Parlin," Bruce Levy, O'Brien vice president, noted. Hawker Siddeley is continuing work on the projects and has stated in filed court papers that it intends to complete construction. Hawker Siddeley has been paying liquidated delay damages to O'Brien since April.

"Hawker Siddeley's English parent has guaranteed the contractual performance of these contracts. O'Brien Energy does not expect the contract dispute to interfere with the construction schedule at these or any other projects," Levy added.

"We completed our equity contribution to the Newark project in June," he reported. "Contract disputes with builders are a fact of life and many times can only be resolved through arbitration or the courts. We believe any claims against O'Brien are largely without merit."

#90206p8473 07/25/1990 ~PR Newswire

STAMFORD, CT (JULY 25) PR NEWSWIRE - Cogintronics Corporation (AMEX: CGN) today announced net income of $453,000, or $.20 per share, for the three months ended June 30, 1990 compared to net income of $211,000, or $.09 per share, for the same period in 1989. Included in net income is an extraordinary credit of $161,000, or $.07 per share, in 1990 and $81,000, or $.03 per share, in 1989 attributable to the utilization of operating loss carryforwards.

Revenues for the second quarter were $4,474,000 in 1990, up from $4,141,000 in 1989.

For the six months ended June 30, 1990, net income was $700,000, or $.31 per share, versus net income of $575,000, or $.25 per share, for the same period in 1989. Net income for the six month period includes an extraordinary credit of $250,000, or $.11 per share, and $191,000, or $.08 per share, in 1989. Revenues for the six months ended June 30, 1990 were $8,847,000, up from $8,502,000 for the comparable period in 1989.

Matthew J. Flanigan, president and CEO of Cognitronics Corporation, stated "Sales of voice processing products reached a new record level of $2.9 million in the second quarter of 1990, up 15 percent over the same period of 1989, which together with a continuing increase in sales of machined parts, were partially offset by lower sales of scanning products. This is

the second consecutive quarter in which sales of voice processing products reached a new record level, reflecting the continued growing acceptance of the company's voice processing products by the domestic telephone industry. The company will continue its marketing strategy to maintain its strong position within this growing market.

"The substantially improved operating profit in the current quarter over the same quarter in 1989 and the first quarter of 1990 is primarily attributable to improved gross margins of voice processing products and, also, the higher sales volume in the current quarter compared to the same quarter in 1989. The improved gross margins reflect the production efficiencies associated with the higher sales volume and a shift in the product sales mix to higher margin products.

Cognitronics Corporation is a leading manufacturer and supplier of voice processing equipment, including telephone announcement products and interactive voice responses (IVR) systems, to telephone operating companies, OEMs and commercial users. Cognitronics also manufactures optical scanning and image processing systems and precision machined parts.

#90206p8476 07/25/1990 ~PR Newswire

HERSHEY, PA (JULY 25) PR NEWSWIRE - Hershey Foods Corp. (NYSE: HSY) today announced record consolidated net sales and earnings for the second quarter ended July 1, 1990.

Net sales were $535,861,000 compared with $485,473,000 for the second quarter of 1989. Net income was $65,844,000 or $.73 per share, compared with $25,080,000 or $.28 per share, for the same quarter last year.

Net sales for the first six months of 1990 were $1,217,105,000 compared with $1,057,718,000 in the first half of 1989. Net income was $112,934,000 or $1.25 per share, compared with $64,769,000 or $.72 per share, for the first half of 1989.

Net income for the second quarter and first half of 1990 includes a one-time, after-tax gain of $35,295,000, or $.39 per share, as a result of the sale of the corporation's interest in AB Marabou, a Swedish confectionery company, which was consummated on May 23, 1990. Weighted average shares outstanding were 90,186,336 for all periods.

"Our second quarter results were excellent," said Richard A. Zimmerman, chairman and chief executive officer. "Consolidated net sales grew nicely as a result of volume growth posted by all operating divisions, as well as the acquisition of Ronzoni Foods Corp. in February 1990. All of

our divisions also achieved increased earnings in the quarter as the sales growth was amplified by generally lower commodity costs and manufacturing efficiencies.

"Our results for the second quarter and first six months are very gratifying because they have been achieved in the context of accelerated and costly new product activity. We are well positioned for the all-important second half and fully expect 1990 to be another record year for Hershey Foods Corporation," Zimmerman concluded.

#90206p8477 07/25/1990 ~PR Newswire

HAMPTON, NH (JULY 25) PR NEWSWIRE - Reflecting the previously announced sales of land in Hawaii and interests in two trash-to-energy facilities, Henley Properties, Inc. (NASDAQ: HENP) achieved net income of $80 million, or $3.82 per share, on revenues of $58.2 million in the three-month period ended June 30, 1990.

In the corresponding period of 1989, the company reported net income of $4.8 million, or 23 cents per share, on revenues of $46.8 million.

Second-quarter 1990 results include the sale of 90 percent of Henley Properties' interest in about 3,500 acres of land on the island of Hawaii for $42 million, costs related to personnel reductions and asset revaluations, as well as the sale of the company's interests in two trash-to-energy facilities for $10 million. The latter transaction resulted in the recognition during the quarter of approximately $100 million of previously deferred income. At June 30, 1990, stockholders' equity had increased to $227 million from $149 million at Dec. 31, 1989.

In the first six months of this year, Henley Properties had net income of $77.8 million, or $3.72 per share, on revenues of $70.8 million, compared with net income of $6 million, or 28 cents per share, on revenues of $60.6 million in the first half of 1989.

Henley Properties has 15 residential, commercial and industrial properties in Southern California, as well as real-estate interests in Hawaii, Illinois, Michigan, New Hampshire and Wisconsin.

#90206p8478 07/25/1990 ~PR Newswire

WHITE PLAINS, NY (JULY 25) PR NEWSWIRE - An emergency room physician consults with an orthopedics specialist at a hospital across the city. The two doctors are able to view the patient's x-ray simultaneously on their computer screens, and decide upon an appropriate course of treatment. When the consultation is finished, a record is entered in the patient's file, and billing data is transmitted to insurance claims processing.

This is a sample of the capabilities of a system under development by NYNEX Corporation (NYSE: NYN) and Sun Microsystems, Inc. (NASDAQ: SUNW), which was demonstrated today in New York. The two companies have joined forces in a development effort aimed at multimedia information and communications systems, which permit the storage, processing and transmission of voice, data, video and image.

The systems under development also signal the first effort to link imaging capabilities with transaction-oriented applications such as records retention, accounts payable and claims processing. An interface has already been developed to PROBITY(TM), a physician's total practice management system that includes insurance claims processing and accounts payable functions, from LaPook Lear Systems, Inc., a New York-based software company.

In addition to health care, the system will also have applications in advertising and publishing, where the electronic transmission of high resolution graphics will enhance efficiency and reduce costs.

According to Terrence McGarty, managing director, NYNEX, "We have found Sun computer hardware to provide just the right combination of capabilities for a system of this type -- high resolution graphics to provide a clear, crisp image, and a distributed, client/server architecture that allows people in different locations to view the same image at the same time. And, because Sun hardware is compatible with FDDI networking technology, we can develop the capability to efficiently and cleanly transmit detailed images over a local area network."

Earlier this year, NYNEX and Sun announced an agreement to jointly pursue commercial systems and network integration projects.

Sun Microsystems, Inc., headquartered in Mountain View, Calif., is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

NYNEX Corporation is a leading provider of sophisticated information systems, software and telecommunications services worldwide. Based in White Plains, N.Y., the company's research and development efforts have focused on such areas as network integration, multi-media communications

and artificial intelligence.

#90206p8485 07/25/1990 ~PR Newswire

PITTSBURGH (JULY 25) PR NEWSWIRE - Reporting a high level of operating activity as the third quarter gets under way, Allegheny Ludlum Corp. (NYSE: ALS) today announced sales of $295,994,000 and net income of $22,639,000, or $.68 per share of common stock for the three month period ending July 1, 1990.

For the 1989 period, a record second quarter in both sales and earnings was reported with revenues of $333,813,000 and net income of $36,685,000, or $1.08 per share.

For the 1990 first half, Allegheny Ludlum sales were $575,414,000, with net income of $45,897,000, or $1.37 per share. In the comparable 1989 period, sales were $697,736,000 with earnings of $71,051,000, or $2.10 per share, reflecting unprecedented business levels and historically high selling prices, including raw material surcharges.

For comparative purposes, earnings per share for all periods reflect the 3-for-2 stock split to shareholders of record at the close of business June 8, 1990. At July 1, the end of the 1990 second quarter, 33,496,196 shares of common stock were outstanding as adjusted for the stock split.

"While the future overall direction of the economy is unclear, so far, market demand for our specialty materials this year has surpassed our expectations and new market applications continue to be developed," Robert P. Bozzone, president and chief executive officer, said. He reported that

production in the company's three major product lines is running strong, but noted that operating income has narrowed under competitive pressure and the current product mix which includes significant exports of semi-finished electrical steel, as well as front end costs of the new four-year labor agreement effective April 1.

Underscoring Allegheny Ludlum's commitment to specialty materials technology, Bozzone also noted the June 20 announcment with Voest-Alpine Industrieanlagenbau (VAI) that the joint venture partners plan to design, engineer and build a commercial-size prototype thin strip direct casting machine to produce stainless and carbon steel products. The equipment, which is expected to be operational in the latter half of 1991, will be built by VAI and owned and operated in the United States by Allegheny Ludlum. In many steel products the new technology to direct cast sheet and strip steel will eliminate the need for conventional slab or ingot casting and hot strip rolling practices now used in the metal producing industries.

#90206p8492 07/25/1990 ~PR Newswire

MINNEAPOLIS (JULY 25) PR NEWSWIRE - MGI PHARMA, Inc. (NASDAQ: MOGN), reported today that revenues for the second quarter ended June 30, 1990, totalled $1,403,562 versus $944,292 a year ago. For the quarter, there was a net loss from continuing operations of $1,442,019 or 18 cents per share compared to a net loss from continuing operations of $90,914 or 1 cent per share in the same quarter of 1989.

For the six months ended June 30, 1990, MGI PHARMA reported a net loss from continuing operations of $2,899,655 or 36 cents per share. This compares with net income from continuing operations of $942,753 or 11 cents per common share for the first six months of 1989.

Dr. Kenneth Tempero, chairman and chief executive, stated that "the first half 1990 results reflect the company's aggressive investment in the clinical trials for MGI 136 and MGI 647." Expenditures relating to MGI PHARMA's clinical development activities nearly tripled those of the same period the previous year. Dr. Tempero explained that "clinical, preclinical and patent data continue to justify our strong commitment to bringing MGI 136 and MGI 647 to market. We are, thus far, very pleased with the enrollment in our clinical studies and the interaction with the FDA and we expect to continue our pace of investment in clinical development."

First half 1990 results include amortization of the DIDRONEL(R) I.V. Infusion purchase price (a $1,111,568 non-cash item) and the June recovery of the $555,000 note receivable from the Molecular Genetics Research and

Development Limited Partnership.

"The company remains in sound financial health," said Dr. Tempero. "With $28,694,000 in cash and cash equivalents and a revenue stream from DIDRONEL(R) I.V. Infusion, MGI 805 (Lyme Disease Vaccine) royalties, and our co-marketing arrangement for oral DIDRONEL(R) we remain confident that we have the financial resources to reach our goal of becoming a significant pharmaceutical company."

Dr. Tempero further stated that "during the second quarter, patent protection for MGI 136 (the company's chemoprotective agent) was enhanced by the issuance of a United States patent for the use of MGI 136 in the prevention of bone marrow suppression caused by doxorubicin. The patent, which was issued to the University of Rochester, N.Y., on July 3, 1990, is covered under an exclusive worldwide license granted to MGI PHARMA in 1988." Bone marrow suppression due to doxorubicin chemotherapy is a major clinical problem facing patients in the treatment of certain types of cancer. Doxorubicin is one of the leading anti-cancer drugs in the world with sales in excess of $100 million annually. MGI 136 has been shown to prevent serious bone marrow suppression in animals treated with doxorubicin. MGI PHARMA currently has MGI 136 under development for the prevention of major toxicities due to cisplatin chemotherapy in patients with lung cancer and ovarian cancer. The new patent broadens the utility of MGI 136 in improving the quality of life for cancer patients.

MGI PHARMA, Inc., is in the business of acquiring, developing and marketing pharmaceuticals prescribed by oncologists and other specialist physicians. The company has acquired a portfolio of compounds, several of which have significant therapeutic and commercial potential. The company has three compounds in human clinical trials and currently sells DIDRONEL(R) I.V. Infusion for the treatment of hypercalcemia in cancer patients. Company management has an established track record of identifying and developing commercially successful pharmaceuticals. Its shares trade on the NASDAQ National Market System under the symbol MOGN.

MCCONNELLSBURG, PA (JULY 25) PR NEWSWIRE - JLG Industries (NASDAQ-NMS: JLGI) announced today that L. David Black, formerly president and chief executive officer of the ARO Corp., will join JLG as its president and chief operating officer in August, succeeding Stephen R. Cecil, who resigned in June.

Additionally, JLG's board of directors announced the promotion of four current officers to senior positions. The officers are Charles H. Diller Jr., currently senior vice president and chief financial officer, who is promoted to executive vice president and CFO, and Rao G. Bollimpalli, Michael Swartz and Raymond F. Treml, currently vice presidents of engineering, marketing and manufacturing, respectively, who are each promoted to the position of senior vice president.

Black, 52, served for 16 years in various capacities with ARO, an international manufacturer of air-powered industrial equipment. His responsibilities at ARO, which had sales of approximately $130 million in 1989, included president and chief executive officer since 1986, executive vice president and vice president of marketing and engineering.

Prior to joining ARO, Black spent eight years with Dresser Industries as international market manager, as general manager of a Dresser manufacturing facility in Mexico and as manager of systems and procedures for Dresser's Valve and Instrument Division.

A 1960 graduate of Texas A&M University with a B.S. in industrial engineering, Black is past president and director of the American Supply & Machinery Manufacturers' Association, director of the National Fluid Power Association, and a member of the advisory boards for Texas A&M University and Western Carolina University.

Diller, 45, joined JLG in 1977 as controller, after six years in public accounting at Peat, Marwick, Main & Co. He was promoted to vice president-finance in 1982 and was named senior vice president and CFO in 1988. Diller is a member of the American Institute of Certified Public Accountants, the Maryland Association of Certified Public Accountants and the Financial Executives Institute. He also serves on the College of Business Advisory Board of Shippensburg University. A 1968 graduate of California State Polytechnic University with a B.S. in accounting, Diller also served as a captain in the U.S. Marine Corps.

JLG Industries Inc. is an international manufacturer and marketer of specialized hydraulic machinery, including mobile aerial work platforms and cranes. Sales are made principally to independent distributors which

sell and rent the company's products to a braod customer base, including users in the construction and industrial markets.

#90206p8501 07/25/1990 ~PR Newswire

BETHLEHEM, PA (JULY 25) PR NEWSWIRE - Bethlehem Steel Corporation (NYSE: BS) today reported it had net income of $22 million and $43 million for the second quarter and first half of 1990 compared to net income of $84 million and $149 million for the second quarter and first half of 1989. The decline in net income was due to lower steel shipments and prices and to higher operating costs, principally at the Sparrows Point plant.

Results for the second quarter of last year included $50 million of unusual charges for restructuring the operations of the BethForge Division. Net income for the first half of 1989 was also reduced by $55 million of unusual charges principally relating to restructuring the business at the Baltimore Marine Division.

Basic Steel Operations: The Basic Steel Operations segment had income from operations of $27 million and $55 million for the second quarter and first half of 1990 compared to $147 million and $284 million for the second quarter and first half of 1989.

Steel shipments were approximately 13 percent and 16 percent lower in the

second quarter and first half of 1990 than in the year earlier periods. The decline in 1990 shipments was primarily attributable to reduced shipments of semifinished steel to other steel producers.

Average realized steel prices were also lower in the second quarter and first half of 1990 than in the year earlier periods. Market and competitive pressures continue to affect the Rail Products and Pipe Division, the Bar, Rod and Wire Division and the Structural Products Division.

Results for the second quarter and first half of 1990 were also adversely affected by higher operating costs. The higher costs for the second quarter were incurred principally at the Sparrows Point plant for planned outages of the large blast furnace for relining and of the hot strip mill for modernization and for accelerated coke oven repairs.

The blast furnace resumed full production during the first week of July after an outage of approximately 100 days. A 25-day outage of the hot strip mill related to its modernization is scheduled for August 1990 and another outage is planned for early 1991 immediately prior to completion of the modernization project.

Employment costs were also higher in the second quarter and first half of 1990 primarily as a result of the labor agreement with the United Steelworkers of America, which became effective June 1, 1989.

The board of directors today declared dividends of $.10 per share of common stock, $1.25 per share of $5.00 cumulative convertible preferred stock and $.62-1/2 per share of $2.50 cumulative convertible preferred stock, each payable Sept. 10, 1990, to holders of record on Aug. 10, 1990.

#90206p8502 07/25/1990 ~PR Newswire

EDEN, N.C. (JULY 25) PR NEWSWIRE - Fieldcrest Cannon, Inc. (NYSE: FLD), announced sales and earnings figures for the second quarter of 1990. A loss of $6.1 million or 58 cents per share was incurred in the quarter compared to net income of $7.7 million or 74 cents per share earned in the second quarter of 1989.

Sales for the second quarter of 1990 were $316.3 million compared to $346.4 million in the second quarter of 1989, a decrease of nine percent. Bed and bath division sales decreased 12 percent from the 1989 level. Carpet and rug division sales increased one percent from prior year sales.

For the first six months of 1990, sales were $590.7 million compared to $642.7 million in the corresponding period a year ago. The net loss for

the first six months of 1990 was $5.7 million or 55 cents per share compared to net income of $10.7 million or $1.04 per share last year.

Bed and bath division operating results were significantly impacted by lower sales levels reflecting a weak market environment. Mill operating schedules were curtailed to control inventory levels which resulted in substantial idle capacity costs. Despite slightly higher sales levels, the carpet and rug division experienced a small operating loss before non-recurring items, compared to a small profit in the second quarter of 1989. Intense price competition for carpet sales has not permitted margin improvement.

Carpet and rug division second quarter results include a $6.6 million pre-tax charge to provide for the cost of closing the Laurel Hill, N.C., tufted carpet mill and service center. The results for the quarter also include a pre-tax credit of $4.9 million from reversal of certain estimated liabilities associated with the consolidated of Bigelow Sanford operations into the carpet and rug division which are no longer required. The combined effect of the non-recurring items reduced net income by $1.1 million or 10 cents per share.

Fieldcrest Cannon, Inc. manufactures and markets bed and bath products under the Fieldcrest, St. Marys, Royal Family, Monticello, and private brand labels. Carpet and rug division products include high quality woven and tufted carpets and rugs marketed under the Karastan, Bigelow, Sanford, Cannon and private brand labels.

#90206p8505 07/25/1990 ~PR Newswire

NORTHBROOK, IL (JULY 25) PR NEWSWIRE - Directors of Woodhead Industries Inc. (NASDAQ: WDHD) today raised the company's regular quarterly dividend from 15 cents per share to 17 cents per share -- representing a 13.3 percent increase.

The dividend will be payable in cash on Aug. 20, 1990, to shareholders of record Aug. 6, 1990. Woodhead Industries has 3,189,905 shares of common stock outstanding.

Alan Reed, Woodhead chairman and chief executive officer, said the increase was being made as a result of the company's successful implementation of its restructuring program and its principal marketing strategy of focusing on core products.

"We've been able to increase our profitability and reduce long-term debt

to where we are now in a position to increase our return to our shareholders."

Reed noted that Woodhead is in a strong cash position and emphasized that the increased dividend will not impair the company's plans for continued internal and external growth.

He said Woodhead will continue to pursue additional growth opportunities through its five-part program of increasing market share, expanding existing markets, developing new products, expanding the company's international presence, and seeking acquisitions that complement Woodhead's core products and distribution network.

This represents the 91st consecutive dividend payment by the company since it became public in 1968.

For the first nine months of the current fiscal year ended June 30, 1990, Woodhead Industries had net income of $3,701,000 or $1.14 per share, on sales of $55,038,000.

Woodhead Industries Inc. is headquartered in Northbrook. The company develops, manufactures and markets premium quality, Safety Yellow(R) specialty electrical devices and mechanical motion control products for industrial applications.

ARDMORE, OK (JULY 25) PR NEWSWIRE - Noble Affiliates, Inc. (NYSE: NBL) today reported net income of $1,804,000, or 4 cents per share, on revenues of $46,279,000 for the second quarter of 1990, compared with net income of $12,276,000, or 28 cents per share, on revenues of $63,261,000, for the same period a year ago.

Revenues for the first half of 1990 were $112,687,000, versus revenues of $113,704,000 for the previous year's first half. Net income for the 1990 first half was $12,215,000, or 28 cents per share, compared with net income before changes in accounting of $18,407,000, or 42 cents per share, for the same period of 1989. The 1989 first half net income of $27,232,000, or 62 cents per share, included a credit of $8,825,000, or 20 cents per share, as a result of the company's adoption of Statement of Financial Accounting Standards No. 96, "Accounting for Income Taxes."

Robert Kelley, president and chief executive officer, noted that the difference in the second quarter results for 1990 compared with 1989,

primarily reflected the sizable gas contract buydown that the company recorded in the 1989 period, from which it received a lump-sum nonrecoupable payment of $15.3 million.

Oil and gas revenues for the 1990 second quarter totaled $43,639,000 up four percent from those in the 1989 second quarter, reflecting increased oil production which offset lower prices.

During the 1990 second quarter, oil production averaged 12,126 barrels per day, 29 percent above the 9,432 average barrels per day recorded during the same period of 1989. Prices received during the 1990 period averaged $16.25 per barrel, down 12 percent from the average price per barrel of $18.39 in 1989's second quarter.

Gas production in the 1990 second quarter was up slightly from the same period a year ago, averaging 144.1 million cubic feet per day. Meanwhile, gas prices dropped three percent to an average of $1.93 per thousand cubic feet in the second quarter of 1990.

Noble Affiliates, Inc. is an independent energy company with exploration and production operations throughout major basins in the United States, including the Gulf of Mexico and offshore California, as well as foreign operations primarily in Canada, Tunisia and Indonesia.

DALLAS (JULY 25) PR NEWSWIRE - Texas Instruments (NYSE: TXN) is launching a multimillion dollar advertising campaign aimed at America's parents to not only make them more aware of the importance of their children's education in today's competitive global economy, but also of how TI's Tools For Learning help students to master the basics.

"There are several reasons why TI has decided to embark on this major advertising program," said Gary Rado, vice president and manager, Consumer Products Division. "Excellence in education is more important to our future than ever. Our children and students face significant challenges in becoming successful, competing players in tomorrow's world. Because of these changes, our newest generation must be our smartest generation to compete globally.

"We want to demonstrate TI's support of education and of the vital role that America's teachers have in educating our children. However, we also want to point out that America's teachers can't do it alone; they need the help of America's parents. And, finally, we want to acknowledge the role that teachers and other educators have played in the development of TI's educational and calculator products and how these Tools For Learning help support and supplement the education our children get in school."

The series of ads features provocative, factual headlines such as "There Is Virtually No Illiteracy In Japan," "The West German School Year Is Two Months Longer Than Ours," "Saturday Is A School Day In Korea," "A Third Grader Spends An Average Of 900 Hours In Class And 1170 Hours Watching Television," and "America's Teachers Need America's Parents."

Texas Instruments has a long history of working with teachers and other educators to develop tools for learning that utilize high technology for educational purposes. Based upon proven learning principles, each tool on TI's Learning Path(TM) addresses a specific area of learning that can begin as early as infancy. TI's classroom calculators support the curriculum guidelines of the National Council of Teachers of Mathematics. TI calculators are being used or evaluated for use by school districts in every state in the nation.

"The series of ads was developed by McCann-Erickson in New York and Houston," said Ralph Oliva, vice president and manager, Worldwide Market Communications. "For added impact, our plan is to run the first three ads together in a single issue of Time on August 6, and in Newsweek on September 17. The campaign will then unfold with additional ongoing insertions in Time, Newsweek, Better Homes and Gardens and Parents

magazines, as well as Sunday supplements in The New York Times, Los Angeles Times, The Washington Post and The Dallas Morning News."

Texas Instruments, headquartered in Dallas, is a high-technology company with sales and manufacturing operations in more than 30 countries.

TREVOSE, PA (JULY 25) PR NEWSWIRE - Betz Laboratories Inc. (NASDAQ: BETZ) reported today that net sales and earnings for the second quarter ended June 30, 1990, increased 13 percent and 17 percent, respectively, over the year-ago period.

Primary earnings per common share rose 18 percent from $.45 to $.53 based on an average of 28,592,718 shares outstanding in 1990 vs. 30,963,790 shares outstanding in 1989. Fully diluted earnings per common share increased 13 percent to $.51 from $.45 in the same year-ago quarter.

Net sales and earnings for the six-month period ended June 30, 1990, increased by 14 percent and 17 percent, respectively, over the year-ago period. Primary earnings per common share rose 17 percent from $.88 to $1.03 based on an average of 28,531,916 shares outstanding in 1990 vs. 30,935,598 shares outstanding in 1989. Fully diluted earnings per common share rose 13 percent to $.98 from $.87 in the similar period last year.

BETZ LABORATORIES

	Second quarter		Six months	
	1990	1989	1990	1989
Net sales	$147,614,684	$130,443,830	$290,940,219	$254,821,511

Fully diluted	.51	.45	.98	.87

Adjusted for one-for-one pro rata stock distribution declared June 14, 1990.

On June 14, 1990, the directors of Betz Laboratories Inc. unanimously approved the pro rata distribution to each shareholder of record on July 26, 1990, one additional common share for each share held as of that date. All of the above average shares outstanding have been restated to reflect the 2 for 1 split. Net earnings per common share for each of the periods presented above are based on such restated shares outstanding.

Commenting on second quarter results, John F. McCaughan, chairman and chief executive officer, said, "The company set new records for both sales and earnings in the second quarter. All major operating units, both domestic and foreign, contributed to our strong second quarter performance. Betz Process Chemicals Inc., which markets the company's line of specialty process chemicals to refineries and the steel industry, had an excellent quarter. This subsidiary experienced a strong increase in sales of its antifoulant treatment programs. These programs prevent foulants from forming and depositing on heat transfer surfaces in the refining process and enable refineries to reduce energy consumption, maximize throughput and reduce maintenance expenditures.

"Betz Industrial, our largest operating unit, also had a very strong second quarter," continued McCaughan. "Particularly strong sales gains were recorded by Betz Industrial to the power industry. Electric utilities are facing increasingly stringent environmental regulations and are turning to Betz more frequently to help them solve environmental problems with our environmentally friendly treatment programs."

Betz Laboratories Inc. an international company headquartered in Trevose, produces and markets a wide range of engineered programs and specialty chemical products for process systems. The company's services are utilized in a variety of industrial and commercial applications, with particular emphasis on the power, chemical, petroleum refining, paper, automotive and steel industries.

AUSTIN, TX (JULY 25) PR NEWSWIRE - The Continuum Company, Inc. (AMEX: CNU) and Computations Holdings Limited announced they have reached an agreement in principle for the acquisition of Computations by Continuum, subject to a definitive agreement and to the approval of Computations' shareholders and regulatory authorities.

The agreement in principle, among other things, includes the issuance of 1,750,000 shares of Continuum common stock for all of the outstanding shares of Computations. Continuum presently has approximately 8,800,000 shares of common stock outstanding.

Ronald C. Carroll, chief executive officer of Continuum, noted that the acquisition of Computations represents a logical extension of Continuum's existing business, principally taking advantage of Computations' presence in Australia and Northern Europe, and its product strengths for the worldwide property and casualty insurance industry.

Brian Gatfield, chief executive officer of Computations, noted that the combination will enhance Computations' ability to service existing customers and to develop new business relationships.

It is anticipated that final agreement will be reached in approximately 90 days and that the combination will be accounted for as a pooling of interests. It is also anticipated that Continuum will not incur any debt as a result of the transaction.

The Continuum Company is an international consulting and computer services firm based in Austin, Texas, serving the needs of life insurance and other financial services companies for computer software and services. Computations is an international consulting and computer services firm based in Sydney, Australia, also providing computer software and services to the financial services industry, primarily life and property and

casualty insurance companies.

Currently, strict financial comparisons are not possible because of different accounting practices in Australia and the United States. It is anticipated that financial information on Computations, restated in accordance with U.S. generally accepted accounting principles, will become available following the closing of the transaction.

NEW YORK (JULY 25) PR NEWSWIRE - Tandy Corporation (NYSE: TAN) today introduced the Tandy 1000 RL -- the first personal computer with unique home management programs so practical and simple that it can become an essential part of family life. The Tandy(R)1000 RL computer is a fully integrated system of hardware and software developed with a specific focus on the home user.

"The Tandy 1000 RL is an entirely new generation of home computer -- one that helps manage everyday home tasks, is easy to use and affordable," said John V. Roach, chairman of the board and chief executive officer of Tandy Corporation.

The Tandy 1000 RL is sold at Tandy's more than 7,000 Radio Shack(R) stores nationwide. The price of the ready-to-use systems range from $750 to $1,299.

"Computers have been accepted in the workplace for years, but not in the home because they've been too hard to use and too expensive," Roach said. "Finally, we've solved those problems.

"The Tandy 1000 RL is so easy to use that it guarantees success. Even the novice user can be productive with the RL after just 15 minutes. Should they need additional help, we've established a comprehensive program to meet our customers' needs," he said.

In addition to the computer's built-in tutorial programs, Radio Shack personnel have been specially trained to work individually with customers who have a question. A dedicated team of computer experts is set up at Tandy's Fort Worth, Texas, headquarters for store representatives to contact for quick, on-the-spot solutions. Customers with a telephone modem can communicate with the technicians themselves.

The Tandy 1000 RL is the result of Tandy Corporation's more than a decade of experience as the leading maker and marketer of personal computers. "We designed the RL after years of research, program development, and an extensive focused testing program with families in the home," Roach said.

CANTON (JULY 25) PR NEWSWIRE - Today, The Timken Company (NYSE: TKR) announced consolidated financial results for the company and its subsidiaries for the second quarter and the six month period ended June 30 1990.

	Second Quarter Ended June 30 (Thousands of Dollars Except Per Share Data)	
	1990	1989
Net Sales	$435,862	$413,913
Income Before Taxes	43,480	48,737
Provision for Income Taxes	18,058	18,571
Net Income	25,422	30,166
Net Income Per Share	$0.85	$1.06
Average Shares Outstanding	29,997,553	28,472,830

	Six-Month Period Ended June 30 (Thousands of Dollars Except Per Share Data)	
	1990	1989
Net Sales	$844,405	$848,637
Income Before Taxes	78,010	91,953
Provision for Income Taxes	33,529	34,058
Net Income	44,481	57,895

Net Income Per Share	$1.47	$2.04
Average Shares Outstanding	30,161,187	28,437,235

Consolidated net sales for the second quarter of 1990 were $435.9 million, which represents a 5.3 percent increase over the second quarter of 1989. When compared to the first quarter of 1990, consolidated net sales increased $27.3 million or 6.7 percent. These improvements arose primarily from increased sales volume.

Net income of $25.4 million exceeded management's expectation for the second quarter of 1990 and exceeded the net income of $19.1 million in the first quarter of 1990, although it was below the net income for the second quarter of 1989. In comparison to the second quarter of 1989, the company has experienced higher employment costs offset in part by reduced raw material costs. In addition, the company continues to incur some additional planned expenses in support of previously announced modernization and expansion programs, as well as the acquisition of MPB Corporation. Second quarter net income was 5.8 percent of net sales compared to 4.7 percent achieved in the first quarter of 1990.

#90206p8529 07/25/1990 ~PR Newswire

HOUSTON (JULY 25) PR NEWSWIRE - Panhandle Eastern Corporation (NYSE: PEL) today reported a net loss for the quarter ended June 30, 1990, of $13.6 million, or $0.15 a share, compared with a second quarter 1989 net loss of $5.0 million, or $0.09 a share. The 1989 second quarter results included $11.1 million in after-tax pension gains from early retirements.

On a consolidated basis, market-area natural gas deliveries for the company's interstate gas transmission units declined slightly in the second quarter, compared with the same period last year. Total market-area deliveries were 403 billion cubic feet (Bcf), compared with 408 Bcf for the second quarter of 1989. Competitive pressures in the Northeast market area contributed to lower-than-expected results for Texas Eastern Transmission Corporation.

Net income for the first half of 1990 was $46.7 million, or $0.53 per share, compared with 1989 net income of $28.0 million, or $0.49 per share. Net income figures include the operations of Texas Eastern Corporation beginning April 27, 1989.

The average number of shares of common stock outstanding increased to 88.0 million for the first half of 1990, primarily because of last year's acquisition of Texas Eastern, compared with 57.6 million for the same period in 1989.

Panhandle Eastern Corporation operates one of the nation's largest interstate natural gas pipeline systems, providing natural gas to the Midwest and Northeast markets.

ST. LOUIS (JULY 25) PR NEWSWIRE - Anheuser-Busch Companies, Inc. (NYSE: BUD), achieved record sales and earnings during the second quarter and first six months of 1990, it was announced today by August A. Busch III, chairman of the board and president.

The company's excellent performance is due largely to the continuing growth of Anheuser-Busch, Inc., the company's brewing subsidiary, and higher profitability of several other subsidiaries, especially Campbell Taggart, Inc. and Metal Container Corporation.

Operating results for the second quarter of 1990 include the following: -- Gross sales of $3.00 billion, an increase of 11.5 percent over gross sales of $2.69 billion for the second quarter of 1989. -- Net income of $257.5 million, an increase of 10.2 percent compared with $233.7 million for the same period a year ago. -- Earnings per share of 90 cents compared with 82 cents for the second quarter of 1989, an increase of 9.8 percent. Financial results for the first six months of 1990 include: -- Gross sales of $5.59 billion, an increase of 9.9 percent over gross sales of $5.09 billion for the first six months of 1989. -- Net income of $440.0 million, an increase of 9.8 percent compared with $400.8 million for the same period a year ago. -- Earnings per share of common stock of $1.54 compared with $1.40 for the first six months of 1989, an increase of 10.0 percent.

The 1990 results reflect the Dec. 1, 1989 acquisition of Sea World. Anheuser-Busch, Inc., also reported record beer volume sales during the second quarter and first six months of 1990. Sales to wholesalers were 22.3 million barrels for the second quarter and 42.4 million barrels for the first six months, an increase of 4.3 percent and 3.6 percent, respectively, over the comparable periods of 1989. The company's second quarter gain of 914,000 barrels is the highest in the industry and widens the company's lead over its competitors.

For the first six months of 1990, Anheuser-Busch beer sales accounted for 42.9 percent of total brewing industry sales (including imports), according to estimates from the Beer Institute. This market share compares with 41.9 percent for the first six months of 1989.

Campbell Taggart, the company's diversified food subsidiary and the second largest contributor to corporate profit, increased its profit contribution through higher volume and enhanced margins from the bread division and international operations.

Metal Container Corporation, the company's can manufacturing subsidiary, reported greatly improved earnings during the period. The company's strong earnings rebound from depressed 1989 levels is due to a higher can and lid sales volume and significant cost reduction.

LOS ANGELES (JULY 25) PR NEWSWIRE - First Interstate Bank of California has appointed Senior Vice President Shirley J. Perkins to head its human resources function.

Perkins succeeds Senior Vice President Lillian R. Gorman, who has been named head of human resources for First Interstate Bancorp (NYSE: I), the holding company for the First Interstate Banks.

Perkins joined First Interstate Bank of California in 1980, and served as a vice president in employee relations before transferring to First Interstate Bancorp in 1985. At the holding company, she was responsible for employee relations, employment and benefits. In 1988, she was elected senior vice president. Her previous experience includes 14 years as director of human resources with Cyprus Mines Corporation, Los Angeles.

A graduate of Florence State University, Alabama, with a bachelor of science degree in business administration, Perkins holds graduate certificates in personnel administration and industrial relations from the University of California at Los Angeles.

Active in numerous professional organizations, Perkins is a member of the California Employment Law Council and is on the boards of directors of Wharton's Financial Employee Relations Study Group and Commuter Computer Corp. She also is president of the Managed Health Care Association, an organization dedicated to furthering the goals of managed health care among major employers.

Born in Waynesboro, Tenn., Perkins resides in La Canada, Calif. First Interstate Bank of California is the principal subsidiary of First Interstate Bancorp, the nation's largest retail and business banking organization with 25 wholly owned banks in 14 states and more than 1,100 offices. First Interstate Bank of California serves customers statewide through 330 offices.

#90206p8536 07/25/1990 ~PR Newswire
LOS ANGELES (JULY 25) PR NEWSWIRE - First Interstate Bancorp (NYSE: I) said today that Lillian R. Gorman has been appointed to head the human resources function of this $55 billion bank holding company.

Dr. Gorman succeeds Gerald L. Shott, who recently advised the company that he planned to take early retirement in 1991.

Shott joined First Interstate as senior vice president from First National Bank of Chicago in 1976 to head human resources and was promoted to executive vice president in 1983. Until his retirement, Shott will devote full time to executive compensation issues.

In addition to assuming Shott's duties, Gorman, a senior vice president, will also serve on the company's Managing Committee.

Gorman joined the First Interstate organization in 1979 and managed the Human Resources Planning, Development and Information Systems function for First Interstate Bank of California until 1985, when she transferred to the parent corporation to manage the Human Resources Strategic Planning function. She has transferred back to the California bank to head the overall human resources function for what is First Interstate's largest subsidiary. She was elected senior vice president in 1987.

A native of New York City, Gorman is a graduate of Lehman College with a degree in psychology. She received her MA degree in 1978 and her Ph.D in 1979, both in industrial psychology, from Case Western Reserve University. She also earned an MBA degree in finance from the University of Southern California. She is active in civic, educational and professional organizations.

NEW YORK (JULY 25) PR NEWSWIRE - Alliance Capital Management L.P. (NYSE: AC) today announced a distribution of 42 cents per unit for the second quarter. The partnership distributed 37 cents per unit for the second quarter of 1989.

The distribution is payable on Aug. 10, 1990, to holders of units at the

close of business on Aug. 3, 1990.

Revenues increased from $37,175,000 to $46,546,000 for the quarters ended June 30, 1989 and 1990, respectively, and from $73,094,000 to $90,880,000 for the six months ended June 30, 1989 and 1990, respectively. Assets under management as of June 30, 1990, were approximately $47.2 billion, up approximately $3.3 billion from March 31, 1990.

The partnership is required to distribute its available cash flow, which was $11,879,764 or 42 cents per unit for the quarter ended June 30, 1990. Because expenses deducted in determining net income include non-cash items and certain employee compensation and benefits expenses that are funded by the partnership's general partner through capital contributions, available cash flow was significantly in excess of net income per unit.

Net income for the second quarter of 1990 was $7,408,000 or 25 cents per unit compared to $5,119,000 or 18 cents per unit for the second quarter of 1989. Net income for the six months ended June 30, 1990, was $12,915,000 or 45 cents per unit compared to $9,599,000 or 34 cents per unit for the six months ended June 30, 1989.

Alliance Capital Management L.P. is a leading international investment adviser providing investment management services to institutions, primarily pension funds and endowments, and to individual investors through a broad line of mutual funds and cash management products.

MILWAUKEE (JULY 25) PR NEWSWIRE - Willie D. Davis, broadcaster and former Green Bay Packers football star, has been elected to the Board of Directors of WICOR, Inc. (NYSE: WIC), parent of Wisconsin Gas Company and Sta-Rite Industries. Davis also will serve on the Wisconsin Gas Company board.

Davis, 56, is president and owner of All Pro Broadcasting, Inc., Los Angeles, which operates WLUM-FM/WMVP-AM in Milwaukee, KACE-FM in Los Angeles, and KDHT/KMVP-AM in Denver. He spent seven years in sales and public relations for the Jos. Schlitz Brewing Company and was president and owner of a beverage distribution business in California for 18 years.

In naming Davis to the WICOR board, Stuart W. Tisdale, president and chief executive officer, said, "Willie Davis will make an excellent addition to our board. He has roots in Wisconsin, and also brings to us an impressive record of entrepreneurial achievement."

Davis also serves on the board of directors of Fireman's Fund Insurance Company, Sara Lee Corporation, MGM/UA Entertainment Company, K mart Corporation and Dow Chemical Company.

"I am very pleased and excited to be a part of WICOR," Davis said. "I've continued to have a special attachment to Wisconsin."

Davis spent 10 years with the Green Bay Packers as captain of the defensive unit under Coach Vince Lombardi. He was inducted into the Green Bay Packers Hall of Fame in 1975, and into the Pro Football Hall of Fame in 1981. He was elected NAACP Man of the Year in 1978.

Davis is a trustee of the University of Chicago and Marquette University, Milwaukee; he is also a member of the Grambling College Foundation. He received a B.S. degree from Grambling State University in 1956, and an M.B.A. from the University of Chicago in 1968. He holds honorary doctorate degrees from Grambling State University and Marquette University.

ST. LOUIS (JULY 25) PR NEWSWIRE - Wetterau Incorporated (NASDAQ: WETT), the country's third largest publicly owned wholesale food distributor, achieved record sales and earnings for the first quarter of the company's 1991 fiscal year, it was announced today by Ted C. Wetterau, chairman of the board, president and chief executive officer.

For the first quarter ended June 30, 1990, the company reported sales of $1.4 billion, an increase of 6.5 percent compared with sales of $1.3 billion for the same period the prior year.

Net earnings for the quarter reached $12.4 million, an increase of 12.1 percent compared with net earnings of $11.1 million the year before. Earnings per common share were 54 cents for the quarter, an increase of 14.9 percent compared with earnings per share of 47 cents the previous year.

Commenting on the quarter, Wetterau stated. "The company's management and directors are highly pleased to post these kind of results reflecting solid increases in our operating earnings. We are also happy to report a significant increase in our return on equity to a record level of 24.1 percent."

During the quarter, the company announced a preliminary agreement to

acquire the Korman Group Companies, $120 million retail grocery chain operating 14 stores primarily in New Jersey. Once the transaction is completed, the stores will join Wetterau's retail operations which currently include approximately 130 grocery stores, combination stores, department stores, and drugstores in ten states.

BEAVERTON, OR (JULY 25) PR NEWSWIRE - FPS Computing (NYSE: FLP) today announced that it completed the sale of convertible preferred stock to an institutional investor for proceeds of $14.5 million. As first announced on June 11, if fully converted, the preferred stock would represent 49.3 percent of the company's outstanding stock.

Net proceeds from the investment will be used to provide working capital, to fund continued product development, and to expand sales and marketing activities. A portion of the financing will be used to reduce the company's long and short-term debt and debt servicing expenses.

FPS Computing has one of the largest installed bases of high-performance computing equipment in the industry. The firm designs, manufactures and markets high-performance computing solutions for scientific, engineering and technical applications.

The FPS Computing product line includes UNIX supercomputers and array processors. Founded in 1970 as Floating Point Systems Inc., FPS Computing is headquartered in Beaverton, Ore., and is listed on the New York and Pacific stock exchanges.

The following trademarks are owned by their respective companies: FPS Computing, Floating Point Systems Inc.; UNIX(R), AT&T.

PHILADELPHIA (JULY 25) PR NEWSWIRE - Sun Distributors L.P. (NYSE: SDP) had net income of $6.6 million for the second quarter of 1990, up more than 18 percent from the $5.6 million earned in the same quarter last year it was announced today by Donald T. Marshall, chief executive officer.

Second quarter income per limited partnership unit (combined A and B interests) was 59 cents compared to 50 cents in 1989.

During the second quarter this year, the Class A and Class B interests began trading separately on the New York Stock Exchange under the symbols SDP and SDPB, respectively. Income per A interest in the second quarter was 29 cents and income per B interest was 15 cents. (The difference between total income per limited partnership unit of 59 cents and the sum of the income for A and B interests of 44 cents is due to an additional 11 million B interests owned by the General Partner, making a total of 22 million B interests.)

Sales for the second quarter of 1990 were $155 million, up nearly 8 percent from $144 million in the comparable 1989 period.

Sales for the six months ended June 30, 1990, were $301 million, up more than 8 percent from $278 million in the same period in 1989. Marshall noted, "Although sales were slightly behind planned levels in the first half due to weakness in some of our markets, we have responded rapidly with expense control measures to maintain planned levels of income and cash flow."

Net income for the six months was $11.1 million as compared to $7.6 million in the first six months of 1989, an increase of 47 percent.

Sun Distributors continued its policy of monthly cash distributions to holders of limited partnership units (or Class A interest holders subsequent to separation) with a total payment in excess of 27 cents per unit in the second quarter.

NEW YORK (JULY 25) PR NEWSWIRE - The Centaur Partners Group announced today that it had delivered its proxies to the secretary of National

Intergroup, Inc. (NYSE: NII) at NII's annual meeting today in Pittsburgh.

Based on the proxies submitted, Centaur said it believes that stockholders of National Intergroup have given Centaur's slate of directors and its proposals for increased corporate democracy at NII a decisive margin of victory.

Centaur said: "We thank our fellow stockholders for their support of our program. Melvyn J. Estrin, Bob Slater and Bill Tull look forward to working with their fellow directors to carry out what they believe is the shareholder mandate to maximize stockholder value."

Centaur's slate of nominees for the NII board consisted of Melvyn J. Estrin, a principal of Centaur, Robert J. Slater, the former vice chairman of Crane Co., and William G. Tull, the former president of American Security Bank.

Centaur also proposed resolutions that would provide for confidential voting by stockholders, reject any proposal by the NII board to lower the trigger of the company's "poison pill" below 20 percent and require approval by a majority of stockholders of any "golden parachutes" for management.

CONTACT: Peter Rosenthal or Steven Matthews of Howard J. Rubenstein Associates, (212) 489-6900, for Centaur.

#90206p8555 07/25/1990 ~PR Newswire
NEW ORLEANS (JULY 25) PR NEWSWIRE - Ocean Drilling & Exploration Co. (NYSE: ODR) reported net income of $33,552,000, or $0.65 per common share, for the quarter ended June 30.

Such net income included an after-tax gain on the sale of the company's diving operations, effective April 18, of $28,353,000, or $0.55 per common share. The current quarter also included the income of the discontinued diving operations to the date of sale which totaled $540,000, or $0.01 per common share, and an extraordinary credit of $1,536,000, or $0.03 per common share.

The extraordinary credit represents the federal income tax benefit resulting from utilization of financial net operating loss carryforwards. An offsetting charge equivalent to the benefit is included in the provision for income taxes. Income from continuing operations, which included the equivalent income tax charge, totaled $3,123,000, or $0.06 per common share, for the second quarter of 1990.

For the quarter ended June 30, the company reported a net loss of

$3,189,000, or $0.06 per common share. The second quarter 1989 net loss included income from discontinued diving operations of $3,204,000, or $0.06 per common share, and a loss from discontinued contract drilling operations of $12,670,000, or $0.25 per common share.

The second quarter of 1989 also included $1,628,000 of restructuring costs, or $0.03 per common share, incurred in connection with the April 1989 merger proposal by Murphy Oil Corp. Income from continuing operations, which included the restructuring costs, totaled $6,277,000, or $0.13 per common share, for the second quarter of 1989.

Revenues from continuing operations for quarter ended June 30 were $50,585,000 compared to second quarter 1989 revenues of $59,964,000. Such revenues included oil and gas revenues of $44,859,000 ($55,752,000 in 1989), and interest and other revenues of $5,726,000 ($4,212,000 in 1989). Exploratory expenses, including dry hole costs, were $2,488,000 in the current quarter compared with $3,791,000 a year earlier.

Drilling and related revenues of the discontinued contract drilling operations, which are no longer included in the company's result of operations, totaled $32,795,000 for the second quarter of 1990 compared to $28,316,000 a year ago.

On a pro forma basis, the discontinued contract drilling operations loss for the quarter ended June 30 totaled $8,587,000 compared to the $12,670,000 loss included in the second quarter of 1989. The second quarter of 1990 benefited from a reduction in depreciation of approximately $2,900,000 as a result of an extension in the estimated remaining useful lives of certain drilling barges.

#90206p8557 07/25/1990 ~PR Newswire

VALHALLA, N.Y. (JULY 25) PR NEWSWIRE - The American Lyme Disease Foundation, Inc., a non-profit organization committed to advancing research, treatment, prevention, and public awareness of Lyme disease, has been established at New York Medical College. The announcement was made concurrent with the observation of National Lyme Disease Awareness Week. The college is based in Westchester County, N.Y., which, since 1985, has reported the highest incidence of Lyme disease in the country.

The American Lyme Disease Foundation will provide a vehicle for private citizens to assist in efforts being made to prevent and treat the disease. Contributions to the American Lyme Disease Foundation will support a variety of programs, especially in research, at New York Medical College College and at other institutions nationwide.

One of the founders of the American Lyme Disease Foundation, G.S. Beckwith Gilbert, chairman of the new group's board, said, "Our objective in establishing a national organization at New York Medical College was to benefit from the college's strong base in scientific research, patient care and teaching. This, we believe, will enable us to respond to the many challenges of Lyme disease in a comprehensive, coordinated manner."

New York Medical College is the only medical university in the nation conducting Lyme disease research on three fronts -- clinically with patients, in the field where ticks are prevalent, and in the basic sciences laboratory.

Several years ago, New York Medical College created a Lyme Disease Center to address the many problems and issues surrounding the tickborne illness. The center is comprised of dozens of faculty experts in infectious diseases, pediatrics, entomology, rheumatology, microbiology, and immunology. Faculty at the college provided information for the first book on Lyme disease entitled Protect Yourself from Lyme Disease: The New York Medical College Guide to Prevention, Diagnosis, and Treatment, written by Diana Benzaia and published last year.

Founded in 1860, New York Medical College is one of the nation's oldest medical schools and is the third largest private medical university in the country. The college is affiliated with 29 hospitals in New York City, Westchester County and the mid-Hudson Valley, N.Y., and in Fairfield County, Conn.

#90206p8558 07/25/1990 ~PR Newswire

NEW YORK (JULY 25) PR NEWSWIRE - Omnicorp Limited (NASDAQ: OMNIC) announced today that Rockwood International Corporate Holdings (RICH) had agreed to Omnicorp's demand for the rescission of Omnicorp's acquisition of Rockwood SCT Ltd., an Isle of Man Corporation (SCT), from RICH. Omnicorp demanded the rescission of its acquisition of SCT from RICH, a subsidiary of Rockwood Holdings Plc (Rich Holdings), a U.K. corporation, as a result of, among other factors, the announcement by Rockwood Holdings that it had gone into administrative receivership in the United Kingdom.

Upon effectiveness of the rescission, Omnicorp will return to RICH all of the issued and outstanding capital stock of SCT, and RICH will return to Omnicorp the 9.2 million shares of the common stock of Omnicorp which had been issued to RICH in connection with the acquisition of SCT. RICH currently holds more than 90 percent of Omnicorp's outstanding common stock.

Upon the consummation of the rescission, Omnicorp's issued and outstanding common stock will be reduced from 12,900,042 shares to 3,700,042 shares, and RICH's holdings in Omnicorp to approximately three million shares, or approximately 81 percent of the issued and outstanding common stock of Omnicorp.

On Friday, July 20, SCT sold its sole subsidiary, Rockwood International Freight Inc. (RIFI), to an unrelated third party for consideration consisting of cash and a promissory note in the aggregate amount of approximately $220,000(Canadian). After discharging certain liabilities and certain obligations relating to such sale, SCT is expected to retain approximately $90,000(Canadian) in cash. As a result of the rescission of the acquisition of SCT by Omnicorp, the sale of RIFI by SCT is for the account of Rockwood International, rather than Omnicorp.

#90206p8562 07/25/1990 ~PR Newswire
EDISON, NJ (JULY 25) PR NEWSWIRE - Engelhard Corporation (NYSE: EC) today announced that net earnings for its second quarter ended June 30, 1990, reached $18.2 million, or 41 cents per share, 21 percent ahead of last year's second-quarter net earnings of $15.1 million, or 34 cents per share.

Net earnings for the first six months of 1990 were up 12 percent to $32.9 million, or 74 cents per share, from $29.5 million, or 66 cents per share, for the same period of 1989.

The maker of specialty chemical products and engineered materials reported that net sales for the 1990 quarter increased 25 percent to $751.3 million from $603.1 million a year ago. Net sales for the first half of 1990 were $1.41 billion, compared to $1.19 billion in 1989.

Orin R. Smith, president and chief executive officer, attributed the increase in second-quarter sales and earnings primarily to the company's success in building its industrial base of business for precious metals management services and to favorable precious metals market conditions.

"The procurement and management of precious metal materials on an international scale have become increasingly complex as large industrial users look for ways to be more cost-competitive," Smith noted. "As a result, Engelhard is providing, on a worldwide basis, a broad range of services that meet these growing customer needs in a continually changing market."

Operating earnings for the company's engineered materials and precious metals management segment grew more than twofold in the second quarter and accounted for about 30 percent of Engelhard's total operating earnings for the period. Significantly higher profit in precious metals management services, as well as improved results for jewelry and refining, more than offset an earnings decline in the firm's industrial fabrication business.

The catalysts and chemicals business segment, which represented 30 percent of the quarter's total operating earnings, posted an 11 percent decline in earnings. "Sales and profit from both our environmental and chemical catalysts businesses continued to grow in the quarter," said Smith. "Sales and profit from our petroleum catalysts business, however, were down substantially as sales declined as a result of competitive pricing."

Engelhard's pigments and additives segment recorded slightly higher sales and profit and accounted for 40 percent of total operating earnings in the 1990 quarter. Stronger sales of pigments and extenders for paints, coatings and plastics resulted in increased profit for the company's specialty minerals and colors group. However, this gain was offset by lower profit from the sale of pigments and chemicals to the paper industry principally those pigments used in the manufacture of uncoated paper products.

Engelhard Corporation is a world-leading provider of specialty chemical products, engineered materials and precious metal management services.

#90206p8565 07/25/1990 ~PR Newswire

MELROSE PARK, IL (JULY 25) PR NEWSWIRE - Only four years after first topping the $100 million mark in sales for a single quarter, Alberto-Culver Co. (NYSE: ACV) today reported passing a new milestone with sales of $201.7 million for its third quarter ended June 30, 1990.

Leonard H. Lavin, chairman and chief executive officer of the company, said the quarterly figure is higher than sales for the entire 1979 fiscal year and up 10.7 percent from $182.2 million for the same period of fiscal 1989. Net earnings increased 16.2 percent to $9.6 million or 36 cents per share compared to $8.3 million or 31 cents per share in the third quarter last year.

"It's good to achieve a new record, but it is nothing more than what we expected," Lavin said. "Growth is the ongoing goal in our business. It is a pattern we are working hard to continue."

For the nine-month period ended June 30, sales were $572.8 million compared to $525.2 million in the same period last year, an increase of 9.1 percent. Net earnings increased 17.9 percent to $23.7 million or 89 cents per share compared to $20.1 million or 76 cents per share in fiscal 1989.

Lavin said that all operating divisions posted sales gains for the quarter but that Alberto-Culver's performance was led by better-than- projected growth in the international division and by the company's Sally Beauty Co. subsidiary, which closed the quarter with a worldwide total of 866 stores, up 82 stores versus a year ago.

The company today also declared its regular quarterly dividend of 5 cents per share on both its Class A and Class B common stock payable Aug. 20, 1990 to shareholders of record Aug. 6, 1990.

MIDDLEBURY, Conn. (JULY 25) PR NEWSWIRE - General DataComm Industries, Inc. (NYSE: GDC) today announced that revenues for its third fiscal quarter ended June 30, 1990 were $49.7 million, a 5 percent increase over revenues of $47.2 million for the same period a year ago.

Operating income for the third quarter was $1.2 million, compared to an operating loss of $1.8 million for the June period last year. Net income totaled $435,000 or $.03 per share against a net loss of $2 million or $(.14) per share for the third quarter a year ago.

For the nine months ended June 30, 1990, revenues were $149.9 million compared to revenues of $151.9 million for the nine months of fiscal 1989.

Net income for the nine-month period was $1.6 million or $.11 per share, against a net loss of $2.8 million or $(.19) per share for the first three quarters last year.

"In view of sluggish U.S. markets and the poor performance of some others in our industry, the company's results for the third quarter, while modest indicate that GDC's recovery is progressing," explained Charles P. Johnson, chairman and chief executive officer.

"A continuing softness in the domestic marketplace, however, makes any near-term performance difficult to predict and leaves us cautious for both the September and December quarters. Nevertheless, we expect to improve on the recent performance of our fundamental businesses."

General DataComm is a leading provider of systems, solutions, equipment and services for information networks worldwide. Based in Middlebury, Conn., GDC services a broad base of corporate customers and telephone operating companies throughout the Americas, Europe, Australia, the Far East and the Pacific Rim. In its fiscal year ended Sept. 30, 1989, the company reported revenues of $201.2 million.

TROY, MI (JULY 25) PR NEWSWIRE - K mart Corporation (NYSE: KM) announced today the development of its first K mart/multi-subsidiary shopping center to be located south of Rochester at Henrietta, N.Y. Marketplace Square, situated at the north corner of Hylan Drive and Jefferson Boulevard across from Marketplace Mall, is expected to open in summer 1991.

The project, in conjunction with the developer Park Investments, Ltd., of Chalmette, La., represents an investment in excess of $18 million.

A 104,000-square-foot K mart store, along with two of its subsidiary companies, PACE Membership Warehouse and Builders Square, will be built on the 32-acre site. PACE, a membership club selling at wholesale prices, will occupy 108,000 square feet and Builders Square, a warehouse-style home improvement chain, will fill 90,000 square feet. Plans include a major drugstore and other retail shops in the remaining 50,000 square feet of space.

Nearly 350 new jobs will be created with the opening of the PACE Membership Warehouse and Builders Square stores. Continued employment will be offered to current K mart associates when the nearby Jefferson Road K mart store is relocated to the new site.

"The site for Marketplace Square is centrally located to the population of this area," said Charles J. Miller, K mart's director of site acquisition for warehouse and grocery operations. "Construction of the development is expected to begin within 30 days and we look forward to the opening of Marketplace Square to meet the buying needs of area residents."

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating 2,324 K mart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Warehouse, Inc., and the Sports Authority.

MELVILLE, N.Y. (JULY 25) PR NEWSWIRE - For the quarter ended June 30, 1990, the Allen Group Inc. (NYSE: ALN) today reported earnings of $.60 per

common share. This is compared to $.27 per common share for the same period last year.

Earlier this month, Allen had indicated at a meeting with security analysts that its earnings for the quarter would be in the range of $.55 to $.60 per common share. At that meeting, Philip Wm. Colburn, chairman and chief executive officer of Allen, commented that the earnings growth was primarily related to strong results at its Allen Testproducts and Antenna Specialists divisions.

Earnings from continuing operations for the first six months of 1990 are $.87 per common share compared to earnings of $.44 per common share for the first half of 1989.

The Allen Group Inc. is a manufacturer and marketer of automotive products including automotive test equipment, automated manufacturing equipment, truck components and mobile communications antennas and accessories.

(A) In 1989, the company sold its specialty rubber products business, resulting in this gain.

(B) The Federal District Court in San Francisco issued a final udgment on Jan. 19, 1990, that certain heavy duty truck radiators manufactured by the

G&O Manufacturing Company division of the company willfully infringed a patent held by Modine Manufacturing Company and awarded Modine approximately $17.2 million in damages, including prejudgment interest. The company is appealing this decision to the Federal Circuit Court in Washington. The company has determined that it is not possible, at this time, to estimate the amount of damages, if any, that may ultimately be incurred; accordingly, no provision has been made in its consolidated financial statements with respect to this contingent liability.

NEW YORK, (JULY 25) PR NEWSWIRE - Transmedia Network Inc. (NASDAQ: TMNI), which owns and markets the Executive Savings Card, entitling holders to 25 percent savings when dining at participating restaurants, today announced the sale of its first franchise -- most of the state of New Jersey -- to Steven Kaplan, a member of the company's sales staff since 1986.

Kaplan, a resident of Woodbridge, N.J., will begin contacting restaurants after closing the transaction on Aug. 30, and his territory will encompass all dining establishments in New Jersey except those in Bergen and Pasaic counties, which will continue to be served by Transmedia from New York City.

Melvin Chasen, Transmedia's chairman, said, "Awarding this franchise is in keeping with our plan to expand into three markets, nationwide, in 1990."

He added, "We're fortunate to have Mr. Kaplan launch our franchise program. He already knows us well and we expect his experience to be a model for other franchises, particularly in working with our Cardholder Service Center in Miami, Fla."

Kaplan noted, "At least 100 additional New Jersey restaurants are targeted to join Transmedia's program within the year."

Attention to Transmedia is growing as restaurants increasingly feel the impact of growing competition, rising costs, lower alcohol consumption, and other factors putting a squeeze on cash flow and profits. Moreover, consumer interest is mounting, especially among baby boomers (adults born between 1945 and 1964), in lower cost, higher value dining.

Transmedia, established in 1984, derives its income from membership fees and cardmembers' use of the Executive Savings Card which converts food and beverage credits issued to the company by restaurants in return for cash advancements used by these dining establishments for a wide variety of needs.

Nearly 600 New York metropolitan area restaurants and 28,000 cardmembers have joined Transmedia's program to date. A total of 35 markets are targeted by 1995 in the company's franchise program which began this year.

COATESVILLE, PA. (JULY 25) PR NEWSWIRE - Lukens Inc. (NYSE: LUC) announced today that it has amended the company's Stockholder Rights Plan adopted in July 1987 to strengthen the protection of shareholder interests in the event the company is confronted with coercive or unfair takeover tactics.

Each full Right provided by the plan entitles the holder to buy one one-hundredth of a share of Lukens Series A Junior Participating preferred stock at a purchase price of $110. The Rights, which basically enable the stockholder to buy Lukens common shares or the shares of an acquiring company at one-half market value, will be exercisable only upon the occurrence of certain events.

The Rights Plan has been amended to reduce the threshold of beneficial ownership at which the Rights will be exercisable, to add an additional event that will trigger the issuance of Rights and to make certain other modifications to the plan. The amended Stockholder Rights Plan provides that Rights will now be exercisable if a person acquires 20 percent or more of the outstanding shares of Lukens common stock. Prior to the amendment, absent the occurrence of other triggering events, the threshold

for the exercise of Rights was the acquisition of 30 percent of the common stock outstanding.

The amended plan also provides that the Rights become exercisable if the board of directors declares any person to be an "adverse person," after determining that such a person has certain interests adverse to Lukens and its stockholders and has become the beneficial owner of at least 10 percent of the shares of common stock then outstanding. Such a declaration requires the concurrence of the company's outside directors.

The amendments to the Rights Plan are intended to enhance the ability of all stockholders to realize the long-term value of their investment in Lukens and to discourage anyone from attempting "greenmail." Lukens said the amendments are not in response to any known effort to acquire the company.

Other changes made to the Rights Plan are described in a letter and related Summary of Rights that will be mailed to all Lukens stockholders.

MUNCIE, IN (JULY 25) PR NEWSWIRE - New Venture Gear's Muncie Transmission Division is preparing to build a new five-speed, light- duty, manual transmission as part of the plant's continuing expansion program.

The NVG Model 4500 is designed for use in a variety of vehicles in the growing light-duty truck market. Production will begin in the spring of 1991, with the first units scheduled for several General Motors truck models during 1991.

Muncie Transmission Division Manager Kenneth G. Dosenbach, who made the announcement, said, "We're planing additional applications for other major truck customers."

He also called the Model 4500 "the significant light-duty truck transmission of the 90s."

The Model 4500 was developed by New Venture Gear (NVG) at its New Process Gear Division in East Syracuse, N.Y, and is NVG's first new product.

The all-new transmission is a state-of-the-art, customer-oriented product which provides smooth shifting and reliable performance under a variety of operating conditions.

The Model 4500 features synchronized shifting in all forward gears with optional reverse gear synchronization. It can be used in four-wheel- and two-wheel-drive vehicles and with gasoline or diesel engines. It is being offered with several gear ratios in both a standard version, and a heavy-duty version designed for engines with torque ratings to 450 lb.-ft. and combined trailer weights (GCW) to 26,000 pounds.

When New Venture Gear was formed as a joint-venture between Chrysler's Acustar parts subsidiary and General Motors Hydramatic Division, it announced its intention to expand both its product line and customer base.

Dosenbach said the addition of the Model 4500 to the Muncie Transmission line-up is part of an expansion project that could add up to 350 jobs over the next several years.

DETROIT (JULY 25) PR NEWSWIRE - FirstFed Michigan Corporation (NASDAQ-NMS: FFOM), the holding company of First Federal of Michigan, today reported net earnings of $5.4 million for the quarter ended June 30, 1990, compared with $5.2 million for the comparable period last year. On a per-share basis, net earnings this quarter were $.49 ($.47 fully diluted), vs. $.47 ($.45 fully diluted) in 1989.

Net earnings for the year to date totaled $12.1 million, up 24 percent from $9.8 million for the first six months of 1989. This represents net earnings per share of $1.09 ($1.04 fully diluted) for the first half of 1990, compared with $.88 ($.85 fully diluted) for the comparable period last year.

Net earnings for the first six months of 1990 brought FirstFed's stockholders' equity to $446.9 million, up from $437.4 million at year-

end 1989. Book value per share increased $.54 in the period to $40.08.

"We feel very positive about our operating performance in the first six months of 1990, particularly the continued improvement in our net yield and containment of operating costs," FirstFed Chairman C. Gene Harling said. "In addition, our wholly owned subsidiary, First Federal of Michigan, continues to meet all current regulatory capital requirements, with a tangible ratio of 3.01 percent, a leverage ratio of 3.53 percent, and a risk-based ratio of 10.57 percent."

Net yield on interest-earning assets improved to 0.99 percent at June 30, 1990, from 0.75 percent at the end of 1989. Net interest- earning assets exceeded interest-bearing liabilities by $521 million at June 30, 1990, compared with $438 million at Dec. 31, 1989.

As a result of the improvement in net yield over the last 12 months, net interest income increased to $25.9 million for the second quarter and $51.4 million for the year to date, vs. $5.3 million and $20.1 million for the comparable periods in 1989.

General and administrative expenses were $49.5 million for the year to date, vs. $46.3 million in 1989. This year's expenses include $1.9 million of accelerated amortization of goodwill in the first quarter. Even with the extra charge, annualized expenses were only 0.87 percent of average assets for the first six months.

FirstFed recognized $1.9 million in fees on standby mortgage-backed security commitments in the second quarter of 1990 and $9.4 million in the year to date, vs. $3.4 million and $6.0 million last year. Other operating income for the current quarter includes a $3.2 million gain from the sale of mortgage servicing rights.

Extraordinary items in this year's second quarter consisted of an after-tax charge of $1.1 million from the early retirement of debt. In the comparable 1989 quarter, FirstFed recognized $13.0 million in extraordinary after-tax gains, primarily from retirement of Federal Home Loan Bank advances.

FirstFed Michigan's portfolio of loans and mortgage-backed securities totaled $8.6 billion at June 30, 1990, versus $9.0 billion at the end of last year. It was divided nearly equally among adjustable rates, fixed rates with terms of 15 years or less, and fixed rates with terms of 20 to 30 years. Non-performing assets at the end of the second quarter were $29.1 million, or 0.26 percent of total assets, far below the industry average. FirstFed's reserve for loan losses at June 30 was $22.6 million.

The company originated mortgage loans, primarily single-family residential totaling $168 million during the second quarter, compared with $174

million in the same period last year.

FirstFed Michigan Corporation will pay a second-quarter dividend of $.15 per share on Aug. 15 to common stockholders of record on July 10. It has paid consecutive quarterly dividends since the first quarter of 1986.

The company's First Federal of Michigan subsidiary is a Detroit- based savings and loan association with 74 offices in the Lower Peninsula of Michigan. First Federal's Bay Savings Bank subsidiary, based in Newport News, Va., operates nine offices in Virginia, and its Omni Savings Bank subsidiary has four offices in Columbia, S.C.

#90206p8601 07/25/1990 ~PR Newswire

DETROIT, (JULY 25) PR NEWSWIRE - FirstFed Michigan Corporation (NASDAQ-NMS: FFOM), the holding company of First Federal of Michigan, today reported net earnings of $5.4 million for the quarter ended June 30, 1990, compared with $5.2 million for the comparable period last year. On a per-share basis, net earnings this quarter were $.49 ($.47 fully diluted), vs. $.47 ($.45 fully diluted) in 1989.

Net earnings for the year to date totaled $12.1 million, up 24 percent from $9.8 million for the first six months of 1989. This represents net earnings per share of $1.09 ($1.04 fully diluted) for the first half of 1990, compared with $.88 ($.85 fully diluted) for the comparable period last year.

Net earnings for the first six months of 1990 brought FirstFed's stockholders' equity to $446.9 million, up from $437.4 million at year-end 1989. Book value per share increased $.54 in the period to $40.08.

"We feel very positive about our operating performance in the first six months of 1990, particularly the continued improvement in our net yield and containment of operating costs," FirstFed Chairman C. Gene Harling said. "In addition, our wholly owned subsidiary, First Federal of Michigan, continues to meet all current regulatory capital requirements, with a tangible ratio of 3.01 percent, a leverage ratio of 3.53 percent, and a risk-based ratio of 10.57 percent."

Net yield on interest-earning assets improved to 0.99 percent at June 30, 1990, from 0.75 percent at the end of 1989. Net interest- earning assets exceeded interest-bearing liabilities by $521 million at June 30, 1990, compared with $438 million at Dec. 31, 1989.

As a result of the improvement in net yield over the last 12 months, net interest income increased to $25.9 million for the second quarter and $51.4 million for the year to date, vs. $5.3 million and $20.1 million for the comparable periods in 1989.

General and administrative expenses were $49.5 million for the year to date, vs. $46.3 million in 1989. This year's expenses include $1.9 million of accelerated amortization of goodwill in the first quarter. Even with the extra charge, annualized expenses were only 0.87 percent of average assets for the first six months.

FirstFed recognized $1.9 million in fees on standby mortgage-backed security commitments in the second quarter of 1990 and $9.4 million in the year to date, vs. $3.4 million and $6.0 million last year. Other operating income for the current quarter includes a $3.2 million gain from the sale of mortgage servicing rights.

Extraordinary items in this year's second quarter consisted of an after-tax charge of $1.1 million from the early retirement of debt. In the comparable 1989 quarter, FirstFed recognized $13.0 million in extraordinary after-tax gains, primarily from retirement of Federal Home Loan Bank advances.

FirstFed Michigan's portfolio of loans and mortgage-backed securities totaled $8.6 billion at June 30, 1990, versus $9.0 billion at the end of last year. It was divided nearly equally among adjustable rates, fixed rates with terms of 15 years or less, and fixed rates with terms of 20 to 30 years. Non-performing assets at the end of the second quarter were $29.1 million, or 0.26 percent of total assets, far below the industry average. FirstFed's reserve for loan losses at June 30 was $22.6 million.

The company originated mortgage loans, primarily single-family residential totaling $168 million during the second quarter, compared with $174 million in the same period last year.

FirstFed Michigan Corporation will pay a second-quarter dividend of $.15 per share on Aug. 15 to common stockholders of record on July 10. It has paid consecutive quarterly dividends since the first quarter of 1986.

The company's First Federal of Michigan subsidiary is a Detroit- based savings and loan association with 74 offices in the Lower Peninsula of Michigan. First Federal's Bay Savings Bank subsidiary, based in Newport News, Va., operates nine offices in Virginia, and its Omni Savings Bank subsidiary has four offices in Columbia, S.C.

#90206p8602 07/25/1990 ~PR Newswire

TERRE HAUTE, IND. (JULY 25) PR NEWSWIRE - Laserdisc technology will be the focus of one of the largest exhibits at the annual convention of video specialty store operators next month in Las Vegas.

Digital Audio Disc Corporation is devoting its 2,400-square foot exhibit solely to demonstrations of the new laser read software by creating three surround-sound video theaters. The Video Software Dealers Association convention exhibit includes screening of a 15-minute educational video, created by DADC, explaining Laserdisc's growing importance.

"Every bit of video in our booth will come from Laserdiscs," stated Jim Frische, president of the Sony-owned facility which is announcing a major expansion of its Laserdisc manufacturing services at the Aug. 5-8 trade show.

"Laserdisc will be to the 90s what Compact Disc was to the 80s," Frische added. "Our booth is designed to help educate retailers to the format's growing part in the video store's product mix today."

DADC, which offers Laserdisc custom manufacturing services, is currently ramping up production and will have a monthly pressing capacity of 300,000 discs by mid-1991.

Frische said that Laserdisc offers picture quality 60 percent better than VHS tape combined with Compact Disc sound.

Home entertainment programs on Laserdisc are available from major motion picture studios, independent video producers, record companies and other suppliers. Laserdisc hardware is available from approximately one dozen consumer electronics manufacturers including Sony, Pioneer, Philips, Panasonic, Yamaha, Magnavox and Sharp.

Digital Audio Disc Corporation is the largest Compact Disc manufacturer in the United States, with production capacity of 10 million discs per month. The company began Laserdisc manufacture in March 1990.

#90206p8611 07/25/1990 ~PR Newswire

PEORIA, Ill. (JULY 25) PR NEWSWIRE - RLI Corp. (NYSE: RLI) today reported that its second quarter consolidated net earnings increased 23 percent to $2.8 million compared with $2.3 million for the same period in 1989. Earnings per share were up 25 percent to 50 cents from 40 cents in the second quarter 1989. Total revenue for the quarter rebounded during the second quarter, increasing 11 percent to $23.1 million compared to $20.8 million in the same quarter 1989.

Net earnings for the first six months 1990 increased 71 percent to $5.9 million, or $1.04 per share, compared with $3.4 million, or $.59 per share for the same period in 1989. Total revenue was $44.0 million compared with $45.0 million in the same period last year. Gross written premiums of $80.2 million during the first half of 1990 represent a 26 percent increase over first half 1989 level. Net written premiums also increased during the first half 1990 to $39.3 million from $31.6 million.

"We are pleased with the continued attraction of new business that resulted from our improved (A-) rating received from A.M. Best Company," said Gerald D. Stephens, president of RLI Corp. "By maintaining this rating in 1990, our underwriters have been able to remain selective in a

very competitive market," he added.

Underwriting results improved significantly as the statutory combined loss and expense ratio for the specialty property/casualty segment dropped to 92.9 percent in the first six months 1990 compared to 108.3 percent in 1989. Higher volume and favorable experience for the property lines of business contributed to an improvement in the loss ratio, which declined to 54.8 percent in 1990 compared with 56.8 percent recorded in the same period in 1989. The expense ratio improved to 38.1 percent from 51.5 percent in the prior year, reflecting the results of RLI's increased premium volume and more streamlined organization.

"We are pleased with the marked improvement in our expense ratio, which occurred as a result of the cost-cutting measures we put in place a year ago," said Stephens. "RLI is now a more efficient company, and the results clearly reflect the steps we have taken to strengthen our operations."

Net investment income before realized gains for the first six months 1990 reached $5.2 million, a 7 percent increase over the $4.8 million attained last year. In both 1990 and 1989, realized investment gains of less than $.01 per share were reported.

Cash and invested assets totalling $195.2 million at June 30, 1990, were up $8.7 million from year-end 1989. Shareholders' equity rose to $73.7 million ($13.02/share) as of June 30, compared with $70.3 million ($12.42/share) at Dec. 31, 1989. Common stock outstanding at June 30, 1990, remained unchanged from year-end 1989, at 5,658,974 shares.

RLI Corp underwrites selected property and casualty insurance products, and markets contact lens insurance, related products and practice automation systems to the ophthalmic industry.

ALLENTOWN, PA (JULY 25) PR NEWSWIRE - Air Products and Chemicals Inc. (NYSE: APD) reported sales of $712.8 million and net income of $56.8 million, or $1.02 per share, for the three months ended June 30, 1990.

Net income for the current quarter was 6 percent higher than the $53.3 million, or $.97 per share, the company reported in last year's third quarter. Sales for the current quarter were up 7 percent over the $663.7 million reported in the year-ago quarter. The current quarter results included an after-tax gain of $2.4 million from the sale of a catalyst business and an after-tax charge of $.9 million from the early retirement of long-term debt. The effect of these two items was a net gain of $.02 per share.

Reviewing third quarter results, Air Products Chairman Dexter F. Baker said, "Our worldwide gases and strategic chemicals businesses achieved strong profit growth as volumes reached record or near-record levels in a number of product lines despite slowed economic growth. Higher operating income from these businesses more than offset the impact of weaker commodity chemical prices, a higher effective income tax rate, and increased interest expense."

In the third quarter, industrial gas revenues and operating income rose 9 percent and 6 percent respectively, compared to the year-ago quarter. Worldwide merchant and on-site gas volumes continued to grow and liquid oxygen and nitrogen prices in Europe and the United States improved.

In chemicals, third-quarter revenues rose 5 percent and operating income increased 15 percent due to broad-based gainsin strategic chemicals. In commodity chemicals, which includes the recently divested polyvinyl chloride resins business, operating income declined due to lower prices.

Environmental and Energy segment results showed an improvement of $6.3 million compared to the year-ago quarter, reflecting last year's charges associated with the landfill gas business. Equity affiliate results benefited from continued strong operations at the Hempstead, Long Island, waste-to-energy and Stockton, Calif., cogeneration facilities. The profit contributed from these facilities essentially covered the costs associated with developing the waste-to-energy, cogeneration and flue gas desulfurization businesses during the quarter.

The Equipment and Technology segment operated at a profit in the third quarter due to a higher level of activity in the equipment part of the segment. The profits from the sale of a catalyst business also contributed to this segment's results.

The Corporate and Other segment reflects an unfavorable variance compared to last year's third quarter due largely to the profitable sale last year of a minority interest in an insurance venture established in 1985.

For the first nine months of fiscal 1990, Air Products' sales were $2.1 billion and net income was $166.8 million, or $3.01 per share. The

results for the comparable period in fiscal 1989 were sales of $2.0 billion and net income of $171.1 million, or $3.12 per share. The current year results included a net after-tax gain of $7.8 million, or $.13 per share, from nonrecurring items. Last year's results included nonrecurring items totalling $9.8 million after-tax, or $.18 per share. The current year results also included the impact of significantly lower commodity chemical prices which reduced earnings per share by approximately $.42, including $.07 per share in the third quarter.

SANTA CLARA, CALIF. (JULY 25) PR NEWSWIRE - Stanford Telecommunications, Inc. (NASDAQ: STII) announced that it has entered into an agreement with Techsonic Industries Inc. of Eufaula, Ala., producer of Humminbird Marine Information Systems, to jointly develop Humminbird's first GPS marine navigation system for use in the boating and sportfishing market.

The Humminbird GPS receiver will allow consumers to take advantage of Stanford Telecom's advanced GPS technology. Stanford Telecom has played a leading role in GPS system technology and development since its founding in 1973. Dr. James J. Spilker, Jr., president and chairman of Stanford Telecom in announcing the agreement said, "This agreement gives us a unique opportunity to apply our GPS technologies and VLSI semiconductor chips to the consumer market with the established market leader, Humminbird".

Tom Dyer, president and chief executive officer of Techsonic Industries in applauding the agreement said, "We've been searching for several years for the right technology partner to proceed with this ambitious project. This reflects our belief in GPS' superiority over conventional land-based LORAN products and applications. As GPS obsoletes LORAN, we expect to be the leading supplier to the boating and sportfishing markets".

The Humminbird GPS satellite navigation system is expected to be in production in June of 1991.

Stanford Telecom designs, manufactures and operates electronic systems primarily for space programs for Government and commercial customers. These systems provide a variety of functions including satellite navigation, communications, earth observation and tracking, telemetry and control for both fixed stations, as well as mobile and airborne users.

WASHINGTON (JULY 25) PR NEWSWIRE - Quality International, the franchiser of Comfort, Quality, Clarion, Sleep -- and now Rodeway -- has changed its name to Choice Hotels International.

With the acquisition of Rodeway Inns International earlier this month, Choice Hotels International became the world's largest franchise hotel company.

"The new name reflects the great variety we offer guests -- choices in price ranges, facilities and locations," said Gerald W. Petitt, president and chief operating officer. "The name also lets consumers know that this is an international organization with hotels in 19 countries on five continents.

The new name is a corporate name change only. It does not involve any on-site changes by any hotels in the system.

"This company has successfully positioned itself as a leader in the lodging industry," said Petitt. "Our new name reflects that role."

"Our future growth and success lies in our ability to meet the needs of a full range of guests," continued Petitt. "To survive in today's market, we have to look at the world as our marketplace and provide our consumers a choice.

"This name change is a logical extension of our development of the concept of market segmentation in the hotel industry in the 1980s. We have built our reputation as the hotel company that offers choices, and now our name says that too."

Choice Hotels International franchises 1,600 hotels, inns, suites and resorts in 19 countries under the Sleep, Comfort, Quality, Clarion and Rodeway names.

#90206p8622 07/25/1990 ~PR Newswire
SANTA BARBARA, CA. (JULY 25) PR NEWSWIRE - President and Chairman, Richard A. Auhll, today announced that first half 1990 set new all-time Circon (NASDAQ: CCON) records for sales, gross profit and net income. Moreover, first half net income and earnings per share were up 643 percent over the first half 1989.

Circon's primary market of "Minimally Invasive Surgery" instrumentation is

expected to have substantial growth in the coming year, as discussed below.

Sales for the first half 1990 totalled a record $27.1 million, a solid increase over the first half 1989. The 20 percent increase in sales achieved by the U.S. direct sales force was the most significant factor.

Gross profit for the first six months 1990 was up 14 percent over last year to $13.5 million, a new Circon high. Gross profit as a percentage of sales grew to 49.9 percent, up from the 47.7 percent, of the first half 1989.

Net income for the first half 1990 rose to a record setting $1.1 million, up dramatically from the $146,000 of the first half 1989. Second quarter 1990 net income increased to $807,000 from $90,000 in 1989. The extraordinary gain of $750,000 resulting from estructuring Circon's debt and repurchasing a $9.0 million convertible note for $7.5 million was a substantial factor.

Sales for second quarter of 1990 were $14.0 million, up from the $12.7 million of the second quarter 1989. Gross profit grew to $6.9 million.

R & D expenditures were up 11 percent in the second quarter as product development efforts accelerated in the emerging Minimally Invasive Surgery areas of cholecystectomy (gall bladder removal) and gynecology. Sales and marketing expenses were also up 18 percent as additional efforts were directed to these fields.

First half operating income was up 11 percent over 1989 and that of the second quarter was down slightly. The new product and market development efforts undertaken in the second quarter should provide a solid base for the future operating income growth.

Minimally Invasive Surgery refers to surgical procedures which can be accomplished endoscopically without a major incision or other traumatization of the patient and often without general anesthesia.

With endoscopic instrumentation the patient has significantly reduced trauma, better healing, much faster recovery, and a shorter hospital stay at a far lower cost than with traditional procedures. This is due to much smaller incisions and reduced tissue damage.

Economic pressures and patient demands have been sufficiently high for some time to induce physicians to seek minimally invasive methods to replace traditional open surgery. Now, new procedures and appropriate endoscopic instrumentation have been developed to replace some of the older, widely used general surgery procedures.

The 35,000 general surgeons perform 600,000 cholecystectomies (gall

bladder removal) and 300,000 appendectomies (appendix removal) annually in the Unites States. In addition, 30,000 gynecologists perform 600,000 hysterectomies annually.

At the present time few of these procedures are utilizing the minimally invasive endoscopic techniques. Surgeons expect that within five years 30 percent to 70 percent of these procedures will be performed endoscopically.

These minimally invasive surgery trends involving about 1,000,000 new surgeries annually will cause a significant increase in the market for new endoscopy and video equipment. Circon already has FDA approval to market much of this instrumentation and will be delivering equipment for several of these applications by year end.

PITMAN, NJ (JULY 25) PR NEWSWIRE - K-Tron International Inc. (NASDAQ: KTII) today announced that Kevin C. Bowen, 38, has been elected president of K-Tron Corp., the domestic feeder and blender manufacturing subsidiary of K-Tron International Inc. located in Pitman.

Bowen joined K-Tron in 1979 as a regional sales manager, was promoted to vice president-marketing in 1988 and in 1989 served as vice president-manufacturing. In late 1989, Bowen was elected general manager of K-Tron Corp.

Donald W. Melchiorre, 41, has been elected a vice president of K-Tron International Inc. and is being transferred to Switzerland to take over responsibility for marketing the company's feeder products in Europe. As European sales manager Melchiorre, previously general marketing manager for U.S. feeder operations, will relocate to Niederlenz, Switzerland, in August and be responsible for sales and service of K-Tron's feeder equipment throughout Europe, including Eastern Europe and the Soviet Union. Melchiorre started with K-Tron in 1987 as regional sales manager and was promoted to general marketing manager in 1989.

John R. Pettit, 35, vice president-manufacturing and product engineering for the company's domestic feeder and blender operations, has been elected vice president-marketing replacing Melchiorre. Pettit joined K-Tron in 1977 in the engineering department, became test lab manager in 1981, moved to regional sales manager in 1982 and national sales manager in 1987. Pettit was promoted to vice president- engineering for K-Tron Corp. in 1988, and in 1989 was named vice president-manufacturing and product engineering. Following Pettit's move to marketing, Bowen will direct responsibilities for manufacturing.

K-Tron also announced that Ulrich Wiedenbeck, 50, has been elected managing director of K-Tron Asia Pacific Pte Ltd., located in Singapore. Wiedenbeck will be responsible for sales, service, training and technical assistance for customers throughout the Far East. These activities were previously directed by Wiedenbeck from Pitman. Wiedenbeck has been associated with K-Tron for eight years and had served in various marketing positions in Europe prior to assuming responsibility for the Far East markets in 1988.

K-Tron International Inc., through its subsidiaries, is a major producer of gravimetric feeders, blenders and security systems with facilities in the United States, Europe and the Far East and customers throughout the world.

#90206p8629 07/25/1990 ~PR Newswire

FREMONT, MI (JULY 25) PR NEWSWIRE - The Gerber Products Company (NYSE: GEB) Board of Directors today approved a 25-percent increase in the quarterly cash dividend per share to $0.30 per share, payable Sept. 10 to shareholders of record Aug. 13, 1990.

Al Piergallini, chairman, president, and chief executive officer said, "The dividend increase is in line with one of our stated financial goals to increase dividends commensurate with earnings growth. Furthermore, it provides further evidence of Gerber's dedication to increasing shareholder value."

In addition, the board authorized the redemption of the outstanding common

share purchase rights, under its Shareholder Rights Plan, at a redemption price of $0.05 per right, effective the close of business on Aug. 13, 1990.

The board also adopted a new Shareholder Rights Plan in which preferred share purchase rights will be distributed as a dividend at a rate of one right for each common share held by shareholders of record as of Aug. 13, 1990. Each new right is initially exercisable, upon the occurrence of certain events, for 1/100 of a share of a new series of the company's preferred stock designated the Series A Junior Participating Preferred Stock at an exercise price of $180.

If a person or group acquires 15 percent or more of the company's common shares or the company's board of directors determines that a 10-percent-or-more holder is an "adverse person" as described in the plan, each right (other than those held by a 15-percent-or-more holder or adverse person) become the right to acquire, at the right's exercise price common shares of the company having a value of twice the right's exercise price. The new rights will expire on Aug. 12, 2000. Except in certain instances, the company will be entitled to redeem the new rights at $0.01 per right until 30 days following a public announcement that a 15-percent position has been acquired.

"The new rights plan establishes an exercise price for the new rights that better reflects the company's long-term trading value. Since the adoption of the original plan, the adjusted pose split price of Gerber stock has risen 177.4 percent from $20.50 on March 18, 1986, to $56.875 on July 24, 1990," said Fred Schomer, executive vice president and chief financial officer.

Details of the new Shareholder Rights Plan are outlined in a letter which will be mailed to all shareholders.

"The new Shareholder Rights Plan is not being adopted in response to any efforts to acquire control of the company," Schomer concluded.

#90206p8633 07/25/1990 ~PR Newswire

LEBEC, CA (JULY 25) PR NEWSWIRE - Tejon Ranch Co. (AMEX: TRC) today reported net income of $824,000 or $.07 per common share, for the six months ended June 30, 1990. This compares with net income of $1,525,000 or $.12 per common share for the same period in 1989.

Net income for the second quarter ended June 30, 1990, was $924,000 or $.07 per common share compared to net income of $1,546,000 or $.12 per common share for the same period in 1989.

The decrease in net income compared to 1989 for both year-to-date and the second quarter is due to the receipt in April 1989 of an $884,000 cash settlement for a gas pipeline condemnation during 1989. Increased water charges due to drought conditions have also reduced earnings for the first six months. As the company begins to receive credits for its unused water entitlement later this year, water costs for the year are expected to be substantially lower and should eventually more than offset the higher water costs incurred to date. The earnings reductions in 1990 were partially offset by increased livestock income and a reduction in corporate general and administrative expenses.

The increase in livestock income is due to the forced early sale of calves due to drought conditions on the ranch. These sales will increase income during 1990 but will reduce earnings in 1991 since the calves that were sold would normally be retained and sold as heavy feeders in 1991.

Total revenues from operations, including interest income, for the second quarter ending June 30, 1990, were $4,067,000 compared to $4,977,000 for the same period in 1989. Total revenues, including interest income for the six months ending June 30, 1990, were $5,559,000 compared to $6,543,000 for the same period in 1989.

Tejon Ranch Company owns approximately 270,000 acres of land approximately 60 miles north of Los Angeles and engaged in cattle, farming, oil and minerals, and commercial highway leasing operations.

#90206p8635 07/25/1990 ~PR Newswire

CHICAGO (JULY 25) PR NEWSWIRE - Stone Container Corp. (NYSE: STO) achieved record sales for the second quarter and first six months of 1990, while earnings declined from the levels of a year ago, announced Roger W. Stone, chairman, president and chief executive officer.

Sales for the three months ended June 30, 1990 were a second quarter record at $1.43 billion, up over the $1.38 billion reported for the second quarter of 1989. For the first six months, sales were a record $2.88 billion, up over the first half 1989 sales of $2.51 billion. The principal factor contributing to the sales increase for the six months was the inclusion of sales for that entire period of Stone-Consolidated (formerly Consolidated-Bathurst Inc.), which Stone Container acquired on March 2, 1989.

Net income for the current quarter was $29.5 million, compared to $63.6 million earned in the second quarter of 1989. Earnings per share were $.49, compared to $1.06 per share in the second period last year.

For the first six months of 1990, net income was $66.2 million, compared to $150.4 million for the first half of 1989. Earnings per share for the 6-month period were $1.10, compared to a record $2.50 per share for the year-ago period.

The 1990 results were impacted primarily by continued discounting of product pricing. Additional factors were increased interest expense and a higher effective tax rate.

During the first half of 1990, price discounts have been prevalent, particularly in newsprint, linerboard and market pulp. Additionally, prices of converted products have declined during the first half to reflect the current discounted price levels of the mill products.

Interest expense in the second quarter of 1990 was $105.6 million, compared to $97.5 million in the year-ago period. For the first six months, interest expense was $211.5 million compared to $141.6 million for the first six months of 1989.

As in the first quarter of this year, depreciation for the second quarter decreased $9.8 million due to a change in the depreciation rates for the company's mills. The effect on net income for the current quarter was

$5.7 million.

In the second quarter, the company recorded a gain, net after tax, of $3.1 million from the sale of timberlands. In the second period of 1989, the net gain from asset sales was $1.5 million.

The company's effective tax rate in the second quarter and first six months of 1990 was 42 percent, compared to 38 percent for the year ago periods.

Recently, the company announced that it had successfully completed negotiations with the Canadian Paperworkers' Union for a three-year renewal of labor contracts covering employees at three of the company's Canadian mills.

The company also recently announced it had received commitments from a group of its banks for a standby credit facility of $400 million. The facility is designed as a backup extension of funds for possible use in semi-annual repayments of an existing bank term loan. The facility provides additional flexibility in expanding the company's options over the next 2-1/2 years. In the event of any drawings by the company on this new facility, the principal repayment period has a final maturity date of March 1, 1997.

In commenting on conditions relating to the company's major product lines, Stone said, "Although we have seen recent weakness in commodity market pulp prices, other major product lines show positive signs. Price increases were recently implemented in North America and in the U.K. for newsprint. Retail bag prices have been increased effective Aug. 1. Linerboard demand remains strong, industry inventory levels have declined and we recently announced a $30-per-ton increase on export linerboard. Importantly, we also believe that pricing for corrugated containers has bottomed."

"Thus, though we see 1990 as a difficult year, with the Canadian union negotiation behind us, the increased flexibility provided by the new bank facility and the positive signs in certain of our major product lines, we believe that the long-term outlook is very positive for our company," Stone concluded.

Headquartered in Chicago, Stone Container is a major international pulp and paper company. With manufacturing facilities in the United States, Canada, the United Kingdom, West Germany, the Netherlands and Mexico (an affiliate), the company's product line includes containerboard, corrugated containers, kraft paper, paper bags and sacks, newsprint, groundwood specialties, market pulp, flexible packaging and wood products.

#90206p8636 07/25/1990 ~PR Newswire

SAN DIMAS, CA (JULY 25) PR NEWSWIRE - Vestar Inc. (NASDAQ: VSTR) today announced that is has been informed by the Bundesgesundheitsamt (BGA), the German drug approval authority, that the BGA has approved a priority review of the AmBisome submission, the company's first proprietary product.

Allocation of priority means that the submission will be reviewed ahead of submissions filed prior to AmBisome which have not received a priority rating. In accordance with German regulations, approval of a priority rating means that the BGA has reviewed the submission and has decided that the product is considered a technical innovation and of important therapeutic value. Vestar submitted the application in February 1990.

Dr. Roger Crossley, president and chief executive officer of Vestar, stated, "this is extremely good news and is the first formal governmental agreement with our own view of the value of AmBisome." Historically, the number of submissions granted a priority review is very low.

AmBisome is the trade name for the intravenous liposomal formulation of amphotericin B, a broad-spectrum, anti-infective agent used to treat potentially fatal systemic fungal infections that often occur in immune-compromised patients who have undergone cancer therapy, post-organ/bone marrow transplants and AIDS patients.

In clinical trials, AmBisome has virtually eliminated the acute and chronic toxicity associated with conventional amphotericin B, even at 3-4 times higher doses, demonstrated by its 80 percent clinical response rate in patients who had already failed conventional therapy, or in whom it was contraindicated.

Vestar Inc. is a pharmaceutical company focused on the development of therapeutic and diagnostic agents for cancer, AIDS, and related diseases.

#90206p8637 07/25/1990 ~PR Newswire

HARRISBURG, Pa. (JULY 25) PR NEWSWIRE - AMP Inc. (NYSE: AMP) Chairman and Chief Executive Officer Harold A. McInnes today announced second quarter results, actions and dividend declaration.

Second quarter sales of $752 million were the second best in the company's history -- up 4 percent from the year-earlier period, but down slightly from the record $764 million in the first quarter of this year. Earlier AMP had expected worldwide sales to exceed the first quarter level. Sales did continue to advance in Europe, but Asia/Pacific sales were flat following a strong first quarter, and U.S. sales declined slightly, reflecting the continued sluggishness of the U.S. economy and the U.S. electronics industry. In addition, Brazilian sales were down sharply in the second quarter from the record level set in the first quarter because of the austerity program initiated in March by the new government to combat hyperinflation.

Changes in exchange rates during the past year did not have a significant effect on total international sales because of offsetting effects. For the first half of this year, U.S. sales were down 6 percent and international sales were up 16 percent in U.S. dollars. European sales were up 11 percent in local currencies and 21 percent in U.S. dollars. Asia/Pacific sales were up 19 percent in local currencies, but up only 8 percent in U.S. dollars.

International sales growth continues to be broadly based, with good growth in nearly all market categories. In the U.S., sales are expected to advance this year in our automotive, distributor, and networking markets; be flat in our aerospace/military, consumer, and industrial/commercial electronics markets; and be down moderately in our computer/office equipment market.

First half earnings of $1.39/share, while up 4 percent from $1.34/share in the year-earlier period, were still below the record $1.50/share in the first half of 1988 despite record sales. Profit margins were maintained during the second quarter at the first quarter 1990 level in Europe, but declined in Asia/Pacific, Brazil and the U.S. While second quarter earnings were up year-to-year on a total basis to $0.64/share from $0.62/share, they were down on an operating basis because the $0.62/share in the 1989 second quarter was after an $0.11/share reduction due to an incentive early termination program and other special restructuring charges in the U.S.

Harrisburg-based AMP Inc. is the world's leading producer of electrical/electronic connection devices. It has 24,800 employees in nearly 160 facilities in the U.S. and 26 other countries. AMP stock is listed on the New York, Pacific and other regional stock exchanges (symbol "AMP").

COLUMBUS, OHIO (JULY 25) PR NEWSWIRE - John B. McCoy, chairman and chief executive officer of Banc One Corporation (NYSE: ONE), announced today that Bank One, Texas, NA has reached agreement to install automated teller machines (ATMs) in more than 350 Diamond Shamrock-owned stores throughout Texas. By the end of the year, 175 Diamond Shamrock-owned convenience stores in Austin, Dallas, Fort Worth, Houston and San Antonio will have new Bank One ATMs. The remainder will be installed throughout Texas by mid-1991.

"Diamond Shamrock Corner Stores really are dual-service, gas station/convenience stores," said Alfred S. Dominick, Jr., executive vice president and chief retail officer for Bank One, Texas. "They are superbly located on the best corner lots with good access and parking, and therefore are ideal banking sites," he explained.

"The banking public wants easy access to banking services," said Dominick. "So we believe ATM users will respond favorably to this additional convenience."

The new Bank One ATMs will be compatible with all major ATM cards issued in the greater Southwest, including those issued by financial institutions which are members of Pulse and MPACT.

Banc One Chairman McCoy indicated that this is an important step in expanding Banc One's ATM network. "The addition of the Diamond Shamrock store ATMs, as well as conversion of the former Bright Banc ATMs, will bring our Texas ATM network to over 500 machines. Banc One Corporation will then have over 1,000 automated teller machines nationally, making it the sixth largest bank ATM network in the United States," McCoy explained.

Installation will begin in San Antonio in September with replacement of 84 machines owned by a former savings and loan organization in San Antonio. No disruption in ATM service to Diamond Shamrock customers is expected.

The balance of the machines will be installed throughout the state in Diamond Shamrock-owned stores which presently do not offer ATM services.

Banc One Corporation has assets of $27.9 billion, not including Bank One, Texas, and common equity of $2.69 billion as of June 30, 1990. Bank One, Texas reported assets of $13.1 billion, including $2.1 billion of assets in the special collection pool. Banc One Corporation now operates banking organizations in Indiana, Kentucky, Michigan, Ohio, Wisconsin and Texas with 716 offices.

CHARLOTTE, NC (JULY 25) PR NEWSWIRE - Coca-Cola Bottling Co. Consolidated (NASDAQ-NMS: COKE) today reported that net income available to common shareholders in the second quarter more than doubled to $4.3 million. Net income per common share was $.47, also more than twice the level recorded in last year's second quarter. For the first half of 1990, net income available to common shareholders increased to $2.3 million and net income per common share rose to $.25, compared to a loss of $1.0 million and $.12

respectively for the first half of 1989. Operating cash flow was $18.9 million for the second quarter of 1990, up 23 percent from last year. For the first half, operating cash flow was $30.5 million, up about 20 percent from the first half of last year.

The improvements in financial results for the second quarter reflect an almost 14 percent increase in franchise unit sales, higher average selling prices and expanded operating margins, offset somewhat by lower contract sales. Moore said that while some of the strong unit sales growth was the result of acquisitions, "same franchise" unit sales grew well in excess of estimates of industry-wide growth during the quarter. Average selling prices were up for the quarter and operating cash flow as a percentage of net sales grew to 15.6 percent for the quarter versus 14.7 percent for the previous year's second quarter. Moore said that the improved operating margins achieved reflect, in part, the Company's focus on higher-margin packages and volume shifts between various distribution channels as well as the impact of strong sales growth.

Moore said he feels the Company is better positioned than at any time in recent years to capitalize on industry trends.

#90206p8647 07/25/1990 ~PR Newswire

CALGARY, ALBERTA (JULY 25) PR NEWSWIRE - Officials with AGT and Robert Bosch GmbH today signed an agreement whereby Bosch will acquire a 50 percent interest in NovAtel Communications, Canada's only manufacturer of both cellular telephones and systems.

Bosch, a diversified international manufacturer of automotive, communications, capital goods, and consumer products with a presence in more than 120 countries, is picking up the 50 percent interest previously held by Nova Corp.

''It's a perfect match,'' said AGT chairman, Dr. Neil Webber. ''Bosch's international experience, research and development expertise, and its marketing know-how will strengthen NovAtel's growth and expansion.''

Bosch chairman, Dr. Marcus Bierich, in Calgary to sign the deal, said that ''this move will intensify research and development, strengthen international competitiveness and solidify our position in European and North American markets especially in the field of cellular phones.''

NovAtel was established in 1983 as a joint partnership between AGT and NOVA Corporation. AGT became sole owner last year and has actively pursued a strategic alliance since that time.

Based in Stuttgart, Germany, Bosch is extensively involved in consumer

electronics through its Blaupunkt subsidiary. NovAtel will serve as a base for Bosch's cellular operations, a natural extension of its automotive and communications business. This investment will give Bosch Communications Technology (Bosch Telecom) a manufacturing presence in the important North American market.

Headquartered in Calgary, Canada, NovAtel is a leader in cellular technology, currently employing more than 1500 people in the research development, manufacture, and sale of cellular telephones and cellular systems worldwide.

AGT, based in Alberta, is Canada's third largest telecommunications company with assets of $2.8 billion and annual revenues of $1.2 billion. In addition to NovAtel, AGT's subsidiary operations include Alta Telecom International Ltd. which specializes in consulting services and customized telecommunications systems overseas; Alta Telecom Inc. which provides alternate access networks, and engineering design management in the United States; Alta-Can Telecom Inc. which invests venture capital in technology-based businesses.

#90206p8655 07/25/1990 ~PR Newswire

DALLAS (JULY 25) PR NEWSWIRE - Motel 6, L.P. (NYSE: SIX) today reported revenues for the second quarter of $122.7 million, a 12 percent increase over 1989. Income before depreciation and interest was $58.4 million, a 13 percent increase over 1989. Net income was $10.4 million compared to $4.9 million in 1989.

For the six months ending in June, revenues were $220.0 million, up $25.2 million or 13 percent from the prior year. Income before depreciation and interest during this period rose to $96.6 million, an increase of $11.3 million or 13 percent over 1989. Net income was $3.5 million compared to a net income of $2.7 million in 1989.

Depreciation expense was $15.8 million and $30.5 million for the quarter and six months, respectively, after being reduced by the $1.3 million and $2.5 million effect of the September 1989 change in the depreciable lives of certain motel buildings and improvements. Interest expense for the six-month period increased $4.8 million as a result of additional debt financing associated with expansion.

On July 18, 1990, a subsidiary of Accor S.A., a Paris-based lodging and food service company, commenced a tender offer to acquire all of the outstanding common units of Motel 6, L.P. at a price of $22.50 per common unit.

Motel 6 is the nation's largest chain of exclusively owner-operated economy motels with 536 locations and over 61,000 rooms in 42 states.

#90206p8656 07/25/1990 ~PR Newswire

HOUSTON (JULY 25) PR NEWSWIRE - Southdown Inc. (NYSE: SDW) announced net earnings of $8.0 million, or 38 cents per share on a fully diluted basis,

for the three month period ended June 30, 1990.

This compares with net earnings of $6.7 million, or 30 cents per share, in the second quarter of 1989. Net earnings in the second quarter of 1989 included $3.0 million, or 18 cents per share, from the company's oil and gas operations which were sold in late 1989 and have been classified as a discontinued operation.

For the first six months of 1990, net earnings were $14.3 million, or 66 cents per share fully diluted, compared with $13.7 million, or 61 cents per share, a year earlier. The 1989 results included $6.3 million, or 37 cents per share fully diluted, of earnings from the discontinued operations.

Operating earnings were $19.1 million in the second quarter of 1990, compared with $20.3 million a year earlier. The lower operating earnings were primarily the result of a decline in earnings from the concrete products operations, which have been adversely effected by the slowdown in construction activity in the Florida and Southern California markets. Operating earnings for the first half of 1990 were $35.7 million, compared with $39.9 million a year ago.

Interest expense declined significantly in 1990 compared with a year ago. Interest expense totalled $7.5 million and $15.0 million in the second quarter and first half of 1990, respectively, compared with $14.8 million and $28.9 million, respectively, in the comparable periods in 1989. The decline reflects substantially less debt outstanding than a year ago as a result of the sale of the company's oil and gas operations.

Southdown Inc. is one of the leading U.S. cement and ready-mixed concrete companies. The company manufactures cement in eight plant locations around the country and markets ready-mixed concrete in Florida and Southern California.

#90206p8659 07/25/1990 ~PR Newswire

SOUTHFIELD, MI (JULY 25) PR NEWSWIRE - Dennis J. Gormley, chairman and chief executive officer of Federal-Mogul Corporation (NYSE: FMO), today reported second-quarter earnings of 25 cents a share. The board of directors also met and declared the company's regular quarterly dividend.

Gormley said sales for the quarter ended June 30, 1990, were $289.3 million compared to $294.8 million in the same 1989 quarter. The 1989 second quarter included $14.0 million of sales from two business units which were sold during that period. Excluding those divestitures, sales in the second quarter of 1990 reflect a 3-percent increase over the previous year.

Earnings available for common shares amounted to $5.6 million or 25 cents a share for the second quarter of 1990, compared with $19.1 million or 83 cents a share for the same quarter of 1989. The 1989 earnings, however, included a one-time gain of $8.3 million or 36 cents a share from divestitures. Adjusting for the 1989 gain, second-quarter 1990 earnings were off 47 percent from the prior year.

Gormley reported that second-quarter sales to global aftermarkets increased by nearly 5 percent as a result of lighting product lines acquired from the R.E. Dietz Co. earlier this year. He also reported that sales of fastening systems increased by 17 percent compared to the same quarter of 1989. These improvements have offset reduced sales in the depressed original equipment sector, Gormley said.

"The year-to-year earnings decline is similar to that experienced in the first quarter of 1990 and is largely attributable to reduced demand on our manufacturing operations," he continued.

"The widely publicized reduction in production schedules of automotive and heavy-duty original equipment manufacturers has reduced the demand on our plants since the summer of 1989," Gormley said. "Our production requirements have been further impacted by our internal efforts to significantly change our manufacturing process and reduce our inventory levels throughout the company."

The Dietz product line also contributed 3 cents a share to the second-quarter decline in earnings, he added. This decline is the result of high sourcing costs from the prior owner and start-up costs as Federal-Mogul integrates these products into its manufacturing and distribution operations.

In other action today, Federal-Mogul's board of directors declared the regular quarterly dividend of 23 cents a share on the common stock of the company. The dividend is payable Sept. 10, 1990, to shareowners of record at the close of business on Aug. 24, 1990. It will be the 218th consecutive dividend paid by the company.

Headquartered in Southfield, Federal-Mogul operates 37 plants, more than 70 distribution centers and four research centers throughout the world. Its products range from a variety of precision parts for the transportation, farm equipment, construction and manufacturing industries to aerospace components.

SAN FRANCISCO (JULY 25) PR NEWSWIRE - Chevron Corp. declared a quarterly dividend of 77.5 cents per share, payable Sept. 10 to stockholders of record Aug. 6. The dividend is an increase of 7.5 cents per share from the preceding quarter.

"The increase reflects the Board's confidence in the future success of the company's programs to enhance stockholder value as evidenced by strong first half earnings and cash flow. We're continuing to make excellent progress on our programs to reorganize and streamline operations, modernize our refineries and service stations and decentralize decision making," said Board Chairman and CEO Ken Derr.

#90206p8669 07/25/1990 ~PR Newswire

ATLANTA, (JULY 25) PR NEWSWIRE - First Liberty Financial Corp. (NASDAQ-NMS: FLFC) reported net income of $425,000 or $.21 per fully diluted share for the quarter ended June 30 compared to a net loss of $4,393,000 or $2.23 per fully diluted share for the quarter ended June 30, 1989.

For the nine months ended June 30, net income and fully diluted earnings per share were $1,248,000 and $.63 compared to a net loss of $3,435,000 and $1.75 for the nine months ended June 30, 1989.

For the third quarter of fiscal 1990, net interest income increased to $5.5 million from $3.5 million for the third quarter of fiscal 1989. For comparable periods, First Liberty's net interest rate spread increased to

3.11 percent from 1.42 percent. Additionally, for the nine months ended June 30, net interest income increased to $16.4 million from $12.9 million for the nine months ended June 30, 1989; likewise for the same periods, the company's net interest rate spread increased to 3.04 percent from 2.12 percent.

Non-interest income for the quarter ended June 30 was $2.3 million compared to a loss of $1.2 million for the quarter ended June 30, 1989. Non-interest income for the nine months ended June 30 was $6.6 million compared to $5.3 million for the nine months ended June 30, 1989. This increase was primarily the result of a $3.1 million loss on securities transactions taken in the third quarter of 1989. During the nine months ended June 30, 1989, the securities loss was offset by a $2.4 million gain on sale of bulk servicing. There were no such items affecting non-interest income during the nine months ended June 30, 1990.

First Liberty's non-interest expenses declined to $6.4 million for the third quarter of fiscal 1990 from $8.1 million for the third quarter of fiscal 1989. Non-interest expense for the nine months ended June 30 also declined to $19.5 million from $22.2 million for the nine months ended June 30, 1989. The decline for both periods is the result of First Liberty's implementation of a cost reduction program in the last quarter of fiscal 1989.

Total assets declined to $894 million at June 30 from $1.3 billion at June 30, 1989, due primarily to the sale of mortgage-backed and investment securities during the fourth quarter of fiscal 1989.

Rated assets declined to $29.2 million at June 30 from $37.0 million at March 31, 1990. The reduction resulted from the improvement in several loans which had previously been rated. Additionally, non-performing loans declined to $11.7 million at June 30 from $12.2 million at March 31, 1990. Foreclosed real estate owned increased by $2.4 million over March 31, 1990, levels to $14.2 million at June 30, resulting in an increase in non-performing assets of $1.9 million to $25.9 million at June 30.

In consideration of the weakness which now exists in the real estate markets, management has elected to systematically increase the level of general loan loss reserves. At June 30, general loan loss reserves totaled $2.5 million or .71 percent of risk loans as compared to $1.6 million or .44 percent of risk loans at March 31, 1990. Risk loans are defined as all loans except residential permanent mortgage loans. R. Gordon Rowell, Liberty's chief executive officer, commented: "Historically, Liberty has not incurred material losses on foreclosed real estate and in many cases realizes gains on the sale of foreclosed properties. However, in soft real estate markets, like many other healthy banks and thrifts, we believe it is prudent to strengthen reserves."

Stockholder's equity was $32.8 million or $16.56 per share at June 30. Primary and fully diluted tangible book value was $10.36 per share and $12.75 per share respectively.

The company also announced that its principal subsidiary, Liberty Savings Bank, FSB, has entered into an agreement to sell its credit card portfolio to the Massachusetts Company, a subsidiary of The Travelers Insurance Companies, for an undisclosed sum. That transaction is expected to close during the first week in August.

First Liberty Financial Corp. is a holding company for Liberty Savings Bank, FSB, and Liberty Savings Bank of South Georgia, FSB, operating 34 banking offices throughout the state of Georgia. First Liberty common stock is quoted through the National Market System of the National Association of Securities Dealers (NASDAQ) under the symbol FLFC. First Liberty's 8-1/4 percent convertible subordinated debentures are quoted through the NASDAQ under the symbol FLFCG.

#90206p8675 07/25/1990 ~PR Newswire

TORRANCE, CA (JULY 25) PR NEWSWIRE - Jeffrey E. Grant, a corporate vice president of Hughes Aircraft Co., has been named president of the firm's Industrial Electronics Group.

Grant, 49, has held a number of line management posts in his 26 years at Hughes, and has assisted in the general management of the Group since January 1989. Prior to that, he served in a similar capacity with the company's Space and Communications Group. He is also a member of the Hughes policy board.

In his new post, he succeeds Dr. Arne Lavik, who is retiring. Grant joined Hughes in 1964 as a member of the technical staff for the microwave tube division, now called the electron dynamics division. He subsequently was head of the division's power tube department, product line manager for power amplifiers and thermal products, assistant division manager and division manager. He holds a bachelor of science degree in physics from the University of California, Berkeley, and a master of science degree in electrical engineering from UCLA.

Lavik, 61, has been closely involved with advances in microwave and millimeter-wave technology in his more than 30 years with Hughes. Named group president in 1988, he was previously vice president of the Ground Systems Group. A native of Norway, he holds degrees from Bergens Commercial College and the Norwegian Institute of Technology in his native country, and a Ph.D. from the Braunschweig Institute of Technology in

Germany.

The Industrial Electronics Group, one of Hughes' seven operating groups, employs some 6,000 people in facilities located in Southern California, Mexico and Scotland. It comprises six divisions and several subsidiaries engaged in the development and production of advanced components, equipment and assemblies for a variety of industrial, defense, commercial and scientific applications.

#90206p8676 07/25/1990 ~PR Newswire

SKOKIE, IL (JULY 25) PR NEWSWIRE - Brunswick Corp. (NYSE: BC) today reported modest declines in net earnings for the second quarter and six months ended June 30, 1990.

For the quarter, net sales of $670.4 million were down 13 percent from net sales of $771.9 million in the second quarter of 1989. Net earnings of $19.5 million, or 22 cents per share, were down 5 percent from net earnings of $20.5 million, or 23 cents per share, in the comparable period of the prior year. Results for the second quarter of 1989 include charges of approximately $10 million ($6.1 million after- tax) for costs associated with production cutbacks and reductions in force in the company's Marine segment.

For the six months, net sales declined 13 percent to $1.36 billion from $1.56 billion in the first half of 1989. Net earnings of $34.2 million, or 39 cents per share, were down 9 percent from net earnings of $37.7 million, or 43 cents per share, for the first six months of last year.

For the second quarter, operating earnings in the company's Marine segment declined from $38.3 million to $37.5 million while net sales declined from $579.1 million to $468.2 million.

"Softness in domestic demand for marine products at the retail level continued. Our earnings performance can be attributed to the benefits of the cost-cutting measures and inventory reduction programs initiated in the second quarter of last year. We will continue to take the appropriate actions to assure that our marine operations and their dealers will be able to compete effectively in this environment," stated Brunswick Chairman, President and Chief Executive Officer Jack F. Reichert.

"Although sales in the Recreation segment were up 16 percent, to $105.8 million for the quarter, operating earnings declined principally as a result of recording gains on the disposition of segment assets in 1989 versus losses recorded in 1990, and also due to lower margins in the

Brunswick Division, which manufactures bowling equipment," he continued.

In the second quarter, the company's Technical segment showed a 5 percent decrease in sales, to $96.4 million, while operating earnings were down from $6.6 million to $3.4 million.

"Through the first six months of this year, our Defense Division is 17 percent ahead of last year in net sales but operating earnings are down modestly," Reichert stated. "The net sales and operating earnings of the Technetics and Industrial Products Divisions declined during the quarter. The businesses of both of these divisions were designated for sale last year and are at various stages of the divestiture process."

Headquartered in Skokie, Brunswick Corp. serves worldwide markets in the marine power, pleasure boating, recreation, defense/aerospace and industrial areas. Its stock is traded on the New York, Tokyo, London, Pacific and Midwest Stock Exchanges.

NEW YORK, NY (JULY 25) PR NEWSWIRE - Universal Matchbox Group Ltd. (NYSE: UMG) today reported operating results for the second quarter ended June 30 1990.

Net sales in the second quarter decreased 12.8 percent to $41.7 million as compared to $47.8 million in the same period in 1989. Sales of core products increased 9.0 percent from 1989. Promotional products and

contract manufacturing volume declined as planned, down 23.9 percent and 50.9 percent, respectively.

The operating loss in the second quarter was $185,000 versus $68,000 last year. Cost of sales increased to 58 percent of net sales from 56 percent in 1989 as a result of decreased sales of high margin promotional products. Selling, general and administrative expenses decreased $3.4 million or 16.1 percent from the same quarter in 1989.

The second quarter net loss was $1.1 million ($0.11 per share) as compared to a net loss of $3.1 million ($0.32 per share) in the corresponding 1989 period. The 1990 net loss reflected $1.1 million of net restructuring income which was included in other income, and $0.4 million of foreign exchange gain.

Net sales for the first six months decreased 12.8 percent to $78.2 million from $89.7 million in 1989. The operating loss in the 1990 first half increased to $3.6 million from $3.2 million last year. The six month net loss decreased to $5.6 million ($0.57 per share) from $7.7 million ($0.79 per share) in 1989.

Universal Matchbox Group Ltd. is one of the world's leading toy companies. The company designs, manufactures and markets toys in more than 120 countries. The company is also a leading contract manufacturer for other major international toy companies.

TECUMSEH, MI. (JULY 25) PR NEWSWIRE - Following is the text of the Report to Shareholders of Tecumseh Products Company (NASDAQ: TECU) for the three months ended June 30, 1990.

To our shareholders: As anticipated in our last report, 1990 second-quarter sales and earnings were down significantly from the exceptionally strong performance in the second quarter of 1989. Most of the decline in earnings for the quarter is attributable to our Brazilian subsidiary, SICOM, Ltda., which has incurred losses in 1990 in comparison with substantial profits in 1989. The effect has been to reduce consolidated net income by $2 per share in the second quarter and by $2.93 in the first half of 1990 as compared to the same periods in 1989.

Because of considerable continuing uncertainties in the Brazilian economy relating to the Economic Stabilization Program announced in March, it is not possible to accurately forecast SICOM's results for the balance of 1990. Nonetheless, we do see evidence that SICOM will return to modest profitability in the second half. SICOM's competitive posture has been impaired by the removal of export incentives and in the future, will be dependent in large measure upon appropriate valuation of the Brazilian cruzeiro, a phenomenon that has yet to occur.

High domestic inventory levels throughout the distribution channels, coupled with an unusually cool spring and summer, have hurt our U.S. air conditioning business and we are planning curtailed production schedules for the remainder of the year.

We have also had a reduction in our Engine and Power Train sales primarily due to a weak European market, as well as a loss of market share in the lower priced end of the product line. Profit margins have held up quite well, however, due to a more favorable product mix.

Because of the economic changes in Brazil and the poor outlook for our U.S. air conditioning markets, we believe that the second half of 1990 will be a difficult one and that earnings will be materially lower than in the record-setting second half of 1989.

TECUMSEH PRODUCTS COMPANY AND SUBSIDIARIES
Consolidated Summary of Income

	Three Months Ended June 30,		Six Months Ended June 30,	
	1990	1989(a)	1990	1989(a)
Net Sales	$ 364.1	$ 418.0	$ 774.8	$846.6

PHILADELPHIA (JULY 25) PR NEWSWIRE - Philadelphia Electric Co., (NYSE: PE) reported today that Unit No. 2 at the Limerick Generating Station in Montgomery County has returned to service after a brief outage to repair an air leak into the unit's steam condenser.

PE said the unit began producing electricity for the region's power grid at 5:25 p.m., on Tuesday, and today was operating at 60 percent of full power. It is scheduled to be gradually increased to full power in the next few days.

Limerick 2 shut down automatically on July 15 when low vacuum in the steam condenser in the non-nuclear portion of the unit caused the shutdown of its turbine generator.

Cause of the low vacuum was determined to be a break in a small oil drain pipe that allowed air to leak into the vacuum system, reducing its effectiveness. The leak was repaired, other similar lines were checked for possible cracks, and additional maintenance was performed before the unit was returned to service.

Limerick Unit 1 continued to operate at 100 percent power during the Unit 2 outage.

NEW YORK (JULY 25) PR NEWSWIRE - Quorum Communications, Inc. (QCI) announced today that it had reached an agreement with the New York State Organized Crime Task Force (OCTF) for the purpose of settling the matters which led to the conviction of its former chairman, Donald C. Carter. With the execution of this agreement, OCTF has indicated that it will not institute civil or criminal proceedings against QCI, nor any of its parent companies.

Under this civil settlement, QCI has agreed to pay $1,000,000 to New York State out of any monies paid to QCI by Donald C. Carter or from other funds if QCI has sufficient financial resources to do so.

In addition, QCI will be hiring a certified investigative auditing firm to review QCI's current business practices and to ensure that appropriate responses are made to its present and past clients' claims for restitution. At the end of six months, the investigative auditor will report back on this matter to both QCI and OCTF. If for any reason the director of OCTF is not satisfied with the contents of the report, the tenure of the auditing firm may be extended.

Commenting in the agreement, Dennis Mensch, chief executive officer of QCI said: "We hope this agreement with the state will provide our existing and future clients with the reassurance they need that this episode is behind us and that we can now focus our energy on serving their needs.

Angus Maitland, chairman of the VPI Group PLC, QCI's parent company, said in London: "We are most grateful to OCTF for the time and trouble they have taken to work on the agreement with us and for their very real concern that QCI remains a viable and ongoing company."

MIAMI (JULY 25) PR NEWSWIRE - The following statement was released today by Eastern Airlines:

The U.S. Attorney has explained to us that Eastern is being used to send a message to the airline industry. Eastern understands that. Eastern got that message nearly two years ago and has taken full corrective action under the scrutiny of the Federal Aviation Administration. As a result, Eastern has become the most scrutinized airline in the industry. And today there is no question that Eastern is safe. Eastern has its share of problems -- operating a safe airline is not one of them.

HIGHLAND PARK, MICH. (JULY 25) PR NEWSWIRE - Chrysler Corporation (NYSE: C) produced its 500,002nd minivan in the 1990 model year today, breaking an industry record and marking the first time any company produced a half-million minivans in one year.

"Seven years ago, only industry insiders knew what a minivan was," said Bennett E. Bidwell, chairman, Chrysler Motors. "Auto analysts, at the time, said we were taking a big gamble that families would move from station wagons to this hybrid vehicle. As it turned out, it was one of the shrewdest business decisions in recent automotive history."

Today also marked the last day of 1990 model production for the St. Louis II assembly plant, where the record-setting 500,002nd unit was built. The plant has begun a four-week model changeover and will start production of the new 1991 minivan the week of Aug. 27.

Chrysler's production milestone underscores just how big the minivan market segment has become. In calendar year 1989, more than 853,000 minivans were sold industrywide in the United States. Approximately one of 17 vehicles sold domestically is a minivan. And minivan segment sales are up 18 percent for the first six months of 1990, despite sluggish new-vehicle sales, Bidwell said.

Chrysler minivans -- Dodge Caravan and Grand Caravan, Plymouth Voyager and Grand Voyager, and Chrysler's Town & Country -- continue to dominate the segment, with a 45-percent share, despite 10 other competing makes. Chrysler's Town & Country, introduced last fall, is helping establish the minivan's luxury market.

Market demand is just beginning to heat up in Europe as Europeans warm up to the idea of minivans providing family transportation. Chrysler's Windsor, Ontario, assembly plant exported 14,172 minivans to Europe in the 1990 model year.

As a result, production climbed steadily in the 1980s. In the first model year (1984), Chrysler's Windsor plant produced 147,657 minivans. By the 1987 model year, St. Louis was added and production reached nearly 321,000 units. In the 1989 model year, 489,470 minivans were produced.

SAN FRANCISCO (JULY 25) PR NEWSWIRE - At the 1990 annual meeting, shareholders of Tosco Corporation (NYSE: TOS) today confirmed an eight-man board of directors.

Seven directors who had previously served were re-elected, including Thomas D. O'Malley, chairman, John J. Lee, Jay H. Bernstein, Houston I. Flournoy, Clarence G. Frame, Erwin Millimet, and Michael E. Tennenbaum. Shareholders also elected a new director, Jefferson F. Allen, who joined Tosco recently as executive vice president and chief financial officer.

O'Malley told shareholders that results for the second quarter ended June 30, 1990 were "particularly gratifying, not only on a net income basis but on an operating basis for both Tosco Refining and Seminole Fertilizer."

Tosco reported net income of $48.2 million, or $1.52 per fully- diluted share, on revenues of $577.5 million for the second quarter, compared to 1989 second quarter earnings of $28.0 million, or $.88 per fully-diluted share, on revenues of $334.2 million.

"While both plants operated extremely well, the refinery, which enjoyed strong margins, had its best operational earning quarter in history," said O'Malley.

Tosco Corporation is a large independent oil refiner engaged in refining and marketing wholesale petroleum products on the West Coast of the United states and is one of the largest U.S. manufacturers and wholesale distributors of phosphate-based fertilizer products.

KING OF PRUSSIA, PA (JULY 25) PR NEWSWIRE - At the regular board of directors meeting of International Mobile Machines Corp. (NASDAQ: IMMC), held Wednesday, July 18, 1990, the company voted to opt out of the major anti-takeover provisions of Act 36 which amended the Pennsylvania Business Corporation Law.

Act 36 requires all Pennsylvania corporations to accept or opt out of the three major provisions of the new law affecting control share voting restrictions, disgorgement provisions and directors' responsibilities by July 27, 1990.

The control share voting restriction limits voting powers when a shareholder acquires voting powers which amount to at least 20 percent of the total shares entitled to be voted. By IMM opting out of this provision shareholders will continue to have voting rights as outlined in IMM's by-laws and articles of incorporation.

IMM also opted out of the disgorgement provision of the act which attempts to discourage "greenmail." It permits a Pennsylvania corporation to recover profits realized as a result of a sale where a person or group of people attempt to acquire at least 20 percent of the company's votable shares.

IMM chairman of the board, president and chief executive officer, William J. Hilsman, in commenting on the board's actions, said, "IMM firmly believes in the benefits of a free market economy and that positive corporate results are the best takeover protection."

The IMM board did adopt the directors' responsibilities provision of Act 36. This provision allows directors to evaluate a potential merger as it affects not only the shareholders, but also IMM's employees, customers, suppliers, creditors and the communities in which the company has offices. This provision is similar to many other statues throughout the country and gives the board the opportunity to consider many important intangibles affecting shareholder value to which a monetary value cannot be attached.

Hilsman emphasized that enhancing shareholder value is the major goal of

the board of directors and that it must look at many different criteria to determine how to best achieve this result.

IMM is a world leader in wireless digital access technologies.

BIRMINGHAM, ALA. (JULY 25) PR NEWSWIRE - The Board of Directors of Energen Corporation (NYSE: EGN) today approved a 7 percent increase in the quarterly cash dividend and announced financial results for the quarter and 12 months ended June 30.

The quarterly cash dividend of 23-1/2 cents per share is payable Sept. 4 to shareholders of record on Aug. 15. Previously 22 cents per share, the new quarterly cash dividend brings Energen's annual dividend rate to 94 cents per share.

For the quarter ended June 30, Energen's net income totaled $2,171,000 or 22 cents per share on 9,826,000 average shares outstanding. This compares with net income for the same period last year of $1,616,000, or 17 cents per share on 9,646,000 average shares outstanding.

Income from continuing operations for the third quarter of fiscal 1990 of $2,171,000, or 22 cents per share, increased slightly from $2,054,000, or 21 cents per share, for the same period last year.

Net income for the 12 months ending June 30 totaled $10,201,000 (including a fourth quarter fiscal 1989 loss of $2,061,000 on the disposal of Energen's specialty well drilling company), or $1.05 per share on 9,742,000 average shares outstanding. This compares with $11,457,000, or $1.29 per share on 8,889,000 average shares outstanding, for the same period last year.

Income from continuing operations for the 12-months period totaled $12,321,000, or $1.26 per share, compared with $11,820,000, or $1.33 per share, for the same period last year.

The increase in income from continuing operations for the current 12-months period was due primarily to Energen's natural gas distribution subsidiary, Alagasco, which realized higher margins on certain emergency gas sales, increased gas usage due to more customers, and rate relief. Weather in Alagasco's service area was 8 percent warmer than normal for the current and prior 12-months periods.

Energen Corporation is a diversified energy holding company engaged

primarily in natural gas distribution, exploration and production.

WATERTOWN, MASS. (JULY 25) PR NEWSWIRE - Ionics, Incorporated (AMEX: ION) today reported record revenues, net income, and ending backlog for the quarter and six-month period ended June 30, 1990. For the quarter, revenues of $32.0 million were up 23 percent compared to the second quarter of 1989, while net income of $1.1 million, equal to 26 cents per share, was up 31 percent. For the half, revenues of $61.5 million were up 19 percent compared to the first half of 1989, while net income of $2.1 million, equal to 49 cents per share, was up 32 percent. Backlog on June 30th of $69.2 million was up 34 percent from that of one year earlier.

Arthur L. Goldstein, Ionics' chairman and chief executive officer, noted that "bookings for the second quarter of $36.7 million, up 30 percent from one year earlier, also reached a record level and included several multimillion-dollar bookings for applications involving municipal water desalination, ultrapure water and boiler feedwater. At the same time, sales of Aqua Cool(R) Pure Bottled Water continued to expand to serve distribution centers in the Stamford, Conn., and northern New Jersey areas." The current results represent the 12th consecutive quarter of improving revenue, net income and earnings per share performance compared to the same quarter in the prior year.

Ionics is a separations technology company involved in the worldwide manufacture and sale of membranes and related equipment for the purification of water, in the supply of purified water and water treatment chemicals, and in the sale of bottled water and home water purifiers.

#90206p8744 07/25/1990 ~PR Newswire

CHERRY HILL, NJ (JULY 25) PR NEWSWIRE - Commerce Bancorp Inc. (NASDAQ: COBA) reported a 10 percent increase in net income for the second quarter from $1,581,000 to $1,745,000 and a 5 percent increase in net income for the first six months of 1990 from $3,125,000 to $3,295,000, it was announced today by Vernon W. Hill II, chairman of the multi-bank holding company based here.

Hill said Commerce's growth trend continues with total assets exceeding $837 million, up from $719 million a year ago, a 17 percent increase. Total deposits increased to $766 million, a $106 million increase, or 16 percent over 1989 deposits of $660 million. Gross loans increased $93 million to $551 million from $458 million, a 20 percent increase.

Fully diluted net income per share of common stock for the second quarter of 1990 was $.34, down 19 percent from $.42 a year ago; for the first six months, it was $.65, down 22 percent from $.83 for the same 1989 period. The provision for loan losses for the second quarter was $715,000 vs. $375,000 for the second quarter of 1989. For the first six months, the provision for loan losses was $1,093,000 compared to $675,000 for the same 1989 period. Fully diluted net income per share of common stock for the second quarter of 1990 and for the first six months of 1990 was impacted by the issuance of 950,000 shares of common stock via a public offering on Nov. 1, 1989, and by the issuance of 417,000 shares of Series C ESOP Cumulative Convertible Preferred Stock on Jan. 30, 1990.

Despite a general slowdown in the regional economy and a softness in the real estate market, Hill said loan and asset quality remains favorable. Non-performing loans (i.e. non-accrual loans and restructured loans) at June 30, 1990, were $5,904,000 or 1.07 percent of total loans, compared to $3,842,000 or .74 percent at Dec. 31, 1989, and $3,521,000 or .77 percent at June 30, 1989. Loans past due 90 days or more were $1,210,000 at June 30, 1990, vs. $443,000 and $158,000 at Dec. 31, 1989, and June 30, 1989, respectively. Non-performing assets (i.e. non- performing loans and assets acquired in foreclosure) at June 30, 1990, were $8,658,000 compared to $4,164,000 at Dec. 31, 1989, and $3,660,000 at June 30, 1989. Non-performing assets and loans past due 90 days or more represented 1.17 percent of total assets at June 30, 1990, vs. .58 percent and .53 percent at Dec. 31, 1989, and June 30, 1989, respectively.

Shareholders' equity as a percent of total assets at June 30, 1990, was 6.75 percent and primary capital as a percent of total assets was 7.18 percent. The company's risk based capital ratios, Tier 1 and 2, were 10.44 percent and 11.29 percent, respectively.

Hill also announced that the company recently declared its regular $.225 quarterly cash dividend on its common stock, payable Aug. 13, 1990, to shareholders of record on July 30.

Commerce Bancorp Inc. is a multi-bank holding company headquartered in Cherry Hill, with 26 banking offices. Its three bank subsidiaries are Commerce Bank, N.A., Cherry Hill; Commerce Bank/Pennsylvania, N.A., Philadelphia; and Commerce Bank/Shore, N.A., Forked River, N.J.

#90206p8746 07/25/1990 ~PR Newswire

FITCHBURG, MASS. (JULY 25) PR NEWSWIRE - ChemDesign Corporation (NASDAQ: CDCC) today announced net income for the second quarter ended June 30, 1990 of $1.0 million or 11 cents per share on sales for the quarter of $10.0 million. Excluding the prior year's $1.8 million gain on sale and associated operating income from the discontinued Sulfur Dioxide product line, bottom line operating results were off approximately 20 percent from the prior year.

Net income for the first half of 1990 of $2.6 million on sales of $20.4 million was up 28 percent over the prior year's net income of $2.0 million on sales of $18.2 million, excluding results from the S02 product line.

Net sales for the quarter of $10.0 million were up approximately 8 percent over the prior year, and for the first half, sales were up 12 percent over the prior year, excluding sales from the S02 product line.

These results reflect the previously announced temporary halt in production, during the second quarter, of the company's major agricultural product, partially offset by an increase in sales of advanced

materials/polymers. In comparison with first quarter 1990 results, AG sales were off by approximately 50 percent while shipments of advanced materials were up by nearly 160 percent. Sales to reprographic and electronic customers were slightly lower in the aggregate (5 percent) than in the first quarter, which were more than offset by stronger sales of the company's specialty chemicals which were up approximately 20 percent.

Richard Brooks, CEO of ChemDesign, explained that: "The AG production slow-down paralleled the customer's multi-week shutdown of its feedstock production plant for maintenance and capacity expansion. Production rates are forecasted to be higher than originally planned during the second half of 1990, as well as for the year overall. Production recommenced in late June."

Jay R. LaMarche, CFO, advised analysts that: "The nearly 30 percent gross margin rate reported for the second quarter was slightly below expectations, largely as a result of the higher percentage of specialty chemicals in the quarter's product mix."

#90206p8751 07/25/1990 ~PR Newswire

WEST PALM BEACH, FLA. (JULY 25) PR NEWSWIRE - Steego Corporation (NYSE: STG) today reported the company's operating results for fiscal 1990.

Operating results for fiscal 1990 were favorably impacted by the sale of the company's replacement parts businesses and certain non- replacement parts businesses classified as discontinued operations last year as further discussed below. Consolidated loss from continuing operations amounted to $5,017,000 ($.44 per share) in fiscal 1990 as compared to $11,579,000 ($1.08 per share) in fiscal 1989 (restated for the effect of discontinued operations). Net income for fiscal 1990, boosted by income from discontinued operations of $5,966,000 ($.52 per share) and an extraordinary tax credit of $2,459,000 ($.21 per share), amounted to $3,408,000 ($.29 per share) which compares to a net loss of $14,589,000 ($1.35 per share) reported for fiscal 1989.

In accordance with strategic planning alternatives reported in last year's annual report, the company pursued and was successful in the disposition of its replacement parts businesses in fiscal 1990. On March 15, 1990, the company sold its Canadian automotive replacement parts business and such sale along with the prior dispositions of its U.S. replacement parts businesses resulted in aggregate cash proceeds of $71.7 million and a net gain before income taxes of $9 million. In addition, in fiscal 1990, the company sold several of its non- replacement parts businesses for aggregate cash proceeds of $4.3 million and a net gain before income taxes of $1.4 million. Net income of replacement parts businesses prior to their disposition, which operating results have been segregated from continuing operations, amounted to $1.1 million in fiscal 1990. In addition, income from discontinued operations includes realized losses in excess of phase out accruals of $1.7 million relative to non-replacement parts businesses classified as discontinued operations in prior years.

#90206p8752 07/25/1990 ~PR Newswire

DETROIT (JULY 25) PR NEWSWIRE - Peter W. Stroh, chairman and chief executive officer of the Stroh Brewery Company, has been elected chairman of Detroit Renaissance where he will serve out the remaining term of the vacated position held by Gerald Greenwald, former vice chairman of Chrysler Corporation.

Greenwald had served on Detroit Renaissance's board since November 1981. Also elected to the board as directors were Anthony M. Franco, chairman and chief executive officer of Anthony M. Franco, Inc.; Dennis R. Toffolo, president of Hudson's; and as vice chairman, Robert A. Lutz, president of Chrysler Motors.

Stroh, a fourth-generation member of the Stroh family associated with the brewery company, joined the company in 1950 for summer employment and was assigned to the maintenance department. In 1952, he rejoined the company to study the technical aspects of the brewing industry.

He attended the U.S. Brewer's Academy in 1953-54 and the Wallerstein Brewing Seminar in 1955. He was elected a member of the board of directors in February 1965 and a vice president in June of the same year. In May of 1966, he became director of operations.

Having served on Detroit Renaissance's board since September of 1974, he is active in many civic, community and business organizations including the Economic Alliance of Michigan, the Detroit Medical Center, New Detroit Inc. and NBD Bancorp, Inc.

Franco, a native of Detroit and graduate of Wayne State University in marketing, founded his public relations firm in 1964. Prior to the formation of the Franco firm, he was public relations director of two advertising firms.

Toffolo was named president of Hudson's on May 21, 1990. He joined Hudson's in 1969 as a management trainee at Hudson's downtown store. He subsequently worked at Hudson's Pontiac, Eastland, Northland, Southland, Oakland, Saginaw, Flint, and Novi stores, holding store manager positions at Saginaw, Flint, Novi, and Northland.

In 1986 Toffolo was promoted to vice president, Dayton's Store Group. In 1988, he was promoted to his most recent position of vice president for Dayton's metro Store Group.

Lutz was named president of Chrysler Motors on Nov. 10, 1988. He was elected a member of the Chrysler Corporation board of directors in June 1986.

Lutz joined Chrysler following 12 years at Ford Motor Company, where he had been executive vice president of truck operations. Prior to that, he served as chairman of Ford of Europe and executive vice president of Ford's international operations. He also was a member of Ford's board of directors.

Detroit Renaissance, a non-profit organization founded in 1970 for the economic and physical revitalization of Detroit, is under the leadership of 37 chief executive officers of corporations in the metropolitan Detroit area. Gov. James Blanchard and Mayor Coleman Young serve as honorary co-chairmen.

#90206p8754 07/25/1990 ~PR Newswire

HOUSTON, (JULY 25) PR NEWSWIRE - Stewart Information Services Corp. (NASDAQ: SISC) earned $0.9 million, or 23 cents per share, in the second quarter of 1990 as compared to earnings of $1.1 million, or 27 cents per share, in the second quarter of 1989. The second quarter of 1989 included an after-tax gain of $1.1 million, or 26 cents per share, resulting from the sale of municipal bonds.

For the first six months of 1990, Stewart lost $0.7 million, or 17 cents per share, compared to a loss of $2.8 million, or 68 cents per share, for the same period last year. The improvement in 1990's earnings was primarily the result of an increase in revenues from higher real estate activity in many of the company's markets and from higher average revenue rates. Revenues also increased because of new offices opened, particularly in the Dallas-Fort Worth area.

Orders for the second quarter of 1990 were up 13 percent from 1989's second quarter. In comparison with year-earlier totals, orders for the month of June 1990 were up nine percent and for the first 15 working days of July were unchanged. The lower rates of increase in recent weeks may be the result of a nationwide decline in housing activity, although the number of orders received is not necessarily indicative of future revenues.

Stewart's primary business is title insurance. The company issues policies on homes and other real property in all 50 states, the District of Columbia and Canada through over 2,600 issuing locations. In issuing a policy, and as one process, the title is first searched, examined and then closed. Stewart's customers include homebuyers and sellers, attorneys, builders, developers, lenders and real estate brokers. The company also sells computer-related services and information to the real estate industry. Additionally, the company produces photogrammetric engineering products and geographic information systems for government and private entities, both domestic and foreign.

WILMINGTON, DE (JULY 25) PR NEWSWIRE - Du Pont (NYSE: DD) and Merck (NYSE: MRK) have agreed to form a joint venture to create an independent, research-driven, worldwide pharmaceutical firm, the companies announced today.

The new company will be called the Du Pont o Merck Pharmaceuticals Co. and will be owned equally by Du Pont and Merck, which will have equal representation on the governing board of directors. Launch date will be January 1991, pending negotiations of definitive agreements and regulatory approvals.

Du Pont will contribute to the joint venture company its entire pharmaceutical and radiopharmaceutical imaging agents businesses. Merck will provide development funds, certain marketing rights to several of its prescription medicines, international industry expertise and cash.

When it begins operations, the Du Pont o Merck Pharmaceuticals Co. will have a research staff of about 1,500, including more than 400 doctoral-level scientists, a first-year research and development (R&D) budget of $230 million, a professional sales staff of 600 people and first-year sales of an estimated $700 million.

The partnership represents a long-term investment by both companies, as the new company's R&D effort is not expected to produce significant commercial results until the late 1990s. Although the two firms anticipate that the creation of the new company will have no significant impact on their financial operations in the near term, both companies expect attractive returns in the medium to long term.

The creation of the new firm represents a strategic move for both companies, according to their chairmen and chief executive officers, Edgar S. Woolard Jr. of Du Pont and P. Roy Vagelos, M.D., of Merck.

Du Pont and Merck said the new company will have sufficient size and assets to capitalize on current opportunities and future products in the Du Pont research pipeline.

The long-term objective of the new company is to become an integrated pharmaceutical company with leading-edge research in a broad array of therapeutic areas and a significant presence in the global pharmaceutical marketplace.

Du Pont is a diversified, global company with manufacturing and processing facilities in 39 countries on six continents. It had sales of $35.5 billion in 1989.

Merck and Co. Inc. is a worldwide, research-intensive, health products company that discovers, develops, produces and markets human and animal health products and specialty chemicals. The company has more than 34,500 employees, 17 research centers, and manufacturing facilities in 18 countries.

WAYNE, PA (JULY 25) PR NEWSWIRE - SunGard Data Systems Inc. (NASDAQ-NMS: SNDT) announced today that net income for its second quarter ended June 30 1990, was $5,353,000, an increase of 23 percent over net income of $4,357,000 for the second quarter ended June 30, 1989.

Earnings per common share increased 19 percent to $.37 from $.31 in 1989.

For the first six months of 1990, net income was $9,709,000, up 19 percent over 1989 net income of $8,185,000. Earnings per common share increased 15 percent to $.68 from $.59 for the first half of 1989.

Revenues for the second quarter of 1990 were $63,771,000, an increase of 31 percent over 1989 second quarter revenues of $48,860,000. For the first six months of 1990, revenues were $119,473,000, up 25 percent over 1989 first half revenues of $95,730,000.

James L. Mann, chairman and chief executive officer, said, "We are pleased with the financial results and continued record of growth that we achieved for the quarter. Our disaster recovery and investment support businesses continued to perform according to plan. We also successfully took some significant steps during the quarter to build on our foundation in order to provide additional growth in the future. As planned, we repaid $50 million of short-term bank debt incurred to acquire Warrington Financial Systems with the proceeds from an $86 million convertible subordinated debenture offering. The additional funds from the offering have added significantly to our liquidity and to our flexibility to react quickly when other acquisition or expansion opportunities arise. Also during the quarter, we reached an agreement in principle to acquire Phase3 Systems Inc., a provider of a real-time securities transaction processing system to banks and other financial institutions. The acquisition of Phase3, which is expected to close in the third quarter, will be a strong addition to our position in the high end of the bank capital markets area."

SunGard Data Systems Inc. is the pioneer and a market leader in comprehensive computer disaster recovery services and is the only large specialized provider of proprietary investment support systems to the financial services industry. The company's common stock is reported on the NASDAQ National Market System under the symbol SNDT.

#90206p8765 07/25/1990 ~PR Newswire

WAYNE, NJ (JULY 25) PR NEWSWIRE - The Grand Union Company announced today that it has executed amendments to its $508 million loan agreements with a bank group led by Citibank, N.A. The amended term loan agreement ($438 million of the $508 million bank facilities) has a stated maturity of March, 1996. This loan may become due and payable earlier under certain conditions, including the non-concurrence of the bank group to an extension beyond July 30, 1992. The prior agreement allowed the bank group to require repayment under these facilities on Dec. 31, 1990.

Grand Union and P&C Food Markets, Inc., a subsidiary of The Penn Traffic Company (AMEX: PNF), also announced that their respective bank lenders and the Federal Trade Commission have approved the terms of all divestitures which were required in connection with the acquisition of Grand Union by GND Holdings Corporation in July, 1989. The Grand Union loan agreement amendments are conditioned, among other matters, upon completion of the store divestitures and the previously announced lease of P&C's stores in New England to Grand Union, all of which are expected to be implemented before the end of this month.

Joseph J. McCaig, president and chief executive officer of Grand Union, said "We are appreciative that Citibank and the other bank lenders have expressed their continued confidence in us by amending the terms of our prior agreements. The new agreements improve our ability to continue to grow and serve the needs of our customers. At the same time, the addition of 13 P&C stores in New England will further strengthen our presence in this market which is central to the success of Grand Union."

Claude J. Incaudo, president and chief executive officer of Penn Traffic, the parent of P&C Food Markets, stated "the completion of these transactions is a significant event for P&C. These transactions will result in current cash payments to P&C totalling $15 million and a steady source of rental income for at least 10 years. More significantly, the transaction will allow P&C to focus its business activities in central and upstate New York where it has had a long term record of growth and success."

Penn Traffic directly and through its subsidiaries, P&C Food Markets, Inc. and Big Bear Stores Company, operates 209 supermarkets in Pennsylvania, New York, Ohio and West Virginia.

#90206p8767 07/25/1990 ~PR Newswire

MOUNTAIN VIEW, CA (JULY 25) PR NEWSWIRE - Agilis Corp. of Mountain View today announced a bold new direction for the company, leveraging its expertise in wireless networking technology. Effective today, Agilis will manufacture and market wireless networking products for both the installed base of networked PC and Macintosh computers, as well as handheld and laptop computers.

The company's wireless local area networks, based on spread spectrum radio technology, were formerly only available as an option to Agilis

workstations. The company's new products, slated for introduction later this year, will be designed for standard PC and Macintosh computers and will support industry-standard network operating systems.

Ken Biba, president of Agilis, said, "We see an enormous opportunity in the area of untethered computer networking, both in and out of the office and both on and off the desk. In addition, with the increasing importance of laptops, stylus-based computers and other next generation portable computers, there will be a tremendous demand for wireless communication. Agilis is uniquely positioned to satisfy that demand."

Agilis was founded in December 1987 with the mission of providing mobile workers with the computing and communication tools that allowed them to work anywhere. The company's first generation products consisted of small, rugged workstations for field applications and wireless local area networking.

As a result of the company's refined focus, Agilis will discontinue the manufacture of its handheld workstation products. The company will continue to support its existing customers.

"Agilis will seize a very large business opportunity by capitalizing on its wireless networking technology today," said John Shoch, general partner for Asset Management, a high technology venture capital firm and an Agilis board member. "The applications and opportunities for wireless communications will explode in the near future, especially when the technology is combined with small portable computing systems."

Agilis Corp. is a privately held company which designs, manufactures and markets wireless networking systems. Agilis headquarters are located in Mountain View.

NAPERVILLE, IL (JULY 25) PR NEWSWIRE - Nalco Chemical Co. (NYSE: NLC) reported today that second-quarter sales and earnings set new company records.

Net earnings were up 12 percent reaching $33.1 million, compared to $29.7 million for the same quarter last year. For the first six months, Nalco's net earnings increased 15 percent to $62.8 million from $54.8 million reported a year ago. On a primary per-share basis, second-quarter earnings increased by 16 percent to 86 cents a share compared to

74 cents a share for the second quarter last year. Primary earnings per-share for the first six months were also up 16 percent to $1.61 a share from $1.39 a share a year ago. Fully diluted earnings for the quarter were 5 cents a share lower than primary earnings and 9 cents a share lower for the first half. These figures take into account the assumed conversion of convertible preferred stock issued to the Nalco Employee Stock Ownership Plan (ESOP).

Second-quarter sales were up 13 percent to $301.6 million from $268.1 million for the similar period last year. Sales for the first six months were also up 13 percent to $586.4 million from $517.6 million recorded last year.

Sales increases were recorded by all five of Nalco's operating units. The water and waste treatment and petroleum chemicals divisions as well as U.S. subsidiaries including the Absorbent Chemicals Group recorded double-digit sales increases among U.S. operations. The process chemicals division sales increased almost 9 percent despite continued softness in the steel and automotive industries. The international division reported a significant 15 percent sales gain. Nalco's core water treatment businesses led the way with solid increases by the Basic Industry and WATERGY groups. Nalco's Pulp and Paper, Mining and Mineral Processing, RPC Chemicals and Visco Chemicals groups, as well as Day-Glo Color Corp. and Adco Products, also turned in significant sales gains. Outside the United States, notable sales improvements were reported by its companies in Italy, Spain, Germany, Austria, Venezuela, Colombia and Taiwan.

Commenting on operations, W.H. Clark, chief executive officer, said, "We are very pleased with our second-quarter and six-months results. They were on target and met our expectations. Even though a few of the industries that we serve are experiencing some softness at this time, Nalco continues to produce admirable results. Our advantages are solid growth in our core businesses, worldwide strength and increasing involvement with our customers to help them prevent or solve environmental problems.

"While the second half will be a demanding challenge, we believe that our advanced technology, competent people, larger investment in R&D, value-added service, automated feeding/monitoring systems, quality improvement process and quick response to customer needs will carry Nalco through the first year of the new decade with excellent performance."

NEW YORK (JULY 25) PR NEWSWIRE - Suzan T. Picariello has been elected to

the position of senior vice president & region head, Consumer Financial Services Group for the Latin American and Caribbean Region, American Express Bank Ltd.

In her new position, Picariello will serve as region head for the Latin American unit, overseeing all Consumer Financial Services businesses, which offer lending, deposit-taking and insurance products to consumers and small businesses.

"Suzan's broad legal and regulatory background will prove invaluable as we look to expand within international markets," said Steve Goldstein, president, Consumer Financial Services Group. "Her expertise will help us customize our financial products and establish business policies that allow us to best respond to the needs of each country," he added.

A 10-year veteran of American Express, Picariello most recently was assistant general counsel, American Express Travel Related Services Company, where she served as the primary legal advisor for the company's non-U.S. business, including Consumer Financial Services, and for the U.S. Establishment Services Group.

Picariello holds a Bachelor of Arts Degree from the City College of New York and a Juris Doctor from Brooklyn Law School.

American Express Bank Ltd., established in 1919, offers commercial and personal financial services to meet the global needs of wealthy individuals through a network of 88 locations in 39 countries.

The bank, along with Travel Related Services International and Consumer Financial Services, is a component of American Express International. These businesses are leading global providers of high quality travel and financial services.

MINNEAPOLIS/ST. PAUL (JULY 25) PR NEWSWIRE - AirTran Corp. (NASDAQ: ATCC) parent company of Mesaba Aviation Inc., today reported net income of $440,000 or $.11 per share for the first quarter ended June 30, 1990, compared to net income of $714,000 or $.18 per share for the same quarter last year. AirTran's operating revenues increased 38 percent to $20,441,000 from $14,771,000 reported during the same quarter one year ago.

Robert D. Swenson, president and chairman of AirTran, said, "The results reflect that traffic growth did not keep pace with the capacity added during the quarter."

Mesaba operates as Northwest Airlink under an airline marketing agreement with Northwest Airlines to provide regional airline feeder service at Minneapolis/St. Paul, Detroit and Milwaukee. Mesaba currently provides scheduled airline service to 37 cities in 11 states.

AirTran's common stock is traded on the NASDAQ National Market System under the symbol ATCC.

HOUSTON (JULY 25) PR NEWSWIRE - Franklin C. Wade, chairman and CEO of Offshore Pipelines, Inc. announced that the company completed its initial public offering of common stock covering 3.8 million shares at a price of

$17.00 per share for total gross proceeds of $64.6 million. Offshore Pipelines, Inc. provides a broad range of marine construction services to companies engaged in offshore oil and gas production.

Prudential-Bache Capital Funding and Smith Barney, Harris Upham & Co. Incorporated acted as co-managers for both the U.S. offering of 2.9 million shares and the international offering of 900,000 shares.

The proceeds will be used to help fund the $83.0 million acquisition of marine construction assets from Brown & Root International Inc. and certain of its affiliates. The acquisition will more than double the size of Offshore Pipelines' existing fleet, will expand its Gulf of Mexico operations and will position the company as a worldwide operator in offshore construction. In anticipation of the acquisition, Offshore Pipelines has bid on a significant number of projects, including international projects and has hired numerous professionals to accommodate the increase in domestic and international activity. The company has obtained commitments for the additional financing it requires to close the acquisition, pending regulatory approval.

NORTHBROOK, IL. (JULY 25) PR NEWSWIRE - Woodhead Industries Inc. (NASDAQ: WDHD) announced today that its board of directors has adopted certain

amendments to its stockholder rights plan aimed at bringing it more in line with the evolution of such plans over the past few years.

Among the amendments is a reduction of the rights plan's "flip-in" trigger from 40 to 15 percent. As amended, the rights plan provides that if any person becomes the beneficial owner of 15 percent or more of the outstanding common stock of the company, each right not owned by such person or related parties will enable its holder to purchase, at the right's then-current exercise price, common stock of the company having a value of twice the right's exercise price.

In addition, the rights plan was amended to include among the "flip- in" triggers a determination by the board of directors that a person is an "adverse person." An "adverse person" is a person who holds at least 10 percent of the outstanding common stock of the company and who the board of directors determines intends to cause the company to take certain actions not in the best long-term interests of the company or whose ownership is determined by the board of directors to be reasonably likely to cause a material adverse impact on the company.

The rights plan was also amended to provide that the "flip-in" provisions would not be triggered by the acquisition of the company's common stock pursuant to a tender or exchange offer determined to be fair to and otherwise in the best interests of the company and its stockholders by a majority of the company's independent directors.

The text of the amendments to the rights plan will be filed with Harris Trust and Savings Bank, the rights agent, and with the Securities and Exchange Commission and may be obtained from the company.

Woodhead Industries Inc. manufactures electrical and mechanical products for worldwide use by a broad range of industries.

CAPE CANAVERAL, FL (JULY 25) PR NEWSWIRE - A General Dynamics (NYSE: GD) commercial Atlas launch vehicle today successfully launched the combined release and radiation effects satellite (CRRES).

The Atlas I (Atlas/Centaur-69) lifted off from Complex 36B here at 3:21 p.m. EDT, marking the company's first launch of a commercial atlas. Separation of the CRRES spacecraft from the Centaur upper stage occurred at 28 minutes and 44 seconds after liftoff.

The CRRES spacecraft will be placed into a highly elliptical, geosynchronous transfer orbit of approximately 220 by 22,000 miles. It will study the interaction of the ionosphere and magnetosphere and the effects of space radiation on microelectronic components.

General Dynamics has committed to building 60 Atlas launch vehicles to support the combined commercial and government market. Today's launch was the first of those 60 new Atlases. Current plans call for Atlas production and launch rates of eight per year. This schedule is expected to support anticipated launch requirements through 1998.

General Dynamics Commercial Launch Services has orders for 23 commercial Atlas launches. Its customers, in addition to NASA, include the European Telecommunications Satellite Organization, the International Telecommunications Satellite Organization, Hughes and British Aerospace. Atlas will also launch 10 military missions in the U.S. Air Force's medium launch vehicle II (MLV II) program.

Atlas is being marketed to domestic and international customers in four versions and is capable of addressing about 90 percent of the expected launch market through the 1990s. The Atlas family includes Atlas I, the version used for today's CRRES launch; Atlas II, a model under development for the Air Force's MLV II program; Atlas IIA which is similar to Atlas II but with an uprated Centaur propulsion system; and Atlas IIAs, which is outfitted with four castor IVA solid rocket motors and capable of placing payloads of up to 7,700 pounds into geotransfer orbit.

STERLING, AK (JULY 25) PR NEWSWIRE - Seafoods from Alaska Inc. (NASDAQ: SEAF) today announced that the intent agreement of June 1 for the purpose of the purchase of Seafoods from Alaska Inc. stock and the provision of loan funds by Panagiotis G. Tsirogiannos, of Athens, Greece, has been terminated.

That being the case, the company said that neither Tsirogiannos nor the company received any of the considerations set forth in the June 1 agreement, and no legally binding transaction is expected to be developed.

The company said that it is now particpating in preliminary investment discussions with another potential source for financing which has ties to Alaska.

The company said it is seeking a minimum investment program of $1.5 million to manage past debt and to expand marketing of its new NOVA LITE, a

patent-pending nova smoked salmon featuring 50 percent less salt and 33-1/3 percent less sodium than traditional brands which has met early success in an introductory sales program.

#90206p8806 07/25/1990 ~PR Newswire

NASHVILLE, TN. (JULY 25) PR NEWSWIRE - Metropolitan Federal Savings and Loan (NASDAQ-NMS: MFTN) today reported a net loss of $849,000, or $0.23 per share, for the fourth quarter ended June 30, 1990. The quarterly loss was principally the result of $1.3 million in additions to reserves for possible loan and real estate losses, as well as a low level of net interest income due to the current high balance of non-performing assets.

For the fiscal year ended June 30, 1990, Metropolitan Federal reported a net loss of $27.3 million, or $7.35 per share. The results reflect $36.8 million provided during the year for reserves against possible loan losses and the write-down of real estate owned, and to a great extent, reflect the continued weakness in the Nashville area real estate market experienced during this past year.

For the fourth quarter a year ago, Metropolitan Federal reported net income of $1,168,000, or $0.31 per share. For the year ended June 30, 1989, the Association had net earnings of $7,079,000, or $1.91 per share.

Deposits as of June 30, 1990, were $927 million, up $20 million over deposits of $907 million a year ago. Assets at year end were $1.12 billion compared with assets of $1.15 billion a year ago.

At June 30, 1990, Metropolitan Federal had tangible capital of $40.9 million or 3.7 percent of assets.

Commenting on the results, Edwin W. Moats, Jr., chairman and chief executive officer, said, "We are pleased with the increase in deposits and the confidence this reflects in our institution. While our tangible capital ratio is more than twice the regulatory requirement, we intend nevertheless to take all necessary steps to restore our institution's profitability and to rebuild our capital to its previous levels. This plan includes the reduction and control of non-earning assets, expense reduction, and concentration on quality loan production."

As of June 30, 1990, Metropolitan Federal had non-performing loans of $68.7 million, compared with $46.9 million a year ago. Real estate acquired through foreclosure by Metropolitan Federal was $81.7 million at year end compared with $34.1 million a year ago. Reserves against loan losses increased to $27.9 million from $17.3 million a year ago.

Metropolitan Federal, Tennessee's largest publicly-traded savings and loan with 19 offices, operates throughout the state. Metropolitan Federal's common stock is traded on the over-the-counter market in the National Market System under the NASDAQ symbol MFTN.

NEW YORK (JULY 25) PR NEWSWIRE - Ray Rodriguez, manager to Julio Iglesias for five years, will join Univision in the newly created capacity of vice president, director of talent relations and promotion; a new division of the Univision Network, it was announced today by president Joaquin Blaya. Rodriguez will be responsible for the consolidation of talent potential through a centralized and coordinated use of artists by the network and its affiliates.

Rodriguez joins Univision from his own management firm which he started in January 1989, after his tenure as manager for Iglesias. During his 10-year association with Iglesias, Rodriguez served first as financial director, then as business manager and finally, as Iglesias' manager throughout the world. As chief executive officer of all the entities in that international organization, he was responsible for planning, coordinating and supervising all worldwide concerts, records, TV appearances, videos,

promotions, merchandising, product endorsements, public relations, marketing and business affairs as well as serving as chief negotiator of all contracts affecting the Iglesias organization.

"Ray brings an invaluable wealth of knowledge in the areas of artist management and business negotiation," said Blaya. "We were fortunate to collaborate with him in the recently aired tribute to Lola Flores, 'Juntos por Primera Vez,' and are even more pleased to engage him in this critically important phase of the network's development."

Rodriguez is a graduate of the University of Miami School of Business and lives in Miami with his wife and three children.

Univision, the nation's leading Spanish-language television network, covers 89 percent of U.S. Hispanic households through satellite-interconnected broadcast and cable affiliates across the country.

SALT LAKE CITY, (JULY 25) PR NEWSWIRE - GCI Industries, Inc. (NASDAQ: GCI) announced today a net income of $147,912 or $.03 per share for the quarter ended June 30, 1990 and $442,305 or $.10 per share for the six months then ended as compared to $136,452 or $.03 per share for the same quarter ended in 1989 and $529,961 or $.14 per share for the prior year's first half. While revenues incrased 6 percent from $1,312,757 to $1,393,162 from quarter to quarter, and 7 percent from $3,017,565 to $3,247,577 for the comparable half-year periods, in 1990 the company recognized an after-tax charge against earnings of $46,110 ($.01 per share) in the second quarter and $227,500 for the first half ($.05 per share) as a result of transaction costs related to its proposed merger with PG Acquisition, Inc.

The company has previously announced that it had entered into a definitive merger agreement with PG Acquisition, Inc., whereby each shareholder of the company will receive upon closing of the merger a cash payment of $2.65 per common share. A vote to approve the merger is scheduled for a special shareholder's meeting to be held on Aug. 24, 1990 in Salt Lake City. Proxy materials were mailed to company shareholders on July 20, 1990. The company's board of directors has recommended that the shareholders approve the merger and it is contemplated that the merger will be approved at the special meeting as PG Acquisition, Inc., which already owns more than 50 percent of the company's outstanding stock, has indicated its intent to vote for the merger. While the expected closing date of the merger is on or before Aug. 31, 1990, the company cautioned that there can be no assurances that the merger will be consummated.

The Golf Card provides to its membership, for an annual fee, the opportunity to play two 18-hole rounds of golf, without payment of green fees, at each of over 1,660 golf courses in the United States and abroad and to stay at over 360 country club golf resorts throughout the United States at special rates discounted from the resort's regular golf packages.

NEW YORK (JULY 25) PR NEWSWIRE - Marking yet another unprecedented coup

for King World -- and underscoring the consistent achievements of the two top-rated shows in syndication -- the company today announced the prime access renewal of "Wheel of Fortune" and "Jeopardy!" for the 1992-93 and 1993-94 broadcast seasons on KABC-TV, Los Angeles.

The announcement, made today by Roger King, chairman of the board of King World Productions, Inc., clearly reflects the industry's certainty that these two shows will continue to dominate throughout the decade.

King commented, "'Wheel of Fortune' and 'Jeopardy!' are the two most powerful shows in syndication! Recognizing this, KABC-TV, the ABC-owned and -operated station in the second-largest market in the country, is making an investment to ensure its healthy and prosperous future. The unparalleled success of these two shows will continue to dominate in the syndication marketplace in the years to come."

Terry Crofoot, president and general manager of KABC-TV, stated, "I have wanted to air 'Wheel of Fortune' and 'Jeopardy!' on KABC-TV since becoming the station's general manager. I now look forward to 1992 when 'Wheel of Fortune' and 'Jeopardy!'s' unrivaled performance will continue on their new home, KABC-TV.

"'Wheel of Fortune' has dominated the number-one spot among all syndicated programs for 26 consecutive sweep periods, and 'Jeopardy!' has held the number-two position for 20 consecutive sweeps.

"Wheel of Fortune" and "Jeopardy!" are produced by Merv Griffin Enterprises.

King World is the leading distributor of first-run programming, including "Wheel of Fortune," "Jeopardy!" and "The Oprah Winfrey Show," the three highest-rated series in first-run syndication, and "Inside Edition," the eighth-highest rated syndicated strip, which the company also produces.

#90206p8822 07/25/1990 ~PR Newswire

NEW YORK (JULY 25) PR NEWSWIRE - BPI Communications, Inc., a subsidiary of Affiliated Publications, Inc. (NYSE: AFP), announced today a major corporate restructuring involving the creation of three new operating groups.

The company, recognized internationally as a leading publisher of specialized magazines and books for the arts, design and entertainment

markets, will be divided into the following three divisions, effective immediately:

-- The Publication Group, which will comprise all magazine and book operations with the exception of properties acquired in BPI's recent buyout of A/S/M Communications, Inc., publishers of Adweek.

-- The Research & Information Group, which will be comprised of Broadcast Data Systems, Billboard Information Network, data collection and electronic publishing.

-- The Corporate Development Group, which will initially be comprised of Adweek, Marketing Week and Marketing Computers, BPI's centralized European operations, The Entertainment Marketing Group, BPI Entertainment News Wire and licensing.

In explaining the restructuring, Gerald S. Hobbs, president of BPI, noted that the company has experienced a period of enormous growth over the last five years, during which it has more than tripled its revenue.

Five years ago, BPI owned seven magazines, a book division with three imprints and an online database. Today it owns 19 magazines, a book division with five imprints, three computer-based, state-of-the- art communication and information services, and a marketing services operation that packages and sells entertainment promotions. Initially located in nine offices with a workforce of 300, it is now a corporation with over 900 employees in 28 locations worldwide.

"These many changes have led directly to the restructuring of the company and a redistribution of responsibility," Hobbs explained. "The responsibility for operations and tactics in BPI's segmented communications and information businesses needs to be shared," he said.

The new corporate structure will allow him more time to focus on planning and corporate strategy, he added.

EDEN PRAIRIE, MI. (JULY 25) PR NEWSWIRE - CPT Corp. (NASDAQ-NMS: CPTC) announced today that it has elected two new members to its board of directors. They are John B. Ferris, former chief financial officer of Super Valu Stores, Inc., an $11 billion Twin Cities-based wholesale and retail food and general merchandise distributor, and Clifford M. Lindsey, chairman of Myriad Research, Inc., of Freeland, Wash. Lindsey was formerly a vice president of Dataquest Corp., a highly respected

California-based office automation research firm.

CPT President and Chief Executive Officer Arun Dube said, "We are delighted with these additions to our board. Ferris brings a wide range of proven financial abilities, as evidenced by his distinguished 17-year career with Super Valu. Lindsey is an internationally recognized authority on the office automation workplace."

In other actions, the board approved Board Chairman John MacLennan's proposal to elect Dube as co-chairman. "This continues the transition within CPT," said MacLennan, who said that he will serve as co-chairman with Dube until the annual shareholders' meeting in October. MacLennan said that he will not stand for reelection as chairman or co-chairman at that time.

The board also announced that it has begun the process of foreclosure on CPT's Eden Prairie headquarters building. The foreclosure is a result of the default by Technology Park Associates of the company's $8.25 million second mortgage on the premises. CPT will continue to occupy the space under the terms of its lease.

SAN MATEO, CA (JULY 25) PR NEWSWIRE - Airlease Ltd. (NYSE: FLY), a California Limited Partnership said today that its second quarter net income increased nearly 5 percent from second quarter income last year. As reported previously, the second quarter cash distribution increased 5 percent, from 60 cents per unit to 63 cents per unit.

The NYSE-listed partnership reported earnings of $2.3 million or 49 cents per unit in the second quarter ended June 30, 1990. This compares with earnings of $2.2 million or 46 cents per unit in the second quarter of 1989. Revenues of $4.1 million for the second quarter were down $300,000 from the same period last year, reflecting an aircraft sale last December. Second quarter expenses decreased 18 percent (from $2.2 million to $1.8 million) as a result of the December aircraft sale, the proceeds from which were used to reduce borrowings and related interest costs.

Earnings for the first six months were $4.5 million, or 97 cents per unit, an increase of 4 percent from earnings of $4.4 million (93 cents per unit) for the same period in 1989. Revenues for the first six months decreased 7 percent (from $8.8 million to $8.2 million) and total expenses also decreased 17 percent (from $4.4 million to $3.7 million) due primarily to the December aircraft sale.

The second quarter cash distribution of 63 cents per unit is payable on Aug. 15, 1990, to unitholders of record on June 29, 1990.

Airlease Ltd. presently has interests in 16 aircraft leased to five domestic airlines.

CLEVELAND (JULY 25) PR NEWSWIRE - The senior economist of a major Detroit bank and well-known local business writers and broadcasters will make live in-flight presentations on morning Continental Express flights between Cleveland Hopkins and Detroit City Airport Aug. 6-10.

The five-day program, "Express Yourself," has been designed to give executives timely business information from local experts as they begin their business day.

"Express Yourself" will also offer executives an unusual way to relax at the end of their business day: late afternoon and evening Cleveland/Detroit City Airport flights will feature live performances by professional stand-up comedians.

Steve Mason, spokesman for Continental Express, the commuter division of Continental Airlines, said that passengers will appreciate the "Express Yourself" program because its highly sophisticated Embraer 120 Brasilia jetprop makes the flight virtually too quick for a passenger to get serious work done.

He added that the size of the 30-passenger aircraft will encourage questions and answers between passengers and business speakers, as well as help provide the intimacy that a stand-up comedian likes with his or her audience.

The business writers who will cover topics of their own choosing on selected morning flights between Cleveland and Detroit City Airport include Mary Kramer, Crain's Detroit business editor, Monday, August 6: Mark Dodosh, editor of Crain's Cleveland business, Tuesday, August 7: and Nunzio M. Lupo, assistant business editor of the Detroit Free Press, Wednesday, August 8.

The senior economist and first vice president of the Manufacturers National Bank of Detroit, David L. Littmann, will be on selected Continental Express morning flights between Cleveland and Detroit City Airport on Thursday, August 9, and on Friday morning, August 10, Wanda Harris, news anchor of WHK Radio, Cleveland, will be aboard.

Mason said that the stand-up comedians who will appear on afternoon Continental Express flights between Cleveland and Detroit City Airport the

week of Aug. 6-10 will be auditioned and selected by Continental Airlines Cleveland travel agents at Hilarities Comedy Hall, 1230 West 6th Street, Cleveland on Tuesday, July 31. The comedy auditions, which are open to the public, begin at 8:30 p.m.

Mason added that the "Express Yourself" program will also ask passengers from both cities to list their favorite local business services -- including restaurants for business entertaining, hotels, delivery services limousine services, hotels, and others. He said that the results will be compiled and offered to future business travelers planning a business trip to Cleveland and Detroit.

Cleveland Hopkins Airport is a major hub for both Continental Airlines and its Continental Express division. Continental and Continental Express fly to more than 100 destinations from Cleveland. Other domestic Continental hubs are Newark, Denver and Houston.

#90206p8832 07/25/1990 ~PR Newswire

BOSTON (JULY 25) PR NEWSWIRE - Shawmut Bank today announced that it is offering a fixed-rate, 30-year, below-market mortgage product available to low-income homebuyers in the city of Boston. This product is part of an $8 million commitment that Shawmut made in January to the Boston mortgage pool.

This product is a fixed-rate mortgage for 30 years, with a rate priced one half below our current two-point market rate and will be offered with no points.

Shawmut has been offering an adustable-rate mortgage (ARM) product since early March. This ARM mortgage is fixed for five years at one percent below-market rate. At the end of the fifth year, the rate adjusts annually, but not more than one percent. Over the 30-year life of the mortgage, the rate will not increase more than four percent.

Shawmut Bank President John P. Hamill said, "Working with community leaders and groups in the city of Boston, we've learned what their banking needs are, and we've recognized that no single mortgage product could meet the needs of all local residents. Our adjustable-rate mortgage product is sensitive to the issue of long-range affordability, but we know that an ARM is not for everyone. For some low-income families, a fixed-rate may offer more stability and security," said Hamill. "In response to this need, Shawmut gives consumers a choice of a fixed- or an adjustable-rate mortgage."

The fixed-rate mortgage will be available Sept. 17. Buyers of homes and condominiums of one to four units may apply for both the fixed-rate and the ARM products at branch offices in Boston of Shawmut Bank and The Provident Institution for Savings, and at Shawmut Mortgage Company offices.

Shawmut Bank is one of the leading subsidiaries of Shawmut National Corporation (NYSE: SNC), a superregional bank holding company with approximately $25 billion in assets. It maintains dual headquarters in Boston, Mass., and Hartford, Conn., and with nearly 400 branch offices in New England.

HOUSTON (JULY 25) PR NEWSWIRE - BJ Services Co. (NYSE: BJS), which completed an initial public offering of nine million shares of its common stock on July 20, 1990, announced that earnings per share for the third fiscal quarter ended June 30, 1990 were 36 cents, an improvement of 140 percent as compared to the same quarter, last year. This earnings improvement was achieved on revenues of $83.3 million which were 6.3 percent above the comparable quarter, last year. For the nine months, earnings per share have improved to 89 cents, 122 percent above last year's results of 40 cents. Nine month revenues of $253.3 million are 8.5 percent above last years level of $233.4 million.

President and Chief Executive Officer J.W. Stewart attributed the improvement in earnings to "Increased activity and pricing conditions in the U.S. market place, combined with the company's continued focus on strengthening its competitive position in the more profitable geographic markets worldwide. The company's substantial operating leverage is demonstrated by the 67 percent pre-tax earnings contribution on the third quarter's revenue increase of $4.8 million. In addition, recent developments in world oil markets reinforces the company's optimistic outlook on future activity and pricing trends."

STAMFORD, CT (JULY 25) PR NEWSWIRE - VIMRx Pharmaceuticals Inc. (NASDAQ: VMRX) announced today the public offering of 1 million units at $5 a unit, for a total offering of $5 million. Each unit consists of five shares of common stock and five Class A warrants. The offering is underwritten by D.H. Blair and Co. Inc. The company has granted the underwriters an option to purchase up to an additional 150,000 shares to cover over-allotments.

Each Class A warrant is exercisable to purchase one share of common stock and one redeemable Class B warrant at a price of $1.50 at any time until July 24, 1995. Each Class B warrant entitles the holder to purchase one common share at $2.25 until July 24, 1995. The Class A and Class B warrants are subject to redemption by VIMRx at 5 cents a warrant under certain circumstances.

The company's president, Richard F. Maradie, said he plans to use the proceeds from the offering to cover research and development efforts, working capital requirements, debt repayment, and the manufacture of pharmaceutical product for clinical trials.

VIMRx is a pharmaceutical company engaged in the research and development of therapeutic compounds derived from natural substances, specializing in therapeutics for viral and retroviral diseases. Initially, the company will focus on the development and commercialization of Hypericin for AIDS

and antiviral therapy.

This offering is made by prospectus only, a copy of which may be obtained from the offices of D.H. Blair and Co., 44 Wall St., New York, N.Y. 10005, 212-495-4000, or VIMRx Pharmaceuticals Inc., 1177 High Ridge Rd., Stamford Conn. 06905, 203-321-2115.

#90206p8843 07/25/1990 ~PR Newswire

HOUSTON (JULY 25) PR NEWSWIRE - Sterling Chemicals Inc. (NYSE: STX) today reported revenues and earnings for its third quarter ended June 30, 1990.

Third Quarter Results Revenues for the third quarter were $139.2 million compared to revenues of $150.2 million for the third quarter of fiscal 1989, a decrease of 7.3 percent. Net income was $18.8 million for the quarter versus $17.6 million for the same quarter of the previous fiscal year, an increase of 6.8 percent. On a per share basis, net income was 34 cents for the third quarter of fiscal 1990 versus 30 cents for the third quarter of fiscal 1989, an increase of 13.3 percent.

In comparison with the second fiscal quarter of 1990, revenues for the third quarter improved from $117.1 million to $139.2 million and earnings per share improved from 20 cents to 34 cents, an increase of 70 percent.

On a year to date basis, revenues for the nine-month period ended June 30, 1990, were $344.2 million compared to revenues of $477.7 million for the

same period of fiscal 1989, a decrease of 27.9 percent. Net income was $34.1 million for the nine-month period ended June 30, 1990, versus $96.3 million for the same period in the previous fiscal year, a decrease of 64.6 percent. On a per share basis, net income was 62 cents for the nine-month period ended June 30, 1990, versus $1.62 for the same period in fiscal 1989, a decrease of 61.7 percent.

Discussion of Results Sterling's earnings from operations for the quarter just ended were essentially the same as the prior year's results. The additional 4 cents per share earned in the June 1990 quarter was attributable to the net effect of: (1) the receipt of insurance proceeds from the final settlement of the freeze-related problems that occurred in December 1989, partially offset by (2) the accrual for a portion of the styrene reactor turnaround currently underway.

Styrene shipments were lower in the quarter just ended versus the prior year because of production inefficiencies with the above mentioned reactor. However, the lower volume was offset by higher margins resulting from the tight supply of product that now exists in the marketplace. The performances of acrylonitrile and acetic acid for the quarter just ended were primarily unchanged from the prior year.

Sterling Chemicals is a major producer of seven intermediate petrochemical products -- styrene monomer, acrylonitrile, acetic acid, plasticizers, lactic acid, tertiary butylamine and sodium cyanide. Sterling Chemicals is headquartered in Houston. The company's stock trades on the New York Stock Exchange under the symbol STX.

#90206p8848 07/25/1990 ~PR Newswire

TAYLOR, Mich. (JULY 25) PR NEWSWIRE - Heritage Bankcorp Inc. (NASDAQ: HEBC) announced that its board of directors, on July 23, 1990, adopted a shareholder rights plan designed to protect the company's shareholders from coercive takeover tactics and takeover bids that are not fair to all shareholders.

In accordance with the plan, typically called a poison pill, preferred share purchase rights will be distributed as a dividend at the rate of one right for each Heritage common share held of record as of the close of business on Aug. 15, 1990. The rights, which are not immediately exercisable, entitle the holders to purchase one one-hundredth of a preferred share at a price of $35 upon the occurrence of certain triggering events. Separate rights certificates will not be distributed. The rights trade automatically with the common shares.

E.G. Wilkinson Jr., president and chief executive officer of Heritage, said "the rights are not designed to prevent a takeover of the company. Rather, the rights plan should encourage anyone interested in acquiring the company to negotiate with the board of directors prior to attempting a takeover. We believe this will assure that all of our shareholders receive fair and equal treatment in the event of a takeover and are able to receive the long-term value of their investment in Heritage." According to Wilkinson, the rights plan has not been adopted in response to any specific effort to acquire control of the company and the board of directors is not aware of any such effort at the present time.

The rights can be exercised and separate rights certificates distributed only if any of the following events occur: acquisition by a person of 20 percent or more of the company's common shares; a tender offer for 20 percent or more of the company's common shares; or acquisition of 15 percent or more of the company's common shares by an unfriendly suitor whose actions are likely to have a material adverse impact on the company or shareholder interests.

The plan also provides that, in the event of a hostile takeover, each right enables its holder (other than the hostile acquirer) to purchase Heritage common shares at 50 percent of the market price. Further, in the event the company is acquired in a merger or business combination, each right enables its holder to purchase shares of the acquiring entity at a similar discount. Heritage may, in its sole discretion, redeem the rights at $.01 per right at any time prior to any of the triggering events.

Heritage Bankcorp Inc. is the holding company for Heritage Federal Savings Bank of Taylor, Mich. Heritage Federal Savings Bank serves southeastern and northern Michigan through its home office and 45 full-service branch offices. Heritage Bankcorp Inc. is quoted on the NASDAQ National Market System under the symbol HEBC.

#90206p8849 07/25/1990 ~PR Newswire

HOUSTON (JULY 25) PR NEWSWIRE - Pennzoil Co. (NYSE: PZL) today reported 1990 second quarter net income of $4.7 million, or 12 cents per share. This compares to $118 million, or $3.15 per share, in the same quarter a year ago. Revenues for the quarter were $551.1 million versus $684.1 million for the same period last year.

For the six month period ended June 30, 1990, the company reported net income of $37.4 million, or 96 cents per share. This compares to net income of $170.6 million, or $4.49 per share, for the 1989 period.

Revenues for the six month period were $1.1 billion versus $1.3 billion in 1989.

Investment income in the second quarter and for the first six months was significantly lower than in the same periods in 1989. This was due primarily to a $140.6 million gain on the sale of Burlington Resources Inc. and Burlington Northern Inc. common stock last year and conversion of $2.1 billion from short-term marketable securities into a long-term investment in Chevron Corp. common stock, only the dividends from which are included in Pennzoil's reported net income.

Results for the quarter were also affected by a one-time charge of $14.4 million associated with a workforce reduction. The workforce reduction is expected to trim future salary and benefit expenses by approximately $25 million annually.

James L. Pate, president and chief executive officer, said, "We are taking definitive steps to adapt to volatile prices and competitive market conditions. The workforce reductions and other cost cutting initiatives will significantly improve our competitive ability."

During the quarter, operating income for the oil and gas segment was approximately equal to last year's, excluding a stripper gas settlement and windfall profit tax refund received in 1989.

Earnings from the motor oil and automotive products segment improved slightly for the quarter due to higher refinery margins. Results from the sulphur segment were down substantially in the second quarter due to reduced sulphur prices.

#90206p8855 07/25/1990 ~PR Newswire

CALGARY, Alberta (JULY 25) PR NEWSWIRE - Alberta and Southern Gas Co. Ltd. (A&S) announced that its producers today accepted a revised pricing proposal covering sales of more than one billion cubic feet (Bcf) per day to Pacific Gas & Electric company (PG&E) (NYSE: PCG) of San Francisco.

With this acceptance, A&S now plans to ask the Alberta Petroleum Marketing Commission for a formal finding of producer support under the Natural Gas Marketing Act.

''We're very pleased with the successful outcome of today's producer vote '' said President Don McMorland. ''It ensures that our sales to PG&E on behalf of some 190 Alberta gas producers will be maintained for the next year.''

The new pricing provisions have a one-year term, from August 1, 1990, to July 31, 1991, and a two-tier price structure. The Tier I price will remain unchanged at $1.90 (U.S.) per MMBtu while the Tier II price will be incentive based at $1.60 (U.S.) per MMBtu. The Tier I price will be applied to all winter volumes (December through February) and to the first 700 MMcf per day of sales during the remaining nine months. The Tier II price will only be applied to the next 200 MMcf per day of sales in March and November and 350 MMcf per day from April through October. Any further volumes would again receive the Tier I price.

This two-tiered structure is expected to result in a weighted average price of about $1.84 (U.S.) per MMBtu over the one-year term.

To accommodate the new pricing provisions, A&S will extend the current netback agreement with its producers to July 31, 1991, from a scheduled expiration date of October 31, 1990.

A&S has been a leading exporter of Canadian natural gas for 30 years. It is a wholly owned subsidiary of PG&E, which operates the largest integrated utility system in the United States.

#90206u0054 07/25/1990 ~United Press International

ATHENS, GREECE (JULY 25) UPI - Critics lambasted the conservative government of Prime Minister Constantine Mitsotakis in parliament Tuesday for mishandling an anti-American demonstration on the Mediterranean island of Crete in which police used tear gas to disperse protesters.

The clashes, in the town of Hania in northwestern Crete, occurred late Monday when a group of people protested the July 8 signing of a military cooperation agreement between Greece and the United States.

The agreement allows two U.S. bases at Souda, less than 10 miles from Hania, to continue to operate.

The 300-member Vouli, or parliament, ratified the agreement by 151 votes to 144 late Monday, touching off the protest in Crete, which voted strongly socialist during the April general elections.

Former Socialist Prime Minister Andreas Papandreou, now heading the opposition, told the legislature Tuesday police attacked some 220 people when they tried to enter the prefecture building to hand in a resolution.

Papandreou, who spoke against the bill ratifying the U.S.-Greek agreement, asked Mitsotakis's New Democracy government to ''be careful, because the next step takes the form of totalitarianism.''

In a rebuttal, Mitsotakis said: ''It is time for Mr. Papandreou to finally show some responsibility and stop encouraging irresponsible and anti-democratic demonstrations.''

The premier said: ''The police did nothing other than protect the prefecture building from attempted occupation. A clear proof of this is the unprecedented fact that while police were injured by bullets no one was wounded on the other side, not even bruised.''

Public Order Minister Ioannis Vassiliadis blamed what he called irresponsible people, anarchists, fanatics and naive individuals for the violence on Crete.

He also condemned a local radio station, saying it ''played an unacceptable role in the incidents.'' Government spokesman Byron Polydoras told reporters the radio station called on people to ''grab your rifles and go into the streets.''

In the debate on the eight-year U.S.-Greek agreement on the bases, Papandreou, who is chief of the Pan-Hellenic Socialist Union, expressed concern, saying Crete could become the target of attack in case a conflict broke out in the region.

Crete would turn into a U.S. port in the East Mediterranean, he said, and questioned the need for the bases on the island in view of the growing detente between the United States and the Soviet Union.

Communist leader Hariloas Florakis, told the Vouli during the debate that the bases were being upgraded and ''served the overall readaptation of U.S. strategy in its new direction, which is the Middle East and oil.''

Florakis said: ''The island is of major strategic importance and is

perhaps the most important point in the southeast Mediterranean. It is within the firing range of conventional and non-conventional arms and is in danger.''

OAK LAWN, IL (JULY 24) UPI - The Village Board refused Tuesday to censure a trustee who said he did not want minorities to live in the suburban town because they don't maintain their property or benefit the community.

The comments published in a local newspaper on July 15 touched off a storm of protest in nearby Chicago and prompted aldermen to suggest raising the water rates charged to the south suburb or even cutting off its water supply altogether.

''Just look at the people and the way these people live,'' Trustee Joseph Vogrich said. ''They don't belong in Oak Lawn. They can't contribute anything to the community ... Should we start a maintenance program to maintain the property for them? I don't want that in Oak Lawn. I don't want these kinds of people in Oak Lawn.''

The Village Board voted 3-2 against censuring Vogrich but Mayor Ernie Kolb and other village officials criticized him for making the remarks. They said they did not censure him, because the remarks were not made during a Village Board meeting.

A large crowd waiting outside the village hall booed and heckled Chicago Alderman Robert Shaw as he exited the meeting Tuesday night. Shaw had threatened to call for increased water rates for Oak Lawn if Vogrich was not censured.

Oak Lawn police arrested two men who chased Shaw into the parking lot shouting ''Shaw go home, leave Oak Lawn.''

During the meeting, Vogrich defended his comments. He said he was speaking of all minorities and did not mean to single out blacks.

''Not once did the word black cross my lips,'' Vogrich said to thunderous applause from the hundreds of residents packed in the meeting.

After the meeting, Shaw expressed his disappointment saying the Village Board ''condoned and put their stamp of approval'' on Vogrich's bigoted remarks.

''It's a black eye for a great city,'' Shaw said.

Another prominent black Chicagoan, Alderman William Henry, said he had

sent a letter to the U.S. Justice Department asking for an investigation into Oak Lawn's hiring and promotion policies, open housing policies and set-aside programs.

Henry said he had also prepared a resolution to be introduced at the next City Council meeting urging the state Legislature to amend the water law to say the city ''may'' provide the service to Oak Lawn rather than the current ''shall.''

Oak Lawn purchases 26 million gallons of water per day from the city of Chicago at a cost of $894 per million gallons.

#90206u0107 07/25/1990 ~United Press International

SAN ANTONIO (JULY 25) UPI - A record store owner who refused to pull copies of a controversial record by the group, ''2 Live Crew,'' from his shelves pleaded innocent Tuesday to a misdemeanor charge of promoting obscene material.

Dave Risher, owner of Hog Wild Records in San Antonio, was released on a $400 personal recognizance bond after appearing before Bexar County Court-at-Law Judge Tony Jimenez. A pre-trial hearing date was set for Sept. 17.

''I think this is a tempest in a teapot. I don't think the album's obscene '' American Civil Liberties Union lawyer Bob Switzer said about the charge against his client.

''It has the standard four-letter words, but so many movies and books and magazines these days do, too,'' Switzer said.

The charge was filed against Risher, 35, after he sold a copy of the rap group's ''As Nasty As They Wanna Be'' album to the 20-year-old son of the leader of a local anti-pornography group.

Police vice squad officers last month visited 30 San Antonio record store owners and told owners to pull the records from their shelves or risk legal action.

The vice squad visits in San Antonio followed a ruling by a federal judge in Florida that the album contained obscene material.

Most San Antonio record store owners complied with the vice squad's request, but Risher, who sold the albums only to customers ages 18 and older, refused.

''I think he has a lot of guts,'' Switzer said. ''He's not a crusader, but

he resented the Gestapo-like tactics of the vice squad.''

The charge carries a maximum penalty of 1 year in jail and a $1,000 fine.

#90206u0121 07/25/1990 ~United Press International

SEATTLE (JULY 25) UPI - To Soviet Valeri Tikhonenko, three is more than two in any language.

''I think Americans concentrate more on two-point game than on outside shooting, and that is why we won today,'' Tikhonenko said Tuesday night after hitting five of his team's eight three-point shots in the Soviet Union's 92-85 Goodwill Games victory over the United States.

Tikhonenko, the only returning player from the victorious Soviet team at the 1988 Olympics, finished with 30 points and continued his country's torment of U.S. basketball. The Soviets have won the only two Olympic meetings between the countries in the last 18 years.

''I'm not ashamed when people are doing their best,'' said U.S. Coach Mike Krzyzewski of Duke. ''These (U.S. players) are 20-year olds and putting the weight of the whole country on their shoulders isn't right.''

The U.S. team had no reason to be embarrassed. At times, it played well. But the Soviets shot much better where it counted most - beyond the three-point line.

Tikhonenko made five of nine long shots and the Soviets hit 8 of 15. The U.S. made only 3 of 13, and top threat Lee Mayberry struck out on five tries.

In addition to an extra 15 points outside, the Soviets did better at the free throw line. They made 20 of 24 to 16 of 25 for the U.S. team.

''That's just the strength of the Soviets,'' Krzyzewski said. ''We knew that in advance. Their penetrating and pitching back out is a little bit unusual for U.S. basketball but very effective.

''I thought our kids didn't play that badly, but we had a hard time scoring. Then their three-point shooting was deflating for us. We'd make a run, then they would knock down a really big three-point shot. That's the sign of a mature team.''

Even though the Soviets aren't nearly as experienced as they were in 1988, they are considerably older and wiser to the international style than the U.S. players. Tikhonenko, drafted four years ago by the Atlanta Hawks, is 26.

''We may have surprised the Americans,'' said Soviet Coach Vladas Garastas. ''We have certain tactics for the game. I can't say what they were. We may need to meet them again.''

Indeed, despite the loss, the U.S. team is still in good shape for a shot at the gold medal of the Goodwill Games. However, it must defeat Italy, which beat Puerto Rico Tuesday, 117-97, on Wednesday to qualify for Friday's semifinals. The U.S. and Soviets then could meet again in Sunday's championship.

Tuesday's game marked the first meeting of the two countries' national teams since the Soviet Union scored an 82-76 victory in the semifinals of the 1988 Olympics at Seoul. The Soviets went on to beat Yugoslavia for the gold medal, and the U.S. settled for a bronze, its lowest finish in an Olympics.

Tikhonenko was the only player from that game to play Tuesday night. But he was too much for the U.S. team, scoring 23 points in the second half and foiling U.S. man-to-man defensive tactics.

Alonzo Mourning of Georgetown led the U.S. effort with 20 points. Billy Owens of Syracuse had 16 and Kenny Anderson o Georgia Tech added 14.

The Soviets, which twice led by nine in the first half, built that margin again, 62-53, after six minutes of the second half. Tikhonenko scored 10 points, including two three-pointers, during the run.

Anderson's three-pointer started a U.S. spurt that cut the Soviet lead to 64-62, with 11 minutes to play. But then Tikhonenko began another assault with 11 points in a 19-9 run that stretched the Soviet lead to 83-71 with five minutes remaining.

The U.S. put on its most frantic pressure, but the Soviets were up to the test.

Mourning, who also had 14 rebounds and five blocks, ignited a spurt over the final five minutes of the first half that helped the Americans to a 45-42 lead at the break.

Mourning had three blocks during a 11-2 run that lifted the United States into a 33-33 tie after the Soviets led by as many as nine. Then, he capped an 8-0 surge at the end of the half with a block that turned into his dunk at the other end.

VANCOUVER, WA (JULY 25) UPI - Convicted child-killer Westley Allan Dodd said he kept a graphic diary of the murder of three young boys so there would be evidence of his crimes in the event of his death.

''I wrote them wanting it to be read eventually,'' Dodd, 29, said in a live interview Tuesday on KGW radio of Portland.

''If I should be killed the next day in a car wreck or something, there would be a record and they would know,'' he said. ''I figured if something happened to me, my dad would find it and he would turn them over to police right away.

''I wanted police to know what happened,'' he said.

A Clark County jury voted 10 days ago to sentence Dodd to death for the murders of brothers William and Cole Neer, ages 10 and 11 of Vancouver, and Lee Iseli, 4, of Portland last summer and fall. Parts of the diary were read to the jury that issued the sentence.

After his arrest, Dodd denied any involvement in the killings. But then he pleaded guilty to aggravated murder against the advice of his lawyers.

Also during his interview, Dodd said he considered committing suicide shortly before moving to Vancouver and again shortly after he was arrested. But Dodd said he felt he ''owed'' it to the families of the victims to go through with the trial.

Dodd said he believes he would be killed within an hour he is placed in the the general population at the Washington State Penitentiary in Walla Walla. But he will be placed on Death Row, where he probably will not have any unsupervised contact with other inmates.

Dodd added that he considers himself a supporter of the death penalty.

''The fact that I'm charged in a capital case and I've been sentenced to death doesn't change my views at all,'' he said.

He said in an earlier interview that he would like to die at the hands of a hangman, because that's how he killed Lee Iseli.

The Neer brothers were stabbed to death last year and Iseli was kidnapped from a school yard in Portland, molested and strangled to death in the first week of November.

Dodd will be formally sentenced Thursday.

#90206u0217 07/25/1990 ~United Press International

LIMA, Peru (JULY 25) UPI - Nearly 100 people have died in clashes between leftist guerrillas and security forces so far this week, police and news reports said.

Suspected Shining Path rebels assassinated a university official Tuesday in the Andean city of Ayacucho and unknown gunmen attacked a prominent Jewish leader in the capital, slightly injuring him.

Police said masked raiders burst into the home of Ciro Alberto Aramburu Villena, director of student welfare at the University of San Cristobal of

Huamanga in the Andean city of Ayacucho, at 2 a.m. and gunned him down as he tried to jump out of a second-floor window.

Aramburu Villena's daughter, 31-year-old Flora Aramburu Castelares, was shot and wounded in the right shoulder when she cried for help, police said.

The University of San Cristobal of Huamanga is considered a center of agitation of the Shining Path guerrillas, who follow a Marxist line founded by the late Chinese revolutionary leader Mao Tse-tung.

For the past week students have occupied the university's cafeteria, demanding free meals.

The legal adviser to the university, Hernando Colonia Arteaga, was killed in a similar pre-dawn raid by suspected Shining Path guerrillas four days ago.

The founder of the Shining Path movement, Abimael Guzman Reynoso, is a former philosophy professor at the university.

Since the Shining Path uprising began in 1980, seven members of the faculty and dozens of students have been killed at that institution in Ayacucho, 230 miles southeast of Lima.

The newspaper Republica said 67 suspected guerrillas and five soldiers were killed in one of the bloodiest battles reported recently between the two sides. The fighting occurred Sunday night near the village of Buenos Aires, in the province of Huamalies, 140 miles northeast of Lima, the newspaper said.

The newspaper said 300 rebels in several columns surrounded an army base and attacked when the 30-man garrison refused to surrender, but they were driven away and chased helicopter gunships.

In the province of Huanta, 30 miles north of Ayacucho, police reported that two men were found dead Monday, apparently when dynamite they were carrying for a guerrilla attack accidentally exploded. Police said they found a banner near the two bodies with the slogan, ''Movement of Anti-terrorist Liberation,'' a previously unknown group.

The mayor of the jungle municipality of Junin, 160 miles east of Lima, Andres Galarza Flores, said that 13 Amazon basin Indians were killed fighting with bows and arrows and poisoned darts against guerrillas using firearms.

He said that an undetermined number of the guerrillas also died in the fight.

In the village of Santa Cruz, 80 miles northeast of Lima, four provincial authorities and the mayor were executed by bullets after summary trials in which they were accused of being ''government servants,'' police said.

Police reported another three people were killed in in the district of Limbani, 500 miles southeast of Lima, by rebels who dynamited installations of the state mining company and the city hall.

Nearly 20,000 persons have been killed in fighting between guerrillas and security forces since the Shining Path guerrillas began their uprising in 1980, concentrating their attacks in rural areas.

Later Tuesday, four unidentified gunmen shot and tossed explosives at a car carrying one of Peru's most prominent Jewish leaders, slightly injuring him, the Radio Programas del Peru radio station said.

Yacob Hansen, the 65-year-old president of the Israelite Union of Peru, the country's largest Jewish organization, was driving through the residential neighborhood of San Isidro in the capital shortly after 5 p.m. when the gunmen opened fire from another car in a traffic jam.

The radio said Hansen, a well-known writer and journalist, was able to walk to a nearby clinic for treatment of minor injuries.

Police declined to speculate on the possible identity of the gunmen.

#90206u0251 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - The Senate, after leaders issued blunt warnings that changes would imperil the new farm policy law, rejected two last-ditch attempts to spend more on farm subsidies.

The victories on late-night votes Tuesday were the latest signs Congress probably would make few major changes in the bills written by the House and Senate Agriculture committees.

However, one more attempt to increase farm subsidies was scheduled for Senate debate Wednesday.

The farm bill would spend about $54 billion on farm subsidies over the next five years. The bills being debated in the House and Senate also would set the terms for conservation, public feeding, export subsidy and research programs through 1995.

Due to budgetary constraints, the bills propose a freeze on crop subsidy rates but would give farmers more freedom to decide which crops to grow.

Sen. Richard Lugar, R-Ind., forcefully criticized a proposal by Sen. Tom Daschle, D-S.D., to raise crop target prices for family size farms. He called it an illusion to suggest farm spending could be increased.

''It's not going to happen. It's going to crash into a heap,'' Lugar said.

Agriculture Committee chairman Patrick Leahy, D-Vt., joined Lugar is warning that support for the bill could collapse if subsidy provisions were changed. Lugar, for instance, said Republicans might propose wholesale changes in the bill if they thought spending was getting out of control.

''This is our last opportunity, maybe for five years,'' Daschle said in asking for a better shake for small farmers. ''The bill does not provide adequate income protection for producers of our most staple commodities.''

Daschle proposed giving a 2.5 percent higher crop target price to small farmers and to exempt the first 100 acres of each grain crop from land set aside requirements. Production above a set level would have gotten a lower payment rate.

While Daschle said his plan would not cost anything, Lugar said it could cost $1.9 billion because farmers would find ways to evade the limits.

The Daschle plan was defeated 72-24 and senators voted 66-30 to kill a proposal by Sen. Charles Grassley, R-Iowa, to make the bill's planting flexibility provisions more attractive.

Sen. Kent Conrad, D-N.D., and Sen. Trent Lott, R-Miss., said Grassley's plan, which would have made crop subsidies available on ''flex'' acres, would give Midwestern farmers an unfair advantage over farmers with fewer choices on what to grow.

Earlier in the day, the House and Senate solidly turned down proposals to trim the sugar support price, now 18 cents a pound, by 2 cents.

The Senate also refused to tinker with the loan rate provisions in the farm bill, although the Bush administration opposes them. However, senators voted to phase out the honey support program and they adopted an amendment to bar farmers from growing fruits and vegetables on ''flex'' acres.

House members rejected a proposal by Rep. Harold Volkmer, D-Mo., to raise the milk support price and voted to end the practice that allows California milk processors to pay a lower price than farmers recieve in other states.

Critics said the sugar program results in consumers being forced to pay high food prices, as well as hurting sugar-exporting nations. Defenders said the cut would mean a loss in jobs in the sugar industry as well as putting farmers out of business.

''The bottom line (on sugar) is, it is jobs in the United States of America, farmers in the United States,'' shouted Rep. Kika de la Garza, D-Texas, chairman of the Agriculture Committee, as the House vote neared. ''It's jobs, jobs, jobs in the USA.''

#90206u0342 07/25/1990 ~United Press International

KOUROU, French Guiana (JULY 25) UPI - The successful lauch of an Ariane 4 rocket that boosted two satellites into orbit put the European space program back on track as an American rocket sat delayed and under repair on the launch pad.

''We're back in operation after what amounts to a 3 1/2-month delay,'' said Doug Heydon, president of Arianespace Inc. ''We're obviously extremely relieved and very happy. I think we have some pleased customers.''

The 37th Ariane flight Tuesday marked a critical milestone for the European Space Agency and Arianespace, the 11-nation European consortium that controls more than 50 percent of the world's commercial launch market.

The successful launch came after a February failure that destroyed two Japanese relay stations and was the fifth failure in 36 launches for Arianespace, lowering the rocket's success rate to around 86 percent, far lower than most U.S. rockets.

Three major American rocket makers are competing with the Europeans for a share of the commercial launch market, but their results have been mixed.

In fact, the debut launch of a commerical Atlas-1 rocket carrying a scientific satellite from Cape Canaveral Air Force Station in Florida was scheduled for Friday but has been delayed by a fuel leak, poor weather and a faulty electrical switch. The launch was scheduled for Wednesday afternoon.

The 192-foot three-stage rocket, equipped with four liquid-fueled strap-on boosters for extra power, thundered to life at 6:25 p.m. EDT Tuesday and quickly climbed away from its firing stand at the European Space Agency's jungle launch complex on the northern coast of South America.

Perched atop Europe's premier rocket were two communications satellites: TDF-2, a five-channel direct-broadcast television satellite built for Telediffusion de France; and DFS Kopernikus-2, a telecommunications satellite built for the German postal service, Deutsche Bundespost.

Powerful springs gently pushed TDF-2 away from the Ariane third stage about 20 minutes after liftoff into its planned preliminary orbit. DFS Kopernikus-2 followed suit about four minutes later.

Small on-board rockets were scheduled to fire roughly 37 hours after launch to propel the satellites toward their final altitude of 22,300 miles over the equator.

It was the first mission for Arianespace since an Ariane 4 launched Feb. 22 veered out of control and exploded 101 seconds after liftoff. Lost along with the rocket were two Japanese communications satellites insured for $189.4 million.

The failure later was blamed on a piece of cloth that blocked a critical water supply line needed by one of the four Viking 5 strap-on engines. Water is used by the engines to regulate the mixture of rocket fuel, to control engine chamber pressure and to cool gases used to pressurize the fuel tanks.

But Arianespace mounted a major investigation and openly reported on the progress and results of the probe, despite the embarrassing nature of the failure. Far from losing business, the consortium signed several new launch contracts during the course of the investigation.

Arianespace plans to launch three more flights this year and nine in 1991 to carry 21 scientific and commercial satellites into orbit. The consortium holds contracts valued at $2.8 billion to launch 37 satellites.

The Ariane 4 is the most powerful rocket in the Ariane family of rockets, capable of boosting 10,000-pound satellites into geosynchronous orbit and comparable to the American Titan-class rockets used to launch heavy military spy satellites.

TDF-2 was built by Eurosatellite for Telediffusion de France to provide direct broadcast television service. The satellite, which weighs 3,362 pounds, measures 20 feet wide and 63 feet across with its twin solar panels deployed.

DFS-2 was built by a consortium of European contractors for the Deutsche Bundespost Telekom of Bonn, Federal Republic of Germany. The 2,277-pound satellite is equipped with 11 transponders to provide television, telephone and data relay services.

The box-shaped relay station measures 51 feet across with its twin solar arrays unfolded.

LOS ANGELES (JULY 25) UPI - A rare Stradivarius violin valued at $550,000 was stolen from famed violinist Erich Gruenberg at Los Angeles International Airport Tuesday by someone who probably had no idea of its worth, police said.

A second Hirsch violin worth about $8,000 also was stolen, Sgt. Michael Apodaca said.

Gruenberg arrived from England via British Airways with his wife carrying the two instruments about 4:30 p.m. He was met by Harold Hirsch, maker of one of Gruenberg's violins.

Gruenberg placed both instruments in a baggage cart and rolled it outside, where he left it briefly as he waited to be picked up, Apodaca said.

When he returned, the instruments were gone.

''He was very, very shaken, as you can probably imagine,'' Apodaca said. ''He's in a state of shock.''

Apodaca said there was a good chance of recovering the Stradivarius. He said its ''99 percent'' likely that it was stolen by someone who had no idea of its worth, and would not have the kind of connections needed to sell it without raising suspicion.

#90206u0393 07/25/1990 ~United Press International
ANCHORAGE, AK (JULY 25) UPI - The Coast Guard threatened to withdraw from the Exxon Valdez oil spill cleanup if Alaska asserts its own cleanup standards and policies over federal authority.

No state will be allowed to establish its own independent standards for an oil spill cleanup, Rear Adm. David Ciancaglini declared Tuesday night in an ultimatum to Alaska and a warning to California and other states.

Last week Alaska told Ciancaglini, federal coordinator of the Exxon Valdez oil spill cleanup, the state had authority to set standards for the cleanup and the Coast Guard was ignoring Alaska laws and policies.

Ciancaglini waited a week. Then, at the regular twice-monthly cleanup

operations meeting Tuesday night, he tore into the state position.

''You're talking about a very important matter that affects a federal entity - it's called pre-emption, where the state feels it can pre-empt a federal authority, and it just isn't so. I won't have it.''

Ciancaglini threatened to pull the plug on the cleanup, which he is directing, and order the Coast Guard out unless Alaska gives in. Although the March 1989 spill was never formally federalized, President Bush put the Coast Guard in command of day-to-day cleanup operations for the 11-million-gallon spill, the nation's worst.

The head-on collision between the Coast Guard and Alaska was triggered by a July 18 letter to Ciancaglini from Dennis Kelso, the state commissioner of the Department of Environmental Conservation.

In a six-page state cleanup policy statement, Kelso asked Ciancaglini to ''instruct his staff to respect the authority, directions and suggestions'' of state beach monitors; to let Alaska set standards for cleanup based on state policies; and to require continued work on any given beach until Alaska deemed the job complete.

But the issue that set Ciancaglini off was a new state policy establishing a numerical standard for the amount of oil deemed acceptable on a ''cleaned'' beach before final polishing using bioremediation, the process of applying fertilizer to stimulate growth of oil-eating bacteria to speed up the natural degradation of oil.

Alaska said mechanical and manual cleanup should continue until oil is reduced to a concentration of 5 grams of oil per kilogram (2.2 pounds) of beach sediment. Once that goal was reached, according to the state policy pronouncement, a beach would be suitable for bioremediation.

''It is the federal government's position, the United States Coast Guard in particular, that we will not hold ourselves to a numerical standard,'' Ciancaglini said.

''In the event that a numerical standard is tried to be used by anyone, then we will immediately cease operations on a particular area no matter what state it's in,'' Ciancaglini said. ''And we will turn responsibility over to that particular entity that is responsible for that position - in this case the state of Alaska, or it could be the state of California, whatever - and we would cease further cleanup operations.''

''Implicit with this is the fact that the entity who tried to impose a numerical standard would also be responsible for assuming all costs associated with it,'' he said.

State cleanup coordinator Randy Bayliss said a numerical standard would be an objective referee when Exxon, state, federal and land manager beach monitors disagreed about whether a beach clean enough. He also predicted numerical standards were the wave of the future in an environmental cleanups.

Even U.S. Environmental Protection Administration Director William Reilly, after touring the cleanup Monday, said he liked the idea of numerical standards but stopped short of embracing the specific standard proposed by Alaska.

But Ciancaglini was unfazed and said, ''If the EPA has standards for hazardous waste, we're talking small areas where you have batteries, acids PCBs, you name it. We're not talking hundreds of miles of shoreline where you're trying to impose numeric standards. There's a big difference. I guess standards have their place for those entities that want to use it, but for an oil spill cleanup in coastal waters of the United States along the shorelines, it is a rather diffcult thing to do.''

He said measurement standards and analysis would interfere with cleanup operations and said, ''Numeric standard is something we will not go by.''

Ciancaglini further objected to Alaska suggesting a new cleanup standard ''a couple of weeks before the cleanup is over.''

Exxon cleanup manager Otto Harrison aligned himself with the Coast Guard in opposition to the proposed state cleanup standard.

#90206u0413 07/25/1990 ~United Press International

NEW YORK (JULY 25) UPI - The prosecution will rest its case against three youths accused of beating and raping a female jogger in Central Park by showing the videotaped confession given by one of the defendants.

The confession by 15-year-old Raymond Santana was to cap the prosecution's case, which received an inadvertant boost from an attorney for another defendant Tuesday.

Videotaped confessions by the three youths are the key pieces of evidence in the attack on the woman jogger, who testified early in the trial but did not remember the attack. Santana's tape was scheduled to be showned Wednesday.

During five hours of rambling cross-examination Tuesday in state Supreme Court in Manhattan the attorney, Robert Burns, seemed to bring out testimony that was detrimental to his client, 16-year-old Yusef Salaam.

Police detective Thomas McKenna had testified earlier that he tricked Salaam into confessing to taking part in the April 19, 1989, attack.

Burns tried to convince the jury that McKenna coerced the confession from Salaam. Instead, the attorney seemed to emphasize the statements his client allegedly made to police, without casting any doubt on them.

The prosecution objected to more than half of Burns's questions and even the two other defense attorneys began objecting to the questions.

Salaam, Santana and their co-defendant, Antron McCray, 16, are being tried on 13 criminal counts, including attempted murder, rape, and sodomy. Three other youths are to be tried later.

Throughout the 4-week-old trial, defense attorneys have asserted the youths were tricked into making written and videotaped confessions by police.

Burns distributed copies of Salaam's alleged confession to the juries and he repeatedly allowed McKenna to give the jurors a more graphic account of Salaam's statements than they had previously heard from the prosecution.

''I will tell you right now that he was (in Central Park) because he told me he was there,'' McKenna said at one point when pressured by Burns.

''You say Yusef hit the woman with a pipe?'' Burns then asked.

''Yes,'' McKenna replied.

Burns then enabled the prosecution to exploit a line of questioning that previously had been forbidden to it.

During cross-examination, Burns asked McKenna about his interrogation of Alfred Morris, a youth who police said was part of the gang that stormed through the park, but who was never charged with any crime. McKenna said Morris placed Salaam in the park along with the gang.

Until Burns mentioned Morris' name, prosecutor Elizabeth Lederer had not been able to question McKenna about the youth because he was never charged in the attack.

The detective said Morris had told him the gang had gone into the park to ''wild some joggers.'' That was the first time jurors heard the word ''wild,'' a reference to ''wilding,'' being used to describe the attack.

WASHINGTON (JULY 25) UPI - A House panel wants a special prosecutor to widen his investigation of former Housing Secretary Samuel Pierce to see if he steered contracts to his former law practice, published reports said Wednesday.

The House Government Operations Subcommittee on Employment and Housing signed a letter to independent counsel Arlin Adams asking him to determine if Pierce, secretary under former President Ronald Reagan, procured work for the New York law firm of Battle Fowler, news reports said.

The disclosures were included in reports by the New York Times and the Washington Post.

Adams has been investigating Pierce to determine if he defrauded taxpayers through favortism in Federal housing programs. Adams said he would review the request and determine what recommendation should be made to Attorney General Dick Thornburgh.

The subcommittee members want Adams to decide if Pierce approved an effort to convince government contractors to use the firm for work on a Department of Housing and Urban Development project in 1988.

Battle Fowler was eventually selected for the job, the reports said.

Pierce was a senior partner at Battle Fowler before he joined the Reagan administration, and has denied any wrongdoing.

Thomas Glynn, a partner at Battle Fowler, said ''We are confident that no member or employee of the firm has engaged in any inappropriate conduct with respect to the Department of Housing and Urban Development.''

#90206u0438 07/25/1990 ~United Press International
(JULY 25) UPI - Vince Coleman steals most of his bases with sheer speed. Tuesday night, he practiced a little cunning on the basepaths to treat the home fans to a baseball rarity.

Coleman collected four hits, scored four times, and stole four bases, including his second career steal of home in the eighth inning, to pace the St. Louis Cardinals to a 9-4 triumph over the Chicago Cubs.

Coleman, seeking his sixth straight stolen base title, was on third in the eighth inning when he swa an oppotunity he just couldn't pass up.

''I figured he (pitcher Mike Bielecki) would waste a pitch to Willie (McGee) because he had him in the hole 0-2,'' Coleman said. ''And (infielder Curtis) Wilkerson backed up at third. That gave me an extra

step or two. You don't get very many opportunities to steal home, and I figured that was a good one.''

Coleman raced home with the Carinals ninth run that boosted his major-league leading steal total to 53. His four thefts matched a career-high, which he has reached eight times.

But Coleman's performance included more than just stolen bases.

He led off the second with his fifth homer and second in three days to give the Cardinals a a 5-3 lead. His blast over the wall in left-center chased Chicago starter Steve Wilson, 3-6.

To complete the self-proclaimed best effort of his career, Coleman tripled singled twice, and made a game-ending diving catch in left.

''I just go out, try to do my best, and let you guys clap for me,'' Coleman said. ''Stealing home capped everything else, and with the diving catch it had to be the best game of my career.

''I never got four hits, stole four bases and hit a home run and won the game.''

Scott Terry, 1-5, earned his first victory since August 11, 1989, in relief of beleaugered starter Joe Magrane, who lasted only two innings. Terry worked four innings, retiring 12 of 14 batters he faced and allowing two hits to help snap the Cubs eight-game winning streak.

In other NL action, Atlanta swept a double-header from Houston 9-3 and 9-8 in 10 innings, Pittsburgh topped Montreal 5-3, New York downed Philadelphia 7-4, San Diego blanked Cincinnati 10-0, and Los Angeles pounded San Francisco 9-2.

In the AL it was: Detroit 8, Baltimore 2; Kansas City 5, Toronto 3; Chicago 8, Cleveland 3; Seattle 8, Minnesota 2; Texas 4, New York 1; Milwaukee 6, Boston 5 and Oakland 5, California 3.

-- AROUND THE NL --

Braves 9, Astros 3, 1st game
Braves 9, Astros 8, 10 innings, 2nd game

At Atlanta, Juan Agosto uncorked a wild pitch with two out in the 10th inning of the second game that scored Greg Olson from third and gave Atlanta the win. Agosto, 5-5, sailed a 2-2 pitch over catcher Alex Trevino's glove. Kent Mercker, 4-1, picked up the win in relief. In the first game, Dave Justice stroked a three-run homer and Ron Gant drove in three runs to lift Atlanta to victory. Charlie Liebrandt, 4-3, allowed

three runs and nine hits over eight innings, walking one and striking out eight. Jim Deshaies, 4-9, took the loss.

Pirates 5, Expos 3

At Montreal, Sid Bream hit a two-run homer and drove in three runs and Barry Bonds had three hits and three stolen bases lifting Pittsburgh. Doug Drabek, 12-4, surrendered three runs and six hits over 7 1-3 innings for his fourth straight victory. Stan Belinda earned his fifth save. Kevin Gross, 8-7, suffered the loss.

Mets 7, Phillies 4

At Philadelphia, Mackey Sasser hit two home runs and knocked in four runs to lead New York. Reliever Julio Machado, 3-1, who was recalled from the minors on Sunday, went one inning for the win and John Franco got the last six outs for his 22nd save. Roger McDowell, 3-4, took the loss.

Padres 10, Cincinnati 0

At San Diego, Bruce Hurst pitched a two-hitter for his first shutout of the season and Tony Gwynn collected three hits to help San Diego snap an eight-game losing streak. Hurst, 6-8, struck out eight and walked two for his 16th career shutout. Jack Armstrong, 11-6, dropped his third straight game, giving up nine hits and seven runs in 4 2-3 innings.

Dodgers 9, Giants 2

At Los Angeles, Ramon Martinez fired a two-hitter for his National League-leading seventh complete game powering the Dodgers. Martinez, 12-4, retired 17 in a row at one point, walked one and struck out eight to push his league-leading strikeout total to 150. Rookie John Burkett, 9-3, took the loss as the Giants dropped their sixth in a row.

-30- 4718

#90206u0442 07/25/1990 ~United Press International

(JULY 25) UPI - Jeff Robinson couldn't get the no-hitter, but he did wind up with something most other Detroit starters haven't seen very often - a win.

Robinson, 8-7, came close to pitching the eighth no-hitter in baseball this season, firing blanks at the Baltimore Orioles for seven innings Tuesday before surrendering consecutive home runs leading off the eighth inning in Detroit's 8-2 victory.

Entering the game, a no-hitter would probably have been the furthest thing from anyone on the Detroit staff's mind.

Before Robinson's outing, Detroit starters had had a 5.35 ERA and a 3-6 record in 12 post-All-Star games. For the season, they were 29-42 with a 5.15 ERA - easily the worst in the league. Tiger starters still haven't won back-to-back games since June 6-7.

''I thought it was going to be one of those crazy nights,'' Detroit Manager Sparky Anderson said. ''I thought he might shoot his way through this.''

''I felt like I had a chance at it,'' said Robinson, who walked five, struck out seven and hit one batter. ''When I got to the eighth, I was thinking it would be great if it happens.

''But I knew I'd thrown a lot of pitches (117 entering the eighth) and my main thought at that time was just getting the shutout. I took care of both of them real quick.''

Robinson allowed two hits in eight innings in his previous start and thus went 15 innings in a row without allowing a run. His ERA is still a nasty 5.04, however.

Mike Devereaux blasted his fifth home run, second in two nights, leading off the eighth and Brady Anderson followed four pitches later by belting his first home run of the season - a shot off the facing of the third deck in right.

''That's always the feeling, that you're going to get a hit,'' Devereaux said. ''We always feel they can't shut us down. As a team, you never get the feeling a guy is going to get it (a no-hitter against you). You can't think that way.

Robinson, unhittable for long stretches in his big 1987 season, credited pitching coach Billy Muffett with helping him regain effectiveness and confidence in both his slider and split-finger fastball.

'''Muff' finally got to me,'' he said, ''to where I could throw the breaking ball ahead or behind in the count. That makes my fastball that much better. It feels like I'm throwing harder, too.''

Cecil Fielder upped his major leagues' leading home run total to 32, Larry Sheets hit a three-run home run while Lloyd Moseby and rookie shortstop Travis Fryman each hit solo home runs to back Robinson and end the Orioles' five-game winning streak.

Fielder broke a scoreless tie in the third with a towering fly ball that nearly hit the left field roof. It landed midway up the upper deck at the base of one of the support posts.

Moseby lined his eighth into the upper deck in right with one out in the fourth, giving Detroit a 2-0 lead against John Mitchell, 2-3.

Elsewhere in the American League: Kansas City topped Toronto 5-3 in 13 innings, Chicago blasted Cleveland 8-3, Seattle bounced Minnesota 8-2, Texas downed New York 4-1, Milwaukee edged Boston 6-5 in 10 innings and Oakland tripped California 5-3.

In the National League it was: Atlanta took two from Houston, 9-3 and 9-8 in 10 innings; Pittsburgh 5, Montreal 3; New York 7, Philadelphia 4; St. Louis 9, Chicago 4; San Diego 10, Cincinnati 0 and Los Angeles 9, San Francisco 2.

-- AROUND THE AL --

Royals 5, Blue Jays 3, 13 innings

At Toronto, George Brett's one-out two-run homer in the 13th inning off Duane Ward, 1-6, lifted Kansas City. Steve Farr, 8-4, picked up the victory with three scoreless innings of relief, allowing one hit and no walks while striking out two.

White Sox 8, Indians 3

At Chicago, Adam Peterson, 1-2, earned his first major-league win in his 13th career start, and the White Sox banged out three triples in a 14-hit attack. Don Pall pitched the final four innings for his first save. Rod Nichols, 0-3, lost his second straight start since being recalled from Triple-A ball July 18. The Indians have lost six of their last seven games.

Mariners 8, Twins 2

At Minneapolis, Matt Young, 5-10, pitched a six-hitter over eight innings and Omar Vizquel drove in a career-high five runs to lead Seattle. David West, 5-7, allowed all eight runs in 5 2-3 innings, giving up 10 hits, walking two and striking out two.

Rangers 4, Yankees 1

At Arlington, Texas - Bobby Witt tossed a seven-hitter for his fourth win in July and fifth in a row overall, leading the Rangers. The Rangers third straight win gave them a 48-48 record, the first time they have been at .500 since May 12 when they were 15-15. Witt, 8-8, struck out ten and walked two in in his second complete game. Tim Leary, 4-13, was the loser.

Brewers 6, Red Sox 5, 10 innings

At Milwaukee, Mike Felder singled home Darryl Hamilton from second base with one out in the 10th inning to send Boston to its fourth straight loss. Jerry Reed, 2-2, took the loss. Dan Plesac, 2-2, blew a 5-3 lead in the ninth but picked up the win. The Red Sox have lost 15 of 20 since July 2.

Athletics 5, Angels 3

At Oakland, Calif., Bob Welch became the majors' first 16-game winner in leading the A's. Welch, 16-3, worked six innings, yielding eight hits and two runs. Dennis Eckersley worked the ninth to record his 31st save. The A's belted three homers off Jim Abbott, 6-9, in the sixth. It was fourth time they have hit three homers in an inning this year, tying the AL record set by the 1964 Minnesota Twins.

PHNOM PENH, Cambodia (JULY 25) UPI - Khmer Rouge guerrillas, stung by losses of diplomatic support from the United States and European countries have stepped up military operations against provincial capitals in a bid to win battlefield victories, Defense Minister Gen. Tie Banh said Wednesday.

''The Khmer Rouge are very obstinate in the face of diplomatic defeats,'' Tie Banh said in an interview. ''They are stepping up activities to fight and kill our people.''

He said reduction of diplomatic support for the resistance coalition by European countries and then last week by the United States had made it important for the Khmer Rouge to score battlefield victories and capture provincial capitals.

The only provincial capital seriously threatened was Kompong Speu, 80 miles north of Phnom Penh, where resistance forces penetrated to the town's defense lines before being thrown back, the general said. He said troops fighting for the Vietnamese-installed government have now recaptured the nearby district town of Stoung that had been under resistance control for several months.

The defense minister said he could not release his own army's casualty figures because ''it would affect the morale of our people and our army.''

The Khmer Rouge are widely feared for their harsh communist rule from 1975 to 1979 that resulted in the deaths of more than 1 million Cambodians.

Tie Banh criticized the Association of Southeast Asian Nations (ASEAN) for failing to support U.S. moves to withdraw diplomatic backing for the

anti-government resistance coalition.

Reacting to reports that ASEAN ministers have agreed to continue support for U.N. recognition of the three-party resistance coalition, he said the regional grouping was slowing progress toward peace.

''It is the old road that the ASEAN ministers always travel,'' he said, adding that if the six-nation grouping wanted the coalition to have the U.N seat until formation of a Supreme National Council joining the three rebel groups and the government, then it should support efforts to form the council.

Despite an agreement signed in Tokyo stipulating that the council be formed by the end of July, Tie Banh said the resistance coalition backed by ASEAN had not responded to the Phnom Penh government's efforts to arrange the first council meeting and ASEAN had done nothing to help.

The council, which is to form the basis of an interim government in a proposed peace settlement, has been rejected by the Khmer Rouge, the most powerful group in the three-part rebel coalition.

He said even if China refused to stop aid to the Khmer Rouge, he hoped he could persuade Thailand to stop serving as the conduit for aid to the resistance coalition led by Prince Norodom Sihanouk.

Tie Banh said the Khmer Rouge still was receiving large quantities of military supplies from its foreign allies - principally China - while his own supplies from the Soviet Union were being cut, along with civilian aid.

''However, the cutback does not yet affect our capacity to fight the Khmer Rouge,'' he said. ''We have to be more self-reliant and consider carefully which measures we use.''

''We have to sacrifice everything to stop the Khmer Rouge,'' he said. ''We are prepared to starve rather than let the Khmer Rouge return.''

MORRILTON, AK (JULY 25) UPI - A chartered bus carrying members of a girls softball team to a tournament in Oklahoma collided with a flatbed truck loaded with chickens, killing the bus driver and injuring 14 passengers.

David Ponder King, 34, who was driving the bus Tuesday from the Tampa, Fla., area to Oklahoma City was pronouced dead at the scene, police said. The driver's hometown was not immediately known, authorities said.

The father of one of the players, 43-year-old Richard Sires of Temple

Terrace, Fla., was taken to Baptist Medical Center in Little Rock for surgery on a broken left leg and was in satisfactory condition, spokeswoman Dana Dussing-Berry said Wednesday.

Thirteen others were treated and released at Conway County Hospital in Morrilton, said hospital spokeswoman Susan Tilley.

Some 24 others who were not injured were taken to the Assembly of God Church in Morrilton to spend the night, Tilley said.

The collision occured about 7 p.m. when the bus turned south on State Highway 9 from an exit ramp and was hit by the northbound truck, officials said.

The driver of the truck, Elmer Justice, 52, was not injured, but thousands of chickens ran through the area as the crates they were being shipped in broke apart, police said.

#90206u0475 07/25/1990 ~United Press International

GENEVA (JULY 25) UPI - Eight OPEC oil ministers, including those of quarreling Iraq and Kuwait, convened Wednesday for a crucial full ministerial conference amid high tension in the Persian Gulf.

The eight ministers on OPEC's Market Monitoring Committee were expected to propose that the 13-member Organization of Petroleum Exporting Countries keep a firm lid on production to boost world oil prices.

Iraq and Kuwait, engaged in a tense confrontation, both belong to the Committee, which always meets on the eve of full OPEC sessions to study the market and draft price and output recommendations.

Officials said Iraq and Iran want production to be kept at fairly low levels until the average price for OPEC crude reaches $25 a barrel.

Ministers on arrival in Geneva Tuesday played down the tension in the Gulf and stressed that the mid-summer OPEC conference beginning Thursday would concern itself only with oil production and pricing.

But Iranian delegates hinted they supported Iraq's show of strength against oil overproducers Kuwait and the United Arab Emirates.

''The oil market is now assured more than ever that Kuwait and the United Arab Emirates will not overproduce, following the Iraqi measure,'' an Iranian official said.

Saudi Arabia earlier indicated it will also side with Iraq in its drive to

restore discipline within OPEC in a bid to bolster prices, after a sharp fall in prices hit OPEC members with losses of from $5 billion to $7 billion since March.

Iraqi officials said their delegation will make it clear to both Kuwait and the United Arab Emirates that the Baghdad authorities are prepared to get tough if the two OPEC states do not respect their allocated production quotas.

Analysts said Iraq, with the second-biggest reserves after Saudi Arabia, is rapidly strengthening its influence within OPEC.

Earlier this week Iraq reportedly deployed about 30,000 troops along its border with Kuwait. In what was largely seen as a response to the move, two U.S. warships left port early for a ''short-notice'' joint exercise with the United Arab Emirates in the tense Gulf.

OPEC officials said the actual current average price for OPEC oil shot up from $14.40 a barrel in early July to almost $17 this week following Kuwaiti and United Arab Emirates production cuts.

Iraqi oil minister Issam Abdul Al-Chalabi told reporters he would support a proposal to increase the production quota of the United Arab Emirates from 1.1 million barrels a day to 1.5 million barrels a day.

Officials said the Market Monitoring Committee would recommend at its meeting Wednesday that production quotas of other members remain unchanged resulting in only a slight increase in total OPEC production, from 22.1 to 22.5 million barrels a day. This would mean a cut in actual production, currently over 23.2 million barrels.

The commission is also expected to call for an increase in the OPEC reference price, a target average based on a mix of seven OPEC crudes.

Iraqi and Libyan delegates said they wanted the reference price to go up from the current $18 to $25 a barrel but other officials said the OPEC conference was likely to agree to a new target of $20 a barrel.

JERUSALEM (JULY 25) UPI - An Israeli planning board has approved construction of a controversial $300 million Voice of America radio relay station, but opponents vowed to take their case to the nation's high court.

The 19-6 decision Tuesday by the National Council for Building and Planning overturned a previous decision to wait for the results of a study on the proposed station's possible effect on migratory birds. The decision

must be approved by the Israeli Cabinet before implementation.

The proposed VOA station would be located in the eastern section of the Negev desert, northwest of the Israeli resort town of Eilat and 10 miles south of the Dead Sea.

Four years ago, Israel and the United States signed an agreement to build the station to relay shortwave broadcasts of the VOA and Radio Free Europe-Radio Liberty in more than 30 languages.

Yoav Saguy, board of governors chairman of Israel's Society for the Protection of Nature, said he would ask Israel's High Court of Justice to overturn Tuesday's ruling.

''We are convinced that the law and the spirit of the law were not observed in the latest moves,'' Saguy told The Jerusalem Post. ''It was a hasty and pressured decision. People voted like robots.''

In the United States, the chairman of the Board for International Broadcasting - the agency overseeing the project - said he was pleased by the Israeli decision. Malcolm Forbes Jr. said the station would operate with the most stringent safety and environmental safeguards of any shortwave station in the world.

''When completed, the station will be a powerful voice for democracy, a spur to economic development in the Negev and a milestone in U.S.-Israeli relations,'' Forbes said in a statement.

''We intend that the relay station will be a 'good neighbor' to the nearby agricultural communities. Extensive studies and planning have gone into the design of the station to ensure that it poses no safety, health or environmental risks to humans, plants or animals in the Negev.''

Forbes said shortwave stations have operated around the world for more than 50 years, many in heavily populated areas, with no evidence of any harm from high frequency radio waves.

Israelis living near the site of the proposed station have expressed fears of possible health hazards and damage to the environment as a result of the project.

#90206u0490 07/25/1990 ~United Press International

MANILA, Phillipines (JULY 25) UPI - Communist guerrillas shot and killed a town vice mayor and fired on a helicopter ferrying relief supplies in a remote northern village devastated by the earthquake that killed at least 1,609 people, the military said Wednesday.

Heavy rains Wednesday flooded low-lying areas, forced school closures and disrupted relief operations for thousands of villagers marooned by landslides since the July 16 temblor that measured 7.7 on the open-ended Richter scale.

The military Office of Civil Defense said as of Wednesday the death toll stood at 1,609. It said 1,037 people were listed as missing and feared dead and 3,204 were injured.

The Department of Social Welfare said more than 1 million Filipinos were made homeless by the temblor, the worst since a 1976 quake and tidal wave killed more than 3,000 people.

Appeals were made for relief agencies to send tents and plastic sheets for the refugees huddled outdoors under tropical downpours. The refugees refused to rebuild their homes fearing aftershocks, which had numbered 659 as of Wednesday, officials said.

Maj. Gen. Gerardo Portacio, Philippine Air Force chief, said guerrillas of the communist New People's Army fired Tuesday on an air force helicopter ferrying relief supplies to an isolated village in the mountainous municipality of Kayapa.

Although the helicopter was not hit, Portacio ordered security for workers in Kayapa, a village 120 miles north of Manila and regarded as an NPA stronghold, after guerrillas reportedly seized some relief supplies.

Farther north in Ifugao province in the quake-battered zone, the military said guerrillas attacked an army detachment in the town of Hungduan on Tuesday, sparking a gun battle in which Vice Mayor Julian Huminding was killed.

''This shows the NPAS (New People's Army troops) are not honoring a cease-fire they unilaterally called,'' said armed forces spokesman Col. Juanito Rimando.

The 19,000-member NPA, which has been waging a 21-year rebellion, announced Saturday it was calling a cease-fire and was joining relief missions.

President Corozan Aquino said she welcomed the reports of the rebel truce but added she would like the rebels to undertake a more meaningful step toward peace.

On Wednesday, 17 senators endorsed a resolution calling on Aquino to declare a cease-fire by all contending forces, including communist rebels, Moslem separatists and right-wing dissidents and ''facilitate a national

agenda for reconstruction.''

Meanwhile, the House of Representatives approved a resolution late Tuesday urging Aquino to suspend payments of the nations $26 billion foreign debt and channel the money to rebuilding ruined areas.

The resolution said ''a frank and sincere appeal at this hour of extreme need should elicit utmost understanding and sympathy from creditors and friends of the Philippines.''

Aquino has said any suspension of payments should be negotiated with creditors and could not be done unilaterally because it would damage the country's credibility.

#90206u0534 07/25/1990 ~United Press International

CAPE TOWN, SOUTH AFRICA (JULY 25) UPI - Anti-apartheid cleric Allan Boesak, president of the World Alliance of Reformed Churches, officially resigned his SouthAfrican church posts Wednesday and said he will divorce his wife of 21 years to continue an affair with a television producer.

Boesak had tearfully said he was resigning his local ministry nearly three weeks ago and hinted he might leave his other posts following reports of an extra-marital affair, but his devoted Bellville congregation gave him three weeks' leave to reconsider.

In a statement Wednesday, the mixed-race cleric said he decided to resign immediately as moderator of South Africa's 680,000-member Dutch Reformed Mission Church and as minister in the Belleville Congregation.

The spiritual leader of some 150 reformed churches worldwide since 1982 said he was asked by the World Alliance of Reformed Churches to remain president until it ''can be clarified'' at the next meeting of the alliance in August.

Boesak was the only president of the 70-million member alliance to be elected to two consecutive terms in its 115-year history.

The 45-year-old Boesak also said in the statement released by his Cape Town lawyer, Essa Moosa, that after discussions with his wife, Dorothy, ''it was decided that it would be in the best interest of all of us that Dorothy and I part.''

Concerning his lover, Elna Botha, a white 30-year-old television producer with the South African Broadcasting Corp., Boesak said, ''The breakdown of my marriage was a fact long before I met Elna.

''What exists between us is a personal matter and nothing which I can be ashamed of. I have therefore no valid reason to discontinue such contact '' Boesak said.

Botha, the niece of former Cabinet minister Stoffel Botha, said in a separate statement issued simultaneously by her attorney in the capital of Pretoria that she also had no intention of terminating her contact with Boesak.

She said the breakdown of her own marriage to radio and television personality Colin Fluxman had ''been on the cards since the middle of 1989'' and was in no way linked to the affair with Boesak.

Breaking his silence for the first time since speaking to his congregation on July 8, Boesak announced his decision two days after returning from a trip to Europe that prompted local newspaper speculation he had met with Botha in Switzerland.

A co-minister at Boesak's Bellville South congregation, Johan Retief, told the Daily Mail on Wednesday if Boesak indeed had an extra-marital affair, he would have to ''give it up and say he has sinned'' before resuming his ministerial duties.

Boesak, who has four children by his wife, said he would continue as director of the Foundation for Peace and Justice, which was founded to aid victims of apartheid.

Boesak said the foundation ''is not directly connected to the positions I held in the Church.''

One of the South Africa's most vocal opponents of apartheid, Boesak was first elected president of the World Alliance of Reformed Churches at an Ottawa meeting in August 1982, when at his urging the body, representing 76 countries, declared apartheid a heresy.

#90206u0666 07/25/1990 ~United Press International

BEIJING (JULY 25) UPI - The highest-level European envoy to visit China since last year's crackdown on dissent met Wednesday with Premier Li Peng and later said the Chinese had abandoned their rage over a plan to resettle thousands of Hong Kong Chinese in Britain.

British Foreign Office Minister of State Francis Maude said he also repeated to Li the concerns of Prime Minister Margaret Thatcher and the European Community about human rights in China.

Maude said he told Li the West had responded favorably to China's recent

release of political prisoners and the lifting of martial law in Beijing and Tibet and urged the Chinese to make further ''positive moves'' to allay Western concerns.

Maude was the highest-ranking European official to visit China officially since Beijing's brutal crushing of peaceful pro-democracy protests across China in June 1989.

His trip to China, authorized by the European Community, signals an easing of Western antipathy toward Beijing's hard-line leadership and a move to repair strained relations. It followed by a week the visit of Canada's undersecretary for external affairs.

Maude said he sensed a sharp change in his hosts' attitude toward the pending British Nationality Act, which would grant right of abode in Britain to 50,000 Hong Kong Chinese families in advance of Beijing's scheduled 1997 takeover of the British colony.

''There was not a trace of anger in the meeting from the Chinese side at all,'' Maude said after the morning discussions at the Diaoyutai state guesthouse. ''He (Li) certainly didn't go into the Chinese concerns about the Nationality Act at all.''

China had bitterly denounced legislation proposing the act in April, saying it violated the 1984 Sino-British joint declaration outlining Hong Kong transfer back to Chinese sovereignty.

The legislation, designed to ease growing concerns in Hong Kong about the colony's future, passed both houses of Parliament Monday and will become law with the queen's signature.

Maude did not say whether the toned-down Chinese position toward the Nationality Act indicated Beijing had given up its opposition to the right-of-abode plan.

Li told Maude Beijing considers his visit an important indication of Britain's good intentions toward China.

''We have given a high assessment to recent friendly gestures taken by Mrs. Thatcher,'' Li said in greeting Maude.

For the past year, Maude has been the British official in charge of Hong Kong affairs, but London stunned the jittery colony Monday by announcing that Maude was being promoted into a job with in the Treasury Department, with no Hong Kong duties.

Many people in Hong Kong denounced the sudden job change as insensitive, since it came after Maude had arrived in Hong Kong and on the eve of his

departure for Beijing, where his chief task was to resume discussions of Hong Kong's transfer to China.

Li even joked with Maude about his promotion, saying, ''I don't know whether I should extend my congratulations or not. ... In China, a finance minister or deputy finance minister is often a target to be attacked.''

Maude nevertheless called his meeting with the Chinese premier ''very open and productive'' and said Li ''reaffirmed his anxiety that we should work closely together ... for the future stability and prosperity of Hong Kong.''

#90206u0768 07/25/1990 ~United Press International

BLOOMINGTON, MN (JULY 25) UPI - Minnesota North Stars President Howard Baldwin is resigning because of a dispute with majority owner Norman Green over control of the team.

The Star Tribune reported that the club will hold a news conference Wednesday to announce Baldwin's departure.

The newspaper also reported that a source says the Stars have acquired left wing Brian Propp, a former Boston and Philadelphia standout, and that the club is trying to make a deal with Montreal to bring back veteran center Bobby Smith.

Green told the newspaper Tuesday night that Baldwin is leaving because Baldwin wants to run the club.

''Since I have a lot of money invested ($16.1 million), I want to run it '' Green said. ''And besides, I can have a lot of fun running it.''

Green said he plans to serve as his own team president.

Baldwin confirmed Green's explanation.

''That's pretty accurate,'' Baldwin said. ''You can only have one person run something. We came here with good intentions. The most important thing is for this franchise to do well. It is much more important than Norm Green, Howard Baldwin and (fellow minority owner) Morris Belzberg.

''Unfortunately, one person (Green) has 51 percent (ownership), and the other (Baldwin) has 24.5. so that's the way it is.''

Baldwin said he planned to retain his 24.5 percent ownership in the team but that he won't own share until the team debt is retired.

The exodus of Baldwin is the latest chapter in the Stars' ownership story. He and Belzberg had planned to buy the club from George and Gordon Gund and run it themselves. But when they could not raise enough money to buy the team, they brought Green into the group. The Gunds are getting an expansion franchise in the San Francisco Bay area.

#90206u0771 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - New orders for durable goods plunged by an unexpected 3.2 percent in June to $124.7 billion on a sharp decline in aircraft and military hardware, the Commerce Department said Wednesday.

Most private analysts had expected a modest increase for June, following a 4.2 percent gain in May, rather than the $4.1 billion drop in orders for expensive products manufactured to last three or more years.

''About half of the decline for June was for defense capital goods,'' the Commerce Department said. ''Transportation had the largest decrease, down $1.7 billion, or 4.8 percent. Most of the decline was in aircraft and parts.''

Excluding defense items, new orders for durable goods were down by 1.7 percent in June. Excluding transportation, new orders were off by 2.6 percent for the month.

The monthly report, compiled by the department's Census Bureau, said shipments of durable goods edged up by 0.5 percent in June, while unfilled orders slipped by 0.5 percent.

Orders for defense capital goods plummeted by 20.7 percent in June, while orders for non-defense capital goods gained a slight 0.3 percent.

The primary metals industries suffered a 4.9 percent drop in orders, while orders slipped by 3.2 percent for machinery and by 3.9 percent for electrical machinery, the Commerce Department said.

The 4.8 percent decline in orders for transportation items was especially surprising because of large orders for civilian aircraft recently placed with the Boeing Co. by China, Japan and Korea.

But it is not unusual for the durable goods report to show wide swings on a month-to-month basis. For example, May's 4.2 percent advance offset a 4.1 percent plunge in April.

''Despite their sharp month-to-month and quarter-to-quarter volatility, non-defense durable orders have achieved growth of less than 1.5 per year since the end of 1988,'' said a market letter issued by Fuji Securities in

Chicago.

#90206u0863 07/25/1990 ~United Press International

TOKYO (JULY 25) UPI - Kawasaki Steel Corp. said Wednesday it plans to invest at least $1.5 billion to renovate production facilities in conjunction with U.S. steelmaker Armco Inc. and increase its stake in their joint venture.

The project calls for improvement of production facilities at Armco Steel Co., established in Middletown, Ohio, in May last year by Kawasaki and Armco, based in Parsippany, N.J.

Kawasaki, Japan's third-largest integrated steelmaker, said the renovation program started with the initial budget of $300 million. A new investment plan will be decided by Armco Steel's board at a meeting to be held next month, the company said.

"We plan to complete the program by 1994 and we estimate total investment to exceed $1.5 billion," a Kawasaki spokesman said. "The program is designed to improve the quality of products."

Armco Steel's total production capacity now stands at three million tons a year, the spokesman said. The renovation is aimed at bolstering supplies of high-quality sheet steel that would be used by U.S. and Japanese automakers.

Under the renovation plans, new continuous galvanizing and continuous annealing lines will be installed at the Middletown plant, replacing old ones currently in use, Kawasaki said. Kawasaki, which now owns a 40 percent stake in Armco Steel, plans to raise its interest to 50 percent next spring.

#90206u0877 07/25/1990 ~United Press International

(JULY 25) UPI - Prices on the Tokyo Stock Exchange closed essentially unchanged Wednesday in slow trading amid uncertainty over the future direction of interest rates and currency fluctuations.

The closely watched Nikkei Average of 225 selected issues, which fell 192.33 points Tuesday, eased a negligible 1.19 points to 31,701.27.

But TOPIX, the broader-based Tokyo Stock Exchange Price Index of all listed major shares, rose 2.72 points to 2,307.31.

Trading remained slow as an estimated 350 million shares changed hands, compared with 356 million shares Tuesday.

Winning issues outpaced losing issues 541 to 388, while 194 issues remained unchanged.

Elsewhere in Asia, stock prices rebounded in moderately active trading on the Hong Kong Stock Exchange following its sharp decline in the previous session.

Trading activity was concentrated in secondary stocks.

The key Hang Seng Index, which plummented 64.02 points Tuesday, rebounded 24.67 points to 3520.54.

In Singapore, stock prices closed higher in fairly active trading on the Singapore Stock Exchange amid some bargain hunting.

The blue-chip Straits Times Industrial Index, which fell 11.32 points Tuesday, rebounded 7.18 points to 1,561.24. The narrower All Singapore Index rose 2.52 points to 444.47.

An estimated 82.4 million shares chnaged hands, compared with 50.3 million shares Tuesday.

In Australia, a strong rally in the oil patch sent stock prices higher in moderate trading on the Sydney Sharemarket.

The key All Ordinaries Index, which fell 11.4 points Tuesday, rebounded 4.5 points to 1,591.6.

An estimated 69.7 million shares changed hands, compared with 65.5 million shares Tuesday.

#90206u0951 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - A Senate subcommittee investigating the role of a former aide to President Bush in the sale of financial institutions in Texas and Oklahoma voted to authorize subpoenas to compel the aide, and others, to testify.

Sen. Howard Metzenbaum, D-Ohio, chairman of the Antitrust, Monopolies, and Business Rights Subcommittee, said Tuesday the aide, Robert Thompson, has indicated he would not cooperate with the investigation.

But other members of the panel said Thompson, who had worked on Bush's presidential campaign in 1980 and served as a legislative assistant to Bush during part of his first term as vice president, would testify.

They said Thompson would cooperate if given assurances that his personal financial records and other confidential information would not be leaked to the media before they are introduced into the public record during the

hearing.

"My understanding is that Mr. Thompson is willing to come but he feels some members of your staff have agreed to leak information only to the New York Times," Sen. Orrin Hatch, R-Utah, told Metzenbaum.

"It is not appropriate to make disclosures of financial information to anyone in advance of a Senate hearing. If they are introduced, then they are public matters," Sen. Arlen Specter, R-Pa., said. "I think there has been a serious breach."

Metzenbaum agreed Tuesday to assure Thompson that his private records will not be released to the media if they are not made part of the public record. He also said he intends to personally request Thompson's testimony and if unsuccessful, would execute the subpoena.

Thompson's attorney, Stanley Brand, has requested the Senate Ethics Committee investigate the conduct of Metzenbaum and his staff. Brand said the staff improperly provided the New York Times with private financial records.

Metzenbaum called the matter a "smokescreen," and said his committee did not improperly release confidential information. "I have no apologies, nor is there any need," he said. "I know a smokescrene and a defensive move when I see one."

William Corr, the subcommittee's staff director, said Thompson had not been given any assurances of confidentiality. He added that all of the information the subcommittee received was obtained through "government sources".

The New York Times reported Tuesday that Thompson helped purchase a failing Oklahoma bank from the federal government, while at the same time investing $100,000 with a federal official working on the deal.

Thompson reportedly paid the funds to Paul Heafy, chief of liquidation for the Oklahoma office of the Federal Deposit Insurance Corp., in January 1989. At the same time, Heafy resigned from the FDIC.

The investment was financed by Harvest Life Insurance, a company controlled by James Fail, an Arizona businessman who purchased the $100 million bank for $526,000. Fail was allowed to purchase the United Oklahoma Bank from the FDIC in January 1989 even though he did not meet federal standards for bank purchases.

Thompson had previously helped Fail in the 1988 purchase of 15 failed thrifts, which were grouped together to become Bluebonnet Savings Bank in Dallas, the Times reported.

Metzenbaum said Thompson not only served as a lobbyist for Fail but also claimed in documents to be entitled to a two percent stake in the Bluebonnet acquisition. "We believe this interest to be worth millions of dollars," Metzenbaum said.

The subcommittee also authorized the issuance of a subpoena for Fail, but said it is unlikely the subpoena will be executed because Fail's attorneys said the executive will cooperate.

Thompson's $100,000 investment was made to National Loan Investors, a partnership controlled by Heafy, and was not prohibited by federal conflict of interest laws, the newspaper said.

The $100,000 deposited by Thompson, plus another $50,000 from Fail went into Heafy's National Loan Investors, a partnership that buys distressed loans from federal regulators, such as the FDIC.

Heafy got approval from agency lawyers to enter the loan buying business, with the stipulation that he not become involved with an office he once headed in Oklahoma City, the Times said.

WASHINGTON (JULY 25) UPI - Sales of existing homes rebounded nationwide by 1.2 percent in June as interest rates edged down slightly, the National Association of Realtors said Wednesday.

The annual sales rate of existing homes stood at 3.34 million last month, vs. 3.30 million homes in May and representing a 0.3 percent increase over June 1989 levels, according to a monthly survey conducted by the realtors.

The median, or midpoint, price for existing homes also increased by 2 percent, to $97,500 from May, and by 4.3 percent from a year earlier, according to the 800,000-member industry group.

The realtors attributed much of the rebound to a drop in the average rate for a 30-year, fixed-rate mortgages, which slipped to 10.15 percent in June.

''People have been watching to see which way rates are headed. Now, they're out scouting the inventory,'' said Norman Flynn, president of the association. ''In general, it appears the market is building up steam.''

But Flynn also noted that the higher prices are causing problems for many first-time home buyers. ''June's median price is not indicative of a lot of entry-level home sales,'' he said.

By region, sales jumped by 9.1 percent in the Midwest and advanced by 1.8 percent in the West, but they fell by 5.8 percent in the economically battered Northeast and declined by 0.8 percent in the South.

''Unfortunately, many people in the Northeast are of the mindset that it is a bad time to buy. That is bunk,'' Flynn said. ''Sellers are more than willing to negotiate. Buyers should be jumping into the market.''

The realtors group also said the median price of existing homes increased in the Midwest to $76,200, decreased in the West to $135,400, increased in Northeast to $148,500 and advanced in the South to $87,500.

All the figures in the private survey were adjusted for seasonal factors.

In addition, the association estimated there were 2.64 million existing single-family homes available for sale at the end of June, which translates into a 9 1/2-month supply at June's resale rate.

#90206u1022 07/25/1990 ~United Press International

LAS VEGAS, Nev. (JULY 25) UPI - Darrell Luery, senior vice president and chief operating officer of Bally's hotel-casino on the Las Vegas Strip, thinks belt-tightening and a switch to customers from the upper middle class has put Nevada's casinos on the road to fatter profits.

''For June, and this is the pattern, our operating income at Bally's-Las Vegas was three times higher than the same period a year ago. At Bally's-Reno, our operating income was up $1 million in June compared to June of last year. The trend holds over the last six months,'' he said Tuesday.

Bally's Manufacturing Corp., the Chicago-based parent of the gambling properties and one of the world's largest manufacturers of gambling machines, is expected to release corporate earnings later this week.

The company's Las Vegas hotel-casino on the Strip has 2,800 rooms. The Reno property has 2,000 room. During the last six months, layoffs have occurred at both resorts, including 600 employees laid off in Las Vegas.

''We have a clearer focus and more emphasis on a new segment of player (gambler): it is the middle-class and upper-middle-class player,'' said Luery. ''Before, we were heavily into the convention business. We are reducing the conventions.

''We won't eliminate it; we need convention business. But we are more closely evaluating which conventions we book and during what times of the

week and the year.''

Luery disputed a July 11 report issued by Merrill Lynch securities analysts Richard Byrne and David Waill that was front-page news Tuesday in a Las Vegas newspaper.

The analysts said that Bally Manufacturing faced a $100.5 million cash shortfall this year and that Bally's two Nevada hotel-cainos faced a $30.3 million cash-flow deficit this year with an increased shortfall of $64.3 million by 1991.

The analysts' report ''certainly is inaccurate,'' said Luery. ''The fact is, both our Las Vegas and Reno properties have improved significantly. Operating results have improved during the first six months of this year. In both cases, the second quarter is particularly strong. We attribute the increase to greater cost efficiencies.''

He said the Strip openings of two new properties - the 3,000-room Mirage last November and the 4,000-room Excalibur last month - have had little impact on Bally's business.

''They are into a different market segment. We don't go after the high-end super-high-roller, and we don't go after the low-end or grind business,'' said Luery. ''We have really felt no great impact.''

The Mirage, operated by Golden Nugget's Steve Wynn, is considered a property for the high-roller gambling segment, while the Excalibur, a property built by Circus Circus Enterprises having a ''Camelot'' motif, is designed to attract family business.

#90206u1025 07/25/1990 ~United Press International

JAKARTA, INDONESIA (JULY 25) UPI - Southeast Asian foreign ministers said Wednesday Washington's about-face on Cambodia could set back a solution to the 11-year-old conflict and warned Secretary of State James Baker to be ready for a grilling on the abrupt policy shift.

The delegates, wrapping up the two-day Association of Southeast Asian Nations ministerial meeting, said they were anxious to hear Baker's explanations for withdrawing diplomatic recognition of the Cambodia guerrilla coalition.

''Maybe he can convince me,'' said Indonesian Foreign Minister Ali Alatas. ''Right now I have doubts.''

Alatas, the host of the ASEAN sessions, said the talks with the region's partners take place ''at a critical juncture of international

developments.''

In a joint communique issued by dignitaries from Indonesia, Malaysia, Singapore, Brunei, Thailand and the Philippines, all six proposed the U.N. seat currently held by the two non-communist factions and the Khmer Rouge be expanded to include the Hanoi-backed government in Phnom Penh.

They urged Prince Norodom Sihanouk, leader of the three-party resistance, and Cambodian Prime Minister Hun Sen to form a Supreme National Council to take the place of the coalition at the United Nations before the General Assembly convenes in September.

The combination would represent ''all shades of political opinion,'' the statement said.

Vietnam and Hun Sen have always rejected any power-sharing plan including the Khmer Rouge.

''Representation of Cambodia at the U.N. is a delicate political question '' the statement said, adding a change like the one Baker outlined ''would set back the search for a comprehensive political solution.''

Under pressure from members of Congress seeking an end to U.S. support of the Khmer Rouge, Baker announced the shift last week in a move to isolate the Khmer Rouge, which is blamed for the deaths of 1 million Cambodians during three years in power before their ouster by the Vietnamese in 1979.

Baker, who also said the United States was opening a new dialogue on Cambodia with Vietnam, arrives here Thursday on the first leg of a marathon trip through Asia for the annual dialogue conference with ASEAN officials.

Also attending are ASEAN's other dialogue partners from Japan, Canada, the European Community, Australia and New Zealand.

''If it were simply a matter of excluding the Khmer Rouge, we would have had a solution long ago,'' Alatas said. ''We're looking forward to hearing directly from Baker on what considerations went into the U.S. shift in its position.''

ASEAN, with the support of the United States until last week, has insisted for eight years that the military might garnered by the Khmer Rouge made it essential it be accepted as a partner in any settlement.

Backed and armed by China, the Khmer Rouge is the most powerful of the resistance parties trying to topple the Hanoi-backed government.

Alatas said relations between ASEAN nations and the United States were not impaired. ''We may honestly differ in our views but that doesn't mean

there is suddenly a breach of trust,'' he said.

ASEAN's unified stand on Cambodia ''sets the basic political directions for our efforts over the coming months,'' said Wong Kan Seng, Singapore Minister for Foreign Affairs. ''It signals friends and adversaries alike that it is premature to count Asean out of the equation.''

The communique also called for the resumption of the Paris International Conference on Cambodia although the first held last year ended without any progress and three regional sessions held in Jakarta also concluded without success.

Each of the ministers hailed ASEAN's unity on Cambodia, including Thai Foreign Minister Siddhi Savetsila who initially welcomed the U.S. move when it was announced.

''Our common stand and fresh approach to the Cambodian problem'' clearly reflects realism and unwavering solidarity, Siddhi said.

ASEAN predictions that the change in the U.S. stance could encourage the Khmer Rouge to step up efforts to regain power by force coincided with events in Cambodia, where Khmer Rouge guerrillas increased their battlefield activities against provincial capitals.

The ASEAN communique also lashed the United States for refusing to accept the forced repatriation of unwanted Vietnamese boat people and the countries threatened to push vessels off their shores as the refugees tried to land.

#90206u1044 07/25/1990 ~United Press International

CAIRO, EGYPT (JULY 25) UPI - Iraq Wednesday appeared to reject Egyptian attempts to mediate a dispute between Baghdad and Persuab Gulf oil producers and angrily denounced U.S.-United Arab Emirates naval exercises in the gulf as ''an imperalist plot.''

The Iraqi statement came after Western diplomats and U.S. officials confirmed Iraq is conducting military maneuvers along its border with Kuwait, apparently as a result over a dispute over oil production. Iraq has accused Kuwait and the UAE of over-producing and forcing down oil prices.

State-run Baghdad Radio, monitored in Cairo, quoted an Iraqi government spokesman as saying Baghdad would resolve on its own its differences with Kuwait and the UAE.

The radio quoted the spokesman as saying Egyptian President Hosni Mubarak's

mediation efforts Tuesday, when he met with Iraqi President Saddam Hussein in Baghdad and Kuwait's Emir Sheikh Jaber al Ahmad al Sabah in Kuwait City dealt with Iraqi-Egyptian relations and were not related to the gulf crisis.

''President Mubarak's talks with President Saddam Hussein were within the framework of bilateral relations,'' the spokesman said.

An official Iraqi statement also denounced U.S.-UAE naval exercises in the gulf as ''an imperalist plot against the Arab nation.''

The State Department said Tuesday it was watching the situation closely and that six U.S. Navy ships were in the gulf as part of a military exercise with the UAE. U.S. diplomats in the region said Washington was keen to offer support to its allies in the gulf and ensure the flow of oil to the West.

The Iraqi statement accused the UAE of ''treason'' by collaborating with the United States and of trying to find a pretext to keep a U.S. naval presence in the gulf. Iraq in the past has called on the United States to withdraw its warships from the strategic waterway.

It reiterated Iraqi accusations Kuwait was implementing ''a U.S.-Zionist plot aimed at keeping oil prices low and Iraq weak.''

The Iraqi statements were expected to embarrass Mubarak, whose chief aide Osama El Baz was quoted Wednesday as expressing optimism the dispute could be resolved and that Mubarak would continue his mediation efforts.

Baghdad Radio also quoted an Iraqi government spokesman as rejecting a Kuwaiti offer to allow an Arab committee to mediate on a nagging border dispute between Iraq and Kuwait.

Iraqi Foreign Minister Tareq Aziz had said Tuesday Iraq should solve its own dispute with Kuwait and the UAE. He also said Kuwait should negotiate the border dispute directly with Iraq and remove from office people who have plotted against Baghdad. This appeared to be a reference to Kuwait's foreign minister, who is a brother of Kuwaiti Emir Sheikh Jaber al Ahmad al Sabah.

Western diplomats in Baghdad, who earlier reported Iraqi military maneuvers along Kuwait's coast and the movement of Kuwaiti Soviet-made missiles to the emirate's border with Iraq, said it was unlikely Iraq would accept any compromise at this stage.

The diplomats said Iraq wanted to exert maximum pressure on gulf producers during the mid-year OPEC ministerial conference currently taking place in Geneva.

Unlike OPEC overproducers Kuwait and the UAE, who have supported moves to increase crude production and lower world prices, Iraq has been pushing for cut-backs and an increase in oil prices to $25 a barrel.

Diplomats on Tuesday said the Iraqi military maneuvers on the Kuwaiti border appeared to be saber-rattling to worry the Kuwaitis.

The dispute erupted last week when oil-dependent Iraq, trying to revive an economy ravaged by nearly eight years of war with Iran, accused Kuwait and the United Arab Emirates of dumping oil on world markets and forcing crude prices down. Baghdad also accused Kuwait of stealing some $2.4 billion of Iraqi oil from a disputed border well.

Tuesday, the Washington Post reported Iraq, which in the 1970s laid claim to all of Kuwait and was involved in military clashes with the emirate, had massed 30,000 troops on the Iraq-Kuwait border.

Kuwait on Monday was reported to have placed its tiny armed forces on alert, and moved Soviet-made missiles to the strategic islands of Warba and Bubiyan.

It was not clear if Kuwait had called on its Gulf Cooperation Council allies to activate a defense pact on its behalf. The GCC includes Saudi Arabia, Bahrain, the UAE, Qatar, Oman and Kuwait.

State Department spokeswoman Margaret Tutwiler said in Washington there had been a buildup ''on both sides'' of the Iraq-Kuwait border but could not give specific numbers. She added the U.S. Navy has six ships in the Persian Gulf, four frigates, one destroyer and the flagship of the U.S. Middle East force.

#90206u1051 07/25/1990 ~United Press International

CALGARY (JULY 25) UPI - The number of properties and companies for sale in the Canadian oil industry continued to escalate during the second quarter, a survey showed.

In its quarterly survey released Tuesday, Sayer Securities Ltd. said $3.5 billion in oil and gas assets were publicly put up for sale in the second quarter, an increase of $1.2 billion from the end of the first quarter.

Sayer Securities analyst Lauchlan Currie said there's a whole movement towards rationalization in the industry that involves not just selling but also buying of properties.

''There are some companies who are selling and buying,'' Currie said. ''Everyone is taking a step back to look at their property portfolio.''

The survey indicated the volume of merger and acquisition transactions in the industry totaled about $943.5 million in the second quarter, a 44 percent increase over the $654.5 million in the first quarter.

Also, the number of transactions rose to 100 in the second quarter compared with 90 in the first quarter.

The largest deal was Gulf Canada Resources Ltd.'s purchase of Imperial Oil Ltd.'s 22.8 percent interest in Interhome Energy Inc. for $492.4 million.

Currie said the oil industry tends to be ''rather herdlike'' and that rationalization has grown steadily over the past three or four years.

''For every seller, there are two buyers,'' Currie said, adding the market now is saturated.

There were 9 transactions over $4.25 million in size totaling $816 million and 91 under $4.25 million which accounted for another $127.5 million.

Transactions under $4.25 million ''are increasing in number and dollar amount as the industry's move to rationalization gathers momentum,'' the survey said.

''Despite the substantial increase in the amount of properties for sale, acquisition prices as measured by dollars per oil equivalent barrel and cash flow multiples have not changed significantly,'' the survey found.

Sayer Securities said a recent analysis of oil industry acquisitions indicated that reserves are being purchased at a discounted cash flow rate before tax, of approximately 20 percent to 25 percent.

#90206u1064 07/25/1990 ~United Press International

BANGKOK, Thailand (JULY 25) UPI - Vietnam agreed to accept the Visa credit card forpayments in Ho Chi Minh City - what used to be known as Saigon - and will expand the service to Hanoi and major cities, the official Vietnamese news agency reported Wednesday.

''Credit cards named 'Visa International' have been in use in Vietnam

since July 17 under an agreement between the Vietnam Foreign Trade Bank and the French Bank of External Commerce,'' said the Vietnam News Agency, in a text made available in Bangkok.

It said the holders can use the card for payments in U.S. dollar equivalentsat major hotels, restaurants, shops and tourist centers in Ho Chi Minh City.

However, the agency said there currently are only 12 places in the country which accept Visa cards.

''Steps will be taken to expand their use to Hanoi and other major cities, the news agency said.

#90206u1069 07/25/1990 ~United Press International

LONDON (JULY 25) UPI - The Rt. Rev George Carey, son of a hospital porter who endorses the idea of ordaining women into the priesthood, was named Wednesday the 103rd archbishop of Canterbury and head of the 70-million-strong Anglican church.

Officials at Lambeth Palace, the traditional residence of the leader of the Church of England, said Carey would assume the post next spring to succeed Dr. Robert Runcie, who is to retire Jan. 31, 1991.

Carey, 54, has been bishop of Bath and Wells for three years and was ranked an outsider for the job because of his relative inexperience compared with other contenders.

A 16-person special commission of lay and clergy members reccomended Carey and an alternative candidate to Prime Minister Margaret Thatcher, who endorsed Carey and passed on his name to Queen Elizabeth II for formal nomination.

Carey is from the evangelical wing of the church and was apparently selected because he is regarded as charismatic with a popular touch.

e was born in East London and is the son of a hospital porter. He left school early but worked his way through university to get a doctorate and also served in the Royal Air Force.

The new church leader told a press conference he has yet to digest the news and planned to go away on holiday to ponder the issues he will have to confront.

''I would want there to be a rich and creative dialogue between the church and state,'' he said. ''This is not to say that the church takes up this

issue of party politics. Far from it. It is to say that socal and political issues are there at the very heart of the Christian good news.

''You have got to be a spiritual archbishop who is concerned about the world, and the implications this has for life today,'' he said, citing South African Anglican leader Desmond Tutu as an example of such a churchman.

Carey is regarded as an apolitical figure, unlike Runcie, who frequently objected to Thatcher's trimming of social welfare programs.

Carey told reporters he supported ordination of women into the priesthood, a nettlesome issue that had divided the church and is unlikely to be swiftly resolved.

He said he resented the bitterness caused by the dispute over Salman Rushdie's book ''The Satanic Verses,'' which many Moslems consider blasphemous. He called on moderate leaders of all faiths to resist such feelings.

Carey also called for the early release of Terry Waite, the Anglican Church envoy taken hostage in Lebanon. He condemned the Tuesday landmine attack by the Irish Republican Army that left three police officers and one nun dead in Nothern Ireland.

''I deplore what has happened and I think that these are evil people who do these atrocious things,'' he said.

The favorite for the post had been the Rt. Hon. David Shephard, the bishop of Liverpool, who described Carey as a gifted and able man and called on all Christians to support him and his family with prayers.

Labor Party member Frank Field said the choice was ''inspired.''

''I did not think that the church would have the courage to do it,'' he said. ''I did not think they would actually do that because his primary role will be to look at this world through God's eyes. That will make him a very difficult customer to deal with.''

-30- 3493

#90206u1080 07/25/1990 ~United Press International

(JULY 25) UPI - Two Nigerian naval vessels steamed toward the embattled Liberian capital of Monrovia Tuesday to possibly evacuate Nigerian nationals.

Liberian guerrillas of the National Patriotic Front have advanced into the heart of Monrovia, and remaining government forces now only hold areas

surrounding the executive mansion, where President Samuel Doe is holed up and vowing to fight to the finish.

In Lagos, Nigeria, Nigerian officials said one warship and one landing vessel, the NNS Ambe - which is capable of carrying 1,000 armed troops - had departed Tuesday and were scheduled to arrive off Monrovia by Wednesday.

The Nigerian officials were unable to confirm if an evacuation was mandatory, but the mission was ordered in response to a growing public outcry about the safety of Nigerians residing in Liberia.

Nigerian President Ibrahim Babangida has maintained a close relationship with Doe, assisting the Liberian leader with money and arms.

A U.S. naval task force also is off the Liberian coast.

Doe has spurned Washington's offer of asylum and is reportedly unable to now leave his mansion because members of his Israeli-trained presidential guard are unwilling to let him go if they do not get safe passage.

At the Vatican, Pope John Paul II made an appeal for peace before 7,000 pilgrims and tourists attending his weekly general audience.

John Paul noted that on Thursday the strife-ridden West African republic marks its national independence day.

''But, alas, there certainly cannot be celebrations on this occasion,'' he said. ''As you know a bitter civil war broke out at the end on December last year, bringing mourning and destruction to the country.

''Let us ask God to illumine the minds of those who hold the fate of the country in their hands so that ... they may make the force of dialogue prevail over that of arms,'' he said.

The pope has not visited Liberia during his six African tours.

Liberian guerrilla commander Charles Taylor, a former civil servant who lived in the United States after being accused of corruption by Doe, launched the rebellion six months ago. He orchestrated a full-scale assault on Monrovia last Thursday after laying siege to the capital for more than two weeks.

Taylor has promised to hold free elections within six months if he takes over the nation, which is located on the southwestern coast of West Africa and founded in 1822 by former U.S. slaves.

Residents Tuesday reported a rebel vessel shrouded in the early morning

darkness steamed toward Doe's seafront mansion and fired at least six rounds at the heavily fortified command post.

They said flashes could be seen from the sea as the ship fired at the five-story Israeli-designed building, where Doe is holed up with about 500 crack troops from his Krahn tribe after refusing all offers of evacuation.

Soldiers based on the grounds of the mansion returned the fire and the booming of cannons echoed across the sleeping city.

The ship retreated and witnesses reported seeing one shell from the mansion fall harmlessly into the ocean only a few hundred yards offshore.

Residents said Tuesday that Doe's disintegrating army, which has been outflanked and swept back into a small pocket of the city, overnight staged reprisal killings.

At least nine male bodies, most stripped of their clothing, were found on a beach not far from the embassy district. Other bodies were scattered nearby, and witnesses told a photographer that soldiers had brought the victims to the site and killed them.

Civilians were harassed frequently by nervous soldiers patrolling the city.

#90206u1089 07/25/1990 ~United Press International

NAIROBI, Kenya (JULY 25) UPI - Kenya Wednesday freed three prominent lawyers who had been accused of subversion and jailed nearly three weeks ago amid a government crackdown on suspected political opponents seeking a multi-party democracy.

Their release followed talks Tuesday between President Daniel arap Moi and a renowned human rights lawyer, Paul Muite, who went into hiding at the time of his colleagues' arrest.

John Khaminwa, Gitobu Imanyara and Mohamed Ibrahim were picked up by security police on July 4 and 5 and told they were being held as suspected parties to a plot to overthrow the government, Khaminwa said on his release.

''Of course that was not true,'' he told journalists.

Khaminwa, his colleagues and his family have maintained he has no political ties beyond the fact he has acted for those unpopular with the Kenyan government.

He said he was been interrogated while in detention and had been held

incommunicado in solitary confinement but was not ill-treated in any way.

The three men released were detained as part of a government crackdown on its suspected political opponents, including two former Cabinet ministers who in April began calling for an end to the constitutional one-party state in Kenya.

Kenya has had only one legal party, the Kenya African National Union, since 1982 when Moi changed the constitution after a coup attempt. KANU has, however, been effectively the only political party since 1969.

It was not immediately clear if the two ministers, Kenneth Matiba and Charles Rubia, also were to be released Wednesday.

Khaminwa was detained when he went to a police station to inquire about the arrest of Matiba, his client.

In all, six people were formally detained, the sixth being Raila Odinga, son of a former Kenyan vice president, Oginga Odinga. But local news reports said as many as 20 people might have been detained.

The detentions brought international condemnation, especially from the United States, where Sen. Edward Kennedy, D-Mass., last week sponsored a bill in Congress calling for a cutoff of military and economic aid to Kenya. The International Bar Association, the largest lawyers' organization in the world, canceled plans to hold a major conference in Nairobi in September.

Kenya said the detentions were justified and numerous politicians pointed to five days of rioting that broke out July 7 as evidence of a plot to overthrow the government.

The rioting began after a banned meeting to call for multi-party democracy turned violent. Matiba and Rubia had applied for a license to hold the meeting before their detention. The application was turned down, but hundreds of people showed up anyway.

This Sunday, President Moi called on fugitive lawyer Paul Muite to come out of hiding and apologize for his part in instigating the riots. Muite replied that he could not apologize since he had nothing to do with it.

On Tuesday he visited the president, was assured of his personal safety and emerged saying that Moi had accepted his explanations.

The government made no immediate statement on the reasons for the releases but Khaminwa said he believed he had been set free as a result of the Muite-Moi meeting.

NEW YORK (JULY 25) UPI - Latest metal market prices as quoted Wednesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 72.00-73.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 132.75 c-lb.

Lead, common, U.S. primary producers 50.00-52.00 c-lb.; U.S. non-primary (secondary) producers 54.00-58.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50-$4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $117.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $481.00-$485.00; dealer-approx., $465.00-$470.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $102.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 288.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 87.00-87.75 c-lb.

#90206u1097 07/25/1990 ~United Press International
LIBREVILLE, GABON (JULY 25) UPI - Police arrested 30 people following the discovery of the body of a policewoman who was apparently decapitated by

machete in a human sacrifice that climaxed three days of voodoo-style rites at a witch-doctor's home, it was reported Wednesday.

The state-run Gabonese newspaper L'Union said Police Sgt. Flavienne Nzoua was on maternity leave at the suburban home of Joseph Nzoghe, a celebrated leader of the secret society, when the rites were staged, said the newspaper.

The newspaper said Nzoua was a follower of the Bwiti sect and had participated with Nzoghe in numerous ritual ceremonies, including an induction ceremony for six new members last Thursday, according to the report.

Nzoua's son, Alain, found his mother's headless corpse sprawled in a bedroom during the final stages of the rite by the sorcerer after participants had absorbed large quantities of a hallucinogenic plant, known as L'Ibiga, and including the ritual sacrifice of three goat kids, according to the report.

A machete was used to sever the head, found not far from her torso. Security sources theorized the slaying was a ritual sacrifice.

Two of the three goat kids were ritually slaughtered by cutting their throats, while the third was discovered still tethered to a bed. Nzoua apparently paid for the third kid whose life may have been spared in return for her own, said the security sources.

About 30 people, including the leader of the occult sect, were arrested.

The incident recalled a case of cannibalism in which another Bwiti sorcerer, Mba Ntem, presided over the devouring of another of his followers, Ondo Ndong, in the southern Libreville suburb of D'Owendo.

Mba Ntem is now on death row at the central prison of Libreville after being sentenced to death in January.

Bwiti rites are said to be practiced by several senior officials of President Omar Bongo's government and high civl servants.

BANGKOK, Thailand (JULY 25) UPI - A bomb went off inside the Burmese Embassy in Bangkok early Wednesday morning, breaking windows but causing no casualities, officials said.

''At about 0420 hours in the early morning of July 25, an explosion occured in the premises of the Embassy of the Union of Myanmar (Burma) in

Bangkok,'' said a press release by the Burmese Embassy in Bangkok.

''It is still under investigating,'' said Tin Tun, an official at the Burmese Embassy.

Lt. Col Vanich Surapolchai, the police chief, said the blast caused no casualities but broke six windows.

He said embassy's officials informed police about the conflict between the Burmese government and ethnic minorities and student dissidents.

''We are still in the dark. It's not an anti-personnel bomb. The criminal did not intend to hurt anybody,'' Vanich said.

Vanich said police, including some from Special Branch, were put on alert at the embassy.

The student dissidents have frequently demonstrated in front of the Burmese Embassy but without violence.

WASHINGTON (JULY 25) UPI - President Bush went down to the wire with his selection of a Supreme Court nominee, at one point keeping the last two candidates waiting in separate White House offices for his final decision.

In part to deny special-interest groups the chance to ''build a public kind of stew for this nomination to be dumped into,'' Bush decided Monday afternoon to name a nominee by the end of the day.

According to an account provided Tuesday by administration officials, the search was down to two candidates. The only problem: Even Bush was not certain 90 minutes ahead of time which would be his final choice.

Officials said Bush was driven to act in part by concern that a prolonged search would only give abortion groups and other interests more time to politicize the process. Convinced early on that he probably would fill at least one high court vacancy in his first term, Bush's advisers had a list of contenders ready in short order.

From the time he learned Friday night of the surprise resignation of liberal William Brennan, Bush was intent to choose a successor as soon as possible.

Within 48 hours, the list had been reduced to three federal appeals court judges: Laurence Silberman of the District of Columbia, David Souter of New Hampshire and Edith Jones of Houston.

By the time Bush concluded a meeting Sunday evening with Vice President Dan Quayle, Attorney General Dick Thornburgh, White House chief of staff John Sununu and White House legal counsel C. Boyden Gray, Silberman was out.

Souter and Jones were summoned to Washington, where Gray on Monday carried out the dirty work of asking about any potential personal embarrassments, a lesson drawn from the case of Douglas Ginsburg, whose nomination was withdrawn in 1987 after a disclosure of prior drug use.

As Bush bid farewell to visiting Ecuadoran President Rodrigo Borja Cevallos at 1:30 p.m., Souter waited upstairs in the family quarters of the White House for his first and only interview with the man who would name him to the Supreme Court.

Bush met with him for 45 minutes, assiduously avoiding any questions touching on political issues, including several suggested by his advisers. He then returned to the West Wing for a similar session with Jones.

Abortion, the official said, never entered into Bush's deliberations. ''I don't think he did allow or would allow it to become a test in his own mind or reality,'' the official said.

Within a half-hour, Bush called White House press secretary Marlin Fitzwater into the Oval Office to announce a decision was at hand. When Fitzwater suggested a 4:30 p.m. televised appearance in the White House Press Room, Bush asked for more time.

The announcement was set for 5 p.m. The main question, however, remained unanswered even in Bush's mind: Which of the two finalists would be at his side?

That word came some 45 minutes later. As plans were set into motion for a 5 p.m. news conference, Bush brought Souter to his private study off the Oval Office to offer him the job. Jones, who had come close to being the second woman nominated to the Supreme Court, was seen slipping out a side door of the White House.

In the glare of television lights, the reserved Souter was somewhat dazed by his instant fame. He had, after all, arrived in Washington the night before uncertain of what to expect and had bunked with a young Justice Department lawyer he had never met to remain out of public view.

Neither Bush nor his aides could point to a single quality that swung the final selection. Bush had compiled three pages of pluses and minuses on a yellow legal pad, then penned some 2 1/2 pages of personal observations on Souter's qualifications - brilliance, dedication and judicial temperament among them - before making a decision.

An official said Bush ''was impressed'' by Souter's demeanor as humble, quiet and studious and his record as a strict constructionist on constitutional issues who would ''devote his life'' to the court.

With only three months on the federal bench and a lack of past political advocacy, Souter also had the advantage of being anything but a flashpoint for controversy: in short, an embodiment of the caution and prudence that Bush has displayed on repeated occasions in 18 months in office.

#90206u1124 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - The U.S. Postal Service is bracing for a possible strike by workers at United Parcel Service with contingency plans to handle an expected 20-fold increase in its package volume.

UPS's contracts with the Teamsters union expire July 31 and, although there has been no direct threat of a strike, the Postal Service is preparing for the worst.

Mike West, a Postal Service spokesman, said UPS delivers 10 million packages a day by truck across the nation, 20 times more packages than the Postal Service's daily volume.

''If the United Parcel Service goes on strike, there is a fear that this avalanche would land on the Postal Service,'' said West, adding, ''We've got a responsibility to serve the mailing needs of 240 million Americans.''

''What we would do if there is a surge in parcel volume ... or if a strike is called, is to implement contingency plans,'' West said.

''There are three areas of business that we do that we feel would be impacted if there is a UPS strike,'' West said.

He said UPS handles about the same amount of overnight express mail as does the Postal Service.

''Between the Postal Service and Federal Express and other overnight couriers, we feel the business that would come to the Postal Service can be handled. We feel we can absorb that,'' West said.

''The second level is two-day priority mail and ... we have about twice the UPS volume in that category,'' West said. ''We feel we can absorb most of the additional service. We expect there would be some tradeup. People would be willing to spend a little bit more money to get their packages delivered.''

He said if a person attempts to mail more than five pieces of priority mail parcels at one time from a smaller post office, ''We'd ask them to go to a nearby larger facility ... so we don't have that mountain of packages at the smaller post offices.''

The third category is the one that has the Postal Service the most concerned, West said.

''This is where UPS has 20 times our volume. It is a concern. ... If 10 million packages a day hit us, we would not be able to absorb that.''

West said the Postal Service's contingency plan would require mailers of more than five parcels to use ''a reservation system.''

Under the reservation system, West said, mailers would be asked to call a toll-free number that would help them locate a destination facility.

''For example,'' West said, ''someone here in Washington wants to send a dozen packages to Chicago. They would call the toll-free number and make a reservation to enter those packages into the mail stream and they'd be given a date and a timeframe when they can put those packages in the post office in Chicago. The Postal Service would then take them from the Chicago post office to its destination in the Chicago area.''

Mailers would be required to arrange their own city-to-city handling of their packages, West said.

#90206u1126 07/25/1990 ~United Press International

CLARKTON, N.C. (JULY 25) UPI - North Carolina agriculture officials, predicting a banner tobacco market this year, said Wednesday sales may surpass the $1 billion mark.

If the $1 billion sales mark is achieved, this will represent an increase of $70 million from 1989, Agriculture Commissioner Jim Graham said.

Buyers for tobacco companies were bidding near 1989's first day prices on their initial trips through warehouses piled high with bundles of high-quality leaf, state officials said.

Markets in North Carolina's huge Eastern Belt stretching across most of the state's tobacco country opened Wednesday.

Preliminary figures showed 4,313,348 pounds sold for $6,567,385 - an average price of $152.26 per hundredweight. On opening day last year, 5 million pounds averaged $156.87.

''These early results are very encouraging,'' Graham said. ''The buyers were impressed with the leaf's high quality.''

Graham noted ''hard working farmers have been under the gun lately from a variety of anti-tobacco groups, including some in this state.

''However, I'm not promoting tobacco use,'' he said. ''I'm also not in the health business. North Carolina cannot turn its back on tobacco.''

Farmers in some parts of North Carolina have sweated out hot, dry weather that wilted many other crops and stunted some tobacco.

''I'm kind of uplifted,'' said Roosevelt Baldwin, a Bladen County farmer. ''It looks a little better than it did last year.''

South Carolina markets opened Tuesday along with markets on the North Carolina-South Carolina border.

#90206u1127 07/25/1990 ~United Press International

BOSTON (JULY 25) UPI - Massachusetts' highest court Wednesday rejected arguments that a tobacco company is liable for conspiracy when a convenience store illegally sells cigarettes to minors.

The 6-1 decision upheld the argument that federal law prevailed in most of the case but the Supreme Judicial Court declined to dismiss two state law claims brought against Philip Morris Inc. by Theresa Kyte and Sean Cann.

The pair sued the tobacco company in 1987, claiming it was in part responsible for their addiction to cigarettes, which they purchased illegally in a Store 24 outlet.

In a majority decision written by Justice Herbert Wilkins, the SJC ruled the tobacco company had no direct links with the stores that could be used as a basis for a conspiracy charge.

Not only were there no Massachusetts complaints filed against Philip Morris for selling tobacco to minors, the store purchased cigarettes through a wholesaler and the manufacturer had no control over who the products were sold to.

''The claim of liability for civil conspiracy fails ... because Philip Morris was unaware of any substantial role it played in Store 24's allegedly illegal sales,'' Wilkins wrote.

The majority also rejected a claim that the manufacturer was liable for negligent entrustment because there was no record that it sold cigarettes

directly to teens.

''The possibility that a third party will violate the law and unlawfully deliver a product to a person who should not have it does not by itself make the manufacturer of that product liable for any resulting harm,'' Wilkins wrote.

But the justices rejected the manufacturer's request for a summary judgment on two counts - alleging breach of implied warranty, specifically in defects that made Marlboro and Parliament cigarettes carcinogenic and addictive.

The majority also rejected a summary judgment claim that the manufacturer violated Massachusetts consumer protection law.

The majority suggested the teenagers would amend their complaints to deal with these two sections only.

In a separate opinion, Chief Justice Paul Liacos rejected the majority decision to dismiss the conspiracy and negligent entrustment complaints, declaring because the plaintiffs ''raised genuine issues of material fact.''

#90206u1135 07/25/1990 ~United Press International

MOSCOW (JULY 25) UPI - A member of the reactionary Pamyat society failed to show up Wednesday on the second day of his trial on anti-Semitism charges and the judge ordered that he brought by force to the courtroom.

Konstantin Smirnov-Ostashvili, a leader of the Pamyat group that blames Russia's ills on Jews and Freemasons, disrupted the start of the legal proceeding Monday by demanding his lawyer's dismissal, alleging that at least two-thirds of all Moscow's attorneys are Jewish.

The defendant did not appear Wednesday and no explanation was given - a far cry from the past treatment of dissidents, who were always held in custody before their trials and hauled to hearings.

The three-judge Moscow court recessed the proceeedings in Smirnov-Ostashvili's case until Thursday and ruled that a policeman be sent to fetch the defendant for the next court session.

''The court decided that the defendant will have to be brought by force,'' said the independent Interfax news service.

Smirnov-Ostashvili's supporters took advantage of the one-day postponement to hold forth in front of the courthouse, staging what Interfax called ''a

rally to back his anti-Semitic views.''

The Pamyat activists filled the courtroom Tuesday, railing against Soviet and foreign reporters covering the trial and demanding that they be removed.

Smirnov-Ostashvili faces charges of inciting racism and anti-Semitism, stemming from the disruption of a meeting of writers on Jan. 18.

Witnesses of the incident said Smirnov-Ostashvili led a band into the House of Writers and demanded all Jewish writers leave Russia, sparking a chair-hurling ruckus in which several people received minor injuries.

A photograph in the Ogonek weekly magazine showed Smirnov-Ostashvili holding a megaphone and reportedly demanding that Jewish writers go into a separate room for a document check.

Moscow Radio said the case is the first time anybody has been charged with inciting ethnic strife and violating Article 74 of the Soviet criminal code.

The hearing opened two days after the Communist Party newspaper Pravda urged that laws be enforced against rising anti-Semitism in the Soviet Union to ease Jews' fears of pogroms and to stem a burgeoning emigration.

#90206u1196 07/25/1990 ~United Press International

CHICAGO (JULY 25) UPI - Grain and soybean prices seesawed on the Chicago Board of Trade Wednesday with soybeans turning lower, corn and wheat mixed and oats fractionally higher at midmorning.

Corn was off 1/2 to up 1 3/4, beans were off 1/4 to off 3, wheat was unchanged to off 1 3/4 and oats were up 1/4 to up 3/4 cent.

A bullish June U.S. soyoil stocks figure from the Census Bureau and expectations of a long-term rise in the domestic demand for vegetable oil - spurred by recent fast-food restaurant changes - led soyoil and beans higher for a time in fairly active trade.

But traders saw no other news to sustain the rally, sending prices on a downward spiral. They again cited continuing mild weather and soybean crop development as bearish factors.

Beans were seen as having a number of supporting factors - a bullish attitude on domestic vegetable oil consumption, news of a bean purchase by Taiwan and ideas that Mexico may soon be back in the market.

The bean rally and small-lot professional buying in December and commercial demand in September had put corn higher earlier in the session.

Professional and commission house buying put wheat higher briefly.

The midmorning prices:

Corn Sep 2.61 off 1/2, Dec 2.57 unch, Mar 2.64 1/2 up 1/4, May 2.69 3/4 up 1/2.

Soybeans Aug 5.83 1/2 off 3/4, Sep 5.88 1/2 off 1, Nov 5.99 1/4 off 1/4, Jan 6.10 1/4 off 3/4.

Wheat Sep 3.02 off 1 1/2, Dec 3.18 off 1 3/4, Mar 3.26 3/4 off 1 1/2, May 3.25 off 1.

Oats Sep 1.29 up 3/4, Dec 1.40 1/4 up 1/2, Mar 1.51 up 1/4, May 1.57 1/4 up 1/2.

HONG KONG (JULY 25) UPI - Thousands of Hong Kong residents Wednesday flooded the Immigration Department to beat the naturalization deadline, hoping to be awarded British citizenship before the colony's return to Chinese rule in 1997.

''I don't know if I will qualify but of course I am going to try,'' said Thomas Chiu, an electrician who joined the line at about 7:30 a.m. and was still far from the building by early afternoon.

''I don't want to leave Hong Kong but you can't trust the (mainland) Chinese,'' Chiu said.

Wednesday was the last day for Hong Kong residents to register for naturalization in time to apply for a British plan to grant 50,000 Hong Kong people and their families British passports and the right to live in Britain.

About 3.25 million Hong Kong residents already hold British nationality documents that do not give the holder the right to live in Britain.

Hong Kong's return to Chinese communist rule has sparked a confidence crisis among the colony's 5.8 million residents, triggering tens of thousands of Hong Kong Chinese to emigrate ahead of the 1997 transition.

The latest British plan, set to be formally enacted in London Thursday, was a bid to stem the ''brain drain'' by granting key Hong Kong people British passports without requiring them to leave the colony.

The British Nationality Act passed both houses of Parliament Monday and will become law with the queen's signature.

Fear of repression and economic downturn in Hong Kong heightened after China's savage crackdown on mainland pro-democracy demonstrators in June 1989.

Wednesday, a sea of people crowded the lobby of the Immigration Department and long lines of applicants snaked for hundreds of yards outside the building.

Police set up barriers blocks away from the building in the traditional red light district and used rope to cordon off lanes for applicants.

''I don't know how many people are here, maybe 2,000,'' said a police officer. ''There is a lot of confusion but we can keep things under control.''

About 160 immigration officers worked to handle the last-minute rush and officials said the department would process anyone who joined the line before midnight. The Immigration Department remained open until midnight Tuesday and officials said 2,150 people applied for naturalization during the day - about double the number of applicants for all of 1989.

''When I left the office at 3 a.m. there were about 20 people sleeping outside, already waiting for us to open the doors at 8:45,'' said C.B. Chan, assistant director of immigration.

British passports will be distributed to 42,000 households by June or July

1991, Hong Kong officials said. Passports for the remaining 8,000 families would be held until nearer 1997.

In Beijing, the Hong Kong issue dominated the highest-level talks between Premier Li Peng and a European official during which China abandoned its opposition to resettling thousands of Hong Kong Chinese in Britain.

MINNEAPOLIS (JULY 25) UPI - The trial of three fired Northwest Airlines pilots accused of flying while under the influence of alcohol opened Wednesday with attorneys asking potential jurors about chemical abuse and connections to the aviation industry.

Selection of 12 jurors and two alternates was expected to continue through the day. The trial was then expected to be recessed until Tuesday.

In individual questioning of the 44 potential jurors, U.S. District Judge James Rosenbaum asked if they were trained as pilots or were employed in the aviation industry or if they belonged to an organization involved with chemical abuse. The potential jurors also were questioned about their personal and professional lives.

Nearly all of the prospects indicated they had heard of the case and Rosenbaum warned them that they should only consider evidence presented in court.

The defendants - pilot Norman Prouse, 51, Conyers, Ga., co-pilot Robert Kirchner, 36, Highland Ranch, Colo., and flight engineer Joseph Balzer, 34 Antioch, Tenn. - were in court with their attorneys.

Prior to the questioning of the potential jurors, U.S. District Attorney Elizabeth De La Vega and defense attorneys met in chambers for more than 30 minutes with the judge.

On Tuesday, Rosenbaum refused to throw out the charges against the three men and also refused to suppress the men's statements or blood-alcohol tests or to allow them to have separate trials.

The three men were the cockpit crew of a March 8 Northwest flight from Fargo, N.D., to Minneapolis. After safely landing the Boeing 727 with 91 passengers on board, the three men were arrested on felony charges of flying under the influence. Authorities allege the men had been drinking at a Moorhead bar the night before they took off.

Prouse tested at a 0.10 percent blood alcohol level while Kirchner was 0.06 and Balzer 0.04. They took off on the 6 a.m. flight less than eight

hours after they allegedly left the bar.

#90206u1272 07/25/1990 ~United Press International
BELGRADE, YUGOSLAVIA (JULY 25) UPI - The government released a nationwide poll Wednesday that showed 79 percent of Yugoslavs supported the free-market policies of reformist Prime Minister Ante Markovic.

The poll of 4,320 people commissioned by the government was conducted by research organizations from six universities around the country between May 26 and June 26. A summary was released at a news conference by Information Secretary Darko Marin.

The findings confirmed popular support for Markovic, a communist reformer who took office 16 months ago with the goal of implementing Western-style political and economic reforms after 45 years of Communist Party rule.

Markovic has calmed inflation, reduced the foreign debt and introduced measures to create a Western-style economic system and legalize political parties. He also promised to hold before 1991 the first free parliamentary elections since the communist takeover at the end of World War II.

Meanwhile, Foreign Trade Minister Franc Horvat announced that Yugoslavia's trade deficit grew to $1.3 billion in the first six months of this year, fueled by a major spurt in Western imports.

To fight inflation, Markovic liberalized imports to boost the availability of foreign goods and force domestic firms to lower prices.

Horvat said the deficit would have been larger had exports not risen by twice their projected amount to $8.7 billion, a 33 percent increase. He also said that during July imports leveled off, creating a small surplus for the month.

The poll found that 79 percent of Yugoslavia's 23 million people would support Markovic if the country was to hold a vote of confidence in his

government, while only 5 percent would cast negative tallies. Sixteen percent were undecided.

Asked about Markovic's reform program, 66 percent said it was ''the right solution'' and only 7 percent expressed disapproval.

''Hardly any government in the world can boast of such support,'' Marin said.

Markovic's success in handling the economy and the lack of any national leader of similar stature have led many people to regard him as the only politician capable of guiding Yugoslavia through its current political troubles.

Marin said the survey would help policy-makers and also provide Markovic with crucial ammunition in his fight against resistance to his program from recently elected nationalist governments in the republics of Croatia and Slovenia and an entrenched communist regime in Serbia.

All three are hindering Markovic's proposals to increase the federal government's taxation and administrative powers. The survey said 58 percent of the people believed the government should be granted more fiscal authority.

The survey also found that 42 percent of Yugoslavs fear the future, while 33 percent have mixed feelings and 14 percent are optimistic. Fifty-two percent said the feuds between the republics and tensions with the central government require more urgent action than any other problems facing the nation.

Croatia and Slovenia, fearing dominance by the majority Serbs, are demanding a new constitution making the country a confederation of independent states. Serbia and the four other republics are proposing a federation.

The poll found 24 percent support the federation plan, while 21 percent favor a confederation. Only 7 percent said the country should split up.

BEIJING (JULY 25) UPI - A lively and talkative President Yang Shangkun told neighbors he has recovered from surgery for appendicitis and said he would live to be 90, state-run television reported Wednesday.

''Now I have recovered but I still need some rest,'' the influential 83-year-old retired army general told visitors in his Beijing home. ''Now I can again carry out my normal duties.

''There is no question that I can live to be 90,'' Yang said with a laugh.

Yang was hospitalized June 25 for surgery to correct what officials called acute appendicitis and is said to have been recovering routinely from the operation.

The nationwide television broadcast was the first indication that Yang had gone home from the hospital and it offered the most compelling evidence of his recovery.

The hard-line communist's illness had sparked fierce speculation in Beijing about the effect his incapacitation would have on Premier Li Peng, another hard-liner supported by Yang and his brother Yang Baibing, secretary general of the Communist Party's powerful Central Military Commission.

Yang and Li played leading roles in the government's decision to use force last year to suppress the massive pro-democracy demonstrations in Beijing and many other cities.

China's Central Television News broadcast videotape of Yang's visit with several elderly neighbors, security guards and neighborhood officials, saying only that the visit had taken place ''recently.''

Dressed in shirtsleeves, Yang appeared energetic and joked about his normally fit and soldierly physique, saying he attributed any loss in weight only to what doctors removed during surgery.

Yang also indicated that he had been ill during a grueling five-nation tour to Latin America in June but had been able to mask his discomfort.

After a woman pointed out that he had looked healthy in television appearances during the Latin American visit, he said, ''I was trying to

look that way.''

#90206u1305 07/25/1990 ~United Press International
WASHINGTON (JULY 25) UPI - Outdated financial regulations have contributed to a measurable decline in the U.S. banking industry's competitiveness in the global financial arena, Treasury Secretary Nicholas Brady said Wednesday.

Brady said the U.S. banking industry has outgrown its historical regulatory structure, resulting in overcapacity, layers of regulation, concentration in riskier business endeavors and uneven product diversification.

''While ours is still the most innovative financial industry in the world, we are looking over our shoulder more and finding our competitors closing the gap,'' Brady told the Senate Banking Committee.

The committee is considering a variety of measures to strengthen the U.S. financial industry given the increasing power of foreign banks. Brady said the competitiveness issue has been added to a comprehensive study of deposit insurance now being prepared by the Treasury Department.

Brady offered few details of the Treasury panel but assured lawmakers that any proposals to change or modernize the nation's banking system would not be made if they would increase risks to taxpayers.

''Simply put, the task is to enhance competitiveness while decreasing taxpayer exposure,'' he said.

Foreign banks have increased their share of assets in the U.S. market, Brady said, while U.S. banks' share in the international banking market has fallen to 14.1 percent last year from 27.2 percent in 1983.

During the same period, foreign banks have increased their share of U.S. commercial and industrial loans to 28.5 percent from 21.4 percent, Brady said.

''By many measures, we are losing market share and competitive standing, both at home and abroad,'' Brady said.

Japanese banks, in particular, have increased their penetration of the United States in recent years. Brady said Japanese banks now account for 11.8 percent of all U.S. banking assets, out of the 20.6 percent held by all foreign banks.

The anticipated sweeping economic liberalization among nations of the

European Community also has forced a reexamination of U.S. banking regulations, Brady said.

''It will be more difficult for U.S. firms to compete on foreign turf when they cannot provide the same services at home, because the knowledge and expertise developed at home will be a crucial foundation to gaining market share abroad,'' Brady said.

Brady suggested the Glass-Steagall Act, the law enacted over 50 years ago thatprohibits U.S. commercial banks from participating in investment banking activities, should be reconsidered.

''The fact is that Glass-Steagall is no longer the rigid wall between banking and securities that it once was,'' he said without saying the law should be abolished.

#90206u1311 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - The man on the street may still see Energy Department laboratories as ''bomb factories,'' but they already are shifting their focus to energy technology and pollution cleanup research, Energy Secretary James Watkins said Wednesday.

''I think it's very unfortunate that there are many in the private sector who feel that these are bomb factories,'' Watkins told senators looking into the future of the department's complex of research labs.

With his department's budget facing the same threat of cuts as other federal agencies, Watkins said the labs under his control are valuable research facilities that can help give the nation an economic boost.

Already, he said, about half of the ''overall programs'' of the labs are in non-nuclear areas - particularly the development of energy technology.

''We are already on a very steep slope of transitioning these laboratories to even more non-nuclear weapons programs and activities,'' Watkins told a Senate Energy and Natural Resources subcommittee.

The Energy Department facilities include Los Alamos National Laboratory and Sandia National Laboratories in New Mexico, Lawrence Berkeley Laboratory and Lawrence Livermore National Laboratory in California, Oak Ridge National Laboratory in Tennessee and the Pacific Northwest Laboratory in Washington.

Committee Chairman Sen. Bennett Johnston, D-La., noting most of the labs were born with the Manhattan atomic bomb project in the 1940s, said, ''The labs are on the brink of change because the world has changed.''

With the Cold War drifting into history, he said, ''The past emphasis on weapons research and development is no longer appropriate. As there is less need for defense capability at the labs, there will be less defense dollars to support them.''

The labs employ more than 16,000 researchers, Watkins told the senators, and can help develop technologies that can be applied to civilian concerns to help boost American competitiveness.

The labs have a future in promoting ''research and development on environmental restoration and waste management,'' Watkins said.

''Our nation is facing a crisis in this area - not only within the DOE defense production complex, but in thousands of landfills and other sites where wastes have been dumped or abandoned,'' he said.

The energy secretary said, ''I believe that over the next 20 to 30 years the field of environmental restoration and waste management will be one of the major growth areas for scientific and technical employment in the United States.''

Watkins, a retired admiral, said work on a national energy strategy should contribute to the Energy Department's shift away from military activities and toward research ''spurring the development of the energy technologies that we will need in the next century.''

#90206u1336 07/25/1990 ~United Press International

NEW YORK (JULY 25) UPI - The Australian Ballet has opened its first U.S. tour in 14 years with a young company of admirably trained dancers who bring freshness and excitement to anything they dance.

The 60-member company's weeklong engagement at the Metropolitan Opera house comes like a breath of fresh air after a two-week visit of Moscow's Bolshoi Ballet to the New York State Theater next door. The Bolshoi has some fine dancers but it left an overall impression of a second-rate company rutted in a dramatic repertory that has lost its power to stimulate audiences.

The Melbourne-based company, founded in 1962, has not brought anything new to perform in New York, Washington, D.C., and Costa Mesa, Calif., but its program is new to American audiences who are curious to see what Maina Gielgud has wrought in little more than seven years tenure as artistic director.

The company opened at the Met with a double bill of ''Suite en Blanc,'' a technically demanding work created by Serge Lifar for the Paris Opera Ballet in 1943, and its own 1986 production of ''Giselle'' based on Marius Petipa's reworking of the 1843 Jean Coralli ballet.

It also is performing ''Spartacus'' by Hungarian choreographer Laszlo Seregi, in the company's repertory since 1978 and not to be confused with Yuri Grigorovich's Bolshoi ''Spartacus''.

Gielgud, niece of British actor Sir John Gielgud, has done wonders with a company that was demoralized by financial woes, a long dancers' strike and many defections when she took over. Firmly rooted in classicism established by directors Peggy Van Praagh and Sir Robert Helpmann in the 1960s, the company is on the brink of world-class greatness.

There are no finer extant characterizations of Giselle and Count Albrecht than those danced by Lisa Pavane and Greg Horsman, both coached in these roles by the Bolshoi's great Galina Ulanova. They are perfectly cast in this most romantic of ballets.

Pavane's crisp footwork and lilting grace, combined with a youthful freedom rooted in solid technique, make her an adorable as the shy peasant charmer who dies of a broken heart. Her arabesques, in particular, are flawless.

As her remorseful traducer, Horsman moves with aristocratic elegance that is both virile and sensitive. His extended pirouettes and other balletic feats mark him as one of the world's finest young male dancers with a strong promise of greatness when he matures.

Also outstanding is Sian Stokes as Myrtha, queen of a ghostly band of

betrayed brides known as Wilis. Stokes is the most dazzling of the company's ballerinas, a big personality and a marvelously assertive dancer who brings out the evil in Myrtha's character that is usually glossed over.

Stokes also makes her mark in ''Suite en Blanc'' in a breathtaking pas de trois with Steven Heathcote and Roy Wilson. This all black-and-white production is smart in every detail and wittily danced by such bright talents as Anna de Cardi, Fiona Tonkin, Elizabeth Toohey, David McAllister and Lisa Bolte.

Tonkin's technique is breathtaking in her ensemble with four men and Bolte is particularly effective in a meltingly danced solo titled ''Variation de la Flute.'' Tonkin's pert ''Variation de la Cigarette'' and McAllister's mazurka solo rich in turning leaps bring down the house.

Designer Peter Farmer's peasant village for the first act of ''Giselle'' is banal and tacky but his second act moonlit wetlands setting for Gisell's grave is as atmospheric as it should be. The chilling effect of the wilis emerging from the mist like zombies in wedding veils is one of the Australians' stunning achievements.

#90206u1343 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - The Pentagon announced plans Wednesday to sell Japan two E-2C early-warning reconnaissance aircraft, 75 ship-to-ship Harpoon missiles and an AEGIS anti-air naval defense system for a total of $825 million.

Japan already has 11 E-2C early-warning aircraft, and the Pentagon said the additional two will ''improve the security of a friendly country which has been and continues to be an important force for political stability and economic progress in Asia.''

The two E-2Cs, built by Grumman Aircraft Corp., Bethpage, N.Y., and related services will cost an estimated $170 million.

In addition, the Pentagon plans to sell Japan one AEGIS anti-aircraft radar system for ships that automatically detects and tracks targets and locks the ship's weapons in on them.

Built by a host of contractors, including General Electric Co., Moorestown N.J., and Raytheon Co., Wayland, Mass., the cost is estimated at $530 million.

A third proposal calls for the sale of 75 Harpoon ship-to-ship missiles, three training missiles, and spare parts for an estimated $125 million. The missiles are built by McDonnell-Douglas Missile Systems Co., St.

Charles, Mo.

#90206u1349 07/25/1990 ~United Press International

LONDON (JULY 25) UPI - A $29 trillion hoard of Ukrainian gold is not lying in the vaults of the Bank of England despite claims that a Cossack leader desposited the fortune 270 years ago, officials said Wednesday.

In Kiev, members of the Ukrainian Parliament that declared sovereignty on July 16 say London must hand back the money they claim was deposited when the Eastern European region was independent from Moscow.

They said the barrel of gold, which was owned by Col. Pavel. Polubotok, had appreciated over the centuries to a current worth of $29 trillion.

A Bank of England spokesman said workers had searched the vaults and scoured their oldest leather-bound ledgers but found no trace of the gold.

''We have looked but we have not found anything,'' he said. ''And we are not in the habit of losing gold.''

The official said the reputable financial house, on which most central banks around the world are modeled, had never had a claim that went back so far in time, with the sum remaining untouched.

Even if the bank located the money, which would be worth $546,000 for every Ukrainian, it could not hand over anything until the rights of Kiev's claim were established, he said.

Ukraine's ambassador to the United Nations reissued the demand on Tuesday, and said the British government had documents to prove it.

The Foreign Office dismissed the charge, saying it endorsed the findings of the Bank of England.

''We do not recognize the Ukraine as an independent state,'' he said, explaining that Kiev would have to exercize control over a clearly defined territory and be independent in external relations before London could deal with it on a diplomatic basis.

The Ukrainian republic has its own ambassador at the United Nations but Western governments have never placed much importance to the representation because the status was a result of demands Josef Stalin. The late dictator wanted the Soviet Union to have greater voting power at the United Nations.

#90206u1351 07/25/1990 ~United Press International

ALLENDALE, NJ (JULY 25) UPI - The early reviews of the film ''Presumed Innocent'' are in, and the one thing people can not stop talking about are the houses.

Allendale residents who saw the film during an early screening say they spent so much time looking at their homes on the silver screen they forgot to concentrate on the plot.

A number of scenes were shot in the tony suburb about 20 miles northwest of Manhattan.

Harrison Ford plays the role of a prosecuting attorney and the main suspect in the murder of a beautiful colleague. The film is an adaptation of the book by Chicago attorney Scott Turow.

Patricia Cellary saw Ford and actress Bonnie Bedelia, who plays his wife, act out scenes in her bedroom, back deck and kitchen.

''The first thing you see in the movie is my our house,'' she said. ''I was shocked. Then they go right into the kitchen.

''There I am looking at my impatients from last year and they looked great '' she said. ''I thought, 'I have to go out and fertilize.' I just couldn't concentrate on the movie. It is so strange to see your house on a big screen.''

Cellary said she and her family moved out for the four weeks the small army of technicians and actors took over her home, she said.

Carol O'Neill's house does not play as big a part in the film, but she is just as star-struck.

''You can see my house when they open the door and Harrison Ford gets arrested,'' she said. ''We couldn't concentrate on watching the movie. We're all going to see it again.''

Jessica Parshley, 10, who picked up $173 as an extra in the film, got to meet Jesse Bradford, who plays Ford's son and used the Parshley home for his dressing room.

''He would film scenes and then come skateboard in the driveway,'' said Cathy Parshley, Jessica's mother. ''Now my daughter wants to be an actress. It came across as very glamorous.''

-30- 2093

#90206u1358 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - The House sustained President Bush's veto of the family and medical leave bill Wednesday, but supporters of the measure plan to pursue the fight by introducing another bill by week's end.

The House's veto override vote was 232-195, 53 votes short of the required two-thirds majority. Thirty-eight Republicans voted to override, while 57 Democrats voted with the president.

Under the legislation, employers with at least 50 workers would be required to offer up to 12 weeks in one year of unpaid leave for workers to care for a newborn, adopted child or seriously ill parent, child, spouse or themselves. During the leave, employees would receive health benefits and job protection.

The bill would affect 5 percent of all employers and 44 percent of all workers, the General Accounting Office said.

Bush and many business organizations contended such a benefit, while laudable, should be not required by government, but rather negotiated between employers and employees. When Bush issued his 13th veto, he said the bill is excessively rigid and ''ignores the realities of today's workplace.''

Despite the House's failure to override the veto, supporters of the bill plan to persevere in fashioning another measure that Bush could sign.

Sen. Christopher Dodd, D-Conn., plans to introduce a slightly modified version by the end of the week.

Rep. John LaFalce, D-N.Y., chairman of the House Small Business Committee, urged his colleagues to sustain the veto and support a compromise bill he plans to offer next week.

But House Speaker Thomas Foley, D-Wash., predicting a family and medical leave bill will be enacted ''if not this year then next year,'' said he wants the legislation as-is with no more compromises.

''Further adjustments to satisfy the president, I think, would have to reduce the bill to a nullity, and I, for one, am not willing to do that,'' Foley said.

During the House debate, Rep. Fred Grandy, R-Iowa, said the House should sustain the president's veto.

''Not passing this version of benefits in the workplace is not a betrayal of trust by the American president to the American people. It is an idea to derail a good idea which was transformed into bad policy,'' Grandy said.

House Republican leader Rep. Robert Michel, R-Ill., said requiring such a benefit could unintentionally eliminate other worthy benefits for emplyoees.

But Rep. Richard Durbin, R-Ill., called the veto a ''slap in the face to America's working men and women.''

Rep. Marge Roukema, R-N.J., who has lead Republican lawmakers' fight for the bill, urged colleagues to ''vote against the paid business lobby'' and override Bush's veto of a ''humane'' bill.

For the working people who take leave, the bill means ''a roof over their heads and food on the table'' rather than the real possibility of being fired, Roukema said.

The House originally approved the bill May 10 by a 237-187 vote, including 39 Republican votes for the bill, but 54 Democratic votes against it.

The Senate originally approved the bill June 13 by a voice vote.

#90206u1394 07/25/1990 ~United Press International
SEABROOK, NH (JULY 25) UPI - The owners of the Seabrook nuclear plant hosted a party with a band and an opera singer Wednesday to mark the controversial facility's ascension to full-power status, more than 18 tumultuous years after it was first proposed.

About 500 invited guests, including nuclear industry executives and politicians, attended the party under gray skies at the $6.6 billion plant to celebrate the attainment of 100 percent power.

"All of us on the New Hampshire Yankee team are feeling a great sense of personal satisfaction and, yes, pride to see this magnificant facility producing electricty at full power," said Edward A. Brown, president of Seabook operator New Hampshire Yankee.

While thousands of protesters have been arrested over the years at anti-nuclear demonstrations aimed at stopping the plant's operation, the station's gates were quiet Wednesday as only five protesters stood flashing anti-Seabrook signs.

"It's a truly offensive display," said Diane Dunfey, a long-time Seabrook opponent. "It ought to be a dedication to dishonesty and callousness because that is what they represent." A former Seabrook health instructor, the Rev. John Wood of the United Church of Christ, gave the invocation.

The two children of control room superintendent Gene St. Pierre officially ushered in the 100-percent power level by flicking on a big fluorescent orange power switch on a box displaying the words "electricity for one million New England homes."

Technicians will continue to test the plant at the 100 percent level for the next several weeks. Seabrook actually reached full power for the first time late Thursday evening. "It's about time," said James J. Griffin, a pipefitter. "It should have happened years ago. It's a little appreciation of the work everybody's done."

The Seabrook plant, New England's ninth nuclear station, gained national recognition during the past two decades as a lightning rod for protests against nuclear energy and the dangers its opponents claim it presents.

Located in the heavily populated New Hampshire Seacoast Region, 40 miles north of Boston, opponents claim the area would be impossible to evacuate in the event of a nuclear accident at Seabrook.

The Nuclear Regulatory Commission issued a full-power license March 15. The plant first was proposed in 1972 and was completed in 1986, seven years behind schedule. Its cost was 6 1/2 times its initial budget.

"The story of our joint owners is a story of perseverance and commitment in the face of the longest licensing battle in American history," Brown said. Seabrook's stormy history has been marked by anti-nuclear demonstrations, court challenges and regulatory delays that led to the bankruptcy of its lead owner, Public Service Co. of New Hampshire.

#90206u1415 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - Outdated financial regulations have contributed to a measurable decline in the competitiveness of the U.S. banking industry in the global financial arena, Treasury Secretary Nicholas Brady said Wednesday.

Brady said the U.S. banking industry has outgrown its historical regulatory structure, resulting in over-capacity, layers of regulation, concentration in riskier business endeavors and uneven product diversification.

''While ours is still the most innovative financial industry in the world, we are looking over our shoulder more and finding our competitors closing the gap,'' Brady told the Senate Banking Committee.

The committee is considering a variety of measures to strengthen the U.S. financial industry given the increasing power of foreign banks. Brady said the competitiveness issue has been added to a comprehensive study of deposit insurance now being prepared by the Treasury Department.

Brady offered few details of the Treasury study, but assured the panel that any proposals to change or modernize the nation's banking system would not be made if they would increase risk to taxpayers.

''Simply put, the task is to enhance competitiveness while decreasing taxpayer exposure,'' he said.

Foreign banks have increased their share of assets in the U.S. market, Brady said, while the share of U.S. banks in the international banking market has falled to 14.1 percent last year from 27.2 percent in 1983.

During the same period, foreign banks have increased their share of U.S.

commercial and industrial loans to 28.5 percent from 21.4 percent, Brady said.

''By many measures, we are losing market share and competitive standing, both at home and abroad,'' Brady said.

Japanese banks, for example, have increased their penetration of the United States in recent years. Brady said Japanese banks now account for 11.8 percent of all U.S. banking assets, compared to a total of 20.6 percent for all foreign banks.

The anticipation of sweeping economic liberalization among the nations of the European Community also has forced a re-examination of U.S. banking regulations, Brady said.

''It will be more difficult for U.S. firms to compete on foreign turf when they cannot provide the same services at home, because the knowledge and expertise developed at home will be a crucial foundation to gaining market share abroad,'' Brady said.

Brady suggested that the Glass-Steagall Act, which prohibits U.S. commercial banks from participating in investment banking activities, should be reconsidered.

''The fact is that Glass-Steagall is no longer the rigid wall between banking and securities that it once was,'' he said without saying the law should be abolished.

#90206u1417 07/25/1990 ~United Press International

CAPE CANAVERAL, FL (JULY 25) UPI - A fuel leak appeared again Wednesday during a test of the grounded shuttle Atlantis, raising the possibility the spaceship may have to be rolled back to the hangar for repairs.

A rollback would eliminate any chance of an early August launch. But officials said the test was inconclusive, apparently because a large plastic ''baggie'' used to trap escaping hydrogen broke shortly after the fueling test began.

"Before that happened, we were getting very small traces at all these sensors, but nothing anywhere close to going out of specifications,'' a NASA official said. ''Within seconds after the baggie broke, the sensors, almost all of them, pegged (off at the high end of the scale).

''The test is kind of inconclusive. If the baggie had held, we would probably have some optimistic words to say about being able to launch this thing.''

But given the ambiguous nature of the results and the time needed to prepare the ship for yet another fueling test, NASA managers could elect to haul the spaceplane off the launch pad for repairs that would delay launch to September.

If that turns out to be the case, the space agency could decide to launch the repaired shuttle Columbia around Aug. 31 - three months behind schedule - and to delay Atlantis's mission until after a high-priority October flight by the shuttle Discovery to launch a European solar probe.

William Lenoir, NASA's associate administrator of space flight, and shuttle program director Robert Crippen planned to hold an afternoon news conference in Washington to discuss the agency's plans.

NASA managers had hoped that work last week to tighten bolts around a suspect fuel line flange near Atlantis's 17-inch-wide ''disconnect'' fitting would eliminate a small hydrogen leak that forced the space agency to ground Atlantis earlier this month.

But signs of leakage showed up again Wednesday during the ship's third fueling test, indicating the problem had not been eliminated, although officials said the broken baggie prevented them from pinning down the exact source or severity of the leak.

NASA had hoped for test results that would allow them to proceed with a launch attempt around Aug. 11. But given the inconclusive nature of the results Wednesday, that schedule would appear doubtful.

The fueling test began at 7:40 a.m. EDT when technicians began pumping liquid hydrogen through Atlantis's plumbing, chilling the fuel lines, valves and seals to about minus 420 degrees Fahrenheit. The only anomaly appeared to be a small crack in foam insulation around the main fuel line.

At 8:14 a.m., engineers began high-speed fuel loading. Four minutes later, the ''fast fill'' was halted after sensors mounted around the flange area detected hydrogen gas. Subsequent tests continued to show signs of leakage and,shortly after 9:30 a.m., the test was called off.

Officials said earlier that if Atlantis passed the test - or if it was determined the shuttle could safely fly ''as is'' - NASA would be clear to launch the spaceplane around Aug. 11 on a secret military mission. The shuttle Columbia then could be launched around Sept. 9 on a 10-day astronomy flight.

But Lenoir said last week he did not expect Atlantis's leak to go away and that it was likely the ship would have to be hauled off the launch pad for repairs, a move that would prevent NASA from launching more than one flight

before Discovery's October mission to launch the Ulysses solar probe.

Under that scenario, NASA managers were debating two options:

-Option No. 1: Haul Atlantis back to the Vehicle Assembly Building, remove it from its external fuel tank and attach it to the tank and boosters originally planned for use by Columbia. Atlantis then could be hauled back to pad 39A for another fueling test around Aug. 17 and launch on Sept. 10.

-Option No. 2: Move Atlantis back to the VAB and haul Columbia to pad 39A for a fueling test and launch around Aug. 31.

In both cases, Discovery would remain scheduled for liftoff Oct. 5.

Columbia was grounded May 29, six hours before its scheduled liftoff, when sensors detected hydrogen gas spewing into its engine compartment. Columbia then was hauled off the launch pad and replaced with Atlantis, which originally was scheduled for a mid-July launch.

But during a fueling test at the launch pad, a small leak was detected. While the leak initially appeared similar to Columbia's, subsequent tests traced the problem to the area of the 17-inch external tank flange.

Exhaustive testing at the Kennedy Space Center and at a laboratory in California ultimately traced Columbia's problem to trouble with seals around drive shafts used to move giant valves inside the 17-inch disconnect assembly.

#90206u1421 07/25/1990 ~United Press International

VIENNA, AUSTRIA (JULY 25) UPI - East German Prime Minister Lothar de Maiziere acknowledged Wednesday his coalition government was in danger of collapse but said his political party would remain in power in a minority government if necessary.

His comments during a one-day working visit to Vienna came as officials in Berlin tried to resolve a dispute that prompted the Liberal Party to pull out of the seven-party ruling coalition on Tuesday.

De Maiziere's Christian Democratic Union's largest coalition partner, the Social Democrats, also threatened to quit if the dispute over the timing of German unification is not resolved by Friday.

De Maiziere told a news conference a compromise was still possible but said the Christian Democrats were prepared to remain in power in a minority government if no agreement was reached.

''We would still be able to act,'' said de Maiziere, explaining that a minority government could still muster enough votes for passage of important legislation.

De Maiziere said he had no plans for meeting with West German Chancellor Helmut Kohl during his Austrian visit. Kohl was vacationing in the Alpine resort of St. Gilgen, near Salzburg, and there were reports the two leaders would hold an emergency summit to discuss the East German crisis.

''That (proposed meeting) was meant to be a little holiday but this is no time for holidays,'' de Maiziere said.

Asked if he would seek Kohl's advice on the crisis, Maiziere said, ''I don't know why my coalition problems should be his problems.''

Although all seven coalition partners support German unification, the Liberals and Social Democrats insist that political union take place before pan-German elections scheduled for Dec. 2. De Maiziere favors separate East German elections before unification.

The future of the East German coalition government remained in doubt after the Liberal Party, which controls 23 seats in the 400-member parliament, pulled out of the governing partnership. The Social Democrats, with 88 seats, also have threatened to quit.

If the Social Democrats join the Liberals, it would leave the coalition with only 192 seats.

#90206u1431 07/25/1990 ~United Press International

PHNOM PENH, CAMBODIA (JULY 25) UPI - Cambodian officials and U.S. experts agreed Wednesday to repatriate six sets of bodily remains, including four found in a Khmer Rouge ''killing field,'' believed to be Americans missing since the war in Indochina.

The first return of possible American remains follows a change in U.S. policy ending American diplomatic support for the Khmer Rouge-dominated resistance coalition but officials said Wednesday's decision was ''purely humanitarian.''

Cambodian Deputy Foreign Minister Sok An said an American team was given 28 sets of remains to inspect - 18 from provinces along the Cambodia-Vietnam border, eight from a mass grave near Phnom Penh and two from the Tuol Sleng prison and torture center operated by the Khmer Rouge in the capital.

He said two sets of remains to be repatriated on Thursday were found in

the provinces and four in the mass grave at Choeung Ek where the Khmer Rouge dumped thousands of bodies of victims - mainly from Tuol Sleng prison - during their harsh rule from 1975 to 1979. The Chinese-backed Khmer Rouge regime was ousted after Vietnam invade Cambodia in late 1978.

Lt. Col. Joe Harvey, leader of the U.S. delegation and commander of the U.S. Joint Casualty Resolution Center, said it was not clear whether the remains inspected were those of military personnel or civilians. He said the work went smoothly.

''We came and did the work. The cooperation was there,'' he said.

Sok An said no topics other than the effort to account for the 83 Americans missing in Cambodia were covered in two meetings between the U.S. delegation and senior government officials.

''This is purely humanitarian work,'' he said. ''We made efforts to do this work and now there are results.''

Chum Bun Rong, director to the foreign ministry information department, said the Cambodian government had paid large amounts of money to villagers who uncovered remains believed to be Americans, but said he did not know whether there had been any discussion of repaying the Cambodian government for its expenses in the search. Other officials declined to comment.

At least three sets of the remains, which journalists were allowed to see, included what appeared to be military identification tags. The remains also included skulls, teeth and large fragments of bones.

There have, however, been numerous reports of people faking identification tags in hopes of getting a reward for turning in the remains even though the U.S. government has said it will not pay rewards.

The remains seen as possibly American are to be placed aboard a U.S. Air Force C-141 cargo jet Thursday during a ceremony at Pochentong airport. The remains will then be flown to Hawaii for further examination at a military laboratory.

The visit of the U.S. delegation was the first official U.S. contact with the Hanoi-backed government that was installed following Vietnam's invasion.

''The people feel very glad to see the Americans,'' Chum Bun Rong said. ''American popularity is rising since the U.S. decision ... to take measures to prevent the return of the Khmer Rouge.''

He referred to U.S. Secretary of State James Baker's announcement last week that the United States will not longer support the rebel coalition,

which includes the Khmer Rouge, in holding Cambodia's seat in the United Nations.

#90206u1436 07/25/1990 ~United Press International

LONDON (JULY 25) UPI - Stock prices closed marginally higher in sluggish trading Wednesday on the London International stock exchange.

The blue-chip Financial Times 100-stock index, which added 1.2 points Tuesday, tacked on another 3.8 points to 2,364.7. The narrower top-30 industrial average slipped 0.1 points to 1,865.7.

Volume amounted to around 428 million shares, up from 386 million shares traded during the same period Tuesday.

Analysts said prices finished slightly higher as investors were circumspect over a number of factors - the outlook for British corporate earnings, Wall Street, interest rates and the timetable for the pound to enter the exchange rate mechanism of the European Monetary System.

Market watchers noted the closely watched Financial Times Stock 100 index had been up as much as 21 points around midday, but a softer pound and Chancellor of the Exchequer John Major's warning that Britain's inflation may rise above the ten percent mark worried the market and cut the gains by half.

Among widely traded stocks, oil issues were strong ahead of the OPEC meeting to convene in Geneva Thursday and got a boost from tensions in the Middle East and the rising price of crude oil.

Enterprise Oil jumped 20 cents to $12.36 and British Petroleum gained eight cents to $6.20.

Reuters rebounded 16 cents to $18.97. The information company plunged $3.06 on Tuesday after warning of an increase in cancellations of its services due to economy drives by major clients, which Reuters said will hurt profits in the second half of the year.

Among some of the day's other highlights, Unilever added 16 cents to $12.65, British Aerospace fell 17 cents to $9.79 and General Electric Co. slipped eight cents to $3.47.

-30- 1965

#90206u1439 07/25/1990 ~United Press International

PARIS (JULY 25) UPI - A severe drought in much of France began to take its toll Wednesday with water shortages, dried up rivers and an increasing

number of bush fires, local authorities said.

Minister of Agriculture Henri Nallet, however, said the drought did not pose an immediate, serious threat.

The drought, which has affected pockets across Europe, has mostly gripped southern France, with the worst-hit regions being Toulouse, Re et d'Oleron Landes, and the port of Marseille.

The heatwave in those regions sent temperatures as high as 100 degrees and triggered bush fires in areas around Calvados, Landes and Marseille, authorities said.

An acute shortage of drinking water in Toulouse forced local authorities to restrict the use of water in gardens and in washing vehicles.

The water shortage also has affected cattle and other animals. A thirsty 880-pound bull jumped into a well in Montagnac, 15 miles from the southwestern city of Beziere, in its search for water, local authorities said.

Firefighters needed three hours to extract the bull from the well after it became trapped.

In the resort of Re et d'Oleron, with its Atlantic Ocean beaches a major tourist attraction, the slump in the tourism has had an adverse effect on the local economy. The number of campers around the beaches has fallen substantially, local council authorities said.

Haroun Tazieff, a former minister and noted geologist, said the drought was caused by a simple recurring climatic cycle.

#90206u1444 07/25/1990 ~United Press International

BOSTON (JULY 25) UPI - Certain people appear to be genetically susceptible to developing chronic arthritis from Lyme disease that does not respond to treatment, researchers said Wednesday.

A high proportion of people who develop long-term Lyme disease-induced arthritis have substances known as antigens in their blood, which act as genetic markers, labeling them as having a high susceptibility, said Dr. Allen Steere.

''This is the first report of a genetic marker being involved in Lyme disease, specifically in patients with chronic arthritis. It suggests that a person with the marker will have more serious arthritis of longer duration,'' said Steere, director of the Lyme Disease Clinic at the New

England Medical Center in Boston.

In a study of 80 people with Lyme disease arthritis, Steere and his colleagues found that 25 of 28 patients, or 89 percent, whose arthritis had lasted between one year and four years had one or both of the genetic markers known as HLA-DR4 and HLA-DR2.

By contrast, only six of 22 people, or 27 percent, with short-term arthritis of one to five months had the markers, as well as 19 of 30 people, or 63 percent, with moderate duration arthritis lasting betweem six amd 11 months, the scientists reported in The New England Journal of Medicine.

The finding has implications for the chances of developing a vaccine for the disease and may help in furthering understanding of disorders such as rheumatoid arthritis and juvenile diabetes, Steere said.

He said the study suggests that in some people, one or more genes are present that influence the body's response to the invasion of the bacterium that causes Lyme disease, leading their immune systems to attack their own joints.

More than 14,000 cases of Lyme disease have been reported in 43 states since 1980, with most cases occuring in the Northeast and Mid-Atlantic coastal states and Wisconsin, Minnesota, California and Oregon.

The disease is spread by one of several types of tiny deer ticks, which attach themselves to a person's skin and inject an infection-causing bacterium into the bloodstream.

Within a week or so, the infection typically causes flu-like symptoms and a distinctive rash that spreads like a red bull's eye around the bite.

Most people - including those with high genetic susceptibility - can be treated successfully for Lyme disease in its early stages. Treatment generally consists of doses of oral antibiotics such as tetracycline or penicillin, Steere said.

However, if left untreated for two or three years, the disease can lead to arthritis of the joints, meningitis, weakness and memory lapses. It is at this stage that antibiotics are frequently unsuccessful in treating arthritis among those with the genetic markers, Steere said.

Among these people, the best treatment is often surgical removal of affected tissue, which is usually in the knee area, he said. Past studies suggest that about 10 percent of those with untreated Lyme disease develop chronic arthritis, sometimes involving erosion of cartilage and bone, Steere said.

Just as some people are more likely to develop serious symptoms from Lyme disease, Steere said others are less so. ''We know of some people in whom Lyme disease is very mild. They develop some localized symptoms and then nothing else ever happens to them, even if they are not treated. Their bodies seem to be able to handle the infection successfully.''

#90206u1452 07/25/1990 ~United Press International

TORONTO (JULY 25) UPI - The Canadian Auto Workers and Ford Motor Co. of Canada Ltd. met Wednesday to formally begin talks aimed at renewing their collective agreement with both sides predicting a difficult round.

Negotiations between the CAW and the Big 3 auto makers began Tuesday when the union and General Motors of Canada Ltd. held opening discussions. The CAW and Chrysler Canada Ltd. hold their first round Thursday.

Bob White, CAW president, said the union's proposals to Ford were almost identical to those presented to GM, saying job and income security would be the focus, but also would include reduced work time. "It will be a difficult set of negotiations because of the direction we want to go in and the direction they want to go in," White said.

Donald McKenzie, Ford Canada's vice-president of employee relations, said, "We are facing a competitive market place like we have never seen before."

White said the union would bring up the fact that Ford's European workers have both longer vacations and a shorter work week, and that the union would try to negotiate reduced work time for its members.

The union also will try to recover 52 hours of work it says it gave up in negotiations in the early 1980s, White said. The CAW is looking for annual percentage wage increases in each year of a three-year deal plus improved cost-of-living allowances and better benefits including family leave and legal services.

McKenzie, who was short on details, said Ford wants to build on its quality momentum and competitiveness, and to negotiate a fair agreement. "We must ensure during these negotiations that we are mindful of our competitive position," said McKenzie, who refused to answer questions about specific union proposals saying the company would use "a problem-solving method" to reach a deal with the union.

But McKenzie did say, "We can't be looking at expensive new programs or operating restrictions that will cost all of us dearly in the long run." The last strike by the union against Ford occurred in 1973 and last two weeks.

There are about 12,800 CAW members employed by Ford in plants in Windsor, Oakville, St. Thomas, Niagara Falls and Bramalea, Ontario. Ford assembles its Tempo and Topaz passenger cars in Oakville and its Crown Victoria and Mercury Grand Marquis models in St. Thomas.

The collective agreements between the CAW and Ford, GM and Chrylser all expire Sept. 14. Contract talks which began last week in the United States between the UAW and the Big 3 auto makers.

The Canadian auto talks mark the first time since the CAW separated from the UAW in 1985 that all Big 3 auto makers will negotiate simultaneously on both sides of the border.

UNITED NATIONS (JULY 25) UPI - Secretary-General Javier Perez de Cuellar criticized Ethiopian rebels Wednesday for barring a U.N. technical team from the country's northern port at Massawa to prepare for resuming famine food relief shipments.

The four-member team of the World Food Program was to have disembarked July 16 in Massawa, 470 miles north of Addis Ababa, but rebels of the Etritrean People's Liberation Front refused to give final clearance for the team's ship to enter the port.

''The secretary-general strongly regrets the position taken by the EPLF,'' Perez de Cuellar said in a statement.

''The suspension of the mission means that the famine-stricken and war-affected population of Eritrea will be deprived of essential humanitarian assistance vital for their survival,'' he said.

Perez de Cuella said the ship was flying the U.N. flag and the technical team was to carry out a survey so shipments of urgent food and medical supplies for famine-stricken and war-affected areas in Eritrea could be resumed.

He said negotiations will continue to obtain the EPLF's cooperation for the port to be re-opened.

The Red Sea port has been closed since its capture by the rebels in February. It is the main entry point for international organizations to channel food supplies to northern Ethiopia, where the United Nations has estimated that up to 4 million people face starvation because of the drought, crop failures and the civil war.

LUSAKA, ZAMBIA (JULY 25) UPI - President Kenneth Kaunda announced the release of six suspected coup plotters and hundreds of political detainees Wednesday and vowed to build a ''new Zambia'' following a wave of rioting against his single-handed rule.

Kaunda also lifted a dusk-to-dawn curfew imposed on the second day of the rioting. At least 27 people died in pitched street battles in late June, mostly between students and police, that were the most serious threat to Kaunda's rule since he took power on independence from Britain in 1964.

The 26-year ruler, facing a national referendum Aug. 13, 1991, that could usher in multi-party democracy, declared his foes ''should forget the past'' and ''start afresh and build a better country, a new Zambia.''

The president told reporters, ''I want to emphasize that we are not acting from a point of weakness but from a point of extreme strength. We have pardoned all these chaps entirely on the basis of love.''

Kaunda said he will release former Chief Justice Edward Shamwana, jailed for life after a 1980 coup attempt; former Army Commander Christon Tembo and three colleagues, implicated in a 1988 attempt, and Lt. Mwamba Luchembe, held for his solo hoax coup announcement on radio June 30.

The president also said he will free hundreds of University of Zambia students and up to 1,000 looters detained following the bloody June 25-27 riots in the capital against the doubling of staple-food prices and oppressive one-party rule.

But the 66-year-old Kaunda vowed not to abandon the stringent economic policies that sparked the riots, saying emergency measures were needed to rectify the ailing economy.

Leading multi-party advocate Arthur Wina said, ''We welcome the release of these prisoners. I continue to bring a message of determination to mobilize all our people into the crusade of democratization.''

Wina brushed aside a charge by Kaunda that the multi-party movement ''hates its rulers'' and said, ''All we want is an open society.''

On June 29, Kaunda yielded to popular pressure and announced the referendum to decide on whether to introduce multi-party rule.

The president first set Oct. 17 as the date but, following demands that all of Zambia's roughly 10 million citizens get the chance to register, changed the late to August next year.

Multi-party lobbyists have said August may be too far off and Wina noted Wednesday, ''It would perhaps be more reasonable for the president to reschedule again.''

MIAMI (JULY 25) UPI - Tropical Storm Arthur lashed the islands of Grenada and Tobago with high winds and rains Wednesday then moved out into the open Caribbean on a course for the Greater Antilles, hurricane forecasters said.

''It could be anywhere in the north central Caribbean in the next couple of days,'' said Bob Sheets, the director of the National Hurricane Center.

''The highest probability would be in the Hispaniola area (Haiti and the Dominican Republic),'' he said. ''Who knows how strong it would be when it gets there. Right now, we don't expect much strengthening.''

The storm, the first of the 1990 Atlantic-Caribbean hurricane season, did strengthen after passing over the island of Grenada early Wednesday. Maximum sustained winds reached 60 mph, up from 45 mph reported earlier in the day.

The Hurricane Center said Grenada reported winds gusting to 55 mph as the center of the storm passed over the island. The storm also dropped heavy rains on Tobago and other islands in the area, the center reported.

Sheets said he expected few reports of damage from those islands, other than localized flooding.

The storm moved out over open water after passing over the islands, and was not expected to pose a threat to land for the next day or two, the center said. All tropical storm warnings in the Caribbean were discontinued.

At noon EDT Wednesday, Arthur was centered near latitude 12.5 north and longitude 63.3 west, about 425 miles southeast of Ponce, Puerto Rico. Tropical storm force winds extended outward up to 70 miles from the center.

The storm was moving west northwest at near 15 mph. Forecasters said that motion was expected to continue for the next day or two.

''It is going to continue to move through the eastern Caribbean. There are some uncertain conditions ahead of it right now,'' Sheets said.

Sheets said some westerly winds aloft above the Caribbean could disrupt

the storm by sheering off its top. ''Yesterdey, those winds were fairly strong ... (but) they may be weakening a little bit,'' he said.

Arthur formed from the season's second tropical depression Sunday in the Atlantic and grew to tropical storm strength Tuesday.

The year's first tropical depression drenched Cuba in late May, before the official start of the hurricane season, which runs from June 1 to Nov. 30.

#90206u1491 07/25/1990 ~United Press International

DETROIT (JULY 25) UPI - Chrysler Corp. plans to raise prices on its all new minivan models due this fall by as much as 12 percent, while holding or reducing prices on less popular car lines, according to preliminary pricing schedules sent to dealers.

Company spokesman Tom Jakobowski declined Wednesday to elaborate on the latest pricing schedules, which allow dealers to start taking fleet orders. But he cautioned prices could change when the No. 3 carmaker posts tentative retail prices later this month or in early August.

Jakobowski confirmed, however, that Chrysler is considering taking larger increases on more popular models like its Plymouth Voyager and Dodge Caravan minivans and balancing them with modest gains or even reductions on vehicles which are not selling as well. "That pattern is true," he said.

Second-ranked Ford Motor Co. recently told dealers prices on most 1991 models would rise by an average 3.2 percent, or $528, although some models will rise as much as nine percent. General Motors Corp. has yet to announce pre-sell prices.

The base price of the least expensive Voyager will start at $13,071, up $1,071 or nine percent from last fall's price, according to Chrysler's preliminary pricing. The plusher Voyager SE model will begin at $14,200, up $1,524, or 12 percent. The longer-wheelbase Grand Voyager will start at $19,300, up 5.3 percent.

All-wheel-drive versions of Chrysler's minivans to be offered for the first time this fall will range from $17,089 to $21,146.

The proposed steep price increases on Chrysler's front-drive minivans underscore the carmaker's confidence in maintaining the stronghold it has enjoyed in this market segment since its current version was introduced for 1984, despite new competition from GM and Toyota Motor Corp.

Toyota's 1991 Previa minivan, which is the newest entry in this market, starts at $13,998, but the LE with an automatic starts at $18,698. The

all-wheel-drive version, called the Previa LE All-Trac, starts at $21,308 with an automatic.

Chrysler is re-tooling its minivan plants in Windsor, Ontario, and Fenton, Mo., for four weeks each this summer to change over to its first substantially redesigned minivans.

The resulting production shortage, which could last into early 1991, is expected to severely hamper Chrysler's financial performance during the third quarter. The production changeover may also be why GM recently upped the rebates on its new minivan models to $1,250 per unit in an effort to grab a larger market share.

NEW YORK (JULY 25) UPI - The man accused of setting fire to the Happy Land Social Club, killing 87 people, appeared in a Bronx courtroom Wednesday and heard the judge set a deadline for his lawyer to decide whether to plead him insane.

Julio Gonzalez sat impassively in state Supreme Court in the Bronx as a woman next to him translated Justice Burton Roberts' instructions.

The 36-year-old Cuban immigrant, who speaks only Spanish, was watched by a crowd of relatives of victims of the March 25 fire.

Gonzalez is charged with 174 counts of murder, two for each of the 87 people who died in the fire. Almost all of the dead were Latin American immigrants, many from Honduras, who had gone to the club for a night of dancing to salsa and reggae.

Authorities say Gonzalez dumped a dollar's worth of gasoline in the entranceway of the illegal social club in a rundown section of the Bronx after quarreling with his girlfriend there.

Roberts gave Richard Berne, Gonzalez's attorney, until Sept. 11 to pursue an insanity defense for his client. Otherwise, the proceedings would move toward a trial for Gonzalez.

Berne said outside of court that defense psychiatrists had not finished evaluating Gonzalez.

Ruben Valladares, the Happy Land disc jockey and one of four survivors of the fire, was among the relatives and friends of the victims who were in the courtroom.

Valladares, whose hands and arms remain covered with a special cloth to

help heal the burns suffered in the blaze, said it was the first time he had ever seen Gonzalez.

Speaking in halting English, Valladares said he thought about ''the killings'' when he saw Gonzalez in court.

Relatives of the victims said they went to the court because they wanted to ensure that Gonzalez was brought to trial.

''I want to know what's going on with the case,'' said Antoinette Dantzler 25, the younger sister of 31-year-old Natalie Dantzler, who died in the fire. ''I want to see justice done.''

''How could a human being do that?'' asked her mother, 50-year-old Jennie Dantzler. ''(Natalie) left a 15-year-old son who still cries for his mother. (Gonzalez) destroyed our family.''

#90206u1504 07/25/1990 ~United Press International

BELFAST, Northern Ireland (JULY 25) UPI - Police questioned two men Wednesday about a powerful land mine planted by the Irish Republican Army that killed three police officers and a Roman Catholic nun, officials said.

The IRA claimed responsibility for the Tuesday attack near Caledon village in county Armagh, 40 miles west of Belfast.

The latest violence in their protracted drive to end British rule in Northern Ireland involved detonating the mine when the unmarked police vehicle drove past in response to an emergency call, which was apparently issued as a lure.

Police said they detained two men.

''Two men are being questioned in relation to serious terrorist crimes in the Armagh area,'' a spokesman for the Royal Ulster Constabulary said.

The blast instantly killed the three policemen and damaged a vehicle coming in the opposite direction, mortally wounding a nun and leaving a second woman seriously injured.

Nuns at the Sisters of St. Louis order, to which 37-year-old Catherine Dunn belonged, said after a memorial mass that they forgave the attackers.

''The deaths of these four young people has shown that unless we can live together on this island with respect for each other ... we will only cause pain, misery and death,'' said Sister Fiona Fullam.

The Sinn Fein party, which uses the political arena to oppose British rule issued a statement saying it deeply regretted all the fatalities but that London must recognize the Irish people's right to independence.

The device packed with high explosives blasted the armor-plated police car off the road into a nearby field, where it landed on its roof. A 20-feet-deep crater remained and debris was scattered around for hundreds of yards.

Police said a number of masked gunmen took a family hostage Monday night to trigger the bomb from their home, located 400 yards from the ambush site.

More than 30 people have died in extremist violence in Northern Ireland this year.

#90206u1563 07/25/1990 ~United Press International

JERUSALEM, ISRAEL (JULY 25) UPI - A U.S. human rights group charged Wednesday that Israeli army regulations encourage soldiers to open fire on Palestinians in the occupied territories with little fear of being punished.

In a report titled ''The Israeli Army and the Intifada: Policies that Contribute to the Killings,'' the New York-based Middle East Watch accused the military of failing to adequately investigate deaths caused by army gunfire and prosecute soldiers suspected of abuses.

The report's conclusions were similar to those of the Israeli human rights group B'Tselem, which issued a report last week urging the military to revise rules of engagement that it said were ambiguous and had resulted in an unacceptably high number of Palestinian deaths.

The Middle East Watch report, written by Eric Goldstein, was most critical of army rules that ''explicitly authorize soldiers to use lethal force in response to certain situations that are not life-threatening to soldiers or bystanders,'' including permission to shoot masked Palestinians who resist arrest.

Responding to the report, an army spokesman said orders on opening fire were drawn up with the help of the judge advocate general and the attorney general, and have been subjected to judicial review by the Israeli Supreme Court.

The spokesman said that according to international law the army has broad authority in the territories, but uses it selectively ''showing great care and responsibility for human life in these difficult situations.''

Army rules, cited in the report, permit the use of lethal force in life-threatening situations and ''as a last resort'' when apprehending a fleeing suspect.

''These permissive rules are the direct cause of many of the (army) killings of Palestinians during the intifada,'' the report states.

Since the beginning of the nearly 32-month-old Palestinian uprising, called the ''intifada'' in Arabic, Israeli security forces have killed more than 670 Palestinians, and Palestinians have killed 11 soldiers, the report said.

Soldiers who kill Palestinians are not likely to be investigated or punished, the report said. Although there were approximately 450 killings by soldiers and police through June 1989, no more than 16 soldiers were court-martialed for causing a death and no more than 10 were convicted and served a prison term.

''(Army) investigators regularly fail to seek the testimony of Palestinian witnesses (and) neglect to obtain medical reports that will shed light on the circumstances of the killings,'' the report asserted. ''This failure to vigorously investigate and prosecute sends a signal to soldiers that they have leeway to exceed their open-fire orders.''

The Middle East Watch urged the United States to ''increase its monitoring of the use of excessive force in the occupied territories ... and urge Israel to take steps immediately to curtail the unjustifiable killings by its troops.''

The group also called on the army to allow human rights workers and journalists free access to the West Bank and Gaza Strip to monitor soldiers' behavior. The military frequently declares areas of disturbances closed military zones or imposes curfews, prohibiting non-residents from entering.

#90206u1565 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - Amid signs of rising public concern, the administration and Congress agreed Wednesday to more clearly define their differences on how to cut some $50 billion from the federal budget deficit next year.

In a second day of stepped-up budget talks, the two sides agreed to swap ''comprehensive packages'' of proposed tax increases, defense and benefit cuts and budget reform in the quest for common ground on how cut the deficit.

But as President Bush met twice with congressional leaders, first to review the budget talks and then to fend off attacks on his defense budget the assault on the deficit continued to lack tangible results or certainty of success.

House Democratic leader Richard Gephardt, D-Mo., conceded ''it's going to be very hard'' to pull together a bipartisan agreement and acknowledged the talks could become ''hung up on three or four major clumps of disagreement.''

Asked if hard decisions had yet been made, he said, ''They've not.'' With the congressional August recess fast approaching, he said the next few days may determine ''if we can put together a package in this time period or not.''

''I think the political will is there to try to solve this problem,'' Gephardt said. ''The devil is always in the detail.''

The White House budget meeting, the second in as many days, produced deficit-reduction targets of $50 billion next year and $500 billion over five years, to be achieved through an unspecified mix of taxes and spending cuts.

Implicit in the adoption of the $50 billion goal for next year, Gephardt said, is a setback until 1995 - from an original date of 1993 - in the deadline set by the Gramm-Rudman-Hollings law for a balanced federal budget.

A new Gallup Poll detected rising public consciousness about the deficit crisis. Twenty-one percent of those polled saw the deficit as the most important problem facing the country, up from a mere 6 percent in April.

The budget negotiators are at work on a rough 50-50 mix of spending cuts and tax increases to bring down a deficit otherwise projected to hit $168.6 billion next year, excluding tens of billions of dollars in costs of the savings and loan industry bailout.

Failure to reach an agreement by Sept. 30, the end of the 1990 fiscal year would trigger some $100 billion in automatic spending cuts to lower the deficit for 1991 to the $64 billion target set by the Gramm-Rudman-Hollings law.

With Democrats eying his defense budget for sizable savings, Bush met with key members of the House and Senate to make the case for continued modernization of U.S. strategic forces to keep up with the Soviet Union.

In urging that Congress not be too hasty in seeking a large peace dividend

from the end of the Cold War, Bush signaled compromise with limits, grudingly accepting a cut voted July 13 by the Senate Armed Services Committee.

Fitzwater said the Pentagon could ''live with'' the panel's $18 billion cut in Bush's $307 billion request for 1991. The House Armed Services Committee begins work Thursday on a bill that would cut $24 billion from Bush's budget.

To help meet that, Chairman Les Aspin, D-Wis., has urged halting production of the costly B-2 stealth bomber. The administration remains committed to spending more than $60 billion for a scaled-back force of 75 B-2s.

Rather than canceling programs like the B-2, Fitzwater said the administration may support some delays or reductions in weapons systems and manpower to reflect a ''reduce political threat'' from the Soviet Union.''

However, he suggested it was premature to make drastic changes in the U.S. force structure and said Congress and the administration will have to continue grappling with the question of how to ''manage the downsizing of the military.''

#90206u1580 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - Harry Truman turned to his close friend Tom Clark when he needed a new Supreme Court justice, then called him a ''dumb son of a bitch'' for ruling against Truman when the president seized the nation's steel mills to prevent a strike.

Teddy Roosevelt eagerly appointed Oliver Wendell Holmes to the high court. When Holmes failed to vote against a corporate merger, Roosevelt said he could ''carve out of a banana'' more backbone than Holmes had.

Presidential appointments to the Supreme Court can become lifetime disappointments. But legal scholars and observers believe President Bush's selection of David H. Souter is a safe conservative bet.

Still, one can only guess.

In a 1984 opinion, Souter indirectly contradicted then-New Hampshire Gov. John Sununu, who had nominated him to the state supreme court about a year earlier.

Souter upheld a state law, opposed by Sununu, that bars customer charges for power plants until after the facilities are operating commercially.

The law contributed to lengthy delays in completing the Seabrook nuclear power plant, which Sununu supported. But Souter, who as state attorney general also spent a gret deal of time fighting opponents to Seabrook, ruled that the law ''means just what it says.''

''That's the great mischief that the framers (of the Constitution) made for presidents. They have the power to appoint the justices but they don't have the power to tell them how to vote,'' George Washington University law professor Jerome Barron said this week.

Indeed, Dwight Eisenhower said his worst mistakes in office were sitting on the Supreme Court: Earl Warren and William Brennan. Warren, a Republican governor of California, led the court as chief justice through the turbulent 1950s and '60s and helped shape one of the most liberal courts in American history. Brennan, who left the bench Friday after nearly 34 years, was the leading liberal voice on the court.

Harry Blackmun, appointed by Richard Nixon, was initially considered a conservative jurist and faithful ally of Chief Justice Warren Burger. Blackmun, author of the decision that legalized abortion on demand, has become a predictable liberal.

Numerous presidents have suffered some degree of embarrassment or disappointment in their judicial selection, but most have been quite successful in appointing jurists with similar views.

''Until the last 20 years, presidents didn't focus that much on the ideology of the appointee,'' said Yale Kamisar, a law professor at the University of Michigan. ''The appointment wasn't considered that vital the way it is today, such as one more vote might overturn Roe vs. Wade or affirmative action.

''For instance, Eisenhower didn't think much about Brennan's ideology; he liked his Irish background. And for Warren, he owed him for helping him become president,'' Kamisar said. ''It was more political patronage, who do we owe. For example, Thomas Dewey was offered a seat on the court by Eisenhower and turned it down. It was a nice show of camaraderie in the party.''

It wasn't until the Nixon era that judges in lower federal courts were largely considered for appointments to the high court. ''There are bound to be fewer and fewer suprises that way,'' Kamisar said.

But even Nixon must have been less than pleased when his appointments, Burger, Blackmun and Lewis Powell, ordered him to comply with a subpoena to turn over the famous Watergate tapes in 1974 that forced him to resign.

''They're appointed for life. They're totally independent and sometimes

they undergo certain changes of views,'' said Henry Abraham, a law professor at University of Virginia. ''Almost every president has seen some disappointment, but by and large, most presidents have at least generally succeeded in getting appointees with whose views they could live.''

C. Thomas Dienes, a professor of constitutional law at George Washington University, said Ronald Reagan was very successful in appointing three conservatives to the court - Antonin Scalia, Sandra Day O'Connor and Anthony Kennedy. Moreover, Reagan elevated William Rehnquist, a Nixon appointee, to the chief justice position.

''With Reagan, he was critical of the Warren court and of judges making the law, overriding decisions by states and legislatures. The Warren court was very strong on equal protection law in which they struck down decisions of the state legislature, placing tremendous emphasis on rights and it was viewed as making the law rather than enforcing the Constitution.

''Reagan came in and thought he would restore it to the proper role of deferring to the policy-making bodies, to interpret the Constitution, not make the law,'' Dienes said.

''The philosophy is, it's not up to them to find a right of privacy that isn't there,'' he said. ''Bad judgment or bad policy is not enough to have something be struck down, that's the dominant philosophy and now Bush ... wants the same thing.''

#90206u1591 07/25/1990 ~United Press International

TORONTO (JULY 25) UPI - Homosexuals appear more likely to be left-handed than the general population, a Canadian study showed Wednesday.

Researchers at McMaster University in Hamilton, Ontario, studied 38 homosexual men and 32 homosexual women and classified them as left-handed if they performed at least one of 12 simple manual activities such as lighting a match with their left hand.

Among the women, 69 percent were either mixed or left-handed. Among men, 45 percent were ''lefties.'' In addition, a followup study found an even greater percentage of homosexual men were left-handed, the researchers said.

In the general population, about 10 percent of people write left-handed, while 30 percent favor their left hand in a variety of activities.

A greater prevalence of left-handededness among homosexuals suggests their ''brain organization may be different than others,'' said Dr. Sandra

Witelson, co-author of the study.

The study is part of a larger ongoing effort to look at the biological and environmental roots of human behavior.

Witelson speculated that hormonal levels during fetal development may affect brain organization. Lesbians may be exposed to an excess of male hormones when they are in their mother's womb, while the mothers of homosexual men may not produce enough of the same hormones, she said.

Such speculation is supported by studies involving the daughters of women with a medical condition that causes an excess of male hormones. The daughters exhibit more left-handedness and lesbianism than those in the general population, she said.

''There are reasons to suspect homosexuality may have a biological component. There may be environmental ones as well,'' said Witelson, who said her findings, published in the journal Psychoneuroendocrinology, are similar to those found in a 1987 British study.

Dr. Stanley Coren, a University of British Columbia psychologist who has studied left-handedness for 20 years, said the latest results were welcome but not surprising.

''Different studies have shown a number of psychological disturbances related to left-handedness,'' said Coren, adding that such disturbances include schizophrenia, depression and insomnia.

Homosexuality is considered a ''behavioral deviation'' by scientists insofar as it is statistically rare, Coren said.

#90206u1600 07/25/1990 ~United Press International
MONROVIA, LIBERIA (JULY 25) UPI - Rebels waded across a swamp Wednesday to launch an attack on Monrovia's Spriggs-Payne airfield, the Liberian capital's last remaining link with the outside world.

Diplomats reported heavy fighting in the eastern part of the city, where troops loyal to rebel leader Charles Taylor have resumed their offensive to oust President Samuel Doe.

Insurgents commanded by another rebel leader, Prince Johnson, have taken all of the city's northern Bushrod Island, where they control the port and oil depots.

With Taylor's troops attacking from the east and Johnson's from the north, the city apeared to be caught in a vice which could clamp shut on Thursday

to mark Liberia's independence day, annually observed on July 26.

Diplomats said Taylor's forces had surrounded and effectively neutralized Doe's troops barricaded inside the radio and television stations east of the city, but did not attack them, apparently in order to spare the facilities.

They said Taylor's fighters staged the assualt on Spriggs-Payne airfield, which until Tuesday was still being used by small planes to evacuate people. The guerrillas weeks ago occupied Robertsfield International Airport, the nation's main air gateway.

Government troops counterattacked Wednesday morning across two bridges which converge at the southern tip of Bushrod island, but were repulsed under heavy rebel fire, seemingly from Johnson's forces.

One squad of government soldiers was seen crawling across one of the bridges but was pinned down under the heaviest gunfire yet heard in the battle for the city.

Some soldiers lay motionless as though dead or injured, while others ran back to the safety of the government positions.

Shells were seen exploding on the other bridge, hitting a government jeep which was trying to lead an attack from that side.

The wreckage of the jeep remained immobilized in the middle of the bridge.

The government, firing from the city center, shelled rebel positions on the far side of the bridges, some rounds falling close to the city's main oil storage depot, which is in rebel hands.

Rebels on Tuesday had crossed a swamp to form on Bushrod Island a bridgehead near the city's telephone exchange. But government troops advanced Wednesday and forced a guerrilla retreat.

Acting Information Minister Paul Allen Wie during an impromptu news conference at the Hilltop Ducor Hotel - with gunfire echoing all around - said Doe remains as defiant as ever and has no intention of resigning.

''The president thinks it is worth dying for his country,'' Wie said.

He distributed a news release quoting Doe as saying a sudden resignation would lead to greater anarchy and ethnic tragedy in Liberia.

Referring to a call for his resignation sent by the black caucus in the U.S. congress, Doe said: ''I cannot heed the advice ... to quit the leadership of Liberia because it would introduce a dangerous precedent of

outrageous rebellion and instability into the West African region.''

Doe met on Tuesday with U.S. Ambassador Peter de Vos, and gave him an assurance that Liberian government charges during the past few days would not lead to an outright break in relations.

But the government repeated its accusation that the United States is actively aiding the rebel side.

Wie told reporters that the Liberian people are disappointed by the United States.

Doe on Friday expelled the Chief of the U.S. military mission to Liberia, Col. David Staley, after accusing him of actively supporting Taylor.

The government on Tuesday accused the United States of launching an attack on Doe's presidential mansion from a submarine, a charge immediately denied by Washington.

Witnesses reported the assault came from a rebel gunboat offshore. Troops at the fortified mansion returned the fire, and later announced that five civilians were killed on a nearby main road.

Monrovians pressed on with their desperate search for food and water in a city where all shops are shut and basic utilities have been closed for more than a month.

WASHINGTON (JULY 25) UPI - Supreme Court nominee David Souter flashed an engaging smile at the cameras Wednesday and said his feelings were just beginning to return as the shock of the past few days subsides.

Souter, President Bush's surprise nominee to replace Justice William Brennan, made courtesy calls on Senate leaders trailed by a crush of reporters and camera crews.

While appearing at ease and managing to fire off a good line or two, the 50-year-old appeals court judge who has spent most of his life living on a farm in New Hampshire clearly would have preferred to be out of the bright lights and back in the cloistered world of judges.

In a meeting with Senate Republican leader Robert Dole of Kansas and Sens. Strom Thurmond, R-S.C., Gordon Humphrey, R-N.H., and Warren Rudman, R-N.H. Thurmond presented Souter with a gavel on four occasions so different groups of photographers could record the moment.

''Can I gavel this meeting to a close right now?'' Souter asked.

With each presentation, Thurmond's praise became greater. At first, he was confident Souter would be confirmed, later he was certain.

''I appreciate the repetition of confidence,'' Souter said.

Souter fielded a few questions from reporters, but on any topic remotely substantive, he said he would hold his response for the Senate Judiciary Committee hearings expected for September.

At one point, he was asked how it felt to leave his long-time home in New Hampshire.

''Well, I don't know that anyone wants to leave New Hampshire,'' he said a bit wistfully.

Dole, who suffered an embarrassing defeat in the New Hampshire presidential primaries to George Bush, quickly chimed in, ''I did'' - a comment that dissolved the room into laughter.

Souter was asked how it felt, after his ''obscure'' existance in New Hampshire, to find his life examined in newspapers and TV shows across the country.

''I never thought of myself as that obscure,'' he responded.

After a short stroll down the hall to the office of Senate Democratic leader George Mitchell, D-Maine, accompanied by Rudman, Souter said that so far people in Washington have been ''extraordinarily kind'' to him. He also said the gravity of his position has just begun to sink in.

''I really don't have any substantive feelings to express,'' he said in response to a question. ''The best news I have now is that the blood is circulating well enough in my brain that I'm beginning to have some feelings.''

#90206u1645 07/25/1990 ~United Press International
CAIRO, EGYPT (JULY 25) UPI - Iraq, calling U.S. Navy maneuvers in the Persian Gulf an ''imperialist plot,'' summoned the American ambassador Wednesday to demand removal of U.S. ships. But sources said Iraq also promised Egypt it would not use force in a dispute with neighboring Kuwait.

Oil prices, which had risen over the past week as the dispute between the two OPEC producers was being acted out, fell amid reports of the Iraqi assurances.

Kuwait, meanwhile, denounced Iraq for attempting ''blackmail'' by staging Iraqi troops along the Kuwait frontier, as tensions rose over oil production and a longstanding border dispute.

Iraq claims Kuwait and the United Arab Emirates have driven down oil prices through overproduction. OPEC oil ministers, meeting Tuesday in Geneva before a full OPEC session Thursday, indicated they were near a consensus to raise the target oil price from $18 to $20 a barrel. Iraq was pushing for $25 a barrel.

Pentagon sources meanwhile confirmed joint U.S.-United Arab Emirates maneuvers were continuing Wednesday, under the name ''Ivory Justice.''

The maneuvers involve six U.S. warships, as well as two KC-135 tanker aircraft and a C-141 cargo plane carrying support equipment from Europe. Tankers helped UAE fighter jets practice refueling in flight, which extends their range.

An official Iraqi statement denounced the U.S.-UAE naval exercises as ''an imperialist plot against the Arab nation.''

In Baghdad, President Saddam Hussein summoned U.S. Ambassador April Glaspieand and reiterated an Iraqi call for the United States to withdraw its naval force from the gulf, Baghdad Radio reported.

The state-run radio, monitored in Cairo, said Saddam received the U.S. envoy, but gave few details of the talks except to say they took place in the presence of Iraqi Foreign Minister Tareq Aziz.

It was the first time in recent memory Iraq's leader had summoned a U.S. ambassador, and analysts said the move reflected the seriousness with which Iraq viewed its position.

Mideast-based U.S. diplomats said they did not expect the Bush administration to announce any naval pullout from the Persian Gulf region, which contains 70 percent of the world's oil reserves. They said that,

just as in the eight-year Iran-Iraq war - suspended two years ago under a U.N.-brokered cease-fire - Washington's priority would be to ensure the free flow of oil through the strategic waterway.

The dispute erupted last week when oil-dependent Iraq, trying to revive an economy ravaged by nearly eight years of war with Iran, accused Kuwait and the UAE of dumping oil on world markets and forcing crude prices down.

Baghdad also accused Kuwait of stealing some Iraqi oil from a disputed border well. Saddam Wednesday reportedly called on Kuwait to give Baghdad $2.4 billion as compensation.

On Tuesday, the Washington Post reported Iraq, which in the 1970s laid claim to all of Kuwait and was involved in military clashes with the emirate, had massed 30,000 troops on the Iraq-Kuwait border. Kuwait reportedly placed its tiny armed forces on alert, and moved Soviet-made missiles to the strategic islands of Warba and Bubiyan.

But Arab diplomatic sources said Wednesday Iraq had assured Egyptian President Hosni Mubarak it would not use military force against Kuwait.

Mubarak made a surprise visit Tuesday to Iraq and Kuwait in an attempt to defuse the crisis. He met with Iraq's Saddam Hussein in Baghdad and Kuwait's Emir Sheikh Jaber al Ahmad al Sabah in Kuwait City.

Iraq, with a 1 million-strong army, Wednesday had appeared to reject Mubarak's mediation. Baghdad Radio quoted an Iraqi spokesman as saying Baghdad would resolve its own differences with Kuwait and the UAE, and that Mubarak's visit only involved bilateral relations, not a gulf crisis.

But Mubarak's chief aide expressed optimism the dispute would be resolved peacefully.

In Geneva Wednesday, OPEC oil ministers, including those of quarreling Iraq and Kuwait, conducted informal bilateral talks and gathered for a monitoring committee meeting on the eve of a full OPEC conference Thursday.

''We are only talking about oil, not politics,'' Iranian Oil Minister Gholamreza Aghazadeh said.

The 13-member Organization of Petroleum Exporting Countries has always stuck to the business at hand despite disputes - even during the Iran-Iraq war.

#90206u1663 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - Handing a club to the Bush administration to use in global trade talks, lawmakers Wednesday proposed moving against subsidized foreign shipbuilders that have taken business from U.S. shipyards and forced thousands of Americans out of jobs.

''We mean business,'' said Sen. Barbara Mikulski, D-Md., at a news conference. ''The loss of jobs is no laughing matter.'' An expected decrease in defense-related shipbuilding in the years ahead also could damage the U.S. industry, she said.

Mikulski joined Sen. Trent Lott, D-Miss. in sponsoring a bill that would impose U.S. duties on foreign ships built in subsidized foreign shipyards, as well as on U.S. ships repaired in such ports. House sponsors were Reps. Helen Bentley, R-Md., Duncan Hunter, R-Calif., and Joseph Gaydos, D-Pa.

The U.S. trade representative, Carla Hills, supports the bill, Bentley said.

The lawmakers and the Shipbuilders Council of America blame billions of dollars in domestic subsidies by Japan, South Korea, West Germany and Norway for making efficient U.S. shipbuilding and repair operations uncompetitive - resulting since 1979 in the loss of 42,000 American jobs and the closing of 45 U.S. shipyards.

Since 1987, noted Mikulski, only one merchant ship has been built in the United States, reflecting a loss of U.S. economic power and human hardship.

''These were honest American men and women who put on their socks each day and went out to earn a living builiding ships for the U.S. Merchant Marine.''

The action follows more than one year of fruitless efforts by the trade representative to negotiate an end to such foreign subsidies.

The Shipbuilders Council had agreed with the USTR on a May 31 deadline for success in negotiations under section 301 of trade law to end the foreign subsidies. The talks have dragged on with an office of the Organization of

Economic Cooperation and Development - a grouping of the world's major industrial nations - that represents governments providing shipyard subsidies.

''No agreement is in sight,'' said John Stocker, SCA president, ''and we have concluded that the prospects for success are slim.''

Lott, the son of a Mississippi shipyard worker, said the legislation is ''to express our concern'' and to provide the Bush administration with some muscle in negotiations. He added that Congress need not apologize in taking a step that could lead to greater international trade frictions.

''If it sounds like (the bill is) protectionist, then I say: if the shoe fits, then wear it,'' said Lott. ''I see nothing wrong with protecting Americans jobs'' against unfair foreign competition.

#90206u1694 07/25/1990 ~United Press International

WAUWATOSA, WI (JULY 26) UPI - Legal attempts to force two young twins to be tested as possible bone marrow donors for their dying half brother may be for naught because the advanced state of the boy's leukemia has made surgery impractical, doctors said Wednesday.

The boy's father, Tamas Bosze, had filed suit in Cook County, Ill., seeking to force blood tests on his twins by another woman to see if they could help their dying half brother. A judge ruled against Bosze, but the case has been appealed to the Illinois Supreme Court.

Doctors said 12-year-old Jean-Pierre Bosze of Chicago, who has advanced acute lymphocytic leukemia, would not benefit from a bone marrow transplant.

''Based on our previous experience, at the advanced stage of his disease, we do not feel we can successfully do a transplant at this time,'' said Dr. James Casper, a physician at Children's Hospital of Wisconsin. ''The disease must be under better control before a transplant can be considered.

''Because this type of disease has proven to be resistant to standard treatment, it is crucial for the patient to have significantly less of a leukemic burden before a transplant is considered,'' Casper said.

Bosze was transferred to Children's Hospital to evaluate the possibility of a bone marrow transplant from an unrelated donor - a procedure in which the hospital specializes.

The mother of the 3 1/2-year-old twins refused to voluntarily allow the childrento be tested as possible donors, saying a bone marrow transplant would endanger their lives.

WASHINGTON (JULY 25) UPI - The Treasury Department auctioned $11.65 billion in two-year notes Wednesday at an average yield of 8.07 percent, the lowest since 7.71 percent on Dec. 19.

The government said the notes, paying interest at an eight percent rate, sold at an average of $99.873 with 100 equaling the face value and one point representing $10 on each $1,000 investment.

At the last auction of two-year notes, May 26, the average yield was 8.41 percent.

MOSCOW (JULY 25) UPI - President Mikhail Gorbachev Wednesday gave the country's growing illegal armies two weeks to disband and directed Soviet troops to hunt down vigilantes who fail to surrender their arms.

Gorbachev's decree was the most forceful step yet against the volunteer legions in the rival republics of Armenia and Azerbaijan and efforts to create national armies in the would-be independent Baltic republics of Latvia, Lithuania and Estonia.

''Armed formations created on the territory of the U.S.S.R. and not envisaged under Soviet legislation are illegal and must be disbanded within 15 days,'' the decree said, according to the official Tass news agency.

''They must surrender their weapons, ammunition and explosives to representatives of the U.S.S.R. Interior Ministry,'' it said. ''Otherwise ... the Interior Ministry and the KGB shall confiscate them.''

The decree said regular Soviet army troops could join the Interior Ministry and KGB forces ''if the actions of the armed formations endanger the population and the state's security.''

Volunteer armies in Armenia and Azerbaijan fought a virtual war in January over the contested enclave of Nagorno-Karabakh, the predominantly Armenian-populated region that has been part of Azerbaijan since 1923.

The decree may have been in response to a reported demand from Ayaz Mutalibov, president of Azerbaijan, for action against Armenian militants operating in his republic.

Mutalibov's demand Friday sparked a heated 90-minute exchange between Gorbachev and several presidents of the country's 15 republics gathered for a meeting of the Council of the Federation, the independent Interfax news service said.

Helicopters dropped thousands of leaflets over Nagorno-Karabakh on Tuesday with a message from Mutalibov warning that he has directed his republic's interior forces to ''clear the region of militants,'' Tass said.

Thousands of Soviet troops are currently deployed throughout the Transcaucasian republics of Armenia and Azerbaijan and in areas of Central Asia also hit by ethnic strife.

Dusk-to-dawn curfews remain in effect in parts of Armenia, Azerbaijan, Kirghizia and Tadzhikistan under states of emergency imposed in recurrent violence.

The Soviet soldiers have largely failed to prevent new clashes, often becoming targets themselves in situations that some journalists and lawmakers compare to the civil wars in Lebanon or Northern Ireland.

In Khabarovsk, a major city in the Soviet Far East, mothers and wives of Interior Ministry soldiers threatened to lie down in front of departing buses and planes to prevent their loved ones from being sent to Nagorno-Karabakh next month, the weekly Moscow News said.

The mothers also sent a petition to Boris Yeltsin, president of the Russian Federation, protesting the August callup order by Soviet Interior Minister Vadim Bakatin, the newspaper said.

''Please protect our sons and husbands from constantly extinguishing inter-ethnic conflicts,'' it quoted the appeal as saying.

The women vowed to block vehicles carrying the troops to Nagorno-Karabakh or stage a hunger strike to stop the military dispatch.

'''Occupiers' is probably the least offensive thing the soldiers heard from the local population (in Nagorno-Karabakh),'' Moscow News said. ''But if they refuse to fulfill the order, they lose their stripes.''

Krasnaya Zvezda, the official newspaper of the Soviet army, complained Wednesday that at least six vigilante groups were operating in Armenia and that ''criminal elements'' had infiltrated them.

A total of 2,000 rifles were seized in the first six months of this year in attacks by Armenian militants on Soviet army units, Krasnaya Zvezda said.

WASHINGTON (JULY 25) UPI - The Securities and Exchange Commission Wednesday reluctantly approved a one-year program in which the New York Stock Exchange will apply circuit breakers during periods of extreme market volatility. Although all four of the SEC Commissioners voted in favor of the program, they unanimously expressed regret that there were not other options available.

Richard Breeden, chairman of the SEC, termed the proposal "second best", but said "I intend to vote for this rule because I believe we owe a duty to 50 million Americans who directly and indirectly participate in the nation's securities markets through investments and their pensions and their IRA accounts."

"I wouldn't want my vote to be construed... as a vote in favor of an adoption on a permanent basis of the same kinds of triggers," said SEC commissioner Richard Lochner.

These triggers are an essential part of the pilot program, which calls for the NYSE to impose certain conditions on the execution of index arbitrage orders or transactions in NYSE stock baskets whenever the Dow Jones Industrial Average moves up or down fifty points from its level the previous day.

In essence, a 50-point move in the Dow in a single day would "trigger" a rule stating that all index arbitrage orders to buy component stocks of the S&P 500 could only be entered at a price that is equal to or above the price the stock's last preceding sale.

In the proposal filed with the SEC, the NYSE said the measures were

intended to "minimize excess market volatility that may be associated with index arbitrage trading and promote stabilization of the market."

Breeden stressed that the measure would not eliminate index arbitrage during periods of volatility, but only govern how it would be conducted. "This rule seeks not to prohibit arbitrage, but define how it can be conducted at certain extraordinary times," Breeden said at the hearing.

The pilot program will be reviewed at an interim period and at its conclusion before it is made a permanent feature of the NYSE.

#90206u1823 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - The financial records at the Pentagon are such a mish-mash that Congress's top bookkeeper told lawmakers Wednesday they remind him of the numerical nightmares at Chrysler Corp. or New York City in the 1970s.

But Comptroller General Charles Bowsher also said Defense Secretary Dick Cheney and his top aides are working to improve the situation. Bowsher, head of the General Accounting Office, also cautioned that any benefit accruing from the so-called "peace dividend" will not soon be felt.

He noted the drop in superpower tensions and increasing budget pressures will force down military spending, meaning the Pentagon will have to pay more attention to program management, frugality, and efficiency.

With that in mind, Bowsher told the House Armed Services Committee: "My observation from working on major financial crises involving New York City the Chrysler Corp., and the savings and loan industry is that accurate financial information was not available to decision-makers. Defense managers face similar problems."

Bowsher pointed to a recent examination of the Air Force accounting system believed to be the best within the Pentagon, that found the service "lacks accurate cost data for almost all of its non-cash assets, such as inventory." He noted the Air Force has an annual budget of about $90 billion and assets of $275 billion.

"The surprise in the Air Force situation was that the accounting was as bad as New York City. It was really bad," said Bowsher. "In this case, you won't have a formal government bailout. You literally bail (the Pentagon) out on an annual basis.

"What you've got here is ... accounting systems ... that don't tell the managers where they stand, what they've got or if they make a certain move what could be saved," he said.

Among the steps the Pentagon should take, Bowsher recommended, are cutting another $100 billion from its five-year spending plan, testing weapons more fully before putting them into production and re-examining major items like

the Seawolf submarine in light of the reduced military threat. The military also should reduce its $34 billion inventory of parts and get rid of duplicative organizations and systems, he said.

There are more than 100 major weapons programs under way at the Pentagon valued in excess of $1 trillion, with well over half that amount yet to be spent.

As for specific weapons, Bowsher suggested Congress think of cutting back on C-17 cargo planes and hold up production money for the rail-based MX missile. Bowsher said that a post-Cold War "peace dividend" may not flow instantly from steps taken in the next few years.

"The American people are going to be absolutely dumbfounded at what it costs to close (bases) and move some of the forces (home from) overseas," he said, adding: "We ought to recognize that the peace dividend will not come too fast."

"A lot of people had hoped the peace dividend would be large and immediate. It just won't be," Bowsher said.

#90206u1844 07/25/1990 ~United Press International
BOSTON (JULY 25) UPI - The AIDS epidemic shows no signs of waning in the United States but the infection rate varies widely across the nation, with inner cities in the Northeast the hardest hit, a hospital survey showed Wednesday.

Dr. Michael St. Louis of the federal Centers for Disease Control said his survey found the problem was the worst in the heart of Northeastern cities where up to 20 percent of men ages 25 to 44 may be infected with the AIDS-causing human immunodeficiency virus, or HIV.

The HIV infection rates among these men are ''markedly higher than those previously reported for any group of persons in the United States not specifically selected'' for HIV risks, St. Louis and his colleagues reported in The New England Journal of Medicine.

''Our findings yield no support for the premise that the AIDS epidemic will soon abate, even in the areas that were earliest affected, such as the New York metropolitan area,'' the researchers warned.

The study, which tested 89,547 blood samples collected at 26 large hospitals, indicated that ''in some poor inner city areas, AIDS is likely to be a tremendous burden in years to come,'' St. Louis said.

He said that, in those same areas, a relatively high percentage of women tested positive for HIV, indicating that AIDS cases among women and children will continue to increase.

To date, 139,765 cases of AIDS have been reported to the CDC and about 1 million Americans are thought to be infected with the deadly virus.

HIV is spread by sexual or blood-to-blood contact, like intravenous drug users sharing needles. It can also be passed on from an infected women to her baby.

In the study, part of an ongoing CDC project, blood samples were tested from patients who visited one of 26 so-called ''sentinel'' hospitals in 21 cities throughout the United States and Puerto Rico.

St. Louis said the samples were collected from January 1988 through June 1989. The patients involved were divided equally between males and females and represented a cross-section of the U.S. population by race and age. Patients were not informed of the test results.

Researchers excluded people undergoing treatment for AIDS-related illnesses or for other conditions such as gunshot or knife wounds, which often are associated with people who have high HIV rates.

By excluding those with known HIV risks, St. Louis said, ''We hoped to get a more representative look at HIV infection in the urban populations'' the hospitals serve.

Overall, 1,201 of the samples, or 1.3 percent, were HIV positive. That is about three times higher than the estimated infection rate in the general population. But St. Louis said that figure was not surprising since the incidence of AIDS in the cities where the hospitals are located is nearly twice the national rate.

The survey found that in general, HIV rates were highest in the Northeast and the South and lowest in the Midwest and the West. The two hospitals with the highest overall rates - 7.8 percent and 5 percent - were in Newark, N.J., and the South Bronx in New York City.

In the hospitals with the highest rates, the ratio of HIV infection between the sexes was lowest, with an average of three males infected for each female. St. Louis called the finding ''especially dismaying'' since the current national male-to-female ratio for AIDS cases is 9-to-1.

''We feel that what we're seeing with these HIV figures is a snapshot of the future, so it appears we can expect to see many more AIDS cases among women and children in years to come,'' he said.

In the hospitals with the lowest HIV rates, the infection was largely found in men, he said, indicating that, in the areas these institutions serve, HIV is concentrated among homosexuals.

Although nearly twice as many blacks as whites tested positive in hospitals with the highest HIV rates, St. Louis said that was not true in hospitals with lower rates, where black and white HIV ratios were comparable.

#90206u1845 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - The Senate, heeding warnings against busting the budget, refused Wednesday to increase farm subsidies to offset inflation - possibly the final blow to efforts to boost spending in the new farm bill. Leaders in the House and Senate said they hoped to complete work on the new farm policy bill by the end of the day.

Congress has shown little interest in changing the legislation. Since debate has opened, it has turned down attempts to increase farm subsidies and generally has given a cold shoulder to so-called reform amendments to trim or eliminate some agricultural programs.

It is rare for the House and Senate to debate the same issue at the same time. The House and Senate versions are similar in most areas but a final compromise version will have to be written.

The bills would spend about $54 billion on farm subsidies over five years - about the same as if there were no change from current law. The administration has warned that billions of dollars in cuts will be needed before the legislation becomes law. Leaders have put off spending cuts until later.

After a blunt warning from leaders that support for the bill could evaporate if the price tag was increased, the Senate defeated, 72-26, a proposal by Sen. Max Baucus, D-Mont., to raise crop target prices whenever inflation exceeds 4.8 percent a year.

Sen. Richard Lugar, R-Ind., said "indexing" could force "vast new

spending." He called the Baucus amendment "the potentially last obstacle" to the plan in the bill to freeze crop target prices for the next five years.

"It (the bill) is a carefully crafted, difficult compromise," said Agriculture Committee chairman Patrick Leahy, D-Vt., in opposing changes to the commodity programs.

Senators also rejected, 57-41, a proposal by Sen. William Roth, R-Del., to eliminate the peanut support program. He said the program, which regulates U.S. production and assures a price of at least $631 a ton, forces consumers to pay an additional $369 million a year.

Southerners said the program assures a fair price to growers, costs the government virtually nothing, and barely touches the consumer at all. Sen. Wyche Fowler, D-Ga., said peanuts account for only 40 cents of the price of a jar of peanut butter. Shortly after the Senate vote, the House ruled opponents could not bring up an amendment to eliminate the peanut program.

Both houses have rejected the idea of cutting the sugar support price, now 18 cents a pound, by two cents and the House has rejected proposals to raise the dairy support price.

The only loss suffered by the farm bloc was a Senate vote Monday to phase out the $100 millon honey support program by 1995. The Senate defeated a plan to cut off crop support payments to large farms.

Meanwhile, five former agriculture secretaries issued a statement of principles for the new farm bill but did not directly take a stand on the legislation being debated.

#90206u1848 07/25/1990 ~United Press International

BATON ROUGE, La. (JULY 25) UPI - State Rep. David Duke, the president of the National Association for the Advancement of White People and a former national Ku Klux Klan leader, qualified Wednesday as a Republican candidate for the U.S. Senate.

Duke paid a $900 qualifying fee and filed papers with the secretary of state about 20 minutes after state Sen. Ben Bagert of New Orleans, the official GOP candidate.

The two candidates are challenging Sen. J. Bennett Johnston, a Democrat who is seeking his fourth term in the Senate.

All three will face each other in an open primary Oct. 6. If no candidate wins more than 50 percent of the vote, the top two will be in a runoff on

Election Day, Nov. 6.

Duke, who has run second behind Johnston in virtually all polls so far, said he expected to make it to the runoff, despite the opposition from his own party.

''I think we can run even with Bennett Johnston or better in the first (election),'' he said. ''I think in the second, if we do that, there's not going to be any problem winning the Senate seat.''

Duke was elected to the Louisiana Legislature from a 99.5 percent white district in 1989 despite opposition from the national Republican Party, including Ronald Reagan and President Bush.

At a news conference, Duke said Wednesday that if he won, he would be less controversial than his critics believe.

''In fact the truth is, I don't think I'm going to be the most controversial senator. I think that will be reserved for Jesse Helms,'' Duke said, referring to the conservative Republican from North Carolina.

''I believe Jesse is just a little bit right of David Duke.''

Duke also contended that Johnston had betrayed the interests of Louisiana voters.

''I believe Bennett Johnston's support of the Ted Kennedy (civil rights) bill promoting affirmative action and minority set asides will be the last straw for the Louisiana voter. I think it's time we send a conservative senator to the United State senate and not somebody who's going to be voting for Ted Kennedy's legislation,'' he said.

DETROIT (JULY 25) UPI - The United Auto Workers blasted Chrysler Corp.'s top negotiator Wednesday for disclosing details of its bargaining stance to the media before it informed union negotiators, saying it will now be hard to meet the Sept. 14 deadline for a new contact.

UAW Vice President Stan Marshall, at an informal briefing at Chrysler's Highland Park headquarters, called Chrysler's approach to this year's labor talks ''arrogant,'' and reiterated that the union will not stray from pattern bargaining.

Pattern bargaining, or using similar frameworks for all three carmakers, was achieved by the UAW decades ago, giving it more bargaining leverage.

The union allowed Chrysler to break pattern in 1979 as the No. 3 carmaker teetered near bankruptcy, but restored wage parity in 1985 and common expiration dates in 1988.

The UAW, which has made job security its top priority, opened talks with General Motors Corp. and Ford Motor Co. last week to replace current three year pacts that also expire Sept. 14. About half a million U.S. autoworkers, including about 55,000 Chrysler employees, are covered by the agreements.

Chrysler spokesman Tom Houston countered Marshall's comments by saying the ''UAW is a respected partner and it is our hope that they will work with us toward a successful conclusion of these negotiations.''

Houston said Chrysler put its concerns before the union in a general context, and would be spelling out details as negotiations unfold.

''It is very important that all Chrysler constituents be aware of the very difficult situation the company faces,'' he said.

Anthony P. St. John, vice president of employee relations for Chrysler, outlined the automaker's proposals Friday in attempts to call attention to the company's special needs when compared with GM or Ford.

They included possible employee ownership in which workers might own a chunk of the company, gain sharing and revised health care coverage to contain soaring costs.

Marshall, head of the union's Chrysler department, said the union is not receptive to proposals like gain sharing, an increasingly popular industry practice that awards workers on a regular basis for reduced absenteeism or gains in productivity and quality.

Top UAW official oppose gain sharing because it puts part of the worker's pay at risk.

''That wasn't brought up at GM or Ford so we won't even discuss it here with Chrysler because we're only interested in pattern bargaining,'' Marshall said, although he said the union will discuss special considerations concerning the proposed closing of its St. Louis No. 1 plant in Fenton, Mo.

Chrysler now plans to close that car plant Nov. 9. after several postponements.

The UAW spent the last two days putting its proposals on the table, including employment and income security and benefits, although no wage amounts were set forth.

UAW bargainers at GM and Ford are being treated this week to a look at future product lines at those companies, partly to convince the union that they will ensure the job security of workers because of anticipated strong demand for them.

#90206u1919 07/25/1990 ~United Press International

FORT CAMPBELL, KY (JULY 25) UPI - An Army helicopter crashed during a training exercise Tuesday night, killing two soldiers and injuring three, officials said.

The CH-47D Chinook helicopter crashed at 10:30 p.m. in the Golden Eagle Landing Zone in the southeast corner of the base on the Tennessee-Kentucky border during a training exercise, said Sgt. Steve Sanderson, a Fort Campbell spokesman.

Sanderson said the names of the dead are being withheld until their relatives could be notified.

Officials from the Army Safety Center at Fort Rucker, Ala., arrived Wednesday to begin an investigation into the cause of the crash.

''Obviously, we're not going to be able to determine what the cause is today. It may take some time,'' Sanderson said.

Army investigators say it will take at least three weeks to complete a preliminary report.

The helicopter was taking part in a training exercise for lifting and carrying cargo in a sling beneath the craft at the time of the accident, Sanderson said.

The injured soldiers were identified as: Chief Warrant Officer 4 Dale Tate 45, of Spokane, Wash., the pilot; Second Lt. Nancy Schultz, 30, of Cleveland, Ohio, the co-pilot, and Specialist Carlos Clyburn, 22, of Detroit, the crew chief.

CHICAGO (JULY 25) UPI - Wednesday's truck and rail bids for grain delivered to Chicago, including delivery time, price and change from previous business day:

No. 2 soft wheat: up to 30 days, 2.96 1/2-3.06 1/2 down 2 to up 3.

No. 1 yellow soybeans: up to 15 days, 5.83 3/4 up 1 1/2 to down 1/2.

Terminal elevator bids: No. 2 yellow corn, up to 15 days, 2.57 3/4-2.60 3/4 up 1 1/4 to 2 1/4.

Processor bids: No. 2 yellow corn, up to 15 days, 2.75 3/4-2.76 1/4 down 3/4.

CAPE CANAVERAL, FL (JULY 25) UPI - An Atlas 1 rocket boosted a $189 million satellite into orbit five days late Wednesday on a mission to paint Earth's invisible magnetic field with clouds of glowing chemicals, creating artificial northern lights visible across America.

The chemical releases, scheduled to begin in September and continue through next July, should be visible to observers in the United States, creating celestial displays that resemble the aurora borealis, or northern lights.

The Combined Release and Radiation Effects Satellite - CRRES - also carries Defense Department experiments to study the effects of space radiation on microelectronics, research expected to help engineers design satellite equipment that is better able to withstand the rigors of space.

Running five days late because of a series of unrelated problems, the powerful main engines of the commercially built Atlas 1 flashed to life at 3:21 p.m. EDT, majestically pushing the 143-foot-tall booster away from launch complex 39-B at the Cape Canaveral Air Force Station.

''We have about the best flight we could possibly hope for,'' launch commentator George Diller said after the Atlas 1 arced east over the Atlantic Ocean and roared toward space with sun glinting off the white nose cone.

About 31 minutes after liftoff, the solar-powered, 3,732-pound satellite, built by Ball Corp. of Denver, was safely ejected into a highly elliptical or egg-shaped orbit.

''Spacecraft separation! Very clean data on spacecraft separation,'' said engineer Skip Mackey, prompting applause and handshakes among controllers.

CRRES was built primarily to study the interaction between the supersonic solar wind, Earth's upper atmosphere and the magnetic field surrounding the planet, an invisible structure called the ''magnetosphere.''

Equipped with a battery of sophisticated sensors, CRRES carries 24

canisters of barium and lithium that will be released into space and detonated over the next year, ''painting'' the otherwise invisible magnetic field with vast clouds of glowing chemicals.

The launch was originally scheduled for Friday, but was postponed by a fuel leak. The threat of stormy weather delayed blastoff on Sunday and a faulty electrical switch prompted another scrub on Monday.

The mission marked the debut of the Atlas 1 rocket, a commercial version of the workhorse Atlas-Centaurs built by General Dynamics Corp. of San Diego, Calif. A successful launch was considered crucial to the company's plans to win a share of the lucrative commercial launch market, dominated by the European Ariane rocket program.

An Ariane 4 rocket Tuesday boosted two European communications satellites into orbit, putting the Ariane program back on track after a February failure destroyed two Japanese relay stations.

CRRES was built to study the invisible bubble of Earth's magnetic field, called the ''magnetosphere,'' to learn more about how it interacts with the solar wind, a stream of electrons, protons and other particles blasted away from the sun.

When high-energy particles from a solar flare smash into the magnetosphere for example, a ''geomagnetic storm'' can occur, disrupting communications and causing problems for electrically sensitive satellites.

To learn more about how the process works, CRRES will release chemical ''tracers'' into space that will briefly paint the otherwise invisible magnetic field with bright colors.

For each experiment, one or two canisters will be ejected into space and detonated about 25 minutes later, after the satellite is a safe distance away.

High-energy ultraviolet light from the sun then will ionize the released chemicals, changing the number of negatively charged electrons in a given atom to give the gas an electrical charge.

The resulting ''plasma'' clouds, initially 60 miles or so in diameter, then will stretch out along Earth's magnetic field lines much like iron filings will line up around a bar magnet to make its force field visible.

By studying how the clouds move, scientists will be able to learn more about the interaction between the planet's magnetic field and atmosphere and plasmas like the solar wind. Such particles spiraling along magnetic field lines create spectacular auroral displays near the planet's poles.

NEW YORK (JULY 25) UPI - Hachette, the French media giant, will retain ownership of Woman's Day magazine, one of the largest-selling publications in the country, after failing to find a buyer who wanted to pay "the true worth of this very valuable franchise," the company said Wednesday.

Daniel Filipacchi, chairman of Hachette Publications Inc., said the auction, designed to find a purchaser, elicited bids that did not reflect the magazine's value, resulting in a decision to withdraw it from the market.

"Hachette intends to invest its considerable resources in this valuable, 53-year-old magazine to maintain Woman' Day as the number-one magazine in its field in the 1990s," Filipacchi said.

Woman's Day has an average issue sale of 4.6 million, primarily on newstands. Hachette, headquarted in Paris, is a $5 billion multimedia company with interests in television, book publishing, magazines and newspapers in 39 countries.

#90206u1981 07/25/1990 ~United Press International

BELGRADE, YUGOSLAVIA (JULY 25) UPI - Serbian nationalists in the Republic of Croatia launched an ''uprising without arms'' Wednesday, declaring the establishment of autonomous Serbian enclaves in a grave escalation of the ethnic tension threatening the unity of Yugoslavia.

Croatian President Franjo Tudjman charged the move was fomented by the Communist government of Serbia with the aim of destabilizing his recently elected nationalist government to justify the deployment of Yugoslavia's Serbian-dominated army.

Frictions are already high between the two republics, fueled by rising nationalist sentiments that have reopened historical wounds and rivalries suppressed since the communist takeover of Yugoslavia in 1945 at the end of World War II.

Some analysts consider Serbian-Croatian tensions the most serious threat to the integrity of the country of 23 million, which was formed in 1918 after World War I.

The declaration of autonomous Serbian enclaves in Croatia was issued at a rally attended by tens of thousands of Serbs in a small town 320 miles southwest of Belgrade. The meeting was dubbed ''the first Serbian assembly.''

''This is the revolt of the Serbian people. This is an uprising of the Serbian people, but an uprising without arms,'' declared Jovan Raskovic, president of the Serbian Democratic Party in Croatia. ''We shall try to keep as wide as possible the distance between such a psychological and national uprising and an armed uprising.''

The rally approved the formation of a 14-member ''Serbian National Council'' to administer more than 10 Serbian-dominated municipalities scattered from the Adriatic coast to Zagreb, the capital of Croatia, which is home to about 3.5 million Croats.

The 600,000 Serbians in Croatia have been agitated since April assembly elections in which Tudjman and his Croatian Democratic Community toppled the republic's Communist regime on a wave of extreme Croatian nationalism.

They are afraid that their rights will be reduced under a new constitution being promoted by Tudjman, a former Communist army general drummed out of the service 20 years ago for espousing Croatian nationalism.

''I am against armed uprisings, but I am in favor of all protests and revolt which will not touch human body,'' declared Raskovic, a bearded psychiatrist. ''We shall not take up arms, we shall kill nobody, and if there is the evil today in these areas, then let us hope it will swallow itself.''

Raskovic has been working for the past three months to tranform his party into a vehicle to unite Serbian areas across Croatia.

In Zagreb, 250 miles west of Belgrade, Tudjman charged that the declaration was inspired by the Communist leadership of Serbia, which began exploiting latent Serbian nationalism three years ago as a means of perpetuating its rule.

''There is a scenario to destabilize Croatia and to turn Croatia into Kosovo and to force military intervention,'' he alleged in a statement carried by Belgrade Television.

Kosovo, a province in southern Serbia, has been enmeshed in a conflict between its 1.7 million ethnic Albanians and 200,000 Serbs for the past nine years. Earlier this year, more than 30 ethnic Albanians were killed in clashes with security forces.

Serbia suspended the provincial administration on July 5 after ethnic

Albanian lawmakers declared independence from the republic. Serbia assumed complete control of the province and troops and Serbian paramilitary police force have been deployed.

Yugoslavia's 8.5 million-strong Serbian majority cherishes Kosovo as the ''cradle'' of its heritage and Orthodox religion.

NEW YORK (JULY 25) UPI - Average yields for money market mutual funds were lower in the latest reporting week, while rates at competing savings and loan institutions also were mostly lower, institutions that track these yields and rates said Wednesday.

The Donoghue Organization, of Holliston, Mass., said average seven-day simple yields were at 7.59 percent, down from 7.66, and 30-day simple yields stood at 7.65 percent, off from 7.66. The average maturity of fund portfolios was unchanged at 44 days.

The Bank Rate Monitor, of North Palm Beach, Fla., gave average rates as follows: money market deposit accounts, 5.95 percent, down from 5.97; Super-Now accounts, 4.99 percent, unchanged; six-month certificates of deposit, 7.65 percent, down from 7.68 percent; 1-year CDs, 7.77 percent, down from 7.81 percent; 2 1/2-year CDs, 7.80 percent, down from 7.82; and five-year CDs, 7.88 percent, down from 7.90 percent.

The average rate for a one-year, adjustable-rate mortgage was 8.41 percent down from 8.46 percent.

The average rate on a 15-year, fixed-rate mortgage fell in the latest week to 9.62 percent, against 9.65 percent, while the average rate for a 30-year, fixed-rate mortgage was 9.81 percent, down from 9.87 percent.

The average rate for a four-year automobile loan was 12.26 percent, down from 12.28 percent.

WASHINGTON (JULY 25) UPI - Charging the pending Louisiana anti-abortion law would make one of the most popular forms of birth control illegal, a group of health professionals Wednesday urged Gov. Buddy Roemer to veto the bill.

''The inclusion in this legislation of a possible prohibition on the prescribing of intrauterine contraceptives goes beyond scientific plausibility,'' the Association of Reproductive Health Professionals said in a letter to Roemer.

''We ... urge you to veto any legislation containing any possible prohibition on the use of the IUDs,'' said the letter, signed by Dr. Richard Derman, chairman of the group.

In mid-July, Louisiana Attorney General William Guste said his reading of the law as hurriedly passed by the Legislature was that it would criminalize the use of intrauterine birth control devices.

Under terms of the law, users of an IUD could be setenced to up to 10 years in prison.

Guste said, however, it was unlikely anyone would ever be prosecuted.

The measure, as passed and sent to Roemer, defines abortion as ''terminating a pregnancy'' or the ''use of any instrument'' to end a pregnancy. An IUD works by preventing the fertilized egg from attaching itself to the uterine wall after conception.

''If those things (IUDs) destroy a fertilized ovum, then technically, it would be prohibited to use them,'' Guste said in his mid-July interview with UPI.

Derman's letter said the availability of legal abortion since 1973 ''has prevented millions of personal tragedies from taking place.''

''What Louisiana (and the nation) needs are human, effective, available educational programs and contraceptive services that will avert the need to resort to abortion to correct the tragedy of an unintended pregnancy,'' he said.

Roemer vetoed an earlier, even more restrictive version of the anti-abortion legislation and the current pending law was hastily approved by the legislature Sunday, July 8.

The governor, who can veto the proposal, sign it or allow it to become law without his signature, has until July 29 to act.

''Angry, punitive legislative actions are not the way to help the people of this great land of ours achieve the goal of only birthing planned and wanted children,'' Derman told Roemer.

#90206u2041 07/25/1990 ~United Press International

ASHEVILLE, NC (JULY 25) UPI - Lawmen Wednesday pieced together a chronology to help determine whether an alleged serial killer who confessed last week to killing four women is a suspect in more than a dozen other disappearances.

Lesley Eugene Warren, 22, described by authorities as a member of the ''punk'' counterculture because his orange hair is cut in a Mohawk style,

was being held without bond in the Buncombe County Jail.

Warren was arrested last Friday in High Point, N.C., on charges of killing three women since 1987.

Warren confessed to the three killings and also admitted to killing a fourth woman - a part-time waitress who disappeared after he took her for a motorcycle ride July 15.

Asheville Police Chief Gerald Beavers said he has received more than a dozen calls from parents whose daughters have disappeared.

''There is a strong possibility that there are other victims,'' Beavers said. ''We are looking into that.''

Beavers said New York State police and sheriff's detectives from Spartanburg County, S.C., are also fielding such calls.

''They've called us and they've called the other departments as well,'' Beavers said. ''I am sure everyone who has a daughter who is missing is very concerned she may have fallen prey to him.''

Spartanburg Sgt. Gary Williams said law officers there were compiling a list of places Warren has lived, worked and visited over the past several years.

''Basically, we are compiling a detailed chronological order of where he was at what time so anyone who calls and says, for example, 'My daughter disappeared here in December 1986,' we know he was in the Army then so that would disqualify that particular incident at that time,'' Williams said.

The officer said most of the calls his department has received have come from other police agencies investigating unsolved crimes.

''We've not gotten a whole lot of calls, but then we don't know how widely published this has been yet,'' said Williams. ''We've had calls from different agencies that have unsolved homicides and we check to see if there is a common thread.''

The first woman Warren is charged with killing was Patsy Vineyard, 20, wife of a fellow soldier at Fort Drum near Watertown, N.Y. She disappeared from her Sacketts Harbor, N.Y. home while her husband was on maneuvers in May 1987. Her body was found in Lake Ontario.

Second was 42-year-old Velma Faye Gray of Travelers Rest, S.C. Her body was found Aug. 27, 1989, in Lake Bowen.

Third was Jayme Denise Hurley of Asheville, who disappeared May 25. Her body was found last week, buried in the Pisgah National Forest not far from the Blue Ridge Parkway.

Warren became a suspect in Hurley's when he was arrested on charges of stealing her purse, a misdemeanor.

However, authorities had not yet found Hurley's body so they could not charge him with killing her. He was out on bond when he allegedly killed his fourth victim, Katherine Johnson, 21, of High Point.

Her body was found in the trunk of her car last Friday after Warren was arrested. Beavers said Asheville police did not know Warren was in High Point.

''Oh, Lord, no - we certainly did not know where he was. That's what burns me up. If we'd known where he was we would have gotten him before all that. We had folks working around the clock on this case.''

Beavers said residents of western North Carolina were stunned to learn an alleged serial killer was living in their midst.

''All of us feel those are the kinds of things that happen in New York,'' the police chief said. ''They don't happen in a place like Asheville.''

#90206u2044 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - The Department of Energy will tell Congress next month the superconducting super collider can be built in Texas for a total cost of $7.8 billion, if there are no delays in the mammoth scientific project, Deputy Energy Secretary Henson Moore said Wednesday.

The $7.8 billion cost estimate for the mammoth scientific project is the lowest of three draft estimates submitted to the department and the one the agency expects to ''go with,'' Moore said, since it comes from the super collider's primary contractor, Universities Research Associates.

''They believe they can build it on time by 1998 for a little over $7.8

billion,'' Moore said. ''We think the proper management practice is ... we're going to hold the contractor to the cost he says he's going to build it for.''

The other two estimates submitted at the request of the department are $8.3 billion, from the department's own staff, and $8.6 billion from the group of scientists called the High Energy Physics Advisory Panel.

Moore stressed that the two higher estimates are the result of leaving greater room for ''contingencies'' that could delay the project and therefore increase its costs.

''What these other two are saying is if something goes wrong, here's what it's going to cost you,'' Moore said.

The Energy Department is still awaiting a fourth cost estimate from an independent panel and, with that in hand, expects to present a ''hard number'' to Congress about Aug. 17, he said.

Moore added because each group of estimators is in basic agreement on the cost of construction, disagreeing only on the cushion needed for delays, he expects the figure given to Congress will closely reflect the contractor's $7.8 billion estimate.

''How much of a contingency fund do you build in? That is the only question,'' Moore said.

The $7.8 billion figure is under the $8 billion the department gave lawmakers earlier this year as a preliminary estimate, but nearly $2 billion more than its scientists predicted before changes in the super collider's design were made.

The super collider, to be built at Waxahachie, Texas, will be an underground tunnel of supermagnets 54 miles in circumference capable of smashing protons together at near-light speed. Scientists hope it will help them unlock the secrets of the smallest building blocks of the universe and Texans and a variety of academic labs and industries expect it to be a financial bonanza.

LOS ANGELES (JULY 25) UPI - Marlon Brando's son, Christian, ordered to stand trial for allegedly killing his half-sister's boyfriend, remained jailed Wednesday as his family scrambled to post $10 million bail and find

his passport, which must be surrendered before he is freed.

Brando's family has the option of posting the bond - believed the highest amount in Los Angeles County history - in either cash, property or a combination of both.

Pamela Wells, a legal assistant to Christian's lawyer, Robert Shapiro, said Christian's passport would also have to be turned over to authorities to gain his freedom. The document has not been found, she said.

On Tuesday, Municipal Court Judge Larry Fidler ordered Brando to stand trial for murder and possession of an illegal weapon, an assault rifle not used in the slaying.

Despite urgings from prosecutors that Brando be denied bail because he is an alleged flight risk, Fidler set the bond at $10 million.

Shapiro told the judge that the amount of bail is ''not an issue,'' given the family's resources.

Brando, 32, a welder, is next scheduled to appear in Superior Court in Santa Monica Aug. 7 to enter a plea to charges he murdered Dag Drollet, 26 the Tahitian boyfriend of Cheyenne Brando and father of her child, born in June.

Brando's laywers claim the May 16 shooting was a tragic accident that arose from a struggle for a gun, or, at worst, the result of Christian's drunken rage upon learning that his sister, pregnant at the time, had been physically abused by her boyfriend.

But prosecutors allege Brando premeditated the killing, then put a .45 caliber pistol to Drollet's left cheek and pulled the trigger as he sat watching television in the den of Marlon Brando mountaintop estate.

On June 15, Cheyenne Brando, 20, left for Tahiti. She has not returned despite being subpoenaed to testify. Police have said her initial statements support the notion that Christian intended to kill Drollet.

Prosecutors, however, face an uphill battle in winning a first-degree murder conviction. Tapes of a detailed statement given by Brando to a police detective were ruled inadmissible because he was not properly read his Miranda rights. Additionally, the judge ruled that the statement given by Cheyenne Brando is also inadmissible unless she is available for direct cross-examination by the defense.

WASHINGTON (JULY 25) UPI - Sharply criticizing the Eritrean rebels fighting the Ethiopian government, a State Department spokesman said Wednesday that blocking food relief supplies is ''reckless and inexplicable.''

Spokesman Richard Boucher said the Eritrean People's Liberation Front has for the past two weeks blocked a U.N. team that could open the way for international food relief.

Despite earlier statements that they would allow the U.N. team to enter the port of Massawa, the EPLF commanders blocked the survey team.

''Their behavior is as reckless as it is inexplicable,'' said Boucher.

The EPLF, which appears to be close to winning the long war against the Marxist government in Addis Ababa, has been backed by Arab governments, chiefly Saudi Arabia.

According to estimates by the U.S. Agency for International Development, about 1 million people are at risk of starvation if the food supplies do not get through. Many of the 1 million people are Eritreans, backers of the EPLF force.

''The Eritrean insurgents are endangering the lives of these people by subordinating the relief effort to their political agenda,'' Boucher said.

''We hope the insurgents will evaluate the decision,'' he added, and let the food relief operation go through.

The United States and the Soviet Union, among other countries, have cooperated in delivering the food to refugees trapped in camps by the civil war. But the EPLF action appears to have put a temporary halt to the cooperative effort.

#90206u2121 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - Film directors Martin Scorsese and Spike Lee have teamed up on a new government advertising campaign that sends teenagers the message: Drug use can lead to unsafe sexual behavior and AIDS.

The new television, radio and print campaign focuses on people ages 12-16, a segment of the population that are ''are using alcohol and illicit drugs and often engage in sexual activity while under the influence of these substances,'' said Charles Schuster, director of the National Institute on Drug Abuse, the agency sponsoring the $3 million public service campaign.

The ads assume teenagers already know alcohol and drug use can cause car accidents and wreck lives. The new message is found in the ads' tag line: ''AIDS. Another way drugs can kill.''

''Use of ... drugs can cloud judgment, induce risk-taking and even damage the immune system of the drug user,'' Health Secretary Louis Sullivan said at a news conference Wednesday unveiling the spots. ''For most youngsters, the decision to have intercourse is spontaneous, not planned. And many of these decisions are made under the influence of alcohol and other drugs.''

The television ads were directed by Scorsese and narrated by Lee.

One of the three 30-second spots shows a couple embracing and kissing on a beach. Lee says, ''Tonight, Delores had a few drinks, did some crack and ended up another tragic story. Only she doesn't know it yet. Drugs make you forget. And if you forget how risky sex can be, you could catch the AIDS virus and not know it for months. AIDS. Another way drugs can kill.''

The 60-second spot - which also will be shown before feature movies at theaters - begins with scenes from popular horror movies and includes such characters as Freddie Kruger, Leather Face and Michael Myers. After scenes showing skeletons, coffins and knives, Lee says, ''If this doesn't scare you, just wait.'' The scene changes to a young girl in a doctor's office.

''One night a year ago,'' Lee says, ''Vanessa got high with some guy and forgot everything she learned about preventing AIDS. Now her life is the horror show.''

None of the spots mention measures people can take to prevent the spread

of AIDS, such as abstinence or use of a condom.

But Assistant Secretary for Public Health James Mason said, ''If you come under the influence or alcohol or drugs, you become so wiped out ... protection goes out the window.''

Mason said one-fifth of all AIDS cases reported since 1981 involve people 20-29 - 280,000 cases. Since incubation of the AIDS virus takes seven to nine years, many of these people were infected during their teen years.

The campaign was released as a new Centers for Disease Control study found no waning of the AIDS epidemic.

The Advertising Council is organizing the campaign. Broadcast stations will donate air time to run the ads and newspapers will provide free space.

Scorsese and Lee did not donate their services, but their fees were low, Ad Council officials said.

#90206u2130 07/25/1990 ~United Press International

BOSTON (JULY 25) UPI - Digital Equipment Corp. said Wednesday it will cut 6,000 employees from its worldwide payroll and took a $400 million restructuring charge for the voluntary severance program, resulting in its

first quarterly loss ever.

The reductions, amounting to about 4.8 percent of the company's global workforce of 124,000, will come "across all functions" and affect operations in both the United States and Europe, John F. Smith, the company's senior vice president of operations, told a hastily arranged news conference.

The emphasis of the cuts probably will be in manufacturing, where the nation's No. 2 computer maker has overcapacity, Digital spokesman Mark Steinkrauss said in an earlier interview.

Smith said no major plant closings were planned although some smaller facilities would be "consolidated" and closed. He said future layoffs, plant closings or additional losses could not be ruled out, though none were anticipated.

Smith promised the cuts will not disproportionately affect either Massachusetts or New Hampshire, two New England states already economically troubled and reeling from a continuing recession in the computer industry. In both states, Digital is the biggest private-sector employer.

He said fewer than 2,000 of the company's 32,000 Bay State workforce would be affected. In New Hampshire, where the company employs about 7,800, he also said he does not expect disproportionate cuts.

The newest severance program will be less attractive than a recently completed incentive plan that 3,000 Digital employees accepted by its July 1 expiration, Smith said. The earlier one, which offered up to two years' pay for employees with 20 years seniority, was "oversubscribed," a company spokesman said.

Although details have yet to be worked out, the new program will be valuable and the company is confident it can persuade employees to take it Smith said. "There's value there" in the package, he said. "It helps people transition to another situation." The new program will be offered to many employees who did not have the option of taking the first one, a spokesman said.

Digital's loss for the fourth quarter ended June 30 was $256.7 million, compared with a profit of $313.2 million, or $2.51 a share in the same quarter last year. Total operating revenues for the company fell 3.8 percent to $3.49 billion from $3.37 billion in the year-ago quarter.

Smith said the company's new mainframe computer, the VAX 9000, is doing well. "Technologically, it's working well and we're quite pleaed with it." Digital expects to ship 100 VAX 9000 line machines in the current quarter "and then we'll have a good indication of the true demand" for the

company's first entry in the tough mainframe computer market dominated by International Business Machines Corp., the world's biggest computer maker.

For the year, Digital still managed a small profit, $74.4 million or 59 cents a share. That was down 93 percent from the $1.073 billion or $8.45 a share for the year ended June 30 1989.

Wall Street initially seemed to applaud the planned workforce reduction, driving Digital's stock up $1 a share in early New York Stock Exchange trading, but the stock fell back in afternoon trading to close at $74.875 a share, down 62.5 cents from Tuesday's $75.50-a-share close. Digital trading Wednesday was active, with some 1.1 million shares changing hands on the NYSE.

One analyst, Stephen K. Smith, who follows Digital for Paine Webber Inc., called the announcement a "turning point" for the company. "People didn't think they were serious about cutting costs until today," he said. He estimated the savings from the cuts at about $2 a share during the next fiscal year.

"I think this is the turning point. I think the September quarter is going to be tough, but things are going to be getting better from there, both with the new product cycle and the cost-cutting."

CHICAGO (JULY 25) UPI - Bally Manufacturing Corp. Wednesday posted second-quarter earnings of $9.2 million, or 26 cents a share, down 57 percent from $21.5 million, or 68 cents a share, during the year-ago

quarter when sale of a subsidiary swelled income.

Overall income for the second quarter was $553.57 million, up from $518.8 million during last year's second quarter, Bally Chairman Robert Mullane said.

For the first half of 1990, earnings were $16.8 million or 47 cents a share, compared with $33.35 million or $1.06 a share for the first half of last year.

Overall revenues for the year-to-date were $1.1 billion, up from $1 billion during the year-ago period.

Last year's figures include the sale of Bally's Alladin's Castle amusement center subsidiary for $33.9 million or $1.08 a share.

Operating profits from the company's four casinos improved despite the openings of new, competing mega-casinos in both Las Vegas and Atlantic City, Mullane said. The products and services group showed improvement for the sixth straight quarter and the fitness center operations achieved record second-quarter profits.

''The outstanding performance of our fitness center business reflects the major repositioning of that business during the past two years,'' Mullane said in a statement. ''We believe our investment will now yield substantial returns in the fitness center business,'' he said.

Bally operates four casino hotels and a national network of fitness centers and manufactures gaming equipment and systems, fitness products and lottery products and services.

#90206u2178 07/25/1990 ~United Press International

DALLAS (JULY 25) UPI - Creditors continued to press their case Tuesday against the bankrupt Hunt brothers, claiming the former billionaires are entitled to only small payments for promoting the recent sale of their coin collections and other antiquities.

The Hunts' creditors, led by the Internal Revenue Service, argued in U.S. Bankruptcy Court that the Hunts' cooperation had no effect on last month's auction by Sotheby's in New York, which raised $21 million.

But lawyers for Nelson Bunker and William Herbert Hunt claim a deal made to gain the Hunts' cooperation entitles the brothers to as much as $5 million from the auction's proceeds.

U.S. Bankruptcy Judge Harold Abramson concluded the four-hour hearing by asking lawyers for both sides to file memos by Friday afternoon assessing the value of the Hunt name alone.

Justice Department Attorney Grover Hartt III said the Hunts' efforts consisted of ''a few cocktail parties and a couple of press conferences

choreographed by Sotheby's.''

But Nelson Bunker Hunt's attorney, Henry Simon, argued that an agreement the brothers made with the creditors clearly states the Hunts should receive 60 percent of the proceeds above an unspecified ''benchmark,'' and the question of what they did to promote the auction is irrelevant.

''The IRS' proposal is simple: 'We keep all the money,''' Simon said.

One thing that both sides agreed upon was that the benchmark was not set before the auction and now appears to be next to impossible to determine.

The creditors propose to give Nelson Bunker Hunt about $400,000 and his brother less than $34,000, an offer Hartt said was essentially a cash settlement.

''The only thing we've proven after literally hundreds of thousands of dollars in attorney's fees is that the benchmark value cannot be proven,'' said Barbara Houser, an attorney for Minpeco, a Peruvian mining company that won a lawsuit against the Hunts stemming from their efforts to corner the world's silver market.

CHICAGO (JULY 25) UPI - Stone Container Corp. Wednesday reported second-quarter earnings of $29.5 million, or 49 cents a share, off 54 percent compared with $63.6 million, or $1.06 a share, a year ago.

Sales for the quarter, however, increased to a record $1.43 billion compared with $1.38 billion a year ago.

Earnings for the first half of the year fell 56 percent, to $62.2 million, or $1.10 a share, compared with $150.4 million, or $2.50 a share, last year.

First-half sales rose to $2.88 billion compared with $2.51 billion a year ago - but the company noted the principal factor in the increase was the inclusion of operating results for Stone-Consolidated - formerly Consolidated-Bathurst Inc., which Stone Container acquired last March.

Stone Chairman Roger W. Stone said continued discount pricing was primarily responsible for 1990 earnings shrinkage, while increased interest expenses and a higher effective tax rate also contributed to the decline.

But Stone said price increases have been implemented or announced for newsprint, paper bags and linerboard, and ''we also believe that pricing for corrugated containers has bottomed.''

He also cited other positive signs for earnings improvement.

Stone said the company has received commitments from a group of banks for a standby credit facility of $400 million for possible use in semi-annual repayments of an existing bank loan.

He also noted the company has recently completed negotiations with the Canadian Paperworkers Union on a new three-year contract for workers at three Canadian mills.

''Though we see 1990 as a difficult year, with the Canadian union negotiations behind us, the increased flexibility provided by the new bank (credit) facility, and the positive swings in certain of our major product lines, we believe that the long-term, outlook is very positive,'' Stone said.

-30- 2077

#90206u2260 07/25/1990 ~United Press International

PORTLAND, OR (JULY 25) UPI - City Commissioner Dick Bogle agreed Wednesday to pay a former aide $20,000 to settle a sexual harassment claim against him, trying to quiet a public outcry over his earlier request that the city foot the bill.

Former aide Faye Burch, 40, filed a complaint in March with Oregon's Bureau of Labor and Industries.

She alleged that Bogle grabbed and hugged her, told her he dreamed about her, made her turn around to see how her clothes fit, suggested they go on an overnight trip to the beach and invited her to his health club for a ''senusal massage.''

Burch only filed a complaint with the state, which was preparing to investigate the case, and had not brought a lawsuit. But city officials apparently were eager to settle the case before any suit could be filed.

After discussing the matter with city risk-management officials, Bogle said he decided it would be better to settle the matter, rather than chance having it go to court.

City Attorney Jeff Rogers told commissioners Wednesday the city was obligated by law to pay judgments against city officials incurred during their course of duty.

Just as Mayor Bud Clark suggested that commissioners should vote on the proposed settlement, Bogle interrupted to make a comment.

Bogle said if the case had gone to trial, taxpayers would have paid a much higher bill, even with an innocent verdict.

''Furthermore, I realize that if we went to trial we might lose and the city would be required to pay a much larger amount,'' he said. ''Because of this uncertainty, I believe it is wise to settle this matter now.''

Bogle also said he already had apologized to Burch and that he was using Wednesday's meeting ''to apologize to the citizens of the city.''

He said the vast majority of people who had contacted his office in recent days expressed strong feelings he should pay the settlement from his own pocket.

NEWARK, NJ (JULY 25) UPI - The former executive director of the Passaic Housing Authority and the agency's former attorney Wednesday pleaded guilty to federal charges of lying to Congress, tax evasion and conspiracy.

The guilty pleas bring to 11 the number of housing authority officials and contractors in New Jersey who have pleaded guilty to committing crimes involving Department of Housing and Urban Development-sponsored activities.

The Passaic Housing Authority, which now has five people convicted of housing crimes, was taken over by HUD in January.

''Today's pleas and the earlier convictions underscore the fact that corruption and fraud in HUD housing authorities have been both extensive and pervasive,'' said U.S. Attorney Michael Chertoff.

Paul Marguglio, the former executive director, pleaded guilty to conspiracy for attempting to hide the fact he held multiple job titles, and collected salaries for each job, and evading taxes on money he took in kickbacks.

Marguglio, who headed the PHA for 18 years, was earning $84,000 a year as executive director when he added three additional job titles - those of modernization officer, contracting officer and purchasing officer - and collected the salaries between August 1988 and December 1989, Chertoff said.

The multiple job titles, a violation of HUD rules, gave Marguglio $125,000 in excess salary over 16 months, said Chertoff.

Marguglio's plea to tax evasion was limited to just one year, 1987, when he said he took $55,000 in kickbacks, including $30,000 from August Michaelis, the attorney for the PHA for 18 years.

Michaelis admitted lying to Congress during an appearance before a House sub-committee on March 9 and to conspiring to help Marguglio evade taxes on $150,000 Michaelis paid to him in kickbacks over the last five years, said Chertoff.

In appearing before the committee investigating abuses at HUD, Michaelis ''was asked whether he knew about the multiple salaries and he testified he did not know of them and that was not true,'' Chertoff said. ''He also testified that he knew of no illegal activity at the PHA when he knew there was a kickback arrangement to pay part of his fees back to Marguglio.''

''Mr. Michaelis regrets the past and wishes to atone in the future,'' said Jonathan Goldstein, his attorney.

The two men will be sentenced Oct. 4 and face maximum penalties of 10 years in prison and fines of up to $500,000.

They remained free on $50,000 personal recognizance bonds.

''The crimes did not involve taking money out of tenants' pockets, it involves money taken out of taxpayers' pockets,'' Chertoff said.

#90206u2399 07/25/1990 ~United Press International

NEW YORK (JULY 25) UPI - Stock prices closed higher Wednesday in moderate trading, extending their rebound from severe declines Friday and Monday with strength in technology issues fueling the rise.

The Dow Jones industrial average, which rose 17.82 Tuesday, added 8.42 to

close at 2930.94.

Among broader market gauges, the New York Stock Exchange composite index rose 0.65 to 195.10 and Standard & Poor's 500-stock index added 1.31 to 357.10. The price of an average share gained 12 cents.

Advances led declines 903-574 among the 1,974 issues crossing the NYSE tape. Big Board volume totaled 163,530,000 shares, compared with 181,920,000 shares traded Tuesday.

Analysts cited strength in technology issues, which helped fuel the market's rise to near the 3,000 level in the Dow industrials, as a major factor in the gains.

They said buying in that group picked up steam when Digital Equipment, whose earnings from operations for the June quarter did not meet expectations, held relatively firm after that news. It lost 5/8 to 74 7/8.

But other companies whose prospects analysts did not see as especially bright did not fare as well. L.A. Gear fell sharply in heavy trading after an analyst was said to lower her earnings estimate for the company's third quarter.

The company said it would not comment on unusual trading activity in the stock and that it did not expect to comment on results for the third quarter until the end of August.

And Gerber Scientific, which said late Tuesday it expected earnings for the six months ending in October to be significantly lower than in the year-ago period, plunged 2 7/8 to 10 3/8.

Sidney Dorr, vice president of institutional trading at Charles Schwab & Co. in San Francisco, pointed out another bright spot in Wednesday's market.

"The important thing to me was that the utilities bounced back up," he said. "They've been looking for a level to bounce off." Indeed, the Dow utilities average gained more than one percent, rising 2.26 to 202.65.

Overall, however, analysts said the market was trying to find a range in which to stabilize after Friday and Monday's wild gyrations, when the Dow industrials fell almost 90 points. "After Friday and Monday we've got to stabilize at some area, and right now hopefully we've found it," Dorr said.

On the trading floor, Chase Manhattan was the most active issue in dividend related trading, up 5/8 to 20 3/8.

Citicorp followed, up 3/8 to 21, also in dividend-related activity.

Computer Associates was third, up 3/8 to 9 1/2 with other technology issues. The company reported a sharp drop in earnings Tuesday, but the results apparently were not out of line with market expectations.

Other actively traded issues included Dow Chemical, off 3/8 to 52 after tumbling Tuesday in the wake of a weaker-than-expected earnings report; L.A. Gear, sliding 2 1/8 to 23; and Student Loan Marketing Association, known as Sallie Mae, off 2 1/8 to 46. It has slumped all week on news that the largest guarantor of loans in the federal student-aid program was facing a possible financial collapse.

Among the blue chips, AT&T rose 1/8 to 37 3/8. IBM was unchanged at 114 3/4, lagging other technology issues such as Compaq Computer, which jumped two to 59 3/8; and Motorola, which added 2 1/8 to 79 3/4. Philip Morris lost 5/8 to 49, Merck gained 5/8 to 89, and Union Carbide rose 3/4 to 20.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 196,438,990 shares, compared with 216,727,660 shares traded in the previous session.

Prices closed higher in moderate trading on the American Stock Exchange. The Amex Market Value index rose 1.44 to close at 356.95. Advances led declines 331-231 among the 816 issues traded. The price of an average share rose five cents. Composite volume totaled 13,618,700 shares, compared with 16,649,640 shares traded Tuesday. Echo Bay Mines led the Amex issues, up 3/8 to 13 1/8.

The National Association of Securities Dealers composite index rose 2.89 to 445.45.

#90206u2451 07/25/1990 ~United Press International

NEW YORK (JULY 25) UPI - Monetary, political and technical factors combined to shove the dollar higher in brisk New York trading Wednesday, as players reconsidered their bullishness on the Japanese yen and bought the U.S. unit.

Currency traders said participants started selling yen, initially against

the German mark but later for dollars, amid a weakening of market conviction that the Bank of Japan will act soon to raise interest rates.

"The yen appears to have been undermined by a recent Bank of Japan commentary denying a tighter policy," said Shearson Lehman Hutton analyst Lisa Finstrom, noting a "negative backdrop" in weak Tokyo financial markets.

Newly bearish sentiment pushed the yen below key technical points, adding momentum to the dollar's upward swing. But it was "likely to be a short-lived rally," Finstrom said, citing transitory factors.

In late New York dealings the dollar changed hands at 1.6245 German marks, up from 1.6213 late Tuesday. It was quoted at 149.80 Japanese yen, also ahead from 148.80 yen the previous day.

Chemical Bank currency vice president Linda McLaughlin also pointed to mainly technical factors. She said the market corrected itself after picking up too many Japanese yen and running short on dollars.

She said Mideast tensions between Iraq and Kuwait over oil also hurt the yen, as Japan is considered to be particularly susceptible to economic damage if oil shipments from the volatile region were disrupted.

Other late New York dollar rates: 1.3795 Swiss francs, up from 1.3780; 5.4450 French francs, up from 5.4350; and 1,189 Italian lire, up from 1,186. The British pound weakened to $1.8110 from $1.8135.

In Europe, the dollar finished lower against most key currencies as support it had derived from Mideast tensions lessened.

The market saw investors "not so keen on dollars near the close in London " a Barclays Bank dealer said, pointing to a statement from saber-rattling Iraq that it would not attack Kuwait in their oil-related dispute.

In Frankfurt, the dollar slipped to 1.6225 marks against 1.6255 at Tuesday's close. It fell in Zurich to 1.3795 Swiss francs against 1.3865.

In London, the pound had a quiet day after plunging in Far East trading after John Major, Britain's chancellor of the exchequer, said he expected inflation in the country to exceed ten percent this summer.

The pound closed nearly two cents down at $1.8095 against $1.8250. Analysts said dealers retreated on sterling after Major failed to provide any clarification of the timetable for British adhesion to the exchange-rate mechanism of the European Monetary System.

The dollar weakened in Paris and Milan, at 5.4450 French francs compared

with 5.4475, and 1,188.75 lire against 1,189.60. It was also down in Brussels at 33.43 Belgian dollars against 33.45 at Tuesday's close.

In Tokyo, the dollar strengthened against the yen on Mideast tensions, and speculation U.S. interest rates will hold at current levels. The dollar closed at 149.13 yen compared with 148.70 yen Tuesday.

In Zurich, gold closed higher at $372.50 an ounce against $369 Tuesday, and rose in London to $372.50 an ounce from $369.

Republic National Bank in New York closed cash gold at $371.50 an ounce, up from $367.50 Tuesday. The New York Commodity Exchange settled gold at $372 an ounce, also ahead from $367.90.

Silver closed lower in Zurich at $4.85 an ounce against $4.90. The metal was unchanged in London at $4.87 an ounce.

Republic closed cash silver at $4.835 an ounce, up from $4.825. Comex silver moved up to $4.828 an ounce from $4.90.

#90206u2585 07/25/1990 ~United Press International

CHICAGO (JULY 25) UPI - Stotler Group Inc., a futures brokerage headed by Chicago Board of Trade Chairman Karsten Mahlmann, said Wednesday it defaulted on $750,000 in debt obligations and was pulling out of the futures business.

The company stopped clearing trades earlier this week and said it will give up its clearing memberships on the CBOT, the Chicago Mercantile

Exchange and other major futures exchanges.

Stotler Group is a holding company whose principal subsidiary is Stotler & Co., one of the city's largest futures brokerage houses.

But, in a brief statement Wednesday, Stotler said it is getting out of the commodities futures business entirely.

The statement said the company decided ''it is in its and its customers' best interests to wind down its commodity futures brokerage business in an orderly manner in the coming days.''

Stotler has been clearing its trades through Brody, White and Co. Inc., since Monday.

The company said it was unable to meet $750,000 in commercial paper obligations because of the collapse of a conditional offer - reportedly from a Taiwanese investor group - to purchase a $10 million stake in the troubled futures house.

A spokesman said the company was involved in discussions with holders of those notes in an effort to work out a rollover or extension of maturities.

But the company also said it has more than $7.5 million in debts coming due in the coming month, and is ''considering all available options'' to meet those obligations.

Possible options include refinancing, debt restructuring or a sale of assets, the company said.

The clearing house's problems began when federal regulators questioned its policies of recording and segregating capital of the holding company and its brokerage subsidiary.

The Commodities Futures Trading Commission said capital of the holding company and its subsidiary were improperly commingled.

Stotler's problem's reached crisis proportions two weeks ago when the CBOT - responding to the CFTC findings - ruled its capital was inadequate to meet clearing requirements.

A company spokesman said the company brought its capital into line with requirements by reducing customer-segregated funds to roughly $120 million from $290 million.

He said the reductions were carried out primarily by transferring customer accounts and trading positions to other firms - and by customer withdrawal of funds.

But the moves left Stotler short on clients and short of cash to meet debt obligations, resulting in the decision to pull out of the business.

Mahlmann, chairman of both Stotler and the CBOT, could not be reached for comment on the developments. CBOT spokesmen also declined comment.

#90206u2628 07/25/1990 ~United Press International
ANALYSIS BY: STEVE GERSTEL

WASHINGTON (JULY 25) UPI - In a rare ritual, the Senate tried and punished Sen. David Durenberger, R-Minn., a contrite colleague fallen from grace in what is known as the world's most exclusive club.

In the most odious of assignments, 99 senators sat in judgment on one man, and to many a friend, who for the past decade and more has worked with them day by day, sometimes night by night.

For Durenberger, the moment was visibly painful, the end of an ordeal which has tarnished his reputation, cost him a fortune and may eventually rob him of his seat in the Senate.

''This is not a pleasant task,'' Senate Democratic leader George Mitchell said at the start of the proceedings. ''But it is a necessary one.''

Gathered in the confines of the ornate chamber, the Senate listened intently to the charges, listed count by count by Sen. Howell Heflin, D-Ala., a former Alabama Supreme Court justice and chairman of the Senate Ethics Committee.

Heflin asked the Senate to convict Durenberger for conduct that was deemed ''reprehensible'' and which brought ''dishonor and disrepute'' to the Senate.

Senators stayed rooted to their seats during the trial. No one left. No one came in.

Neither did Durenberger, the 55-year-old Republican elected for the first time in 1978, who refused to contest the charges in the Senate, accepting the verdict of his colleagues.

A big, tall man with graying hair, Durenberger sat listening attentively as Heflin and other members of the Ethics Committee summed up their case, and as Senate Republican leader Robert Dole, Mitchell and old and close friend Sen. Alan Simpson, R-Wyo., reminded the Senate of Durenberger the man - without forgiving his sins.

Dressed in a dark blue suit, with arms crossed accross his chest most of the time, Durenberger sat in the front row on the Republican side of the Senate with his lawyer, his chief of staff, Rep. Vin Webber, R-Minn., and his state colleague, Sen. Rudy Boschwitz, R-Minn., by his side.

At one point, a young page walked down the aisle and placed a fresh glass of water on his desk. He nodded his thanks.

Sitting just behind Heflin was Sen. Christopher Dodd, D-Conn., whose father was censured by the Senate in 1967 for comingling personal and campaign funds.

Equally attentive were six senators now under investigation by the Ethics Committee: Sens. Alan Cranston, D-Calif., John McCain, R-Ariz., Donald Riegle, D-Mich., Dennis DeConcini, D-Ariz., John Glenn, D-Ohio, - all for their links to Charles Keating and his failed Lincoln savings and loan in California - and Alfonse D'Amato, R-N.Y., for allegations of improritety connected to the scandal at the Department of Housing and Urban Development.

The visitor galleries were almost full, as they always are in the middle of the summer tourist season, and so was the one gallery reserved for the family and close friends of the senator. No member of the Durenberger family was present.

At his request, Durenberger did not rise to speak until after the Senate voted to denounce and fine him for ''knowingly and willingly'' engaging in financial deals his colleagues found offensive and wrong.

But unlike those who preceded him in the dock - Sen. Thomas Dodd, D-Conn., Sen. Herman Talmadge, D-Ga., and Sen. Harrison Williams, R-N.J. - Durenberger did not go down fighting.

Instead, he accepted the verdict of his colleagues, saying he was ''deeply sorry'' and promised to ''work even harder'' in the years ahead.

''If there is a smudge on the Seal of the United States Senate, or on the

Star of the North, as we like to call our state, I will work my hardest to polish both back to brightness.

''Today is an ending and a beginning,'' Durenberger said. ''For past mistakes, I ask your forgiveness. For future challenges, I need your friendship.''

And the Senate, spared a prolonged agony which Durenberger could have forced and impressed by his compsure during the length of the deliberations, showed his was still a member of the club.

As Sen. William Armstrong, R-Colo., said, Durenberger was a man that ''after we denounce him, we still want him to be our friend.''

-30- 4404

#90206u2650 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - The Senate voted 96-0 Wednesday to denounce Sen. David Durenberger, R-Minn., for ''reprehensible'' and unethical conduct in yielding to the temptations of greed.

The vote supported the unanimous resolution passed one week ago by the Senate Ethics Committee that recommended the punishment for evading limits on outside income and other violations.

Denunciation is the toughest sanction short of outright expulsion a senator can receive for wrongdoing.

Durenberger and Sen. Rudy Boschwitz, his Republican colleague from Minnesota, both voted ''present.'' Sens. Tom Harkin, D-Iowa, and Brock Adams, D-Wash., did not vote.

In a speech on the Senate floor prior to the vote, Durenberger apologized to his colleagues and vowed to ''work even harder than I already have to bring about solutions to our national challenges, by bringing to the Senate the best ideas my state - and my experience - can produce.''

''To my colleagues here, who know me and work with me, I would just say how deeply sorry I am for the painful ... experience we've just been through, and for the extra burden my misconduct has placed on each of you '' Durenberger said.

In its resolution, the committee said Durenberger used a book deal with a Minneapolis publisher and other financial maneuvers to avoid Senate rules limiting outside income. The scheming - involving more than $100,000 - was ''reprehensible and has brought the Senate into dishonor and disrepute,'' the panel said.

It concluded that Durenberger ''knowingly and willingly'' engaged in conduct that was ''in violation of the statutes, rules and Senate standards and acceptable norms of ethical conduct.''

In addition to denunciation, the committee recommended Senate Republicans take additional disciplinary action against Durenberger and ordered the third-term senator to reimburse $29,000 plus interest to the Senate and pay $95,000 to charities with which he has no affiliation.

Sen. Howell Heflin, D-Ala., chairman of the Ethics Committee, said in presenting the panel's findings to the Senate that there was ''convincing evidence that Senator Durenberger knowingly and willfully engaged in a pattern of unethical misconduct which violated statutes, rules and standards of conduct applicable to members of the United States Senate.''

''It is this evidence of knowledge and intent which has brought us here today and which has obliged each member of the committee to conclude that Senator Durenberger must be denounced and that he must disgorge himself of money unjustly and unlawfully obtained,'' Heflin said.

Senate Democratic leader George Mitchell of Maine said although he had a ''special sense of discomfort'' in denouncing Durenberger, ''we owe it to this institution ... to uphold the standards of conduct.''

Senate Republican leader Robert Dole of Kansas urged his colleagues to support the Ethics Committee's recommendation but also praised Durenberger.

''You only have two things around this place: your word and your record. On both things, Dave Durenberger is a winner,'' Dole said.

Durenberger, 55, has maintained his misconduct was unintentional and urged committee members in a July 12 letter to issue a milder punishment of reprimand, which requires no formal action by the Senate.

''The (investigative) process has been a sanction in itself'' and has had a ''devastating effect on my life and career,'' Durenberger said in the letter.

Despite Durenberger's apologies and plea for leniency, the six-member ethics panel - three Democrats and three Republicans - followed the recommendation of Special Counsel Robert Bennett, who said during a public hearing last month that Durenberger's actions were not inadvertent and were ''clearly and unequivocably unethical.''

A 15-month Ethics Committee investigation revealed that Durenberger received some $100,000 in outside income in 1985 and 1986 through an agreement with Piranha Press, which published the senator's two books on health and defense and foreign policy.

The arrangement allowed Durenberger, who is paid $98,500 yearly as a senator, to sidestep supplemental income limits by claiming speeches were ''book promotions'' and having the money paid to Piranha Press, which then turned it over to Durenberger.

Senators were allowed to keep a maximum of $22,000 for speaking fees in 1985 and $30,000 in 1986.

The committee also found several other violations, including: Durenberger improperly accepted limousine service for personal use; transferred funds to his campaign committee through Piranha Press; and failed to report on financial disclosure forms reimbursement for travel expenses stemming from the book deal.

Durenberger, first elected in 1978 to fill the seat vacated by the death of Democratic Sen. Hubert Humphrey, has said he has no intention of resigning. He is a member the Enviroment and Public Works, Finance, and Labor and Human Resources committees, and would be up for re-election in 1994.

While Minnesota Democrats have called for his resignation, Durenberger has the support of the state Independent-Republican party and a trust fund has been established to help pay for his legal fees, which have topped $500,000.

#90206u2701 07/25/1990 ~United Press International

WASHINGTON (JULY 25) UPI - Members of Congress continue to reap rich dividends from savings and loans, which despite their political troubles contributed more than $1 million to lawmakers in the last 18 months, a review of campaign finances indicated Wednesday.

The review, conducted as the Justice Department forecast five more years to prosecute the top 100 fraud cases, also showed that lawmakers most frequently involved in thrift issues have netted the most money from S&L political action committees.

Since President Bush first proposed a plan to resolve the S&L bailout in January 1989, more than 500 thrifts have failed or gone under federal supervision and the total bailout could end up costing the taxpayer $500 billion.

Still, a review of Federal Election Commission records by United Press International, show that S&L PACS have contributed slightly over $1 million to members of Congress in that time period.

The UPI review found that the United States League of Savings Associations was the leading PAC contributor since January 1989. The League funneled $228,200 to lawmakers, which was evenly donated to Republicans and Democrats.

Other top contributors included the Household Finance Corp. of Ill., which contributed $74,400 to lawmakers, and the American Financial Services Association of the District of Columbia, which made contributions of $57,300.

In the House, 17 of the top 25 thrift PAC recipients since 1987 are members of the Banking, Finance and Urban Affairs Committee, which regularly votes on S&L matters. The panel members collected $403,700 of the total $563,200 that thrift PACs contributed to leading House recipients.

In the Senate, 12 of the top 25 PAC leaders are members of the Banking, Housing and Urban Affairs Committee who received $403,300 of the total $780,000 doled out by S&L groups since 1983. Other leading recipients included members of the Finance Committee, the Senate tax writing panel.

Sen. Pete Wilson, R-Calif., engaged in a tight gubernatorial contest, was the one notable exception to the general strategy employed by interest groups. Wilson, who is not a member of a banking or finance panel, was the third highest recipient in the Senate of S&L PAC contributions, netting $65,316 since 1983.

Wilson's Democratic colleague, Sen. Alan Cranston, a member of the Banking Committee, was the top Senate recipient of thrift PAC money, according to the United Press International review.

Cranston, who received $79,400 since 1983, is one of five senators under Senate investigation for allegedly intervening with federal regulators on behalf of Charles Keating, the chairman of the parent company that owned the failed Lincoln Savings & Loan Association. Cranston received $39,000 in campaign contributions from Keating and his associates.

Cranston's spokesman, Murray Flander, defended the senator's receipt of thrift PAC money, saying, ''There is absolutely no question in our minds about the integrity of the senator.''

Wilson's spokeswoman, Lynda Schuler, said suggestions that all S&L PAC donations are tainted amounts to ''guilt by association. It's unfounded,'' she said. ''Wilson has never been suspected of being involved in the scandal.''

Wilson and Cranston have reportedly received far more money from S&L ''interests,'' which include individual donations. But those figures have

failed to disclose whether all contributors associated with S&L's make their donations for the sole purpose of advancing thrift interests.

In the House, the five top PAC recipients are members of the Banking Committee. Rep. Carroll Hubbard, D-Ky., collected the most, with $40,800 since 1987. He was followed by Reps. Richard Lehman, D-Calif., who received $34,000, Frank Annunzio, D-Ill., who amassed $33,200, Stephen Neal, D-N.C., who collected $30,800 and Norman Shumway, R-Calif., who received $29,800.

#90206u2702 07/25/1990 ~United Press International

LONG BEACH, CA (JULY 25) UPI - A U.S. Coast Guard adminstrative judge Wednesday suspended the mariner's license of Capt. Joseph Hazelwood, skipper of the ill-fated Exxon Valdez, for nine months, followed by 12 months of probation.

Retired Coast Guard Capt. Harry Gardner, issuing the ruling at the end of a day-long hearing, warned that if Hazelwood violated the terms of his probation his license would again be revoked for three additional months.

Hazelwood, 43, pleaded no contest - which carries the legal weight of a guilty plea but without the admission of guilt - to charges that he drank alcohol within four hours before performing his duties and that he left the bridge of the tanker while it was headed for Bligh Reef.

Two other charges against Hazelwood were dropped in a plea bargain agreement. They alleged that he had a blood-alcohol level higher than the legal limit for ship captains of 0.04 percent and that he turned control of the ship over to an unqualified third mate.

The grounding of the Exxon Valdez last year resulted in an 11-million-gallon oil spill in Alaska's Prince William Sound. The spill, which blackened more than 1,000 miles of the environmentally sensitive Alaskan coastline, was the worst environmental disaster ever in the nation.

Hazelwood, hurrying to an elevator after the hearing, simply said, ''I'm glad this portion is over.''

Defense attorney Michael Chalos said Hazelwood pleaded no contest to the charges because he wanted to accept responsibility but avoid a protracted hearing.

''He wants the Coast Guard and the people of America to know he accepts his responsibility,'' Chalos said during a break in the hearing.

''(Hazelwood) has suffered enough. He wants to do what he knows best -

that is captain a ship. He wants to go back to sea and he wants to go back as soon as possible.''

Hazelwood proclaimed his desire to return to the sea as soon as a jury in Alaska convicted him of negligence in the Exxon Valdez spill while clearing him of three more serious charges, including reckless endangerment and operating the tanker while intoxicated.

But like any mariner, the Huntington, N.Y., skipper, who was fired by Exxon after the disaster, needs a Coast Guard license to go to sea.

Chalos said the hearing vindicated Hazelwood as a competent ship's master.

''I think any employer looking at it objectively would hire him back,'' Chalos said.

''What we had here was not a drunken sailor. Alcohol played no role in the grounding. What we have here is human error,'' Chalos said.

The 987-foot Exxon Valdez, loaded with 53 million gallons of Alaska crude bound for Long Beach, smashed into the underwater rocks and tore open at 12:04 a.m. on March 24, 1989.

Along with fouling the coast of Alaska, the spill killed tens of thousands of animals, devastated an entire commercial fishing season and polluted the pristine wilderness, which is still being cleaned 16 months later.

As a result of his criminal negligence conviction, Hazelwood was sentenced to spend 1,000 hours helping clean up the mess but his sentence was put on hold while he appealed.

The evidence against Hazelwood in the Coast Guard's license hearing was much the same as the evidence against him in his Alaska criminal trial. But several of the charges in the Coast Guast administrative proceeding were different.

In Alaska, drunken driving requires a 0.1 blood alcohol level. The more stringent Coast Guard rule judges a mariner intoxicated at 0.04. Hazelwood's blood alcohol was measured at 0.061 about 10 hours after the wreck.

Alaskan officials could not prove that Hazelwood was legally drunk when his ship hit the rocks. Nor could Alaskan officials find any witnesses to testify that Hazelwood was impaired.

Hazelwood's own lawyers, shipmates, Exxon agents and others all have placed Hazelwood in a Valdez bar before sailing. Two Exxon drinking buddies said the trio visited two bars before returning to ship. Hazelwood

drank vodka, according to Alaska court testimony, but when, how much and for how long was a subject of disagreement.

#90206u2797 07/25/1990 ~United Press International

SAN ANTONIO DE BELEN, COSTA RICA (JULY 25) UPI - Salvadoran rebels said Wednesday progress has been made with government negotiators on an accord to set-up a permanent U.N. commission on human rights in El Salvador.

Proponents of the plan say it would bring an end to middle-of-the-night disappearances and police searches, and liberate political pisoners and increase freedom of expression.

Chief rebel negotiator Schafik Jorge Handal said there have been positive advances and the talks will not be broken off.

Rebels of the Farabundo Marti National Liberation Front, or FMLN, had repeatedly threatened to launch a major offensive if the round of talks that began Friday at San Antonio de Belen, Costa Rica, about 7 miles northwest of San Jose, did not produce any major breakthrough.

The government said last week that any offensive would bring an immediate end to the current talks.

Nidia Diaz, a member of the FMLN negotiating team, said an agreement on human rights would compensate for the continued deadlock on reform of the armed forces.

Rebels have been demanding substantial reductions in the armed forces and prosecution of army officer accused of human rights violations, including the Nov. 16 slayings of six jesuit priests.

Diaz said the rebels had rejected a government proposal on the issue because it only specified ''a restructuring of the armed forces.''

The six-day round of talks was scheduled to end at 5:00 p.m.. No date or location have been provided for a possible new round of talks.

On Tuesday, chief government negotiator Oscar Santamaria proposed that Costa Rica be the site for the rest of the negotiations.

Both rebels and the government are trying to bring an end to the decade-old civil war that has cost more than 72,000 lives. At a previous round of talks last May in Caracas, Venezuela, the two sides agreed to try to reach a cease-fire before September.

#90207b0006 07/26/1990 ~Business Wire
LOUISVILLE, KY (JULY 26) BUSINESS WIRE - Kentucky Medical Insurance Co. (NASDAQ/NMS:KYMDA) reported lower revenues and earnings for the quarter ended June 30, 1990.

Second-quarter revenues for the medical professional liability insurer were $4.9 million, compared with $5.6 million for the same period in 1989. Operating income was $499,000, compared with $606,000. Net income decreased to $499,000 from the prior period's net income of $878,000, which included a $271,000 extraordinary tax credit.

Earnings during the second quarter were 35 cents per share, compared with 70 cents per share for 1989. The 1989 figure includes a 22 cents per share tax credit. Earnings per share were calculated on 1,438,299 and 1,255,640 shares outstanding as of June 30, 1990 and 1989, respectively. All per-share amounts were calculated on shares outstanding subsequent to a four-for-three stock split distributed on May 24, 1990.

Chief Operating Officer David W. Lester said a 12.5 percent reduction in overall rates, a shift in policy renewal dates and a decline in the policyholder base were primary contributors to the revenues and earnings decline.

Those factors were offset somewhat by decreased reinsurance costs and lower amounts set aside for future losses and related expenses, which Lester said reflects favorable trends in liability claims.

Rate credits and reductions, implemented in January to reflect improved claims experience, were expected to increase the company's market share among Kentucky liability insurers, he said. The company's policyholder count, which had fallen prior to the action, remained generally flat through the second quarter.

Kentucky Medical Insurance provides medical professional liability insurance to about half of Kentucky's doctors and insures hospitals, healthcare facilities, dentists, oral surgeons and healthcare professionals. It also offers investment, leasing and other insurance services to the Kentucky medical community.

#90207b0011 07/26/1990 ~Business Wire
NASHVILLE, TN (JULY 26) BUSINESS WIRE - Surgical Care Affiliates Inc., the Nashville-based outpatient surgery center company Thursday announced

record operating results for the second quarter and six months ended June 30.

Revenues for the quarter ended June 30 were $29,863,605, compared to revenues of $20,116,724 for the like quarter of 1989. This was an increase of 48 percent for the quarter. The company reported net income of $2,710,283, or 23 cents per share, for the second quarter of 1990, vs. $1,501,460, or 14 cents per share, for the second quarter of 1989, an earnings increase of 81 percent.

For the six month period of 1990, net revenues were $57,466,991 compared to revenues of $38,891,558 for the like six months of 1989. This was an increase of 48 percent for the period. The company reported net income of $5,105,096, or 44 cents per share, for the first six months of 1990, vs. $2,807,669, or 26 cents per share, for the like period in 1989, an earnings increase of 82 percent.

During the second quarter of 1990, a new surgery center was opened in Baltimore. This center is a joint venture with local physicians and a 130,000-member health maintenance organization located in Baltimore. Additionally, acquisitions of the Inland Surgery Center in Redlands, Calif., and the Forest Surgery Center in San Jose, Calif., were finalized during the second quarter.

Both acquisitions include local surgeons as co-owners with Surgical Care.

Ken Melkus, president of Surgical Care Affiliates Inc. stated: ''Results for the second quarter of 1990 continued at a record level of profitability and surpassed each of the preceding 16 quarters. Revenues, net income and earnings per share all attained the highest level in the company's history. Outpatient surgery continues to gain increased acceptance on a national basis and the company is experiencing increased utilization and acceptance of its centers.''

Melkus also noted that Surgical Care's caseload increased by 37 percent to over 27,700 cases in the second quarter of 1990. For the first six months of 1990, the company's caseload increased 37 percent to nearly 53,000 cases while same unit cases for the surgery centers increased 14 percent.

Medicare recently issued its preliminary proposal to increase reimbursement for ambulatory surgery centers by 4.21 percent. This latest increase is likely to receive final approval in mid-September and will be retroactive to July 1. On March 12, surgery centers also received a 4.88 percent increase from Medicare.

According to SCA's records, 28 percent of the surgeries performed in the company's centers are covered by the Medicare program.

Melkus added: ''The company is continuing its expansion efforts and expects to develop several new facilities and complete additional acquisitions during the remainder of 1990.

''Adding new facilities, increasing volume at existing centers and increasing the complexity of surgery being performed at the centers, such as outpatient gallbladder surgery will all contribute to future revenue and earnings growth for the company.''

A quarterly cash dividend of 3 cents per share was declared to be payable on Sept. 10 to stockholders of record on Aug. 31.

Surgical Care currently operates 29 outpatient surgery centers in 16 states, a diagnostic center and an HMO. The stock is traded under the symbol of SCAF and listed daily in the National List of the Wall Street Journal.

SANTA ANA, CA (JULY 26) BUSINESS WIRE - Alpha Microsystems Thursday announced that David A. Young has been named as vice president, finance and chief financial officer.

Prior to joining Alpha Microsystems, Young served as corporate controller of California Industrial Products. Young's previous positions include vice president, finance and administration, chief financial officer and secretary and treasurer of San/Bar Corp.; and vice president, finance and administration, chief financial officer and secretary of MSI Data Corp.

John Cain, president of Alpha Microsystems stated: "David Young brings over 20 years of financial expertise to Alpha Micro, including extensive experience with high-technology companies. He is a well-respected member of the financial community, and we are fortunate to have a person with his valuable qualifications join Alpha Micro."

With headquarters in Santa Ana, Alpha Microsystems designs, manufactures, markets and services a broad line of multi-user computer hardware and software products worldwide.

Through its system families, the company offers a wide array of business-oriented operating environments, including Alpha Microsystems' proprietary AMOS and RECAP multi-user operating systems; the widely used XENIX, PICK and MS-DOS operating systems; and Business Basic. Alpha

Microsystems provides its computing solutions to business and professional users through an international dealer network.

SAN JOSE, CA (JULY 26) BUSINESS WIRE - TeleVideo Systems Inc. (OTC:TELV) has announced the signing of a distribution agreement with Omnilogic/France, the second largest computer distributor in France and part of the $300 million Omnilogic/CPU group, the largest distributor of peripherals and software in Europe.

The first contracted order under the new agreement calls for TeleVideo to ship approximately 27,000 computer terminals, expected to be valued in excess of $7 million over the first year.

In the announcement, TeleVideo indicated it expects Omnilogic/France to follow with orders for the company's computer system products. TeleVideo is also hopeful that other groups of Omnilogic covering other countries will follow suit by carrying TeleVideo's full line of PC computer and terminal products.

Omnilogic has indicated that it intends to make the TeleVideo line its number three line of products, behind Citizen and Wangtek. Other notable manufacturers currently being carried by Omnilogic include Borland, Conner Lotus, Microsoft, Novell, Seagate and Western Digital.

''This puts us back in the French market,'' said Ugo Cauz, TeleVideo's director of international sales. ''Because Europe is becoming very pan-European, success in France will spread to other parts of the continent. It will help re-establish TeleVideo's name throughout Europe as a leading supplier of terminals and systems.''

Omnilogic, headquartered in Paris, offers a broad range of products to the European market, including microcomputers, networks, graphic products, printers, controllers, and other peripherals. It is a subsidiary of SCOA, a multinational company listed on the Paris Stock Exchange.

Other companies in the group include Synelec Austria, Synelec Germany, Omnilogic Belgium, Omnilogic Netherlands, Omnilogic Spain, Telcom (Italy), and CPU Peripheral (United Kingdom). CPU/UK also carries the TeleVideo line of products.

TeleVideo Systems Inc. is a leading supplier of industry-standard, high performance LAN file servers and workstation products, low-cost video display terminals, computer enhancement products, and application-specific

integrated circuits (ASICs). TeleVideo is a publicly held corporation and is traded in the over-the-counter market. Corporate offices are located at 550 East Brokaw Road, P.O. Box 49048, San Jose, Calif., 95161-9048. Telephone: 408/954-8333.

Omnilogic is located at 11 Rue de Cambrai, Batiment 028, 6eme Etage 75019 Paris, France. Telephone: (1) 40 05 28 00.

DENVER (JULY 26) BUSINESS WIRE - The U.S. Environmental Protection Agency has awarded a $30,000 grant to the Rocky Mountain Conservation Fund to help develop a ''Complete the Cycle'' center to showcase recycled products.

The 3,500-square-foot center, scheduled to open in September, will be located in space donated by TRI-R Systems Corp. (NASDAQ:RRRC) at its corporate headquarters in Denver. Other businesses and individuals who have contributed to the center include Cobe Laboratories and actor Dennis Weaver.

The center will include:

-- A showroom where a variety of recycled products -- everything from recycled paper products to carpeting to yo-yo's -- will be displayed.

-- A lecture/training facility complete with video equipment.

-- A research library containing trade magazines, videos, environmental cirriculum and data on environmental products from around the United States and the world.

''Recycling isn't merely collecting materials, it's reusing it, and our center will be designed to help individuals and businesses learn about the variety of products made from recyclables that are available for them,'' said Andy McKean, the center's manager.

Headquartered in Denver, TRI-R Systems Corp. operates in Colorado, Wyoming and Arizona. The company purchases a wide range of reusable materials from consumers, business and government, processes these materials, and sells them to domestic and foreign manufacturers.

Commodities purchased include aluminum cans and scrap aluminum, glass, copper, brass, stainless steel, plastic containers, and a variety of paper products including computer printout paper, office paper, newspaper and cardboard.

The company's stock trades on the over-the-counter market (NASDAQ) under the symbol RRRC.

COEUR d'ALENE, IDAHO (JULY 26) BUSINESS WIRE - AERO-TECH Industries Inc. (ATI) announced Thursday that Dr. George Gould, Frank R. Wall and Fred Geschwender will be formally launching the all-new XP TALON aircraft product line at the Oshkosh '90 Experimental Aircraft Association's (EAA) Fly-In Convention at the Wittman Regional Airport, Oshkosh, Wis., from July 27 through Aug. 2.

The three versions of the XP TALON are the ''...DASH IV'' which is configured as a tail-wheel aircraft with an eliptical rudder and wing tips the ''...DASH V'' which has a tail-wheel and a squared-off rudder and wing tips, and the ''...DASH X'' which has a tricycle landing gear, squared-off rudder and wing tips with the canopy extended forward five additional inches for a stepped cockpit configuration.

The four aircraft presently being produced are, one each of the three models, with one additional shipset of parts and sub-assemblies entering the ''modular component package systems'' -- a trade name of ATI.

According to Dr. Gould ''Doc,'' it is anticipated that the XP TALON aircraft full-scale prototype will be complete for rollout and undergo flight testing this year.

ATI's XP TALON product line is powered by a liquid-cooled, aluminum 400+ horsepower engine with a reduction drive developed by Fred Geschwender, ATI's XP TALON powerplant specialist, and propelled by a Hartzell 4-blade, 82 inch diameter, constant-speed propeller, computer engineered to specifications for ATI. The aircraft are configured for two-pilots in a tandem (front and back) dual control arrangement. Safety features include bird-strike resistance using a Lexan 3/8-inch thick polycarbonate windshield and a scratch/solvent resistant acrylic 1/4-inch thick, full-view canopy which has emergency jettison and kinetics capability.

Wall, a senior principal staff engineer for ATI, believes that the canopy/windscreen system and operating mechanism demonstrates ATI's zeal for craftsmanship and the attention to detail in developing the aircraft. ATI anticipates that many of the features which are incorporated into the TALON aircraft will be aggressively sought after by industry due to the unique simplicity.

#90207b0037 07/26/1990 ~Business Wire

SAN JOSE, Calif. (JULY 26) BUSINESS WIRE - KLA Instruments Corp. (NASDAQ/NMS:KLAC) announced Thursday that KLA's financial results for the 1990 fiscal year ended June 30 were adversely affected by a substantial increase in Engineering R & D for introductions of a series of new product families during fiscal 1991.

Gross Margin increased 4 percent on a 1 percent increase in revenue, but was offset by a 23 percent increase in Engineering R & D.

For the twelve months ended June 30, sales were $167,916,000 and net income was $9,380,000, or 52 cents per share, compared to sales of $165,459,000, net income of $11,678,000 and earnings per share of 65 cents for the previous year's comparable period.

KLA Instruments Corp. also announced today that sales for the fourth fiscal quarter ended June 30 were $42,922,000 and that net income was $2,163,000, or 12 cents per share. This compares with sales of $43,162,000 and net income of $3,107,000 equal to 17 cents per share, for the prior year's comparable quarter.

New orders for the fiscal quarter ended June 30 increased approximately 20 percent over the third fiscal quarter's new orders, resulting in a slightly positive book-to-bill ratio in the June quarter.

The company also reported that cash flow was $5,800,000 positive for the June quarter and $15,800,000 positive for the twelve months ended June 30. At June 30 the company had net cash and marketable securities (net of short-term borrowings by the company's overseas subsidiaries) of $39,000,000. The company had no long-term debt.

KLA Instruments Corp. is a leading innovator of industrial image automation systems.

#90207b0043 07/26/1990 ~Business Wire

HOUSTON (JULY 26) BUSINESS WIRE - American General Corp. (NYSE:AGC) announced that its board of directors Thursday declared a quarterly dividend of 80 cents per common share, payable Sept. 1, 1990, to holders of record as of Aug. 7, 1990.

This represents a common dividend payout of 82 percent of operating earnings and 48 percent of net income for the second quarter.

The indicated annual dividend rate of $3.20 is a continuation of the rate that was announced at the May 2, 1990, annual shareholders' meeting in conjunction with the decision to offer the company for sale in its entirety. As stated at that time, the indicated annual dividend rate was more than doubled so as to give American General shareholders an additional return while they wait for the sale process to be completed.

When American General released second quarter earnings on July 19, 1990, the company stated that the sale process is proceeding according to its expectations with strong interest expressed by both domestic and international prospective buyers.

American General is an insurance and financial services organization with assets of $34 billion and total equity of $4.5 billion. Headquartered in Houston, the company has subsidiaries that operate in 50 states and Canada.

The company groups its operating subsidiaries into three business segments: Insurance - Home Service; Insurance - Special Markets; and Finance/Real Estate. American General common stock is listed on the New York, Pacific, London, and Swiss stock exchanges.

WASHINGTON (JULY 26) BUSINESS WIRE - The American Electronics Association Thursday announced publication of ''Soft Landing in Japan,'' a Japan market entry handbook for U.S. software companies.

Developed by a newly formed Software Subcommittee of the AEA Industry Committee in Japan, the publication is a primer for American software firms desiring to maximize their business opportunities in Japan.

AEA President and Chief Executive Officer J. Richard Iverson stated: ''Japan is the largest single market for software products outside the United States. Unlike Europe, it has low market penetration and, for now few local competitors. Japan is a strategically important market to any software company aiming at being a world-class player in the decade ahead.''

The comprehensive handbook includes a market overview and covers distribution, legal issues, recruitment, marketing and customer support. There is a chapter lising sources of information for firms wanting to do business in Japan.

Six case studies of U.S. software companies that have been successful in marketing their products in Japan provide a unique insight into problems, solutions, and necessary attitude changes. The six profiled firms are Autodesk, Comshare, Ingres, Lotus, Oracle, and SDRC.

Price of the handbook is $50 for AEA members and $95 for non-members. For more information, contact the American Electronics Association, 5201 Great America Parkway, Santa Clara, Calif. 95054. Tel. 408/987-4200.

The American Electronics Association is headquartered in Washington and Santa Clara, Calif. The AEA/Tokyo office has been serving the American electronics industry since 1984.

#90207b0053 07/26/1990 ~Business Wire

BELLEVUE, WA (JULY 26) BUSINESS WIRE - Summit Savings Association (NASDAQ:SMMT), Thursday reported that cost control measures and a change in strategic direction implemented a year ago led to a strong rebound to

profitability in fiscal 1990.

The association earned $553,000, or $.42 per share, for the fiscal year ended June 30, 1990, compared to a fiscal 1989 loss of $1,152,000, or $1.84 per share. Earnings for the fourth quarter ended June 30, 1990, were $239,000, or $.12 per share, compared to a loss of $57,000, or $.09 per share, for the quarter ended June 30, 1989.

''Last year we set out to return Summit to profitability. We have done this by cutting expenses across the board, building lower cost core deposits, shifting our focus to the single-family home mortgage market, and significantly reducing the large holdings of real estate owned as a result of foreclosure,'' said James F. Grabicki, president.

''We continue to develop new lending programs, such as home equity backed consumer loans, to attract additional loan business, not only in our traditional market area but also in Bellingham where Summit is opening a loan production office to serve that very active and attractive residential real estate market,'' Grabicki added. Previously, Grabicki served as president and chief executive officer of a thrift institution headquartered in Bellingham.

''Moving into new headquarters alongside Interstate 405 in Bellevue's central business district not only has lowered occupancy cost but has given Summit a great deal of exposure. New customer accounts plus our effort to attract core deposits over the past year has enabled Summit to reduce jumbo CDs to 10 percent of deposits at June 30, 1990, from 19 percent one year earlier,'' he added.

The results for the last quarter of the fiscal year ended June 30, 1990, reflect a reversal of $168,000 which had previously been reserved for payment of federal income taxes. This reversal was the result of an income tax bad debt deduction more favorable than originally anticipated, which increased net operating loss (NOL) carryforwards. The benefit of the increased NOL carryforwards will continue to be reflected in future periods. Also, Summit's fourth quarter results reflect additions to loan loss reserves totaling $148,000, further strengthing the association's reserve position.

''The December 1989 stock offering, together with this year's earnings, brings the association's core capital to 7.8 percent of assets. Our strong capital base and reserve position give us a great deal of flexibility to move ahead,'' Grabicki added.

In fiscal 1990, Summit's non-interest expense decreased 29 percent to $2.7 million compared to $3.8 million in fiscal 1989. The association reduced its expenditures for compensation, advertising, depreciation, occupancy and professional services.

Summit's net interest income after provision for loan losses was $2.0 million this year compared to the $1.5 million produced in fiscal 1989. The association's net interest margin in fiscal 1990 was 2.0 percent compared to 1.9 percent the year before. Non-interest income totaled $1.3 million in fiscal 1990 compared to $664,000 the year before.

Mortgage loan production in fiscal 1990 increased 132 percent to $95 million compared to $41 million in 1989. Summit's portfolio of loans serviced for others totals $91 million. Total assets are $113 million, compared to $110 million a year ago. Shareholder equity was $8.9 million and book value was $4.41 per share at June 30, 1990.

Summit Savings Association is a Bellevue-based thrift institution emphasizing residential lending of all types and offering a wide range of financial services including high performance money market accounts and certificates, annuities and other investment products. The association services the greater Seattle metropolitan area, offering competitive service and rates and is opening a loan production office in Bellingham, Wash., in August.

HOUSTON (JULY 27) BUSINESS WIRE - Union Texas Petroleum Holdings Inc.

(NYSE:UTH) Thursday reported $16 million, or four cents per share, in net income for the second quarter of 1990, compared to $86 million, or 88 cents per share, for the same period a year ago.

The decrease was attributed primarily to the prior year's impact of the 1989 second quarter business interruption insurance settlement related to the Piper explosion in the U.K. North Sea. As a result of the settlement, Union Texas recorded $58.6 million of net income for 1989's second quarter in addition to proceeds that had been accrued monthly since the explosion in July 1988.

For the first half of 1990, the company had $47 million, or 27 cents per share, in net income, compared to $136 million, or $1.33 per share, in 1989's corresponding period, reflecting the 1989 second quarter business interruption insurance settlement.

During 1990's second quarter, Union Texas was affected by the absence of business interruption insurance accruals and lower prices for Indonesian liquefied natural gas (LNG), U.S. gas and ethylene. These items were offset by higher crude oil volumes from the North Sea's Claymore and Scapa fields and increased ethylene output following the recent expansion of the company's jointly-owned ethylene plant.

The company's 1990 first half results were affected by the absence of business interruption insurance accruals, lower Indonesian LNG volumes and lower prices for U.S. gas and ethylene, offset by improved U.S. gas volumes particularly at Eugene Island Block 371 and Vermilion Block 187 and increased prices for Indonesian LNG.

Revenues for 1990's second quarter totaled $263 million, compared to $366 million from a year ago. For the first half of 1990, revenues were $574 million, versus $673 million for the same period in 1989. The decline in revenues for 1990's second quarter and first half was attributed to the absence of accruals for business interruption insurance.

One of the nation's largest independent producers, Houston-based Union Texas Petroleum Holdings, Inc. explores for and produces oil and gas in the U.S. and overseas and has petrochemicals and natural gas processing interests.

SUGAR LAND, Texas (JULY 26) BUSINESS WIRE - Imperial Holly Corp. (AMEX:IHK) reported net sales for the first quarter of fiscal 1991 ended June 30, 1990 of $178,973,000 compared to $176,988,000 for the same period last year.

Net income for the period was $5,425,000 a 31 percent increase over comparable results last year of $4,129,000. Earnings per share for the quarter were 54 cents representing a 23 percent increase over last year's results of 44 cents, adjusted for a three-for-two stock split effected in April 1990.

Commenting on the comany's excellent performace for the quarter, Robert C. Hanna, president and chief executive officer stated that, ''These results bear our earlier indications, which we expressed to the New York Society of Security Analysts earlier this month, that the quarter's results would compare very favorably to last year's.

''Efficiencies in our California operations due to an excellent quality sugarbeet crop and the capital improvements made over the past two years

in our factories there were important contibutors to the quarter's strong showing.''

#90207b0092 07/26/1990 ~Business Wire

BEVERLY HILLS, Calif. (JULY 26) BUSINESS WIRE - Great Western Financial Corp. Thursday broke ground on a 10-story executive office building in Chatsworth, the first step in a three-phase program to create a new corporate-headquarters complex.

The new executive office building, scheduled for occupancy in 1992, will be the centerpiece of a major expansion program that will total 780,000 square feet on 20 acres next to an existing Great Western service center.

''This new complex will be needed to accommodate the significant growth we expect during the 1990s,'' said James F. Montgomery, chairman and chief executive of Great Western Corp. ''Our goal is to create for our employees the finest working environment in Southern California.''

In addition to the headquarters building, the first phase of the project will include a 92,000-square-foot employee center, a child-care center and the first segment of a multilevel parking structure that eventually will accommodate up to 2,500 cars.

Designed in a contemporary international style by Gin Wong Associates, the 233,000-square-foot executive building will feature stepped upper floors and exterior surfaces of textured warm-tone, pre-cast concrete and solar gray glass--setting the architectural theme for the complex.

Lushly landscaped plazas and attractive pedestrian walkways will link the new facilities and create the feeling of an extended campus rather than an office complex, according to Gin Wong, president of the architectural firm that planned the project.

About 100 executive management and corporate staff at the company's Beverly Hills headquarters will move to the new tower, according to Montgomery. ''Our goal is to consolidate the company's corporate and administrative management at one location,'' he said.

The two-story employee center, built in the same architectural style as the executive tower, will have landscaped gardens and fountains and an outdoor terrace with a waterfall.

In addition to a cafeteria, the building will contain a fitness and exercise facility, a small company store and the human-resources

department. The day-care center will be built on a three-acre site and can be expanded to serve more children as the company grows.

Great Western's service center at Corbin Avenue and Plummer Street houses 2,600 employees in nine low-rise buildings. The combined facilities will total nearly 1.6 million square feet. The contractor is Peck/Jones Brothers Construction Corp.

Great Western Financial Corp., with assets of nearly $40 billion, is the parent company of Great Western Bank, a real estate-oriented retail bank. One of the nation's leading residential mortgage lenders, the company operates more than 1,000 mortgage lending, retail banking and consumer-finance offices nationwide.

#90207b0094 07/26/1990 ~Business Wire

VANCOUVER, British Columbia (JULY 26) BUSINESS WIRE - Glamis Gold Ltd., through its operating subsidiary, Rand Mining Co., has exercised its ''Option to Purchase Agreement'' with Echo Bay Mines Ltd. for all of Echo Bay's Randsburg, Calif., properties.

The 5,600 acres of property include 47 patented and 299 unpatented mineral claims. These claims include the Baltic deposit and the Lamont deposit, which will become an extension of Rand Mining's existing Lamont Pit.

Echo Bay had previously published mineable reserves for the Baltic and Lamont deposits of 5.2 million tons of gold ore grading 0.036 ounces per ton and containing approximately 187,000 ounces of gold. Rand Mining's independent investigation indicates a very good potential for increasing the mineable reserves for the Baltic and Lamont deposits to over 13 million tons at a grade of .023 ounces per ton.

Although additional feasibility and engineering work will be done to confirm the reserve estimate in the near future, it appears that the deposits contain approximately 300,000 mineable ounces of gold. In addition other areas of exploration potential exist on the properties.

In exchange for $100,000, Glamis was given a 60-day option period to perform "due diligence" on the properties. On closing the Agreement to Purchase, Glamis will pay Echo Bay an additional $4,900,000. Echo Bay will retain a 1 percent Net Smelter Return production royalty. (All amounts are in U.S. dollars.)

Glamis President, A. Dan Rovig, said: ''This is a significant opportunity

for Glamis to double its mineable gold ore reserves at Rand Mining Co.; thereby assuring continued production at Rand by utilizing the existing management, operations and technical infrastructure. Engineering and permitting activities will commence immediately.''

Rovig also notes: ''This acquisition, along with the previously announced option agreement for an exploration and development joint venture on 30,000 acres of adjacent mineral lands at Randsburg, with Denver-based DRX Inc., provides a most significant step in Glamis' announced intention to continue a program of domestic growth and business development.''

The company also announces that further drilling at the Yellow Aster Pit has replaced Yellow Aster ore mined to-date. Therefore the reserves remain at 11.4 million tons at .022 ounces per ton. Drilling is being continued in an effort to expand the reserves.

On behalf of the board of directors.

BEVERLY HILLS, CALIF. (JULY 26) BUSINESS WIRE - Qintex Entertainment Inc. (QEI) (NASDAQ:QNTXQ) Thursday reported court approval of the $37 million sale of two television stations owned by its affiliate, HR Broadcasting (HRBC), to a partnership controlled by Boston-based ABRY Communications.

HRBC will retain cash and accounts receivable in the sale of stations WTTO in Birmingham, Ala., and WCGV in Milwaukee, bringing the total transaction to approximately $40 million.

Under the terms of the agreement, HRBC will repay senior secured lenders and pay transaction costs and normal prorations at closing. HRBC will then remit the balance of the funds to QEI, which expects to receive more than $20 million for its interests in HRBC. The deal will close following transfer of FCC licenses for the stations, which is expected to occur by the end of this year.

''HRBC has been a well managed operation and a good investment for QEI,'' noted Jonathan Lloyd, president of Qintex Entertainment. ''Qintex is receiving excellent cash value for its HRBC interests,'' he said.

As reported on June 5, 1990, QEI directors have approved the sale of the company's operating assets in two separate transactions. In addition to the sale of the company's interests in HRBC, QEI has reached an agreement to sell its entertainment assets to RHI Entertainment for $42.4 million. This transaction is still pending.

The station sales were approved in U.S. Bankruptcy Court by Judge Lisa Fenning. Qintex filed for Chapter 11 bankruptcy protection in October 1989.

HOUSTON (JULY 26) BUSINESS WIRE - Galveston-Houston Co. (NYSE:GHX) Thursday announced that, for the six months ended June 30, 1990, its net earnings increased by 266 percent compared to the similar six-month 1989 period and exceeded the net earnings before preferred dividends reported for the entire year of 1989.

For the first six months of 1990, the company reported net earnings of $4,065,000, or 23 cents per share, compared to $1,110,000, or 10 cents per share, for the first six months of 1989 and $2,902,000, or 24 cents per

share, for the year ended Dec. 31, 1989. In 1989, the company paid $1,015,000 in preferred dividends. No preferred dividends will be paid in 1990 since all preferred stock was redeemed or converted during 1989.

Average shares outstanding for the first six months of 1990 were 17,813,526, an increase of 52 percent over the same 1989 period. Revenues for the 1990 six-month period were $38,469,000, 27 percent higher than reported for the similar six months in 1989.

For the three months ended June 30, 1990, the company reported net earnings of $2,478,000, or 13 cents per share, a 282 percent increase over the $648,000, or 5 cents per share, reported for the comparable period in 1989. Revenues were $20,009,000 and $15,642,000 for the second quarter of 1990 and 1989, respectively.

The 1990 second quarter backlog and net new orders continued to break records for the company's ongoing operations. For the period, orders booked surpassed $20 million for the first time in any quarter. Backlog was 5.2 percent higher at June 30, 1990 than at the end of the previous quarter and 63.7 percent greater than at the end of the second quarter of 1989.

Galveston-Houston Co. manufacutures valve actuators and custom steel castings for the energy and other industrial markets and replacement wear parts and excavation buckets for the construction, mining and other earthmoving industries.

Galveston-Houston Co. common stock is traded on the New York Stock Exchange under the symbol GHX.

#90207b0114 07/26/1990 ~Business Wire

IRVINE, CA (JULY 26) BUSINESS WIRE - ReadiCare Inc. (NASDAQ:REDI) Thursday announced that it plans to add six facilities to its workers' compensation outpatient medical center network.

The additional centers, to come on-line by November 1990, will bring to 50 the number of sites of service owned, managed or under development by the company.

The new centers are located in the company's California and Washington state markets and include two start-up centers scheduled for opening by November 1990, one center to be acquired and two WorkFit rehabilitation and reconditioning centers.

The company also announced that as a result of its re-evaluation of the business prospects of one center previously classified as a discontinued activity, it will now operate the center as a continuing operation. Separately, six other workers' compensation medical centers are being expanded to meet increased levels of demand.

With respect to the one center to be acquired, the transaction is expected to close by Aug. 31, 1990. The proposed acquisition is subject to the execution of definitive agreements and other conditions. Most recent annualized revenues for the one center to be acquired and the one previously discontinued center were approximately $2.2 million. Financing requirements for the acquisition and the start-up centers will be met from the company's existing cash flow and unsecured bank lines of credit, as needed.

Said Dennis G. Danko, president and chief executive officer, ''Our expanded network will enable us to accommodate increasing patient volumes in existing geographic markets, as well as permit us to add complimentary workers' compensation services, such as outpatient rehabilitation, orthopedics, magnetic resonance imaging (MRI), and others.'' He continued, ''We are optimistic that the new centers, in the aggregate, will favorably impact operating results in the fourth quarter of fiscal-year 1991 and beyond.''

ReadiCare is the West Coast's largest operator of workers' compensation medical centers and programs serving over 20,000 client companies. The company also provides a wide range of on-site workers' compensation-related programs and management services to business, industry and other health care organizations.

ReadiCare programs have a proven track record in reducing workers' compensation costs and in improving employee productivity, health and safety.

CINCINNATI (JULY 26) BUSINESS WIRE - The United States Shoe Corp. Thursday reported that Howard Platt, executive vice president and president of footwear wholesaling and retailing, has announced his retirement as of Sept. 1, 1990.

Platt has established an ongoing consulting relationship with U.S. Shoe whereby he will be actively involved in managing projects for the Footwear Group.

Martin ''Mickey'' Schulman, group president of domestic footwear, has been promoted to president of footwear manufacturing and wholesaling, with responsibilities for both domestically manufactured footwear and footwear imported through the company's Marx & Newman division.

Reporting to Schulman, in addition to domestic manufacturing and wholesaling division presidents, will be Michael Geller, who has been promoted to chief executive officer of the Marx & Newman division, filling the position vacated by Howard Glick who retired May 1. Geller currently is president of David Evins and gruop vice president with responsibilities for Evan-Picone and Adrienne Vittadini.

Charles Goorman will continue as president of footwear retailing, reporting to Bannus Hudson, president and chief executive officer of the company.

As a consultant to U.S. Shoe, Platt will be involved in supporting the company's relationships with key accounts, providing expertise in product sourcing and in the management of overseas operations.

Schulman, who succeeds Platt in footwear wholesaling management, has been group president of domestic footwear since 1987. He was formerly with the Joyce division, where he had risen from salesman to national sales manager and ultimately president of the division. He has been with U.S. Shoe for 27 years.

As CEO of Marx & Newman, Geller will draw on his considerable expertise in sourcing footwear overseas. Geller established the Italian manufacturing capability for the Andrew Geller brand and spend the first 17 of his 27 years in the footwear industry working with American and Italian footwear manufacturers. Geller joined U.S. Shoe in January.

Prior to joining U.S. Shoe, Geller was vice president of Intershoe Inc.

WESTLAKE VILLAGE, CA (JULY 26) BUSINESS WIRE - Tandon Corp.'s (NASDAQ/NMS:TCOR) sales in Europe rose 15 percent during the first half of 1990, compared with the same period a year ago, S.L. Tandon, chairman, president and chief executive officer, informed shareholders Thursday at the multinational personal computer company's annual meeting.

Europe, which represents Tandon's primary market, accounted for 95 percent of revenues for the six months ended June 30.

Tandon also told shareholders that the company closed its second quarter on June 30 with gross margins up to 30 percent from 19 percent a year ago; with revenues from the company's higher-performance, higher-margin computer systems exceeding those from its low-end PCs; and with a strong balance sheet showing working capital of approximately $99 million, up from $83 million on Dec. 31, 1989.

''Since the beginning of 1989, we've been focusing our efforts on a return to profitability and on maintaining our role in Europe in the face of increased competition from some of the world's largest computer firms,'' Tandon said.

''While this emphasis will continue, we're now in a better position to

supplement our European marketing operations with a program to expand our currently modest share of the $30 billion United States and Canadian PC markets.

''With this North American program, we are going to try to emulate in the U.S. and Canada the wide acceptance that our newest systems, based on the Intel 80386 and 80486 microprocessors, have achieved throughout Western Europe against competition as tough as any in the U.S.,'' Tandon said.

Heading up the company's U.S. and Canadian marketing efforts as vice president, U.S. marketing, is Graham C. Beachum Jr., a computer industry specialist with more than 20 years of experience in the systems business, who was introduced to shareholders at the meeting.

Prior to joining Tandon, Beachum served in a variety of executive management and marketing positions with a number of major companies, including IBM Corp., Tandy Corp., Dell Computer Corp. and Northgate Computer Systems.

Beachum told shareholders that preliminary product advertisements began appearing in the computer trade press earlier this week but that the full North American marketing campaign is not planned to get underway until the fall.

Also at the annual meeting, held at the Hyatt Westlake Plaza in Westlake Village, shareholders re-elected a board of five directors, including S.L. Tandon, chairman, and Ranjit Sitlani, executive vice president. Outside directors include Murdock N. MacRae, Robert V. Adams and Leonard M. Silverman. Tandon directors are elected annually.

Tandon Corp., founded in 1976, is a multinational company involved in research and development, manufacture and marketing of IBM-compatible desktop and laptop personal computer systems and subsystems.

Ranked as one of the leading business PC suppliers in Western Europe, Tandon has headquarters in Moorpark.

#90207b0133 07/26/1990 ~Business Wire

REDMOND, WA (JULY 26) BUSINESS WIRE - Microsoft Corp. Thursday unveiled a multimillion-dollar business initiative to provide sophisticated network products and services to customers worldwide.

''This investment, both in dollars and developmental effort, represents

the largest commitment Microsoft has ever made,'' said Bill Gates, chairman and chief executive officer at Microsoft Corp.

Through Microsoft's new Network Specialist Program, the company is selling and supporting its network software product line through highly qualified network resellers, while continuing to work with its core group of OEMs. Microsoft will support its resellers through comprehensive training, support and major marketing programs.

The products that are included in the Network Specialist Program are Microsoft LAN Manager, Microsoft's network operating system, and Microsoft SQL Server, the database server for PC networks, jointly developed by Sybase and Microsoft. Also part of the program are the DCA/MS Select Communications Workstation and Communications Server, sold and supported by Digital Communications Associates (DCA) and resellers authorized by DCA and Microsoft.

Microsoft is focusing on a core group of initial LAN Manager and SQL Server resellers. During the next twelve months, the company intends to authorize 600 resellers in the U.S., and approximately 400 resellers internationally. To date, Microsoft has received over 700 inquiries from resellers. The first wave of authorized network specialists began attending classes this month. It is expected that the products will start being sold by mid-August.

Additional Headcount to Support Networking Thrust

To fully support this effort, Microsoft is adding headcount to its development staff, as well as its sales and product support staff and systems, and training programs. Over the next twelve months Microsoft's goal is to add approximately 300 domestic sales, support, developer and training personnel. In addition, over 100 similar positions will be staffed internationally.

In addition, Microsoft will invest heavily in end-user marketing programs including an advertising campaign, a multimillion-dollar seminar series, tradeshow participation and direct marketing activities to reach customers in domestic and international markets.

Microsoft Corp. (NASDAQ:MSFT) develops, markets and supports a wide range of software for business and professional use, including operating systems network products, languages and applications programs, as well as books, hardware and CD ROM products for the microcomputer marketplace.

#90207b0139 07/26/1990 ~Business Wire

JOPLIN, MO (JULY 26) BUSINESS WIRE - The Empire Disrict Electric Co. Thursday reported earnings for the second quarter of 1990 of 25 cents per common share.

Revenues for the quarter were $31,721,000 and net income of $1,577,000. This compares with earnings during the same period last year of 34 cents per common share on revenues of $29,974,000 and net income of $2,095,000.

The board of directors Thursday declared a quarterly dividend of 58 cents per share of common stock payable Sept. 15, 1990 to holders of record as of Sept. 1, 1990. They also declared regular quarterly dividends payable Sept. 1, 1990 on each of the three issues of preferred stock to holders of record as of Aug. 15, 1990.

The company also announced that its board of directors approved Thursday, subject to regulatory clearance, a shareholder rights plan. The plan is designed to protect the shareholders of the company by preventing abusive or unfair takeover practices.

The plan would discourage takeover bids that do not offer terms which are fair to all shareholders of the company, and, among other things, provide protection against acquisitions of control without payment of a control premium to all shareholders.

In part, the board's decision to enact the shareholder rights plan was based in the recognition that numerous other United States companies have adopted such plan, as well as the advice of its outside advisors.

The board believes it appropriate to offer similar safeguards to the company's shareholders. The shareholder rights plan is not intended to prevent a takeover of the company that is beneficial to its shareholders. The plan was not adopted in response to any existing effort to acquire control of the company.

The terms of the plan provide for a dividend distribution of one right for each share to holders of record of the company's common shares at the close of business on Aug. 20, 1990. The rights will become exercisable only in the event a person or group accumulates 10 percent or more of the company's common shares.

#90207b0143 07/26/1990 ~Business Wire

SANTA MONICA, CA (JULY 26) BUSINESS WIRE - Oppenheimer Industries Inc. (the company) Thursday announced that it received notice on July 18, 1990, from Master Mortgage Investment Fund Inc. (Master Mortgage) alleging certain defaults in the terms of the loan from Master Mortgage to the company, declining the company's request to disburse additional funds needed to extend such loan from May 31, 1990, and exercising Master Mortgage's option to accelerate payment of all outstanding principal and accrued but unpaid interest owed on the loan.

The current outstanding balance of the loan as stated by Master Mortgage is $4,340,450.59. The loan is secured by a second mortgage on the company's Armendaris Ranch in New Mexico. The company is evaluating the Master Mortgage allegations and the company's available options under the Master Mortgage loan.

The company also announced that each of U.S. Real Estate Advisors Inc. and Wespac Investors Trust III have agreed to waive any rights they may have as a result of the notice from Master Mortgage and the defaults alleged therein pursuant to the terms of the previously announced stock purchase agreement entered into on April 18, 1990, (i) to terminate such stock purchase agreement or (ii) to claim a failure of a closing condition and refuse to consummate the second step of the stock purchase transaction contemplated by that stock purchase agreement.

Moreover, the company announced that it had obtained a letter from Meyers Investments Inc., the proposed lender of a $10 million revolving credit facility pursuant to a commitment which had been delivered to the company on July 3, 1990, stating that Meyers would not deem the notice from Master Mortgage and the events alleged therein to be an event of default under a specific provision in the commitment or in any other way adversely affect the terms of the commitment (including, without limitation, the right of the company to borrow under the revolving credit facility contemplated by the commitment).

Meyers also agreed that the proceeds of the revolving credit facility may be used to make payments to Master Mortgage if the company chooses to do so.

Oppenheimer Industries is an American Stock Exchange company with real estate holdings in Missouri, California and New Mexico.

#90207b0145 07/26/1990 ~Business Wire

DAYTON, OHIO (JULY 26) BUSINESS WIRE - DPL Inc. (NYSE:DPL) today reported second quarter earnings of 48 cents per share, slightly higher than 47 cents per share earned a year ago.

For the first six months of 1990, earnings were $1.22 per share as compared to $1.33 per share in 1989.

Peter H. Forster, DPL Inc. chairman and CEO, said, ''Electric sales to business customers gained 4 percent in the second quarter over the same period last year, reflecting the continued strength of the economy in West Central Ohio.''

This strong economic growth and the recent hot humid weather also resulted in an all time record peak electricity usage by our customers of 2,604,000 kilowatts set on July 9, 1990. The new peak exceeded the previous record of 2,585,000 kilowatts set by our customers in August 1988.

Earnings for the year were lower than the first six months a year ago due to mild winter weather experienced in the first quarter and a lower level of sales to other utilities.

DPL Inc.

#90207b0149 07/26/1990 ~Business Wire

SAN JOSE, Calif. (JULY 26) BUSINESS WIRE - International Microelectronic Products Inc. (NASDAQ:IMPX) Thursday announced that revenues for its first fiscal quarter ended July 1, 1990 were up approximately 26 percent from the same quarter of fiscal 1990.

Revenues for the first quarter were $18.7 million, compared with $14.9 million for the same quarter a year ago. The company also reported net income of $875,000, or 4 cents per share for the first fiscal quarter, compared with a net loss for the same quarter last year of $941,000, or 4 cents per share.

Compared with the preceeding quarter ended March 25, 1990, revenues were essentially unchanged at $18.7 million, while net income declined from $1.4 million, or 6 cents per share. The lower net income was due primarily to increased spending in research and development and marketing in support of new product development.

''Although semiconductor demand has been virtually flat industrywide, we believe we must continue our strong investment in new product development and marketing support to position us to take advantage of future opportunities in the standard products market,'' said Barry Carrington, president and chief executive officer.

IMP has broadened its product line by adding application-specific standard products to its longtime custom product roster. Carrington said the

company's current research and development efforts are concentrated on the company's continuous time-filter technology and other products targeted at the computer peripherals industry.

During the quarter IMP announced its low-power video digital-to-analog converter (DAC) chip, one of its first application-specific standard products. The video DAC, which is targeted at laptop computer applications because of its low power consumption, supports the VGA graphics standard for IBM and IBM-compatible computers.

IMP designs and manufactures application-specific integrated circuits (ASICs) and application-specific standard products (ASSPs). The company uses its proprietary celled-based design methods and CMOS process technologies to supply value-added mixed analog and digital and complex digital chips to customers, primarily in the computer peripheral, computer and communications markets.

#90207b0153 07/26/1990 ~Business Wire

MILPITAS, Calif. (JULY 26) BUSINESS WIRE - Robert Cohn, president and chief executive officer of Octel Communications Corp., (NASDAQ/NMS:OCTL) Thursday announced that for the fiscal year 1990, ended June 30, 1990, net revenues were $127,815,000, an increase of 47 percent over net revenues of $87,179,000 for fiscal 1989.

Net income for fiscal year 1990 was $17,684,000, or $1.04 per share, an increase of 50 percent over net income of $11,798,000, or 78 cents per share, for fiscal 1989.

Net revenues for the fourth quarter ended June 30, 1990, were $36,181,000, an increase of 40 percent over net revenues of $25,916,000 for the like three-month period in fiscal 1989. Net income for the fourth quarter of fiscal 1990 was $4,943,000, or 29 cents per share, an increase of 50 percent over net income of $3,306,000, or 21 cents per share, for a similar period last year.

''We are pleased to have turned in a strong performance in the fourth quarter,'' said Cohn. ''We continued to see our revenues come from a number of different major market segments: Fortune 1000 companies, telephone companies, cellular providers, smaller companies, and international markets.

''The mix of our business continues to vary from quarter-to-quarter

between Customer Premise Equipment (CPE) shipments and Voice Information Services (VIS) shipments. The fourth quarter was a particularly strong quarter for VIS revenues.''

Octel Communications Corp. designs, manufactures and markets a full line of high-performance voice processing systems. Octel's Aspen product line is sold in the United States, Canada and overseas to small businesses and large multisite corporations.

The new Sierra multiple-application voice processing platform is a very large capacity system designed to meet the special needs of telephone companies and other voice information service providers. Octel was founded in 1982 and has headquarters in Milpitas.

#90207b0156 07/26/1990 ~Business Wire

DENVER (JULY 26) BUSINESS WIRE - The Writer Corp. (NASDAQ:WRTC) Thursday reported a net loss in 1989 of $3,242,000, or 74 cents per share, on revenues of $21,986,000.

This compares to a loss of $18,223,000, or $4.43 per share, on revenues of $35,093,000 in 1988.

For the six months ended June 30, 1990 Writer showed a net income of $2,730,000, or 62 cents per share, on revenues of $12,371,000 compared to a loss of $2,205,000, or 53 cents per share, on revenues of $9,678,000.

William E. Nollsch, president, said the company is now strictly in the homebuilding business after selling its final commercial property, downtown's Writer Square, in June.

The mixed-use development was sold to a partnership including Writer chairman and chief executive officer, George S. Writer Jr., Writer board member Roland Siedler Jr. and the project lender. The transaction resulted in a gain of approximately $3.7 million which was recognized in the second quarter.

Nollsch said the sale of Writer Square finalizes the company's restructuring. He noted that the sale of the downtown property will inject cash into the company and improve the balance sheet by adding equity and eliminating debt.

While Writer Square has operated at break even, its impact on The Writer

Corp.'s financial statements was negative due to depreciation and amortization.

He said the company also has renewed its banking lines.

In addition, Writer has closed its Atlanta and Colorado Springs operations cut marketing expenses and reduced other overhad such as salaries and staff levels.

Nollsch said the company is building single family, detached homes at three communities -- Castle Pines North, in Douglas County, and North Park in Westminster. They began building at Highlands Ranch in Douglas County in June.

#90207b0158 07/26/1990 ~Business Wire

DENVER (JULY 26) BUSINESS WIRE - Nevada Goldfields Corp. Thursday announced that Robert H. Allen, 62, and Richard Atkinson, 48, have joined Nevada Goldfields' board of directors and will immediately assume active roles in all aspects of the company's activities including strategic planning and refinancing.

Allen was a founder and chief executive officer of Gulf Resources and Chemical Corp. from 1962-1982 and currently serves on several boards of directors, including Federal Express Corp. and First-City Bancorporation. Atkinson is a professional engineer and co-founded Getty Resources with Allen. Atkinson served as president and chief executive officer of Getty Resources from its founding until it was sold.

As part of the restructuring efforts, the company has allocated 940,000 shares for issuance to 15 employees, officers and directors. These stock options are exercisable over a ten year period at CAN 45 cents per share, and are subject to regulatory and shareholder approval. The exercise price for the options was determined on the basis of the average closing price of the company's shares on The Toronto Stock Exchange for the 20 trading days ending July 16, 1990.

The company also reported that phase one of its exploration program in the Kingston district has been completed. A wide-spaced drilling program at the Jumbo target in the Manhattan district produced encouraging results. Six of the nine holes drilled intercepted ore-grade material with grades

ranging from 0.064 to 0.5 ounces of gold per ton over widths of 5 to 25 ft.

Drilling on the adjacent Keystone target resulted in the development of an additional 85,000 tons of proven and probable ore at a grade of 0.104 ounces of gold per ton. This new extension remains open both on dip and strike.

The drilling program at the Birch Creek Prospect produced several intercepts ranging from 0.043 to 0.156 ounces of gold per ton and further exploration is warranted. An additional target area known as the Coyote Springs Project has been located in the Kingston district. Surface sampling indicates that evaluation by a drilling program is warranted.

Nevada Goldfields Corp. is a Canadian public company with two gold mines in Nevada. Its shares trade on The Toronto Stock Exchange under the symbol NGF, on NASDAQ under the symbol NGFCF, and on the Stuttgart Exchange, West Germany, under the symbol NGF SG.

#90207b0161 07/26/1990 ~Business Wire

SEATTLE (JULY 26) BUSINESS WIRE - Aldus Corp. (NASDAQ: ALDC) Thursday reported record revenues and earnings for the second quarter ended June 29 1990.

Aldus reported revenues of $33.3 million, a 37 percent increase over revenues of $24.3 million reported for the second quarter of 1989. Net income for the quarter was $5.8 million, or 40 cents per share, up from $4 million, or 29 cents per share, for the same period a year ago. Results for 1989 have been restated to include those of Silicon Beach Software Inc., which Aldus acquired through a pooling of interests in February 1990.

''Our results exceeded expectations for second-quarter 1990 due to strong domestic and international demand across our product line,'' noted Bill McAleer, vice president of finance. ''Aldus PageMaker sales grew sharply following the May shipment of PageMaker 4.0 for the Macintosh and the June shipment of PageMaker 3.01 for Microsoft Windows 3.0. Sales of other products, particularly Aldus Persuasion and Aldus FreeHand, also contributed to the increase in sales this quarter.''

During the second quarter, Aldus also announced the shipment of two Chinese language versions of PageMaker 3.0 for the Macintosh, SuperCard 1.5 for the Macintosh, and Aldus PrePrint, a new program for generating four-color separations from the Macintosh.

Aldus Corp. creates computer software that helps people throughout the world effectively communicate information and ideas. In addition to PageMaker, the company's flagship product, the Aldus product line includes Aldus Persuasion, Aldus FreeHand and Aldus PrePrint. Silicon Beach Software products include SuperPaint, SuperCard, Digital Darkroom, Super 3D, and Personal Press. Aldus distributes both product lines through an international network of more than 16,000 dealers and distributors.

#90207b0164 07/26/1990 ~Business Wire

DALLAS (JULY 26) BUSINESS WIRE - Lomas & Nettleton Mortgage Investors (NYSE: LOM) Thursday announced that operations for the fiscal year ended June 30, 1990, resulted in a net loss of $26,438,800, or $2.26 per share, as compared to net income of $3,235,563, or 28 cents per share, reported in the prior year.

Net income for the quarter ended June 30, 1990, amounted to $394,712, or 3 cents per share, as compared to a net loss of $17,306,693, or $1.48 per share, reported for the same period last year.

Jess Hay, chairman and chief executive officer, stated that ''Results of operations for the fiscal year ended June 30, 1990 were impacted negatively by the $38,000,000 provision for possible losses established at March 31, 1990. Results of operations for the quarter and year ended June 30, 1989 reflect the $29,000,000 provision for possible losses established at June 30, 1989. The significant provisions established in each year reflected the continuing deterioration in the United States real estate markets, the constriction of liquidity available to real estate and the negative consequences of such conditions on LNMI's borrowers.''

The Trust also announced that the record date for determining shareholders entitled to notice of and to vote at the Trust's 1990 annual meeting, which is scheduled to be held in Dallas on Oct. 19, has been fixed at the close of business Aug. 27. The Trust expects to mail the related proxy statement and its 1990 annual report to shareholders on or about Sept. 17.

Lomas & Nettleton Mortgage Investors is a real estate investment trust engaged in short-term real estate lending for the construction and development of projects throughout the United States. It is managed by Lomas Management.

WOOSTER, OH (JULY 26) BUSINESS WIRE - FirstFederal Financial Services Corp. (NASDAQ:FFSW), the holding company of First Federal Savings and Loan Association of Wooster, Thursday announced the signing of a definitive agreement to acquire First Federal Savings and Loan Association of Mount Vernon.

First Federal of Mount Vernon, a federally chartered and FDIC-insured mutual savings association with four offices, will merge with and into First Federal of Wooster.

The transaction is subject to regulatory approval from the Office of Thrift Supervision and is subject to the completion of due diligence to the satisfaction of FirstFederal Financial Services Corp.

In announcing the signing of the agreement, Richard E. Herald, chairman and chief executive officer of FirstFederal Financial Services Corp., said: ''We are very pleased that First Federal of Mount Vernon has agreed to join forces with our institution.

''We believe that the proximity of the market areas, the value of the core

deposits acquired and the economies of scale that can be achieved make this acquisition attractive from our stockholders' perspective.

''And, we are delighted that the personnel of First Federal of Mount Vernon will be joining our team, ensuring the personal touch that demonstrates our commitment to providing high-quality financial services to our markets.''

Richard W. Drake, president and chief executive officer of First Federal of Mount Vernon, said: ''Our board is very optimistic about the opportunities for expansion of services that this transaction will bring about for our customers and our market.

''FirstFederal Financial Services Corp. is a first-rate savings and loan holding company, the subsidiary of which exceeds all capital standards imposed under the recent financial institutions legislation. This transaction will ensure that our customers will maintain access to one of the best-capitalized thrift institutions in the Midwest.''

FirstFederal Financial Services Corp. had total assets at June 30 of $321 million, shareholders' equity of $25.7 million and a capital-to-assets ratio of 8.00 percent. Its principal subsidiary, First Federal Savings and Loan Association of Wooster, operates eight offices in the north-central Ohio counties of Wayne, Ashland, Medina and Richland.

First Federal Savings and Loan Association of Mount Vernon had total assets of $77.4 million at June 30. It operates three offices in Mount Vernon and one in Loudonville.

IRVINE, CA (JULY 26) BUSINESS WIRE - Resmaster, a new high-tech

communications company, announced their acquisition by Comparator Systems Corp. Wednesday in a stock-exchange transaction giving Comparator 81 percent of Resmaster's common stock.

In their first phase Resmaster will be supplying reservation communications, credit-card authorization, communications management and other communications services to the travel and leisure industries in Mexico.

Resmaster's marketing in Mexico will be handled by Sat-Networks International (SNI), an elite team of communications experts who provide an interpretive conduit between United States high-technology and international end users. SNI is considered to be at the technological forefront of communications in Mexico, the Caribbean and the Pacific Rim.

Sat-Networks International is filed as an international communications common carrier in the United States, and recently delivered $300,000 worth of communications hardware to a Mexican university system.

Revenues at Resmaster, from their Mexican business, are expected to be $1.5 million by the end of the first year. Resmaster expects to be making further announcements, in approximately 30 days, on contracts with large airline corporations in the United States.

SAN FRANCISCO (JULY 26) BUSINESS WIRE - Bank of America Thursday announced that its no-cost package of car-related services that makes it easier for consumers to buy, finance, and maintain their cars is now available through 375 franchised dealers statewide.

Called CarPower, the program is the first of its kind offered by a major California bank. Included in the CarPower program is the CarNetwork service, a discount buying plan that can save Bank of America customers money on new cars without their having to negotiate.

With the CarNetwork service, participating dealers have agreed to set car prices at a certain percentage or dollar amount above the manufacturer's invoice. The exact percentage or amount for each model is determined in advance by the dealer. The markup may be as little as 1 percent, but is never more than 9 percent above the factory invoice.

The CarNetwork Service is operated for Bank of America by Automotive Dealers' Marketing, Inc., of Los Angeles, Calif., the largest provider of

discount car-buying referral programs in the U.S. The program is available exclusively to all Bank of America customers. To take advantage of the service, customers simply make an appointment and present their CarPower membership card to a participating dealer. Customers may obtain a membership card and list of dealers from any Bank of America branch.

Bank of America initially test marketed the program in Bakersfield and then expanded it to the greater San Francisco Bay Area earlier this year. The 375 auto dealers now participating in the program represent most major foreign and domestic manufacturers.

Bank of America also offers pre-approval for a car loan and up to 100 percent financing on most new cars. And to launch the statewide CarPower rollout, BofA is waiving its $60 loan fee on applications for new car loans received between now and September 29. To apply for pre-approval, car buyers simply stop by any Bank of America branch or call toll-free 1-800-THE-BofA, extension 500, (1-800-843-2632, extension 500) from 8 a.m. to 8 p.m. weekdays and 9 a.m. to 5 p.m. Saturdays. The CarNetwork discounts are available to customers no matter how they finance their purchase.

The benefits of the CarPower program don't end when the car rolls off the lot, either. Many participating dealers offer CarPower customers a 10 percent discount on all parts, labor, or both (except body work and advertised repair specials). CarPower customers receive the discount on all their cars, not just those purchased through the program.

ST. LOUIS (JULY 26) BUSINESS WIRE - Roosevelt Financial Group Inc. (NASDAQ:RFED), the holding company for Roosevelt Bank, reported net income for the quarter ended June 30, 1990 of $1.5 million, or 25 cents per share.

This compares with earnings of $4.3 million, or 73 cents per share, for the quarter ended June 30, 1989.

For the six months ended June 30, 1990, the Company had a loss of $3.1 million, or 54 cents per share, attributable to its 80 cents per share loss in the first quarter resulting from the liquidation of its high yield bond portfolio.

The company also announced that its board of directors declared the regular dividend of 20 cents per share for the quarter ended June 30, 1990. The dividend will be paid Aug. 31, 1990 to stockholders of record

as of Aug. 15, 1990.

Company officials also announced that the Federal Deposit Insurance Corporation (FDIC) recently concluded an examination of Roosevelt Bank. The FDIC examiners concluded that no additional reserves or charges are necessary with respect to the Bank's loan portfolios or the operation of its mortgage-backed securities and hedging activities.

Roosevelt Bank has now undergone separate examinations by the Office of Thrift Supervision and the FDIC since the passage of the Financial Institutions Reform, Recovery and Enforcement Act in August of 1989. At June 30, 1990, Roosevelt's non-performing assets as a percentage of total assets was .28 percent.

With $2.6 billion in assets, Roosevelt is the largest St. Louis- based savings institution. Roosevelt now conducts operations through 22 full-service offices in Missouri and Illinois, including 20 in the metropolitan St. Louis area.

KAHULUI, HAWAII (JULY 26) BUSINESS WIRE - Maui Land & Pineapple Company Inc. reported net income of $470,000 or 26 cents per share for the second quarter of 1990 compared to $6.9 million or $3.83 per share for the second quarter of 1989.

Revenues of $27 million for the second quarter of 1990 were 32 percent lower than the like period last year.

For the first half of 1990, net income was $197,000 or 11 cents per share compared to $7.6 million or $4.22 per share for the first six months of 1989. Revenues for the first half of 1990 were $48.9 million compared to $64.6 million for the like period in 1989.

Lower results for the second quarter and first half of 1990 were primarily due to the timing of sales of the eight ocean-front lots at the Kapalua Place subdivision.

Resort operations at Kapalua, excluding real estate sales, also reported lower revenues and operating profits in the second quarter and first half of 1990 compared to the like periods last year.

For the second quarter of 1990, the company's pineapple operations

reported higher revenues and a slightly lower operating loss compared to last year. A higher average unit value of sales contributed to these improved results. For the first half of 1990, lower revenues and an increased operating loss were reported by the pineapple operations compared to the like period in 1989, as higher costs and lower case volume of sales offset a higher average unit value of sales.

Revenues and operating profits from the Kaahumanu Center increased in the second quarter and first half of 1990 compared to the like periods in 1989.

#90207b0265 07/26/1990 ~Business Wire

SAN JOSE, Calif. (JULY 26) BUSINESS WIRE - ARIX Corporation (NASDAQ:ARIX) Thursday announced that it would record restructuring and operational charges aggregating between approximately $14 million and $16 million in the fourth quarter of fiscal 1990.

These charges to earnings were incurred in connection with a previously-announced plan to downsize the company's ARIX Computer Corporation subsidiary as a result of reduced revenues from its largest customer, Unisys Corporation.

The non-recuring restructuring charge is estimated to be approximately $12 to $14 million and is comprised of provisions for employee termination costs resulting from a reduction in force effective June 1, 1990, termination of certain lease obligations relating to excess facilities and the writedown of certain fixed assets, inventory and other assets.

The operational charge consists principally of reserve provisions for product upgrades and receivables.

As a result of the charges and reduced fourth-quarter revenues (the latter are estimated to be approximately $7 million, compared with $20 million of revenues in the fourth quarter of fiscal 1989), the Company expects to post net losses of approximately $20 to $22 million for the quarter, or $(2.60) to $(2.90) per share, and approximately $31 to $33 million for fiscal 1990, or $(4.05) to $(4.35) per share.

The Company anticipates that, based upon its estimates of the results of the quarter and the fiscal year, its ability to borrow funds under its existing bank line of credit will be reduced from the current amount outstanding of approximately $2.9 million. The Company is seeking alternative financing sources.

ARIX chairman and chief executive officer Eugene Manno said, ''Although our financial results for the quarter and the fiscal year are disappointing, we believe that we are now positioned to go forward with our expenditures more appropriately in line with our revenue expectations.''

ARIX Corporation, through ARIX Computer Corporation and its subsidiaries, manufactures and markets UNIX-based symmetric multi-processing minicomputers for applications in multi-user environments. ARIX computers are marketed worldwide indirectly through VARs, OEMs, systems integrators and distributors and directly to select large numbers. The Company has an installed base of over 6,000 systems.

#90207b0606 07/26/1990 ~Business Wire

MENLO PARK, CA (JULY 26) BUSINESS WIRE - Raychem Corp. Thursday reported a loss for fiscal 1990 of $111 million, or $3.12 per share, compared with earnings of $36 million, or $1.04 per share, in fiscal 1989.

The fiscal 1990 loss includes a previously announced $90 million provision for restructuring and divestitures. Sales grew by 3 percent to $1.11 billion from $1.08 billion in the previous year.

For the fourth quarter of fiscal 1990, Raychem reported a net loss of $14 million, or 38 cents per share, vs. net earnings of $13 million, or 37 cents per share, in the corresponding period of the previous year. Fourth quarter sales decreased 2 percent to $295 million from $301 million a year ago.

Fourth quarter 1990 results exclude operations to be divested, Advanced Packaging Systems and shape memory alloys, which were provided for in the

third quarter restructuring charge.

Reported sales for the fourth quarter would have been lower by $11 million had foreign currency exchange rates been the same as the corresponding period in fiscal 1989. Currency exchange rates had essentially no effect on the company's reported sales level for the fiscal year as a whole, compared with fiscal year 1989.

Sales in fiscal 1990 declined from prior year levels in Raychem's electronics segment (annual sales fiscal year 90 $444 million, fiscal year 89 $474 million) and improved in the industrial segment (fiscal year 90 $340 million, fiscal year 89 $309 million) and telecommunications segment (fiscal year 90 $292 million, fiscal year 89 $277 million).

Reported sales in the fourth quarter were down vs. last year's fourth quarter in both electronics ($116 million vs. $131 million) and telecommunications ($78 million vs. $81 million) and increased in the industrial segment ($91 million vs. $83 million).

Raychem also announced its regular quarterly dividend of 8 cents per share, payable on Sept. 5, 1990 to stockholders of record as of Aug. 8, 1990.

Raychem is a broadly based materials science company serving international markets. The company develops and supplies high- performance products for the aerospace, automotive, construction, electronics, electrical power, process and telecommunications industries.

MENLO PARK, CA (JULY 26) BUSINESS WIRE - Beta Phase (PSE:BTA.P), a high performance connector manufacturer, announced Thursday it has received a $1 million advance under a license agreement from Molex Inc., a leading worldwide electronic connector manufacturer.

Molex has a worldwide co-exclusive license to BetaFlex connector technology and has the right to be an alternative source for Beta Phase high performance connectors.

In connection with making the advance, Molex received a warrant from Beta Phase to purchase 3 million shares of Beta Phase common stock at 30 cents per share anytime during the next five years. Last February Molex invested $1,075,000 for 716,666 shares of series C preferred stock which can be converted into 3,583,330 shares of common stock.

Beta Phase manufactures and distributes a proprietary product line, BetaFlex connectors, using flexible circuitry and shape memory alloy technology. Beta Phase connectors provide improved miniaturization and higher performance in high density and high speed transmission applications.

These products find application in new supercomputers, computers, new military electronic systems and advanced CAD/CAM workstations.

Founded in 1984, the company operates a manufacturing, development and headquarters facility in Menlo Park. Its products are sold direct and through a nationwide network of manufacturers' representatives.

Molex is a Fortune 500 company which designs and manufactures a broad line of electronic connectors, flat cable, switches and associated application tooling. Based in Lisle, Ill., the company's worldwide operations include 46 plants in 20 countries. Sales for the fiscal year ended June 30, 1989 were $572 million.

WALLINGFORD, CONN. (JULY 26) BUSINESS WIRE - Novametrix Medical Systems Inc. (NASDAQ/NMS Symbol: NMTX) Thursday announced that Siemens Medical Electronics Inc., a U.S.-based affiliate of Siemens A.G., was not able to finalize a decision to acquire a controlling interest in the company by the original expiration date of the option to purchase stock or assets in the company.

The company stated that circumstances unrelated to the relationship between Novametrix and Siemens' U.S. affiliate precluded a decision by Siemens to make such investment and does not reflect on the relationship between the companies.

The company confirmed that the $3.125 million OEM Agreement with Siemens entered into in March 1990 is still in effect and is on schedule with initial deliveries slated to begin in the company's fourth quarter of fiscal 1991. In addition, the company stated that Siemens has begun to market Novametrix products in certain international markets, where in the past, the company had been poorly represented.

Novametrix Medical Systems Inc. is a leading designer, developer, manufacturer and marketer of medical electronic instruments which non-invasively and continuously assess a critically ill patient's oxygen and carbon dioxide status. The company's products are primarily used in

operating rooms, intensive care units and respiratory therapy departments.

HAUPPAUGE, NY (JULY 26) BUSINESS WIRE - July, 26, 1990, Robert A. Carlson presiden and chief executive officer, North Atlantic Industries Inc. (NASDAQ:NATL) today announced record second quarter and first half results for the period ended June 30, 1990.

Net income for the second quarter of 1990 increased 86 percent to $854,000 or $0.24 per share, compared with net income of $459,000, or $0.13 per share, in the second quarter of 1989. Revenues for the quarter increased 10 percent to $10.4 million compared with $9.5 million during the second quarter of 1989.

For the first six months of 1990, net income rose 147 percent to $1,632,000, or $0.46 per share, as compared to net income of $662,000, or $0.19 per share, for the first six months of 1989.

Revenues for the first half of 1990 increased 15 percent to $20.6 million compared with $17.9 million in the first half of 1989. The increase in sales for both the quarter and the year to date is attributable to increased shipments of military products. The improvement in net income for the second quarter and first half of 1990 resulted in part from the increase in sales and also from cost reductions achieved through the company's restructuring activities initiated during the fourth quarter of 1989. Net income for both periods benefitted from reductions in income taxes.

Carlson commented, ''Our first half performance matched the company's expectations and we remain optimistic about the Company's performance for the remainder of the year. Our backlog is currently near its historic high and stands at $19.6 million, compared with $10.3 million at the same time last year.''

North Atlantic Industries designs, manufactures and markets computer, computer peripheral, communications and instrumentation products to government and aerospace industry customers. The company is a leading supplier of TEMPEST printers, MIL-SPEC teleprinters and tape storage systems, as well as phase sensitive instruments.

#90207b0620 07/26/1990 ~Business Wire

PLANO, TX (JULY 26) BUSINESS WIRE - PRONET INC. (NASDAQ/NMS Symbol: PNET) thursday announced revenues and earnings for the second quarter ended June 30, 1990. The company's fiscal 1990 net income continues to demonstrate significant improvement.

Revenues for the second quarter of fiscal 1990 increased 22 percent to $3,729,000 from $3,056,000 reported for the same quarter last year. The company reported net income for the second quarter of $82,000, or $0.02 per share, as compared to a loss of $(145,000), or $(0.04) for the same quarter in fiscal 1989.

For the six months ended June 30, 1990, revenues increased 24 percent to $7,445,000 as compared to $5,996,000 reported in fiscal 1989. The company achieved net earnings of $91,000, or $0.02 per share, a significant improvement over a net loss of $(302,000), or $(0.08) per share, reported in the same six month period last year.

Commenting on the results, Jackie Kimzey, president and chief executive officer of PRONET INC., stated, ''Our second quarter results reflect the company's corporate strategy to increase market share within our existing paging locations thereby maximizing our financial performance. We are extremely pleased with our significant increase in second quarter net earnings of $82,000, or $0.02 per share, over our first quarter return to profitability of $9,000, or $0.00 per share.

''Operating cash flow also increased 12 percent to $976,000 from $869,000 reported in the first quarter of fiscal 1990 and increased 65 percent for the six months ended June 30, 1990 compared to the first six months of fiscal 1989. Operating results from all of our medical paging locations remain strong. During the second quarter, we added 4,572 new pagers, bringing the total number of pagers in service to 86,792.''

Kimzey continued, ''We are also pleased that expansion of our ProNet Tracking System (PTS) operation into new markets is proceeding as planned. We recently completed the installation of a 1,000 tag PTS system in Houston, Texas, which tracked and recovered a robbery within the first week of operation. The Houston marketplace is the company's third PTS system in Texas, joining Austin and Dallas.

PRONET INC. is the leading supplier of medical communications integrated paging systems designed exclusively for medical institutions and health care professionals. In addition, PRONET operates a state-of-the art miniature radio transmitter and receiver system which can be attached to merchandise to assist police in the apprehension of robbery suspects and the recovery of stolen merchandise.

#90207b0621 07/26/1990 ~Business Wire
MILFORD, CONN. (JULY 26) BUSINESS WIRE - BIC Corp. for the second quarter ended July 1, reported net income of $7,608,000, or $.62 per share compared with net income of $7,662,000, or $.63 per share, in the prior year's second quarter. Sales were $91,636,000 compared with $95,470,000.

Net income for the first six months of 1990 was $13,618,000, or $1.12 per share, compared with net income of $14,172,000, or $1.17 per share. Sales were $170,940,000 compared with $175,880,000.

Net income in both the 1990 second quarter and first half includes an extraordinary gain of $498,000, or $.04 per share, due to a Mexican tax-loss carryforward.

Commenting on second quarter U.S. operations, Bruno Bich, president, said, ''Sales and earnings gains from writing instruments and shavers, plus reduced losses in perfume, were not sufficient to offset substantial sales and earnings decreases in lighters.

''The decline in lighter sales is attributed to both a reduction in the number of smokers in the U.S. and, more significantly, to an increase in the number of low-quality, inexpensive lighters imported into the United States from China, Thailand and Korea. We are addressing this problem with revised and aggressive marketing programs and increased sales efforts which are designed to counteract these low-quality, imported lighters.''

#90207b0622 07/26/1990 ~Business Wire
DALLAS (JULY 26) BUSINESS WIRE - Uranium Resources Inc. (''URI''), a

Dallas-based uranium mining company, announced Thursday that its stockholders have approved a one-for-four reverse stock split of URI's common stock to become effective on or about Aug. 1, 1990.

Upon effectiveness, URI will have approximately 6.6 million shares outstanding. Immediately after the reverse split is effected, URI will exchange the certificates issued to its stockholders and warrantholders for new certificates representing the number of shares of stock and warrants its security holders will be entitled to as a result of the reverse split.

Management proposed the reverse split in an effort to enhance the liquidity of the market for the common stock and to make URI's common stock eligible for trading on the NASDAQ National Market System (''NMS'').

The common stock is traded on NASDAQ under the symbol ''URIX'' and on The Toronto Stock Exchange under the symbol ''URI.''

Upon the effectiveness of the reverse split, the NASDAQ symbol for the common stock will be changed for a period of approximately 30 days to ''URIXD.'' The company anticipates that the symbol for the common stock on The Toronto Stock Exchange will change to ''URX.''

The company's warrants and units trade on NASDAQ under the symbols URIXW and URIXU, respectively. Upon the effectiveness of the reverse split, these NASDAQ symbols will be changed to ''URIWD'' for the warrants and ''URIUD'' for the units for approximately 30 days.

The company produces uranium in south Texas using low cost in situ solution mining techniques, and holds substantial uranium reserves in New Mexico.

SAN JUAN CAPISTRANO, CA (JULY 26) BUSINESS WIRE - Nichols Institute (ASE:LAB) Thursday announced that it has commenced sales to the public of 1,767,032 shares of its common stock at $16-5/8 per share pursuant to its previously announced public offering.

The company is selling 850,000 shares and current securityholders are selling an additional 917,032 shares, including 489,911 shares to be acquired through exercise of stock-purchase warrants by the company's senior noteholders immediately prior to their sale.

The company expects to receive net proceeds of approximately $16,267,000 from the exercise of the warrants and the sale of the shares being sold by the company, after deduction of underwriting discounts and offering expenses. Kidder, Peabody & Co. Inc. and William Blair & Co. are co-managing underwriters for the offering.

They have been granted a 30-day option to purchase up to 250,000 additional shares from the company on the same terms to cover over-allotments.

The proceeds to be received by the company from the offering represent new capital and are presently intended to be used for working capital and general corporate purposes which may include, among other things, the expansion of existing laboratory capabilities and the establishment of additional regional laboratories.

A prospectus can be obtained from Kidder, Peabody & Co. Inc., 10 Hanover Sq., New York, NY 10005 or from William Blair & Co., 135 S. LaSalle, Chicago, Ill. 60603.

Nichols Institute provides esoteric diagnostic testing to clients nationwide in the fields of endocrinology, genetics, immunology, microbiology, molecular biology, oncology, serology, special chemistries, toxicology and virology. It also has regional laboratories in California, the Pacific Northwest and in the Midwest which provide clinical testing to those markets.

NIDA-certified substance-abuse testing is also provided to clients nationwide. Nichols Institute Diagnostics manufactures kits for the performance of medical diagnostic tests which are distributed worldwide.

#90207b0626 07/26/1990 ~Business Wire

SEATTLE (JULY 26) BUSINESS WIRE - Lindal Cedar Homes Inc. (NASDAQ:LNDL) reported Thursday that consistently strong home sales and the elimination of the losses at WindowVisions enabled the company to post a 35% gain in profits in the second quarter compared to the second quarter a year ago.

For the quarter ended July 1, 1990, net earnings were $1.16 million, or $.44 per share, on revenues of $13.4 million compared to net earnings of $861,000, or $.33 per share, on revenues of $14.9 million in the like period a year ago.

Lindal reported net earnings for the first half of 1990 were $709,000, or $.27 per share, on revenues of $21.6 million compared to $116,000, or $.04 per share, on revenues of $23.0 million in last year's first six months.

Revenues were down slightly because of the sale of the hardwood flooring unit earlier this year and the company's decision to downsize the window segment. Earnings per share have been adjusted to reflect issuance of 10% stock dividends in June 1990 and in May 1989.

''Custom home division sales have kept pace with last year's record levels and new orders are strong,'' said Robert W. Lindal, president. ''Downsizing WindowVisions by restricting the division's outside sales reduced consolidated revenues but, more importantly, enabled WindowVisions to post a profit of $35,000, or $.01 per share, in the second quarter this year compared to a loss of $315,000 or $.12 per share in the second quarter a year ago.''

Lindal said the sale of the hardwood flooring unit and the downsizing of WindowVisions have resolved the problems the company had been experiencing with those units. The company posted a $34,000 or $.01 per share loss on the sale of the remaining hardwood lumber inventory.

Lindal Cedar Homes is the world's largest manufacturer of top-of-the-line, year-round cedar homes and sunrooms which are sold under the trademarks of Lindal Cedar Homes and Justus Log Homes. Over 350 distributors are located in the U.S., Canada, Japan and other foreign countries.

MINNEAPOLIS AND DENVER (JULY 26) BUSINESS WIRE - United Banks of Colorado Inc., (NASDAQ: UBKS) and Norwest Corporation (NYSE: NOB) Thursday announced the signing of a definitive agreement for the merger of United Banks, a bank holding company with headquarters in Denver, into Norwest, a diversified financial services organization based in Minneapolis. The agreement, approved by the boards of directors of both companies, is subject to approval by shareholders of United and regulatory agencies.

Under the agreement, each share of United common stock will be exchanged for 1.22 shares of Norwest common stock and each share of United preferred stock will be converted into the right to receive $51.50 and accrued dividends in cash at the time of closing. Based on a 30-day average of Norwest's stock price before July 10, the day merger discussions were announced, United's common shareholders would receive Norwest stock with a value of approximately $440 million. The transaction is structured to be a tax-free exchange for United's common shareholders and accounted for as a pooling of interests.

In addition, United has granted to Norwest an option exercisable, in whole or in part, under certain circumstances to purchase authorized but unissued shares of United common stock equal to 24.99 percent of United's shares currently outstanding.

The merger is expected to result in less than one percent earnings dilution in 1991 and will be accretive for Norwest's stockholders in 1992, the first full year of operations. Pursuant to the merger agreement, adjustments to align United more closely with Norwest's accounting and credit standards, as well as transaction-related expenses, (which are currently estimated to total as much as $95 million) will be reflected in United's 1990 results. Such amounts will be in addition to the special provisions for loan losses and real estate write-downs, aggregating approximately $95 million, which were announced today by United Banks.

United Banks of Colorado, headquartered in Denver, has assets of $6.3 billion and more than 3,600 employees. It serves more than 500,000 customers throughout the Rocky Mountain region through its 40 Colorado banks and other affiliates engaged in data processing, insurance, mortgage banking, trust and securities brokerage. Norwest, based in Minneapolis, has assets of $26.8 billion, and provides banking, banking-related and specialized financial services through more than 1,270 offices in 47 states and internationally.

DAYTON, OH (JULY 26) BUSINESS WIRE - NCR Corp. Thursday announced a $12 million, multi-year reseller agreement between its customer services division and Codex Corp., of Mansfield, Mass.

Under this agreement, NCR will market Codex leased line modems, statistical multiplexers and other products.

''This agreement allows NCR to provide end-to-end solutions for our customers,'' said Gary Burnett, vice president, NCR customer services division. ''We will protect our customers' equipment investment and extend its useful life by providing added functionality.''

Many NCR customers need to network different systems to provide increased user access to a variety of applications. NCR's customer services division helps customers design and install communications and networking solutions.

''This agreement illustrates a strategy at NCR to build partnerships with third-party vendors which enables us to offer value-added solutions,'' Burnett noted.

Codex Corp., a subsidiary of Motorola Inc., is a leading supplier of network products and integrated network solutions. Offerings include network management systems, T1/E1 switches, X.25 networks, multiplexers, DSU/CSUs, modems, LAN, internet working devices and professional services.

Service and maintenance support for these products will be provided by NCR's 5,000 field engineers at 400 locations throughout the United States.

NCR Corp., based in Dayton, develops, manufactures, markets and supports business information processing systems for worldwide markets.

ISSAQUAH, WA (JULY 26) BUSINESS WIRE - Personal computer software reseller Egghead Discount Software (NASDAQ:EGGS) announced Thursday that the company's board of directors named Matthew J. Griffin president and chief operating officer (COO) at its regularly scheduled July meeting.

Griffin's promotion is effective Aug. 1. Since joining the company in February 1989, Griffin served first as Executive Vice President of Corporate Development, then as EVP/Administration and later EVP/Operations. In his new role as president and COO, Griffin will continue to oversee the company's two main businesses -- retail and direct sales -- and the company's administrative functions. Egghead chairman and chief executive officer Stuart M. Sloan formerly held the title of president.

Sloan said, ''In many ways, Matt's new title merely confirms what he's been doing since the beginning -- that is, very actively and capably managing all the key operations of our business. This change will allow Matt to take an even stronger leadership role at Egghead, however, and will allow me to spend even more time on the company's strategic analysis and positioning.''

Griffin's compensation package based on equity incentives will not change with his new position. He draws an annual salary of $1.00 and has options to acquire up to 400,000 shares of Egghead stock at an average price of $14.13 per share.

Griffin graduated magna cum laude from Princeton University and holds masters degrees in construction management and business administration from Stanford University. He previously served as a principal of Wright Runstad & Co., a Pacific Northwest developer of downtown office towers and is a principal of the private investment firm Sloan Capital Cos.

Egghead Discount Software sells personal computer software, peripherals, and accessories to individuals and businesses through its 191 company owned and operated retail stores in the U.S. and Canada, and through its 140 direct sales representatives nationwide.

For more information, contact John Kist or Diane Merz at Egghead Discount Software, 206/391-0800.

#90207b0641 07/26/1990 ~Business Wire

HOLYOKE, MA (JULY 26) BUSINESS WIRE - Heritage Bancorp Inc. (NASDAQ:HNIS) Thursday reported a loss for the second quarter ended June 30, 1990 of $8.4 million or $1.16 per share compared to a loss of $18.9 million or $2.59 per share for the first quarter of 1990.

The loss resulted primarily from the provision for loan losses of $8.5 million, as previously announced. For the six months ended June 30, 1990 the net loss was $27.3 million or $3.75 per share compared to a loss of $2.0 million or $.26 per share for the first half of 1989.

At June 30, 1990 non-performing loans were $81.6 million, other real estate owned totaled $8.3 million while in-substance foreclosures equaled $26.7 million, bringing total non-performing assets to $116.6 million or 7.25% of total assets.

With this quarter's provision for loan losses and charge-offs, the period end loan loss reserve was $34.8 million, representing 42.7% of non-performing loans and 29.8% of non-performing assets.

Chairman Richard B. Covell commented, ''until market conditions improve, there can be no assurances that there will not be further increases in non-performing assets or declines in collateral values that would necessitate more than customary increases in loan loss reserves or charge-offs in the future.''

With respect to operational matters, the Company reported that its new operations center, which will consolidate several important operations functions and further improve operating efficiencies, is proceeding on schedule and on budget. In addition, the Bank plans to introduce a number of new deposit based products over the next six months designed to further meet our customers' needs.

At June 30, 1990, total assets were $1,608.7 million versus $1,733.0 million at June 30, 1989. Heritage Bancorp Inc. is the holding company of Heritage Bank for Savings, a Massachusetts-chartered savings bank, with 26 offices in western Massachusetts.

VALLEY STREAM, NY (JULY 26) BUSINESS WIRE - Nationwide Cellular Service Inc. (NASDAQ:NCEL) Thursday announced that a Memorandum of Agreement had been entered into between Nationwide Cellular Service Inc. (''Nationwide'') and the Ministry of Communications of Romania (''MCR'').

Stephen Katz, chairman of the board of Nationwide, said that the Memorandum expressed the intention of Nationwide and the MCR to enter into a joint venture, with Nationwide owning not less than 51 percent, subject to the laws of Romania.

The joint venture will design, engineer, and operate the cellular telephone system for Romania, a country with 24 million inhabitants. Nationwide, subject to the ratification of its board of directors, is to provide, among other things, initial funding for the joint venture.

Katz also noted that no definitive agreement has yet been executed pending among other things, the establishment of rates, the receipt of import and construction permits and the passage of pending joint venture and tax abatement legislation in Romania.

ELMSFORD, NY (JULY 26) BUSINESS WIRE - Clinical Technologies Associates Inc., (NASDAQ:CTAI and CTAIW) Thursday announced that The Upjohn Co. has elected to exercise its option, under the agreement entered into on May 16 to proceed with the development of CTA's patented oral delivery system for use with a pharmaceutical agent.

Accordingly, during Stage I of the agreement, Upjohn shall pay CTA three additional quarterly installments of $250,000 each.

Additionally, by Aug. 10, Upjohn shall purchase the remaining 65,250 shares of CTA common stock contemplated in the agreement, priced at $11.5625 per share, the fair market value of such stock on the day proceeding the date on which the parties reached a general understanding.

Pursuant to the agreement, CTA also has granted Upjohn an option to purchase an additional 87,000 shares of CTA common stock at $17.34 per share.

CTA develops new pharmaceutical products, including a unique Oral Delivery System for drugs which previously could be administered only by injection.

This patented Oral Delivery System, based on pre-clinical testing in animals, allows peptides, such as insulin and mucopolysaccharides, such as heparin, which currently cannot be administered via the digestive tract, to be taken orally.

CTA also develops drugs that affect the central nervous system and the cardiovascular system and performs clinical studies for pharmaceutical companies seeking approval from the U.S. Food and Drug Administration to market new drugs.

#90207b0647 07/26/1990 ~Business Wire

PORTLAND, ME (JULY 26) BUSINESS WIRE - UNUM Corp. (NYSE:UNM) Thursday announced 1990 second quarter net income of $50.3 million or $1.45 per share compared to $39.5 million or 95 cents per share for the same quarter in 1989.

Net income was increased $9.1 million or 26 cents per share due to the resolution of an outstanding federal tax issue. Revenues for second quarter 1990 were $513.2 million, versus $476.0 million for second quarter 1989.

Net income for the six months ended June 30, 1990, was $93.8 million or $2.68 per share. For the same period in 1989, net income was $72.4 million or $1.72 per share. Revenues for the first six months of 1990 were $1.0 billion versus $950.6 million for the comparable period in 1989.

In May, UNUM announced the formation of Specialty and Group Insurance Operations which currently consists of two reporting segments, Employee Benefits and Retirement Products. Pre-tax income for Employee Benefits was $42.8 million for second quarter 1990 compared to $37.1 million for the same period in 1989.

Premiums for second quarter 1990 were $225.6 million versus $206.6 million in second quarter 1989. Sales for the segment increased 25 percent to $45.9 million, including a 23 percent increase in sales of long term disability insurance to $29.2 million.

Retirement Products had second quarter 1990 pre-tax income of $4.0 million compared to $3.1 million in the same quarter of 1989. Second quarter revenues for the segment were $111.7 million versus $110.4 million for second quarter 1989.

For second quarter 1990, UNUM's Individual Life Division had pre-tax income of $1.7 million compared to $1.3 million for the same quarter in 1989. Premiums of $2.1 million for second quarter 1990 were equal to those of second quarter 1989.

UNUM Corp. is a specialty insurance holding company headquartered in

Portland, Maine. UNUM is the nation's leading provider of group long term disability insurance and a major provider of employee benefits and individual disability insurance. The company also markets retirement plans and long term care insurance.

STAMFORD, CT (JULY 26) BUSINESS WIRE - Trenwick Group Inc. reported earnings of 62 cents per share in the second quarter of 1990, an increase of 17 percent compared to earnings per share of 53 cents in the second quarter of 1989.

For the first half of 1990, Trenwick reported earnings per share of $1.18, an increase of 16 percent compared to $1.02 in 1989.

Consolidated net income of $4.3 million in the second quarter of 1990, increased seven percent compared to consolidated net income of $4 million in the second quarter of 1989. For the first half of 1990, Trenwick reported consolidated net income of $8.6 million, an increase of nine percent compared to $7.9 million in the first half of 1989.

Included in Trenwick's net income for the second quarter and first half of 1990 was a fresh start benefit of $70,000 or 1 cent per share and $151,000 or 2 cents per share, respectively. Fresh start benefits of $194,000 or 3 cents per share and $287,000 or 4 cents per share were included in the company's net income for the second quarter and first half of 1989, respectively. Also included in Trenwick's net income were after-tax realized gains of $10,000 and $82,000 in the second quarter and first half of 1990, respectively, compared to $75,000 and $83,000 in the comparative periods in 1989.

Trenwick's net premiums written of $20.2 million in the second quarter of 1990 decreased 13 percent compared to $23.4 million written in the second quarter of 1989, while net premiums written in the first half of 1990 of $46.5 million decreased 11 percent over the same period in 1989.

The distribution of the company's net premiums written among its three principal underwriting divisions was as follows (in thousands): Trenwick declared a second quarter dividend of 12 cents per share in 1990, compared to 6 cents in the second quarter of 1989.

#90207b0654 07/26/1990 ~Business Wire

WESTBORO, MA (JULY 26) BUSINESS WIRE - Data General Thursday reported a net loss for its third quarter ended June 30, 1990 of $21.4 million, or 71 cents per share, compared to a net loss of $23.1 million, or 79 cents per share, for its third quarter last year.

The 1989 third quarter results included a gain of $6.3 million before taxes resulting from the sale of a company facility in Sunnyvale, Calif.

Revenues for the third quarter were $302.4 million, compared with revenues of $306.1 million for the third quarter last year.

Operating loss for the quarter was $18.7 million compared with an operating loss of $28.7 million for the third quarter last year.

Net loss for the first three quarters of 1990 was $50.5 million, or $1.69 per share. For the same period last year, the company reported a net loss of of $35.7 million, or $1.22 per share. The 1989 results included gains totaling $14.9 million resulting from sales of company facilities in Sunnyvale and Manhattan Beach, Calif.

Revenues for the first three quarters of 1990 totaled $907.9 million, compared with $957.3 million for the same period last year.

Operating loss for the nine-month period was $44.4 million, compared with an operating loss of $45.1 million in the prior year.

The company said it is still being impacted by sluggish demand for proprietary computer systems and competitive pricing pressures throughout the industry.

''While we are disappointed with revenues overall, our AViiON product line again showed a significant revenue increase,'' said Ronald L. Skates, president and chief executive officer.

During the quarter the company announced that Resource Information Management Systems (RIMS) had signed an agreement to sell $60 million worth of AViiON systems over the next three years. The RIMS agreement is Data General's largest AViiON reseller agreement to date within the insurance industry.

Data General also unveiled a series of new products for the AViiON line, including the industry's lowest-priced server and a workstation offering 17 MIPS performance for under $6,000.

In addition, the company also strengthened its product line with a series of aggressively priced IBM AT-compatible personal computers, the DASHER/386-25k and DASHER/286-12j systems, and new mid-range systems for its MV/Family of systems, the ECLIPSE MV/5500 DC and MV/9500.

''The cost reduction program that we began implementing last year also continues to show positive results. Compared to last year's third quarter, our operating expenses decreased by almost $14 million,'' said Skates.

''While we remain cautious with respect to the near-term, we are optimistic that demand will improve during subsequent quarters,'' Skates said.

#90207b0657 07/26/1990 ~Business Wire

PHOENIX (JULY 26) BUSINESS WIRE - Talley Industries Inc. (NYSE:TAL) Thursday said its second quarter earnings were $2.4 million, or 20 cents per share, on revenues of $97.5 million, compared with last year's earnings of $18.1 million, or $1.42 per share, on revenues of $105.7 million.

Last year's second quarter earnings included a $60 million pretax gain on the sale of Talley's automotive air bag business and a $35.3 million charge to establish reserves against the company's realty assets.

First half earnings were $5 million, or 41 cents per share, on sales of $200.6 million, compared with last year's earnings of $20.8 million, or $1.63 per share, on sales of $208.2 million.

William H. Mallender, chairman, said, ''Earnings for the quarter were lower than those recorded for the same period last year, exclusive of the air bag sale gain and charge for realty reserves, but they achieved a level comparable to our 1990 first quarter results.

''Strong earnings results at our solid propellant units and our savings bank continued during the second quarter. While the real estate economy in Arizona remains depressed, the prospects for Talley's joint venture investment in a mixed use project in California have improved considerably resulting in a $1.3 million after-tax credit to second quarter results.

''However, pricing weakness in the stainless steel markets, due to declining nickel prices, continued through this latest quarter, resulting in a significant decline in operating earnings at our steel units. The

price of nickel has had a major negative impact through the first half of 1990.

''Our naval architecture and marine engineering firm also reported lower results for the second quarter,'' Mallender said.

RESTRUCTURING PLAN:

''The company's previously announced plan to reduce debt and improve liquidity is proceeding on schedule,'' Mallender said. ''We are making good progress toward our planned divestitures. The level of interest expressed in a number of our business units has been impressive, and we expect to report specific results by the end of the third quarter.

''The divestiture program, along with selected capital spending cutbacks and operating expense curtailment will positively impact the company's debt level, profitability and liquidity,'' Mallender said.

Talley Industries is a diversified designer, manufacturer and supplier of aerospace, industrial and commercial products and services, including high-reliability electronic components and stainless steel rod and bar products.

Talley also invests in and develops real estate, primarily in the Phoenix area, and operates a federally chartered savings bank as an autonomous, wholly owned subsidiary, which specializes in serving the Asian population in the greater Los Angeles area.

CONCORD, Mass. (JULY 26) BUSINESS WIRE - Technical Communications Corp. (NASDAQ: TCCO) Thursday announced sales of $2,385,735 and net earnings of $198,361 equaling 16 cents per share for its third quarter of the fiscal year 1990.

For the same quarter of 1989 sales were $3,038,066 with net earnings of $436,990 or 36 cents per share.

For the first nine months of the year ending June 30, sales reached $6,147,304 with net earnings of $503,511 or 41 cents per share. Results for the same period of the prior year were sales of $10,329,231 and net earnings of $1,631,658 or $1.33 per share.

Arnold M. McCalmont, chairman and chief executive officer described the

third quarter results as, ''In line with expectations,'' McCalmont stated, ''I am pleased to see our backlog almost doubled in one quarter. At the end of the third quarter our backlog stands at $9.7 million, up approximately 87 percent from the prior quarter. This situation should set the stage for our best quarter of the year, the fourth quarter.''

Backlog at the end of the third quarter of 1989 was $4.6 million.

Technical Communications Corp. designs, manufactures and markets high-performance secure communications systems and cryptographic devices used to protect sensitive communications sent over voice, data, and fax networks.

STOCKHOLM, SWEDEN (JULY 26) BUSINESS WIRE - L M Ericsson Thursday announced details of the 5-for-1 stock split approved May 8, 1990.

As a result of the split, each old share at SEK 50 par value is to be replaced by five new shares, each at SEK 10 par value.

A similar procedure will be applied for Ericsson's American Depository Receipts (ADRs) and other depository certificates. Ericsson's ADR program is handled by Citibank-ADR department.

The record date for the split will be Sept. 26. The last trading day in shares with the old par value will be Sept. 19. and the first trading day in shares with the new par value will be Sept. 20.

All Ericsson shares will be transferred to the VP System, the new electronic securities record keeping system of VPC (the Swedish Securities Register Center), during Sept. 7-9. Consequently, no cancellation of share certificates will take place, and the stock split will be automatically registered in the new system. Confirmations of the registration (VP Statements) will be sent out by VPC on Oct. 2.

As a consequence of the split, the conversion price of Ericsson's convertible debentures will be adjusted. Debentures submitted for conversion after Aug. 3 will be converted at the new conversion price to shares with the new par value.

Registered holders of convertible debentures will receive further information on the effects of the stock split by mail.

Ericsson is an international leader in telecommunications. Ericsson is recognized for its advanced systems and product for wired and mobile communications in public and private networks. -0-

AKRON, OH (JULY 26) BUSINESS WIRE - Goodyear today reported a loss of $9.4 million or 16 cents per share in the year's second quarter as worldwide sales rose slightly to $2.9 billion.

Impacting the results were unusual charges of $21.4 million after tax or 37 cents per share associated with the restructuring of a portion of North American tire operations and the closing of the New Bedford, Mass., roofing systems plant.

In the 1989 period, the company had net income of $27.1 million or 47 cents per share after provision for $95 million or $1.65 per share in losses related to the sales of the South Africa subsidiary and unused pipe owned by the All American Pipeline subsidiary.

The restructuring of North American tire operations is designed to improve the cost effectiveness of wholesale and retail tire operations while better serving a changing marketplace. The program resulted in a pre-tax charge of $20 million from the reduction of personnel in various sales, distribution and other operations and other associated costs.

The July 12 decision to close the New Bedford plant resulted in a pre-tax charge of $15 million taken in the second quarter reflecting personnel reduction and other plant closure costs.

Second quarter 1990 net income reflects depreciation of the All American Pipeline System and its operating and interest expenses, which were capitalized last year. Recognition of these items in the year-earlier period would have reduced net income by $26.8 million or 47 cents per share.

Other factors contributing to the quarter's results, according to Chairman Tom H. Barrett, were severe price competition in North America and Europe in both tires and general products; higher costs; a prolonged strike at the Turkey tire plants; and the impact of economic reform by the Brazilian government.

Barrett reported improved tire unit sales in the U.S. replacement market over 1989, although earnings did not improve due to competitive pricing pressures.

DALLAS (JULY 26) BUSINESS WIRE - BancTec Inc. (NASDAQ-BTEC) has recently received ImageFIRST orders totaling approximately $5.6 million and a 9400

document workstation order valued at over $1.4 million.

High-speed ImageFIRST 5500 systems were ordered by Signet Ltd., one of the largest United Kingdom credit card processors and a current IMPAC I user, and by the Ohio Bell Telephone Co., an Ameritech Co. Signet will expand the use of BancTec image systems for sales draft processing, and Ohio Bell will use the ImageFIRST systems for processing customer payments.

An ImageFIRST 9600 system developed specifically for the wholesale lockbox marketplace was ordered by BayBanks Systems Inc., headquartered in Waltham Mass.

American Electric Power Service Corp. of Columbus, Ohio, placed an order for additional 9400 workstation systems for use in several of their payment processing centers.

All of the above systems are expected to be included in revenue in the current fiscal year.

BancTec provides computerized systems for processing financial transactions, including checks, remittance advices, sales drafts and giro documents. BancTec designs, manufactures, markets and services products that employ optical character recognition and image processing technologies to read, digitize, encode, sort and process financial documents.

DEERFIELD, IL (JULY 26) BUSINESS WIRE - Baxter and Comdisco Inc. Thursday announced plans to work together to help hospitals manage and finance high-technology capital equipment.

Comdisco will join Baxter's ACCESS program to provide asset-management services to hospitals that participate in Baxter's Corporate Program, analyzing and recommending better ways to acquire, utilize, safeguard, and dispose of expensive high-technology equipment.

The ACCESS Program is one of the value-added services available to Baxter corporate customers through the company's exclusive Corporate Program agreements.

"U.S. hospitals spent more than $10 billion on capital equipment last year, on everything from advanced diagnostic imaging machines to computer mainframes," said Kenneth N. Pontikes, chairman and president of Comdisco.

"Our program with Baxter will help hospitals contain costs and make better use of expensive and critically important equipment."

Baxter and Comdisco, working through its subsidiary, Comdisco Disaster Recovery Services, also will consult with hospitals to assist in the recovery of medical and financial computer records that are lost in the event of fire, flood, or electrical outage.

"Planning and acquisition of high-technology capital equipment is becoming more critical and complex, as hospitals strive to keep their competitive edge in the face of limited resources and diverse technologies," said Terry J. Mulligan, corporate vice president at Baxter.

"We're delighted to add Comdisco to our roster of ACCESS associates, which also includes Spectrum (with IBM), Kraft Foodservice Group, and Waste Management Inc.

"These corporate alliances enable Baxter to help solve some of the most pressing financial, administrative and clinical problems faced by hospitals today: better management of information systems, capital equipment, medical wastes and food services."

Comdisco Inc., based in Rosemont, Ill., with more than 5,000 customers and assets of $4.0 billion, is the world's largest independent lessor and remarketer of high-technology equipment and provider of disaster recovery services.

Baxter International Inc. is the leading international manufacturer and marketer of health-care products, systems and services. It offers 120,000 products to health-care providers in 100 countries. The company had 1989 revenues of $7.4 billion.

BOSTON (JULY 26) BUSINESS WIRE - United Asset Management Corp. (UAM) Thursday announced that net income in the second quarter of 1990 rose 28 percent to $4,568,000 from $3,569,000 in the same quarter a year ago.

Fully diluted earnings per share for the second quarter were $.27, a 17 percent increase over the $.23 reported in 1989. Revenues in the quarter increased 14 percent to $40,663,000 from $35,635,000 a year earlier. Operating income increased 17 percent to $10,755,000 from $9,168,000 in the 1989 quarter. All 1990 results set quarterly records for UAM.

Operating Cash Flow (Cash flow provided by operations before working capital changes) rose to a record $12,400,000, a 17 percent increase over the second quarter of 1989. Amortization of cost assigned to contracts acquired, a significant component of Operating Cash Flow, increased to $6,494,000 in the quarter from $5,797,000 in the second quarter of 1989.

Amortization on a per share basis was $.30 in the second quarter of 1990, up from $.28 in the like period of 1989.

Norton H. Reamer, president of UAM, stated, ''UAM's record second quarter results were significantly ahead of those last year due to the strong markets and favorable investment performance achieved by our affiliated firms. We believe that we continue to be well positioned for internal growth as well as further growth by acquisition, as demonstrated by the two transactions we recently announced.

''UAM has signed agreements to acquire Newbold's Asset Management Inc. of Byrn Mawr, Penn. and Cambiar Investors Inc. of Englewood, Colorado. These two firms have total assets under management of over $5 billion.''

UAM provides investment management services, primarily to institutional cients, through 22 operating firms which manage $39 billion for 3,400 clients located throughout the United States and abroad.

UAM is listed on the New York Stock Exchange, Ticker Symbol: UAM.

#90207b0675 07/26/1990 ~Business Wire

REDMOND, WA (JULY 26) BUSINESS WIRE - Interpoint Corp. (NASDAQ: INTP), Thursday announced that, despite an all-time record backlog of new orders, revenues and profits for the year ending Oct. 31, 1990, will be below previous expectations.

The company said revenues are now expected to be 2 to 4 percent below the record pace of 1989. Profits, including the one-time $533,000 integration charge recorded in the first quarter, are expected to be down substantially from 32 cents per share a year ago.

''While bookings, or new orders, are expected to be about on budget for 1990, the average lead time between when an order is placed and when the customer schedules delivery has lengthened considerably this year,'' according to President and Chief Executive Officer Peter van Oppen. ''The result is that the future looks great but our near-term shipments are considerably lower than we would like,'' he said.

The company noted that its commercial aviation, export and other markets are expected to more than offset any long-term reductions in U.S. defense spending.

Founded in 1969, Interpoint designs, manufactures and markets a broad range of proprietary power converters and custom hybrid microcircuits for aerospace and industrial applications with headquarters in Redmond, Wash. Production facilities are located in Redmond and Kaohsiung, Taiwan. Sales offices are located in Minneapolis, Minn., Long Island, N.Y., and London.

QUINCY, MA (JULY 26) BUSINESS WIRE - Clean Harbors Inc. (NASDAQ:CLHB) Chief Executive Officer Alan S. McKim and President Clyde Keaton announced Thursday during the company's annual meeting of stockholders that Clean Harbors has engaged Alex Brown & Sons and Kidder, Peabody & Co. to refinance certain of its existing bank debt through a private placement of senior and subordinated debt.

The proceeds from this financing will also be used to provide additional capital to finance the future growth of the company.

Management also discussed a variety of accomplishments in connection with its ongoing programs to expand its range of services and business development activities in the mid-Atlantic and midwest markets.

The company has secured the necessary approvals to process higher margin drummed wastes at its Chicago treatment facility. Clean Harbors has recently been engaged by both the U.S. Coast Guard and U.S. EPA to clean up oil spills on Lake Michigan, and by Ohio EPA to remediate a superfund site, having recently contracted with the State of Ohio as one of three firms retained to provide these services on an as-needed basis.

SEATTLE (JULY 26) BUSINESS WIRE - Aldus Corp. Thursday announced the appointment of Stephen Cullen as vice president and general manager of

Silicon Beach Software Inc., a subsidiary of Aldus. Cullen succeeds Charlie Jackson, Silicon Beach's founder.

In his new role, Cullen is responsible for the overall management of the San Diego-based company. He comes to Silicon Beach with significant experience in the computer industry, the past six years with Mountain View Calif.-based Software Publishing Corp. (SPC).

Most recently Cullen was a business unit manager for SPC and before that held director-level positions in marketing, business development and product marketing. Prior to SPC, he was employed by INMAC and Crown Zellerbach.

"Steve brings to our organization demonstrated skills in the area of business unit management, and we are pleased to have him as part of the team," said Phil Herres, chief operating officer for Aldus. "While Charlie Jackson will be sorely missed as the creator of great products for the Macintosh, I know Steve will successfully carry on Charlie's vision."

Jackson will remain with Silicon Beach in a consulting role for approximately six months. He will then pursue his interests in sponsoring amateur athletics programs.

Aldus Corp. (NASDAQ: ALDC) creates computer software that helps people throughout the world effectively communicate information and ideas. In addition to PageMaker, the company's flagship product, the Aldus product line includes Aldus Persuasion, Aldus FreeHand and Aldus PrePrint.

Silicon Beach Software products include SuperPaint, SuperCard, Super 3D, Digital Darkroom and Personal Press. Aldus distributes both product lines through an international network of more than 16,000 authorized dealers and distributors.

#90207b0680 07/26/1990 ~Business Wire

LA BELLE, FL (JULY 26) BUSINESS WIRE - Mr. Ben Hill Griffin III, chairman of Alico Inc. (NASDAQ:ALCO) a La Belle, Fla. agribusiness company, announced that net earnings for March - May, 1990, the third quarter of the 1990 fiscal year, were 14 cents per share as compared to 37 cents per share for the like quarter a year ago.

For the nine months period, net income was 57 cents per share compared to 92 cents per share for the like three quarters of last year.

Total revenues for the third quarter were $4.0 million compared to $6.8

million for the like quarter a year ago. For the nine months period, total revenues were $19.7 million for the current fiscal year compared to $21.2 million for the like period a year ago.

Stockholders' equity at the end of May was $47.9 million compared to $44.5 million a year ago.

Griffin stated that the reduced net income for the first three quarters of the fiscal year resulted primarily from reduced citrus revenues associated with the freezing weather of Dec. 24 and 25, 1989. ''The adverse weather reduced both the volume of fruit produced and the juice yield of the remaining fruit.

''Additionally, there were higher citrus production costs associated with the expensing of all production costs for a four-year-old grove. Production expenses for this grove were previously capitalized during its preproductive period.''

Griffin, commenting on next year's citrus crop said, ''It is premature to establish estimates for the 1990-91 crop. There will be some negative carryover of the freeze in our central Florida groves but, fortunately, additional production is anticipated from our south Florida groves which were not damaged by the freeze.''

#90207b0689 07/26/1990 ~Business Wire
WESTFIELD, MASS. (JULY 26) BUSINESS WIRE - Stanhome Inc. announced Thursday that the board of directors has elected Alejandro (Alek) Diaz, Stanhome's current president and chief operating officer to succeed H.L. (Bill) Tower as chief executive officer as of Aug. 1, 1990.

Diaz, 45, has been with Stanhome for 18 years and has been instrumental in leading the international growth of the company's direct selling group. ''Stanhome is thankful for Bill's contributions,'' said Diaz, ''under his leadership the company has thrived and become a Fortune 500 Company. The strength of our management teams will enable us to further enhance and grow Stanhome in the 90's.''

Tower, 58, who has been chief executive officer since 1978 will remain with the company as chairman of the board. ''It seems to me that a dozen years is about the ideal length service for a CEO,'' said Tower. ''I have had a wonderful tour of duty in this job, but now it's time to make a change. Stanhome is fortunate that, in Alek Diaz, it has someone of proven ability to lead this worldwide marketer of high quality consumer products and to further enhance the company's strong performance during the decade of the 90's.''

Stanhome is a Fortune 500 Company headquartered in Westfield, Mass. Its key product segments include design giftware and collectibles sold through its Enesco Worldwide Giftware Group, collectibles sold through the Hamilton Worldwide Direct Response Group, and household and personal care items sold through the Stanhome Worldwide Direct Selling Group.

The company's sales have grown at a compound annual rate of 10 percent for the past 10 years and earnings per share have risen at a 13 percent rate. In the past five years, the annual rate of growth in sales has been 11 percent and earnings per share 23 percent.

#90207b0690 07/26/1990 ~Business Wire
HORSHAM, PA. (JULY 26) BUSINESS WIRE - Advanta Corp. (NASDAQ: ADVN) Thursday reported net income for the three months ended June 30, of $2.2 million, or 24 cents per share.

Net income of $7.2 million, or 77 cents per share for the same period of 1989 included an $18.6-million pretax gain on a sale of credit cards and

$1.1 million of extraordinary income, which were offset by a special increase in loan loss reserves and restructuring costs.

Combined, these items increased second-quarter 1989 after-tax earnings by $8.7 million, or 93 cents per share. Excluding these items, second-quarter 1990 core earnings improved by $3.7 million, or 40 cents per share over the same period last year.

Dennis Alter, chairman and chief executive officer, commented, ''We are pleased with our continued progress and the substantial improvement in the core earnings of the company year over year. We attribute our success to date to our well-focused strategy, which has enabled us to grow in a profitable, controlled manner.

''As we have continued to build our receivable and revenue base, we have maintained a control orientation, resulting in improvements in operating expenses.''

For the six months of 1990, the company reported net income of $7 million, or 72 cents per share, on par with last year's net income before extraordinary income of $7 million, or 75 cents per share. Net income for the first six months of 1989 was $8.1 million, or 87 cents per share.

1990's first-half earnings included an $8.9-million pretax gain from a sale of credit cards while 1989's comparable period reflected an $18.6-million gain on a credit card sale. Each period included an approximate $4.5-million increase in credit card reserves, primarily in response to continued increases in credit card balances.

#90207b0701 07/26/1990 ~Business Wire

PRINCETON, NJ (JULY 26) BUSINESS WIRE - Church & Dwight Co., Inc. (NASDAQ:CRCH) Thursday reported net income of $5.2 million, or $.24 per share for the quarter ended June 30, 1990.

This compares to $2.1 million, or $.10 per share in the same period last year. Excluding unusual items related to the disposal of product lines in both years and the sale of an equity investment and a manufacturing facility in 1989, earnings per share would have been $.21 in 1990 compared to $.19 in 1989. Total sales advanced to $104.1 million from $95.7 million, an increase of 8.8 percent over the prior year.

For the first six months of 1990, the company reported net income of $11.0 million, or $.51 per share, compared to $4.1 million, or $.20 per share in 1989.

Excluding the unusual items in both years, earnings per share would have been $.48 in 1990 and $.29 in 1989. Company sales were $202.1 million, 8.3 percent above the $186.7 million for the same six month period a year earlier.

Church & Dwight's board of directors today announced that it has increased the quarterly dividend by 14 percent to 8 cents per share from 7 cents per share share, payable Aug. 31, 1990 to stockholders of record at the close of business Aug. 16, 1990. This is the company's 358th regular quarterly dividend.

According to Minton, this is the company's ninth consecutive year in which the company's dividend has been increased.

Church & Dwight Co., Inc. is the manufacturer of ARM & HAMMER(R) consumer and industrial products.

STOUGHTON, MA (JULY 26) BUSINESS WIRE - Reebok International Ltd. (NYSE:RBK) announced Thursday that it has entered into a new five-year compensation arrangement with Paul Fireman, the company's chairman and chief executive officer.

Under the new arrangement, which will be effective beginning Jan. 1, 1991, when his current employment agreement ends, Fireman will receive a base salary of $1 million per year and will be eligible for a cash bonus of up to an additional $1 million per year, contingent upon achievement of company profit objectives.

This compensation compares to an average of approximately $13.6 million per year for the past four years under the current employment agreement, which based most of the compensation on a percentage of pre-tax earnings.

In addition, Fireman has been awarded a one-time grant of options to purchase 2.5 million shares of Reebok common stock. These options will become exercisable in stages over a five-year period at an average premium of approximately 18 percent above the current market price for Reebok common stock and will remain exercisable for a period of ten years from the date of grant.

The company's board of directors believed that it was particularly appropriate to tie Fireman's long term compensation directly to increases in value for the company's shareholders through the one-time stock option grant.

Reebok International Ltd., headquartered in Stoughton, is the leading designer and marketer of active lifestyle and performance products, including footwear and apparel.

The company's operating units include Reebok's Footwear and Apparel Products divisions, and AVIA, Ellesse North America, Rockport, and Boston Whaler Boats. Sales for 1989 totaled $1.822 billion.

DALLAS (JULY 26) BUSINESS WIRE - Mary Kay Corp. disclosed Thursday that it was actively exploring the refinancing of a major portion of its existing debt.

The company said that, while no assurances could be given as to the terms of the financing or the timing of its completion, it anticipated the financing would be completed no later than the fall of 1990.

The company said it intended to acquire a substantial amount of its publicly traded 15 percent discount debentures and to amend the terms of the remaining debentures as part of the refinancing. John P. Rochon, vice chairman of the company, said the primary objectives of the refinancing would be to enhance the company's financial flexibility and to secure better economic terms on its debt.

The First Boston Corporation has been retained by the company as its financial advisor in connection with the refinancing.

#90207b0709 07/26/1990 ~Business Wire

NEW YORK, NY (JULY 26) BUSINESS WIRE - Net income of Quantum Chemical

Corporation for the second quarter of 1990 was $7.1 million, equal to 27 cents per common share.

Net income for the 1989 second quarter was $175.4 million equal to $6.85 per common share, which included $129.4 million or $5.05 per share principally from the sale of the oleochemical business; net income from continuing operations in the 1989 period was $46.0 million or $1.80 per common share.

The 1990 second quarter results were significantly lower than those of the prior year period, principally because of lower selling prices and profit margins for polyethylene and other major chemical products. Polyethylene is the Company's most important product. Volume of shipments and operating losses for the propane marketing business in the 1990 quarter approximated those of the 1989 period. A loss incurred by the 50% owned propane marketing joint venture, QFB Partners, formed in August 1989, also adversely affected the 1990 results. In April, the Company sold its 50% interest in RMI Titanium Company through an initial public offering. The after tax gain on such sale, $16.0 million, was included in the 1990 second quarter results. Sales from continuing operations in the 1990 quarter were $586.0 million compared to $672.5 million in the 1989 period. The average number of shares of common stock outstanding was 26.7 million in 1990 versus 25.6 million in 1989.

Net income for the 1990 six months was $12.9 million or 49 cents per share compared with $250.7 million, or $9.80 per share in the 1989 period. Net income for the 1989 period included $133.3 million or $5.21 per share principally from the sale of the oleochemical business.

The 1990 six months income from continuing operations decreased significantly compared to the prior year period because of lower selling prices and profit margins for all major products of the petrochemical business. Operating profits of the Company's propane business were less than in the 1989 period because of a decrease in volume of shipments as a result of unusually warm weather during the winter months. The 1990 six months results were also adversely affected by the Company's share of the net after interest and tax loss incurred by the 50% owned propane marketing joint venture. The current period results included the $16.0 million gain on the sale of the Company's interest in RMI Titanium Company. Sales from continuing operations in the 1990 six months were $1,268.8 million compared with $1,486.6 million in the 1989 period. The average number of shares of common stock outstanding was 26.3 million in 1990 versus 25.6 million in 1989.

Quantum Chemical Corporation has operations in petrochemicals and propane marketing.

#90207b0717 07/26/1990 ~Business Wire

GREENVILLE, SC (JULY 26) BUSINESS WIRE - First Federal Savings and Loan Association of South Carolina Thursday reported fourth quarter earnings of $1.7 million or 37 cents per share, compared to $1.2 million or 26 cents per share for the same period in 1989 for a 44 percent increase.

Net earnings for the fiscal year ended June 30, were $4 million or 85 cents per share compared to $5 million or $1.06 per share for the year ended June 30, 1989. Three significant factors resulted in the improved quarterly earnings: an increase in the net interest income, a reduction in the effective tax rate, and lowering of general and administrative expenses.

Net interest income was $14.3 million for the quarter and $51.4 million for the year compared to $11.9 million and $50.6 million respectively for the same periods in fiscal 1989; increase of 20 percent and 2 percent. At June 30, the interest rate spread was 2.77 percent, up from 2.28 percent at June 30, 1989.

Mortgage loan origination volume was $109.4 million compared to $128.5 million for the fourth quarter in fiscal 1989, and $444.6 million for the year, compared to $492.1 million last year. This volume was achieved with four less loan origination offices. Commercial and consumer loan volume was $91.6 million for the quarter and $335.9 million for the year, compared to $86.6 million and $372.6 million in fiscal 1989.

As the loan portfolio grew, the provisions for loan losses were increased by $484,000 to cover possible future charge offs of nonperforming assets. Nonperforming assets decreased from June 30, 1989 to June 30, 1990 by $3.9 million.

Deposits were $1.747 billion at June 30, 1990, a decrease of $44.2 million which was a direct result of management's decision to payoff $63.4 million in brokered deposits. The association actually experienced a net internal growth of $19.2 million for the year.

With assets of $2.344 billion, First Federal of South Carolina remains the largest thrift in the Carolinas and the second largest financial institution headquartered in South Carolina. Stockholders' equity increased to $95.4 million with a book value of $20.35 per share on June 30, 1990 which enables The First to continue to meet the new capital requirements.

#90207b0721 07/26/1990 ~Business Wire

LOS ANGELES (JULY 26) BUSINESS WIRE - Coast Savings Financial Inc. (NYSE & PSE:CSA), reported Thursday that, primarily as a result of the establishment of additional loss reserves for its loan and foreclosed real estate portfolios, it realized a net loss of $28.7 million for the quarter ended June 30, 1990, compared to net earnings of $5.8 million for the second quarter of 1989 (a).

The fully diluted net loss per share totaled $1.89 for the second quarter compared to fully diluted earnings per share of 41 cents for the year-earlier period.

The net loss for the fist six months of 1990 totaled $22.9 million, compared to net earnings of $11.8 million for the first half of 1989. The fully diluted net loss per share was $1.51 for the six months ended June 30, 1990, compared to fully diluted net earnings of 83 cents for the year-earlier period.

''While the need to establish additional loss reserves during the quarter was disappointing, the provisions were necessary in light of various developments, including further diminution in the value of certain income-producing properties located in troubled commercial real estate markets outside California and implementation of asset valuation concepts required by the federal regulatory agencies,'' stated Ray Martin, chairman and chief executive officer.

''Importantly, Coast continues to generate solid core earnings and exceeds the new, more stringent capital requirements as of June 30, 1990.''

Following a comprehensive review of the loan portfolio and foreclosed real estate assets during the quarter, the company established a $31.5 million provision for loan losses and a $16.5 million addition to its allowance for losses on foreclosed real estate.

Largely as a result of the second quarter provisions, the company's nonperforming assets ratio (net nonperforming assets as a percent of total assets) was reduced from 1.64 percent at March 31, 1990 to 1.36 percent at June 30, 1990, despite a $333.6 million reduction in the asset base.

In addition, total problem assets (gross nonperforming assets plus restructured loans) were sharply reduced from $323.1 million at March 31, 1990, to $284 million at June 30, 1990. At June 30, 1990, the reserve

for loan losses represented 68 percent of nonaccrual loans and 30 percent of total nonaccrual and restructured loans. These percentages were substantially enhanced relative to the fist quarter levels of 39 percent and 18 percent, respectively.

Loan origination volume totaled $583.1 million for the quarter, bringing year-to-date originations to $1.1 billion, on target with the company's annual funding goal.

Virtually all of these originations were one-to-four family adjustable rate residential mortgages tied to the 11th District cost of funds index.

At June 30, 1990, Coast had 92 percent of its loan portfolio in adjustable rate and match-funded loans, and its one-year gap ratio -- a measure of interest rate exposure -- stood at 5 percent, an improvement from 1 percent as of June 30, 1989.

Coast's net interest rate spread -- the difference between the yield on interest earning assets and the cost of interest bearing liabilities -- stood at 2.24 percent at June 30, 1990, compared to 2.33 percent and 2.42 percent at March 31, 1990, and Dec. 31, 1989, respectively.

Despite this spread pressure and the reduction in the asset base during the quarter, net interest income reached $50.6 million for the quarter, down only slightly from the first quarter level.

Following enactment of the FIRREA legislation, the company has aggressively reduced its investment in high yield securities. Coast's net investment in high yield bonds was reduced from $105.9 million at Dec. 31, 1989, to $59 million at March 31, 1990 and to $39.6 million at June 30 1990.

The dollar amount of loans serviced for investors rose to $4.7 billion at the end of the quarter, up from $4.4 billion as of March 31, 1990. Largely due to this increase, loan servicing fees and charges increased to $4.2 million for the second quarter of 1990, a 3 percent improvement over the $4.1 million registered for the quarter ended March 31, 1990.

Primarily reflecting strong improvement in fee generation from retail banking activities, second quarter fee income surged 118 percent over the year-earlier period.

Retail deposits reached $8.3 billion at June 30, 1990, up $181 million since Dec. 31, 1989. Brokered deposits decreased from $745 million Dec. 31, 1989, to $347 million at the end of the second quarter.

On July 25, 1990, the board of directors of Coast Savings Financial Inc., declared a dividend of 10 cents per common share for the second quarter of

1990, payable Aug. 31 to shareholders of record as of Aug. 17.

Coast Savings Financial Inc., is the holding company of Coast Federal Bank FSB. Coast's primary emphasis is on residential real estate lending and retail banking provided through 125 retail banking offices and 8 regional mortgage lending centers located throughout California. (a) All prior period financial information has been restated to reflect the implmentation of SFAS No. 72, Accounting for Certain Acquisition of Banking or Thrift Instititions.

SOUTHBOROUGH, MA (JULY 26) BUSINESS WIRE - Amadeus, the European reservation system consortium, based in Madrid, Spain, has awarded Bytex Corp. a $1.4 million contract for its UNITY 50 Network Switching Systems.

The contract was signed with the operations company of the Amadeus Group, Amadeus Data Processing GmbH & Co. KG. based in Erding, near Munich, Federal Republic of West Germany.

Initially, the Bytex switches will be installed in four sites in Europe. They are in Erding, site of the new Amadeus data processing center; Copenhagen, Denmark; Madrid, Spain; and Paris, France.

Future plans call for another four to five sites in the Amadeus network and more than $1 million in additional switch orders. Amadeus selected Bytex after completing an extensive six-month evaluation.

Bytex entered the German market in 1989 in cooperation with Datakom GmbH of Ismanning near Erding, its distributor for the Republic. The Amadeus contract award resulted from a combined effort of Bytex with Datakom. Paul Hoffman, Datakom managing director, sees this contract as the first of many Bytex systems for the German market.

According to Andrew Cowie, managing director of Bytex DataCom, Ltd., London, a subsidiary of Bytex Corp., ''This order from Amadeus is one of the most significant contracts Bytex has received in Europe and solidifies Bytex's position as the leading supplier to European airlines and reservation systems.''

Cowie points out that Bytex's UNITY NetWork Link to IBM's NetView network management system was a significant factor in ''Amadeus's selection of Bytex.'' Bytex is the only network switch provider offering a direct link to NetView.

Cowie says that Amadeus will use UNITY network switching systems to enhance its network control and testing capabilities on a worldwide linked control system.

Amadeus was established in 1987 by Lufthansa German Airlines, Air France, Iberia Air Lines of Spain, and Scandinavian Airlines System (SAS) to provide one-stop-shopping travel service. Amadeus will provide the largest worldwide full-service travel reservations and information network. Iberia Airlines and SAS are also Bytex customers.

Bytex designs, manufactures, markets and supports fault-tolerant electronic matrix switching systems and related communications products. Bytex is the leading worldwide supplier with an installed base of more than 4,000 switches. According to International Data Corp., Bytex has approximately 36 percent of the market. Bytex is traded on the NASDAQ National Market System under the symbol BYTX.

#90207b0726 07/26/1990 ~Business Wire

NEW YORK (JULY 26) BUSINESS WIRE - At a meeting with securities analysts Thursday in New York City, Richard de J. Osborne, chairman, president and chief executive officer of Asarco Incorporated (NYSE:AR) today announced that the company will construct a new solvent/extraction-electrowinning (SX-EW) plant at its Silver Bell Unit near Tucson, Arizona, at a capital cost of $54 million.

The new facility, which is estimated to be completed by 1993, will be capable of annually producing 18,000 tons of copper cathode. Osborne also announced that Asarco will spend an additional $26 million at the Ray Mine also in Arizona, including $16 million for additional mining equipment and $10 million in pre-mine stripping costs.

The expansion program at the Ray Mine, which will now total $194 million with the new expenditures, consists of new mining equipment, in-pit crushing, accelerated pre-mine stripping and the construction of a new mill located at the mine site. The result of this expansion at Ray will be an increase in the mining and milling rate to 60,000 tons of ore per day and an increase in production capacity from today's 115,000 tons-per-year rate to 182,000 tons of copper per year by 1992.

In making these announcements, Osborne said, ''The decision to build the Silver Bell SX-EW plant was based on a study that has been underway for some time to determine how best to take advantage of 58 million tons of

existing oxide ore reserves at Silver Bell and about 22 million tons of new reserves acquired near Silver Bell in 1989. The additional expenditures at Ray had been contemplated when the expansion plan was originally approved in 1989.

''Our decision now to proceed ahead with them is based on the greater flexibility we will be able to achieve in operations. We will have the capability of feeding both of the mills at full capacity when the copper market is strong or curtailing them and lowering costs when demand is weak.''

The SX-EW plant at Silver Bell will involve conventional mining and heap leaching of a portion of production. The balance will come from the existing sulfide pit using a rubblizing method, which involves blasting large sections of leachable material and then leaching the rubblized area in place. Total reserves at Silver Bell will sustain operations for 21 years.

In a separate presentation on the outlook for copper, Asarco's vice president of sales, Robert J. Bothwell said, ''The company is optimistic about the copper market today based on a variety of factors, not the least of which is the continued strong demand in the Pacific Rim, a decline over the last several years in both producer and consumer stocks to very low levels, and an increase in the intensity of copper usage in major sectors such as automotive, building construction and telecommunications.''

ASARCO Incorporated, headquartered in New York City, is one of the world's leading integrated producers of nonferrous metals, principally copper, silver, lead, zinc and gold. Asarco also produces specialty chemicals, minerals and other industrial products and provides environmental services. Asarco had 1989 sales of $2.2 billion.

#90207b0727 07/26/1990 ~Business Wire

BOSTON (JULY 26) BUSINESS WIRE - Boston Edison Co. (NYSE:BSE) Thursday reported earnings (loss) per common share for the three, six and twelve months ended June 30, 1990.

Earnings (loss) per share for the three months ended were ($0.17) compared to ($0.09) last year; for the six months ended were $0.51 vs. $0.11; and for the trailing twelve months earnings (loss) were ($0.47) vs. $1.79 for the same period last year. The results of operation for the six and twelve months ended June 30, 1990 includes $0.41 per common share due to the cumulative effect of a change in accounting principle to begine

recording unbilled revenues, effective Jan. 1, 1990.

This accounting change provides a better matching of revenues and expenses by recording an estimate of customer usage which is unbilled at the end of each month. Results for the twelve months ended June 30, 1990, also included an after-tax charge of $106,280,000 relating to provisions for settlements of Pilgrim Nuclear Power Station litigation and rate proceedings recorded in the fourth quarter of 1989.

Boston Edison Co. also announced a quarterly dividend of $0.365 per share on the company's preference stock, cumulative $1.46 series and a quarterly dividend of $2.30 per share on the company's preference stock, cumulative Series A. These dividends will be paid on September 4, 1990 to holders of record at the close of business on Aug. 10, 1990.

#90207b0732 07/26/1990 ~Business Wire

WEST COLUMBIA, SC (JULY 26) BUSINESS WIRE - Wells American Corp. (ASE: WAC) disclosed Thursday that it has entered into preliminary negotiations with multiple third parties in an effort to facilitate an infusion of capital into the company and to determine if a merger of interests with an outside firm would be in the best interests of its shareholders.

Robert K. King, president, indicated that the company is reviewing various proposals in an effort to form a strategic alliance to assist the company in restoring profitable operations. The company is also attempting to identify and negotiate with individuals or entities who may have an interest in acquiring, merging with or investing in the company.

Management cautioned that there can be no assurances that any alliance can be successfully consummated or under what terms such a pact would be concluded.

Management also stated that the creation of any alliance with third parties could involve the issuance of additional shares of the company's common stock. King also reiterated that Wells American's revenues must soon be restored to a level which prevents further operating losses if the company's capital resources are to be sufficient to maintain ongoing operations.

Thursday's announcement follows the Wells American acknowledgement on Jan. 10, 1990, that it had been forced to drastically curtail its IBM-compatible computer manufacturing activities and that it had suspended marketing operations.

In conjunction with the announcement, the company said it trimmed staffing to essential personnel and planned to focus its efforts on the development of new business opportunities.

Wells American subsequently formed a new subsidiary to develop and market a new Apple Macintosh compatible computer product and is attempting to place the product into production pending the acquisition of additional funding.

In conjunction with the release of Wells American's year-end results on July 2, 1990, the company disclosed that it was evaluating current operations, including, among other things, ''exploring the availability of additional capital, studying ways to reduce expense levels further and investigating other initiatives.

Wells American's common securities are traded on the American Stock Exchange under the ticker symbol WAC. For further information on Wells American, contact Robert K. King, president, at the company's corporate The address is suite 122, 121 Executive Center Drive, Columbia, S.C. 29210; phone: 803/734-4300.

PRINCETON, NJ (JULY 26) BUSINESS WIRE - Church & Dwight Co., Inc. announced Thursday that it has filed an application for listing its common stock on the New York Stock Exchange (NYSE).

It is expected that Church & Dwight's securities will begin trading on the NYSE around mid-August under the symbol ''CHD''.

Dwight C. Minton, chairman of the board, said, ''This decision was made after careful consideration of the advantages associated with a listing on the NYSE. We expect this listing to provide a broader market for Church & Dwight shares with improved visibility, especially in the international investment community, and increased awareness of our Company.''

Church & Dwight Co., Inc., is the world's largest producer of sodium bicarbonate, popularly known as baking soda. The company sells its products under the ARM & HAMMER(R) trademark to consumers through supermarkets, drug stores, and mass merchandisers and to industrial customers and distributors. The company's common stock currently trades on the NASDAQ National Market System under the symbol ''CRCH''.

COLUMBUS, OH (JULY 26) BUSINESS WIRE - A $10-million-plus plant expansion at Louisville, Ky., will lift Borden capacity more than 50 percent for powder and flake novolac phenolic resins, according to an announcement Thursday by R.J. Ventres, chairman and chief executive officer of Borden Inc. (NYSE: BN).

''Our Industrial Resins unit (part of the worldwide Packaging and Industrial Products Division) is growing several times faster than the overall industry for these products,'' said Ventres.

''This expansion will maintain Borden's ability to satisfy customer needs for high and consistent quality resins. It incorporates full computer monitoring and control, including the latest techniques in statistical process control.''

Part of the investment also provides for sophisticated equipment and systems to continue to meet strict environmental standards, Ventres noted. The overall project is scheduled for completion in phases by the middle of 1991.

Borden is currently the largest U.S. and worldwide merchant market producer of novolac phenolic resins. The products are used as bonding agents for brake linings, grinding wheels, automotive insulation panels, refractory and foundry products, molding materials, composite materials and numerous other specialty end uses.

Borden Inc. is a worldwide producer of foods, non-food consumer products, and packaging and industrial products, with worldwide sales of $7.6 billion in 1989. The company ranks number one in the world in pasta, wallcoverings, forest products adhesives and vinyl foodwrap films; number one in U.S. dairy; number two in salty snacks in North America; and number one or two, nationally or regionally, in 26 U.S. niche grocery product categories.

#90207b0747 07/26/1990 ~Business Wire
TORONTO (JULY 26) BUSINESS WIRE - July 26, Rio Algom Limited, 51.5 percent owned by The RTZ Corporation (NYSE:RTZ), Wednesday announced consolidated net earnings for the first six months of 1990 of $39.3 million, equivalent to $0.86 per common share.

This compares to $68.2 million, or $1.51 per share, in the first six months of 1989.

A benefit of $4.3 million in 1990 ($0.10 per common share) resulting from the utilization of prior year's tax losses has been included in income and mining taxes in accordance with generally accepted accounting principles. The corresponding item in the comparable period in 1989, amounting to $3.6 million ($0.08 per common share) was disclosed as an extraordinary item.

Consolidated revenue for the first six months of 1990 was $710 million compared to $1.03 billion in the same period last year.

The reduction in net earnings in 1990 as compared to the same period last

year reflected principally lower commodity prices, reduced operating margins in the metals distribution businesses, and the absence of earnings from the company's steel manufacturing operations which were sold on August 1, 1989.

Similar circumstances were responsible for the reduction in earnings in the second quarter which were $19.2 million in 1990 compared to $26.3 million in 1989.

Lower year-to-year earnings at Highland Valley Copper, in which Rio Algom holds a 33.6 percent beneficial interest, reflect the fall in the average copper price to US$1.21 in the second quarter and US$1.16 for the first six months, compared to US$1.27 and US$1.37 in the comparable periods in 1989.

Shipments from Rio Algom's potash operations decreased from the levels of second quarter 1989 because of unattractively low export prices.

Tin mining incurred an increased operating loss as tin prices continued to decline in the second quarter of 1990. The average price of tin was $3.34 for the second quarter and $3.37 for the first six months, compared to $5.51 and $4.95 in the comparable periods in 1989. While the company continues to achieve operating efficiencies at Rio Kemptville Tin it is studying available options in view of prevailing unsatisfactory tin prices.

#90207b0749 07/26/1990 ~Business Wire

HOUSTON (JULY 26) BUSINESS WIRE - Enron Corp. (NYSE:ENE) Thursday reported net income of $33.9 million for the second quarter of 1990, or 55 cents per share, after preferred dividends.

The amounts compare to second quarter 1989 net income of $10.2 million, or 7 cents per share, after preferred dividends.

Comparable revenues were $2.3 billion in the most recent quarter and $2.4 billion a year ago.

For the first half of 1990, Enron reported net income of $134.9 million, or $2.43 per share after preferred dividends. The amounts compare to net income of $99.2 million, or $1.75 per share for the first six months of 1989.

In the second quarter of 1990, Enron recorded a $67 million pre-tax ($50 million after-tax) gain from the settlement of litigation between the ETSI Pipeline Project and Santa Fe Pacific Corp. The same period a year ago includes a $50 million pre-tax ($33 million after-tax) take-or-pay reserve reversal in the Gas Pipeline and Marketing Group.

''Enron's larger interstate gas pipeline companies performed strongly during the most recent quarter, largely offsetting the effects of depressed prices on the other pipeline units,'' said Kenneth L. Lay, chairman, president and chief executive officer of Enron Corp.

''Northern Natural and Transwestern reported increased volumes while Citrus and Houston Pipe Line were affected by low residual fuel prices in Florida and low natural gas prices in Texas.''

Enron Oil & Gas earnings before interest and taxes improved by $13.1 million in the second quarter of 1990, compared to the same period a year ago.

Enron Corp., America's leading natural gas company with approximately $10 billion in revenues and $9 billion in assets, operates the nation's largest natural gas transmission system; markets natural gas, gas liquids, crude oil and refined products nationally and worldwide; owns 84 percent of Enron Oil & Gas Co., one of the country's largest independent (non-integrated) natural gas exploration and production companies; and also is one of the largest independent producers of electricity in the United States, with extensive experience in combined heat and power installations.

#90207b0751 07/26/1990 ~Business Wire

MAPLEWOOD, NJ (JULY 26) BUSINESS WIRE - First World Cheese Inc. (NASDAQ: FWCH), announced record sales and earnings for the second quarter and six months ended June 30.

Net sales for the quarter reached a record $37.8-million and net earnings were $809,000, or 16 cents per share (both primary and fully diluted). This compares to second quarter of 1989 net sales of $27.6 million and net earnings of $790,000, or 16 cents per share (both primary and fully diluted).

Net sales for the six months also reached a record $74.4 million, compared

with net sales of $50.8 million for the six months ended June 30, 1989. Net earnings for the six-month period were $1,696,000, or 34 cents per share (both primary and fully diluted), compared with $1,630,000, or 32 cents per share (primary and fully diluted).

Carl T. Wolf, president and chief executive officer of First World Cheese, said the record revenues were primarily due to the growing acceptance of the PreMonde Alpine Lace brand low-sodium, low-cholesterol cheeses. PreMonde Alpine Lace continues to expand its consumer franchise and brand awareness. The brand is rapidly becoming the No. 1 nutritional cheese in the country.

Wolf also said the introduction in June of a line of PreMonde Alpine Lace Free N'Lean fat-free cheeses, the first fat-free, low-cholesterol cheeses to be marketed nationally, has been extremely well-received. Beginning in August, the cheese will be available in supermarkets in the New York metropolitan area.

First World Cheese Inc. is a developer and marketer of a growing line of low cholesterol cheeses sold under the PreMonde Alpine Lace label. The company's primary product lines are designed to meet consumer taste expectations while providing the dietary benefits of lower fat and cholesterol.

Through its Mountain Farms Inc. and Marolf Dakota Farms Cheese Inc. subsidiaries, the company also packages and converts bulk cheeses into consumer retail packages and manufactures a small portion of the cheeses sold under the company's brand names. In addition, the company engages in the cheese commodity trading business.

SAN ANTONIO (JULY 26) BUSINESS WIRE - The board of directors of Valero Energy Corp. (NYSE:VLO) Thursday declared a regular quarterly cash dividend of 7 cents per share on the company's common stock. The dividend is payable Sept. 10 to holders of record at the close of business Aug. 6.

The board also declared a regular quarterly cash dividend of 86 cents per share for its Depositary Preferred Shares, 1983 Series. Each Depositary Preferred Share represents one-twentieth share of the company's $68.80 Series B Cumulative Preferred Stock. The dividend is payable Sept. 1 to holders of record at the close of business Aug. 10.

Valero Energy is involved primarily in specialized refining of high-sulfur atmospheric residual oil into premium products, such as unleaded gasoline, through its specialized refinery in Corpus Christi, Texas, and in the marketing of those products.

In addition, a wholly owned subsidiary of Valero is general partner of and has an approximate 49 percent interest in Valero Natural Gas Partners L.P. which owns a 7,100-mile network of natural gas transmission and gathering lines throughout Texas and in Oklahoma, purchases and sells natural gas to markets throughout Texas and the United States, provides third party gas transportation services, owns 11 natural gas processing facilities and markets natural gas liquids.

#90207b0757 07/26/1990 ~Business Wire
GALVESTON, TX (JULY 26) BUSINESS WIRE - Hornbeck Offshore Services Inc. (NASDAQ:HOSS) announced earnings for the six month and three month periods ended June 30, Thursday.

Revenues were $11,056,000 and net income totaled $1,867,000 (26 cents per share; 25 cents per share on a fully diluted basis) for the six months ended June 30.

In the six months ended June 30, 1989, the company reported revenues of $1,212,000 and a net loss of $2,363,000 ($1.15 per share) which resulted primarily from non-recurring partnership restructuring costs of $2,223,000 recorded in the second quarter of 1989.

For the quarter ended June 30, 1990, revenues totaled $6,260,000, and net income was $1,150,000 (14 cents per share; 13 cents per share on a fully diluted basis).

Larry D. Hornbeck, chairman of the board, president and chief executive officer, indicated that higher revenues and earnings in 1990 were caused by several factors including the purchase of several vessels in the second half of 1989 and January of 1990, the improved day rates and utilization rates for the company's vessels compared to 1989 and the investment of proceeds from a recently completed public offering of the company's common stock.

Hornbeck noted that the company is continuing its expansion program. ''We are optimistic about future prospects for our segment of the oil and gas service industry. In our opinion, future demand for service vessels will soon exceed available supplies.''

Hornbeck Offshore Services Inc. is engaged in the offshore marine services business, primarily serving the oil and gas industry in the Gulf of Mexico through its operation and management of supply, tug-supply, utility, crew and geophysical vessels.

MECHANICSBURG, PA (JULY 26) BUSINESS WIRE - Continental Medical Systems Inc. (NASDAQ: CONT) (''CMS'') announced Thursday that it has signed an agreement to acquire 80 percent of the outstanding stock of Communi Care of America Inc., Pro-Rehab Inc. and Alta Petens Inc., which are

headquartered in Boone, N.C.

Communi Care, Pro-Rehab and Alta Petens are privately owned companies engaged in the business of providing physical, occupational and speech therapy services on a contract basis, principally to nursing homes, primarily in 17 southeastern states.

The three owners of the acquired companies, including their current chief executive officer, have agreed to enter into five-year employment agreements to continue to run the operations of the acquired companies.

The acquisition is expected to close during CMS' first fiscal quarter, subject to certain regulatory approvals and other closing conditions. The purchase price will consist of an undisclosed combination of cash and CMS stock, part of which is payable over five years. CMS expects to finance the cash portion of the purchase price from available bank lines.

CMS is one of the nation's leading providers of comprehensive medical rehabilitation. CMS operates 12 rehabilitation hospitals and one specialty facility for a system total of 942 beds in Arkansas, California, Colorado, Florida, Kansas, Kentucky, Louisiana, Massachusetts and Texas.

CMS has 10 community-based rehabilitation hospitals under construction in Arkansas, California, Colorado, Indiana and Texas.

In addition, CMS supplies physical, occupational and speech therapy services in 25 states nationwide through its California Physical Therapy Inc. in Southern California; VTA Management Services Inc. of New York City; Pro Therapy of America in Birmingham, Mich.; and RehabWorks Inc. headquartered in Clearwater, Fla.

#90207b0761 07/26/1990 ~Business Wire

CANTON, MA (JULY 26) BUSINESS WIRE - Instron Corp. Thursday reported quarterly revenues and earnings for the second quarter of 1990.

Net revenues for the quarter ended June 30, 1990 were $30,636,000 compared with $28,688,000 for second quarter of 1989.

Net income was $897,000 or 14 cents per share, compared with $671,000 or 11 cents per share in 1989. Net income for the second quarter of 1989 included a special items charge of $380,000 or 6 cents per share for a reduction in the work force.

For the first half of 1990, Instron's net revenues totaled $57,055,000 compared with $55,818,000 in 1989. Net income was $1,425,000 or 23 cents per share, compared with $1,082,000 or 18 cents per share in 1989.

The net revenues for the second quarter increased by nearly 7 percent over the same quarter last year, thereby improving the first-half net revenues by over 2 percent from 1989. Bookings for the second quarter increased over last year's comparable quarter by approximately 8 percent, but only 2 percent for the first-half of the year as continued improvement in international business offset weaker domestic business activity. The backlog of customer orders as of June 30, 1990 was $29 million compared to nearly $26 million a year ago.

James M. McConnell, president and chief executive officer, said that since the company expected bookings to lag in the United States, expense levels were curtailed to ensure a minimum impact on earnings.

''The second quarter total bookings continued to reflect weaker U.S. business and stronger international business. We are concerned as to whether we can continue to offset the slowdown in our domestic business with higher international volume during the last-half of the year. Presently, our business forecast indicates that we will not be able to do so and we will control our costs accordingly,'' said Mr. McConnell.

McConnell noted that the second quarter financial results were favorably affected by product mix and a lower rate for income taxes.

Instron Corp. listed on the American Stock Exchange (ISN), is leading producer of instruments and systems for advanced materials testing.

DALLAS (JULY 26) BUSINESS WIRE - Sun Energy Partners L.P. (NYSE:SLP) Thursday announced a net loss of $6 million, or 2 cents per unit, for the quarter ended June 30, 1990, compared with net income of $26 million, or 7 cents per unit, for the second quarter of 1989.

Revenues were $264 million for the 1990 second quarter vs. $301 million for the second quarter in 1989.

Primary reasons for the lower earnings were lower oil prices and lower volumes for both oil and natural gas.

For the six months ended June 30, 1990, net income was $51 million, or 13 cents per unit, compared with a net loss of $144 million, or 40 cents per unit, for the first six months of 1989. The net loss in 1989 included a $199 million cumulative charge for a change in accounting method. Revenues were $600 million for the first six months of 1990 compared with $604 million for the same period in 1989.

The Partnership also announced a cash distribution of 22 cents per unit for the third quarter to be paid Sept. 10 to unitholders of record on Aug. 17.

Sun Energy Parnters L.P., whose managing general partner is Oryx Energy Co., is traded on the New York Stock Exchange under the symbol ''SLP.''

NEW YORK (JULY 26) BUSINESS WIRE - Western Publishing Group Inc. (OTC: WPGI) announced Thursday that it has completed the previously announced acquisition of Sight & Sound Inc. for a purchase price of $17.6 million paid in newly issued WPGI stock.

Sight & Sound Inc. is America's largest publisher of children's interactive electronic storybooks that feature talk, music and sound effects.

Sight & Sound Inc. now a subsidiary of WPGI, has anticipated annual net sales of substantially in excess of $20 million. Sales include products sold under the trademark ''Sound Story'' many of which include characters licensed from Teenage Mutant Ninja Turtles, Sesame Street, Looney Tunes, Disney and Peanuts.

Zeb Billings, the founder of Sight & Sound Inc. and developer of its products and technology, will remain with the combined companies and will head the new electronic and technology research and development group.

WPGI's management believes that the acquisition will make a positive contribution to its earnings in the current fiscal year and introduce entirely new product lines for future growth beginning in the third quarter of the present fiscal year.

BOSTON (JULY 26) BUSINESS WIRE - Tech/Ops Sevcon Inc. (AMEX:TOC) reported that net income per share for its third fiscal quarter ended June 30, 1990 was 26 cents compared to 18 cents for the same quarter of the previous

year, a gain of 44 percent.

Sales were $4,625,000, compared to $3,405,000 in the prior year's third quarter, a gain of 36 percent. Operating income was $704,000, a gain of 43 percent over the 1989 quarter, pincipally due to increased sales.

Other income was $27,000 compared to $112,000 last year due to decreased interest income and lower currency gains. Net income was $456,000 compared to $365,000, an increase of 25 percent. Average shares outstanding were lower than last year mainly due to share repurchase in the first quarter of fiscal 1990.

For the nine months year-to-date, income per common share was 69 cents, a gain of 30 percent over the 53 cents earned in the first nine months of fiscal 1989. Sales of $12,441,000 were 13 percent higher than last year and operating income increased by 22 percent to $1,915,000. Net income of $1,236,000 was 14 percent ahead of the $1,081,000 for 1989. Average shares outstanding were lower than in 1989 mainly due to share repurchases in this year's first quarter.

Introduction of the MOS90 range of compact computer driven motor controllers using MOSFET transistors in place of the traditional SCR devices is proceeding to plan with a significant volume of test units being shipped to selected customers throughout the quarter.

Tech/Ops Sevcon designs, manufactures and distributes solid-state controls for battery driven vehicles such as fork lift trucks and underground mining vehicles. The company has facilities in Burlington, Mass., the United Kingdom and France.

DALLAS (JULY 26) BUSINESS WIRE - International Broadcast Systems Ltd. (NASDAQ:IBTVA) announced Thursday the acquisition of the international rights for the feature film KEYS TO FREEDOM, starring Jane Seymour, Omar Sharif, Denholm Elliot, Jim Youngs, and David Warner.

KEYS TO FREEDOM is directed by Steve Feke (''When A Stranger Calls,'' ''Hawaii Five-O,'' ''Kojak'') and produced by Eduardo Rossoff (''Adventures Of The Sacred Mountain,'' ''Chanel Solitaire,'' ''The Falling,'' and ''The Kid Brother'').

French composer Francis Lai, best known for his Oscar winning score for ''Love Story,'' combines western and oriental instruments to achieve the mysterious feeling of the Orient in the KEYS TO FREEDOM soundtrack.

Set against the turmoil of Hong Kong in transition, KEYS TO FREEDOM is a mystery 'noir' with strong elements of romance, adventure and international intrique in which the highest levels of Hong Kong society become entangled with an underground ''people smuggling'' scheme and a forbidden love affair.

''While IBS has consistently developed one of the fastest growing international distribution catalogs in recent years, the acquisition of KEYS TO FREEDOM will dramatically enhance the scope of our international broadcast and home video licensing operations.

''The international premiere of KEYS TO FREEDOM this fall at MIPCOM in Cannes, France, will represent a meaningful step forward in our ongoing quest to acquire and distribute increasingly significant entertainment properties,'' stated IBS' chairman and chief executive officer, Earl L.

Jones Jr.

With offices in Dallas; Los Angeles; Paris; Santiago, Chile; and Washington, IBS distributes television programming in more than 125 countries. Additionally the firm secures airtime and sponsorships internationally and provides broadcast management and consulting services to television stations and program producers both domestically and abroad.

BIRMINGHAM, Ala.(JULY 26) BUSINESS WIRE - Protective Life Corp. (NASDAQ:PROT) announced Thursday that its consolidated net income for the second quarter of 1990 was $6.8 million or 50 cents per share, an increase of 16 percent over the $6.0 million or 43 cents per share in the same period in 1989.

Excluding realized investment gains and losses, the company's earnings were 50 cents per share in the second quarter of 1990 as compared to 40 cents per share last year, a 25 percent increase. In the 1990 second quarter, realized investment gains were less than 1 cent per share compared to 3 cents per share for that period last year.

Consolidated net income in the first six months of 1990 was $12.2 million or 90 cents per share, compared to $10.7 million or 77 cents per share in the comparable period in 1989, an increase of 17 percent.

Excluding realized investment gains and losses, earnings in the first six months of 1990 were 91 cents per share compared to 72 cents per share in the same period of 1989, a 26 percent increase. Realized investment losses were 1 cent per share in the first six months of 1990 compared to realized investment gains of 5 cents per share for that period of 1989.

The company's second quarter results reflects improved earnings in most of its major lines compared to the same period in 1989. During the second quarter the company's assets increased $226 million to $1.6 billion due largely to individual annuity and guaranteed investment contract deposits.

HOUSTON (JULY 26) BUSINESS WIRE - Service Corporation International (SCI) reported Thursday that income from continuing operations for the three months ending June 30, 1990, totaled $14.3 million, which represents a 17.2 percent increase over the second quarter of 1989.

Earnings per share from continuing operations increased to $.30 per share from $.26 per share last year. Discontinued operations contributed $.04 to the total net income per share of $.30 reported in the second quarter of 1989; discontinued operations had no effect on net income in the second quarter of 1990.

Revenues from continuing operations increased by $12.3 million or 9.7 percent to $139 million during the current quarter. For the six months ended June 30, 1990, income from continuing operations increased to $32.1 million or $.67 per share, from $30.1 million or $.63 per share earned last year.

R. L. Waltrip, SCI's chairman said: ''We are pleased to report that revenues and earnings increased in all three of our core businesses during the second quarter. While acquisitions continue to be an integral part of SCI's strategy, I think it is important to note that our second quarter performance was achieved without the assistance of any new acquisitions.''

''Our businesses during the second quarter started to show the positive impact of our restructuring,'' Waltrip said. ''And the recent completion of the sale of our life insurance company and the retirement of the variable term preferred stock will benefit future operating results and cash flow.''

SCI is the largest funeral service and cemetery company in North America. In the forth quarter of 1989 the Company began restructuring operations to focus on its three core businesses -- funeral service, cemetery operations and financial services. SCI's common stock is traded on the New York Stock Exchange. The Company's ticker symbol is SRV.

#90207b0824 07/26/1990 ~Business Wire

STURBRIDGE, MA (JULY 26) BUSINESS WIRE - Galileo Electro-Optics Corp. announced Thursday that, as previously estimated, sales for the third quarter of $9,585,000 were down 1.9 percent from the same quarter last year, while for the first nine months of the fiscal year, sales of $30,449,000 were up 8.2 percent from the first nine months of last year.

Net loss this quarter was $1,467,000, equivalent to a loss of 23 cents per share, compared to income of $601,000 or 10 cents per share in the same quarter of 1989. Net loss for the first nine months of this year was $721,000 or a loss of 11 cents per share as compared to net income of $1,441,000 or 23 cents per share for the same period last year.

Results for the quarter were adversely affected by poor manufacturing yields, particularly in the Fused Fiberoptics Product Line, a decline in sales caused by protests which have delayed the award of the U.S. Government's contracts for military night vision devices and has led to a reluctance on the part of the manufacturers to place orders for the company's components used in those devices, and costs related to a company-initiated restructuring program.

The restructuring goals of a lower cost structure and increased emphasis on commercial markets are expected to dampen earnings fluctuations caused by past efforts to respond to the changing demands of the military night vision marketplace. In this transition to a commercial emphasis, the company has reduced the workforce at its Sturbridge, Mass. facility by 17 percent and will limit its involvement as a supplier of military night vision components to a more defined set of products and specifications.

The company also is planning to relocate its Flexible Fiberoptics Product Line to its Forest, Virg. plant in an effort to reduce costs. While the restructuring costs contributed to the third quarter's net loss, the resulting cost structure should allow the company to return to profitable operation in the fourth quarter, if anticipated sales levels are achieved.

Galileo develops, manufactures and markets fiberoptic and electro-optic components, assemblies and systems which transmit, sense or intensify light or images. Galileo's products are sold primarily to original equipment manufacturers for use in military night vision devices, scientific and analytical instruments and a variety of commerical applications.

#90207b0830 07/26/1990 ~Business Wire

IRVINE, CA (JULY 26) BUSINESS WIRE - StarTel Corp. (NASDAQ:STAS) Thursday announced results from operations for the second quarter ended June 30, 1990, with revenues of $1,926,000, up 14 percent from $1,691,000 in the same period of 1989.

Net income for the second quarter was $69,000 compared with a loss of $470,000 in the same period of 1989. Related earnings per share for the second quarter were 1 cent per share compared with a loss of 10 cents per share in the same period of 1989.

Results for the six months ended June 30, 1990, included revenues of $3,726,000, up 1 percent from $3,680,000 in the same period of 1989. Net income for the six months ended June 30, 1990, was $124,000 compared with a loss of $949,000 in the same period of 1989.

Related earnings per share for the six months ended June 30, 1990, were 3 cents per share compared with a loss of 20 cents per share in the same period of 1989.

Don Berry, chairman of the board of StarTel, stated that the company has now achieved profitability for four consecutive quarters. Over the last 12 months, revenues and net income were $7,645,000 and $331,000, respectively.

The company attributes the improved performance to management and organizational changes made during the first half of 1989 and a continuing dedication to enhancing its existing products while closely managing expenses.

StarTel maintains a strong balance sheet with over $1.1 million in cash and no bank debt. The company is stronger in both year-to-date revenues and earnings growth compared with 1989 and is committed to maintaining its leadership in providing telemessaging systems to hospitals, universities, executive suites and telephone-answering bureaus.

StarTel manufactures and markets telecommunications systems with integrated voice, data, database and networking capabilities. StarTel has installed to date approximately 980 systems worldwide in corporations, executive suites, hospitals, telemarketing centers and telephone-answering bureaus.

#90207b0831 07/26/1990 ~Business Wire

TINTON FALLS, N.J. (JULY 26) BUSINESS WIRE - Concurrent Computer Corp. Thursday announced a shortfall in estimated fourth quarter revenues and expects to report a substantial loss for the fourth quarter ended June 30.

According to James K. Sims, chairman, chief executive officer and president of Concurrent, ''The accelerated market trend towards standards-based products has caused confusion and hesitation in the marketplace. This activity has delayed purchase decisions. In addition, customer-requested delays and cancellations, specifically in government programs where uncertain conditions exist, have contributed to the shortfall.''

These market conditions have led the company to commence implementing a strategic reorganization in the upcoming weeks. The reorganization will reduce the company's worldwide workforce in the range of approximately 15-20 percent and will include a voluntary separation program for U.S. employees.

The financial impact of the reorganization, including a significant restructuring provision, will be reflected in the fourth quarter results when reported in about four weeks.

In addition to market conditions, the operations of the company are constrained by its leveraged position. Therefore, the company has engaged Goldman, Sachs & Co. to review its current capital structure.

''Reducing costs and accelerating our product implementation strategy will lead to increased efficiencies. The new organization will be streamlined and market-driven ready to react to quickly-changing market needs. We are confident that the steps we are taking will contribute to the long-term

health and success of our customers and our company.

''Several UNIX-based products announced over the last six months have been well received by our customers. These include both our RISC-based multiprocessor system and the application server product for the commercial market. Our plan to announce a major product this fall is further evidence that we are on the right track for long-term growth,'' said Sims.

Concurrent Computer Corp. is the leading supplier of high performance real-time computer systems worldwide. The company's products, marketed through the Commercial Markets, Simulation/Training and Real-Time Technical Systems Groups, provide real-time solutions to the financial, communications, public sector, technical, aerospace and simulation markets. Its common stock (CCUR) is traded on the NASDAQ National Market System.

BRISTOL, CT (JULY 26) BUSINESS WIRE - A regular, quarterly cash dividend of $0.13 per share was declared by Eagle Financial Corp. (AMEX: EAG) it was announced in Bristol Thursday by Frank J. Pascale, chairman and chief executive officer.

The dividend is payable on September 1, 1990 to shareholders of record as of August 15, 1990.

In making the announcement, Pascale said, ''We believe Eagle continues to exhibit positive trends in earnings with emphasis placed on recurring income while keeping a diligent watch on the quality of assets and a tight control of overhead. Based on these factors, the board of directors declared this eighth consecutive quarterly dividend.''

Ralph T. Linsley, vice chairman and president, added, ''Eagle significantly exceeds the regulatory capital requirements and our shareholders warrant a return on that equity. We are pleased to continue our dividend program.''

Eagle Financial Corp. is a $475 million multiple savings and loan holding company for the four-office Bristol Federal Savings Bank of Bristol, and the five-office First Federal Savings and Loan Association of Torrington, Conn.

#90207b0833 07/26/1990 ~Business Wire

BOSTON (JULY 26) BUSINESS WIRE - BayBanks Inc. announced Thursday a net loss of $11.5 million for the three months ended June 30, 1990.

This compares with a net loss of $13.8 million for the prior three months ended March 31, 1990.

Also, the board of directors of BayBanks Inc., at its meeting today declared a quarterly dividend of 30 cents per share payable Saturday, Sept. 1, 1990, to stockholders of record Tuesday, Aug. 14, 1990. The previous quarterly dividend was 45 cents per share.

''The continued weakness in the regional real estate market has led to a reappraisal of values in our loan portfolio,'' said William M. Crozier Jr. chairman of the board and president of BayBanks Inc. ''And our addition to loan loss reserves of $63.5 million caused the past quarter's loss.

''The decision to reduce the company's dividend to 30 cents per share this quarter reflects the board's desire to conserve capital during an unsettled period in the region's economy and thus to preserve the company's already considerable financial flexibility,'' Crozier added. ''Decisions on future dividends will be based on the circumstances prevailing at the time.''

Nonperforming loans were $265 million at June 30 compared with $237 million at the end of the prior quarter. Net loan losses for the past quarter were $45 million compared with $26 million for the prior quarter. Reserves at June 30 were $145 million, or 55 percent of nonperforming loans.

In addition, the company reported that at June 30, other real estate owned totaled $69 million, which includes $49 million in a new category of in-substance foreclosures reflecting properties in the process of foreclosure but where the company's bank subsidiaries have not yet taken legal title.

During prior periods, loans in the process of foreclosure were included in the category of nonperforming loans. Other loans past due 90 days or more were $94 million at June 30, down from the $100 million total at March 31.

Crozier noted that BayBanks' capital and reserves at $688 million are well above regulatory guidelines. The average primary capital ratio for the second quarter is 7.05 percent, compared with the regulatory minimum guideline of 5.5 percent of total assets.

Under new risk-adjusted standards to be applied by year-end 1990, the company's total capital ratio currently is 8.34 percent, compared with the regulatory minimum of 7.25 percent. He also noted the liquidity of the company's balance sheet is high and has been increased during the first half of the year by the conversion of $513 million of residential mortgages to securities that are readily marketable.

''BayBanks is fully prepared to meet all the appropriate credit needs that come its way and thereby to support the growth of the region's economy,'' Crozier stated.

Regarding operations for the second quarter, Crozier said that June 30 totals for consumer deposits show a good gain over March 31 figures, in part from the acquisition of deposit accounts from the failed Home National Bank in Milford in early June. Operating expenses for the second quarter and the first half of 1990 were virtually unchanged from the comparable periods in the prior year.

BayBanks also announced that the board of directors took action today on two questions posed by recent changes in Massachusetts law. The board voted to be subject to a new law governing the classification of boards of directors of publicly owned Massachusetts corporations. The BayBanks Inc. board is already classified, but the new law contains provisions to assure director continuity.

The board of directors also voted, under an ''opt-out'' provision of the new Massachusetts nationwide interstate banking law, to postpone until July 1, 1992, the effective date on which nationwide interstate banking would apply to the company. Under the new law the board retains the flexibility to ''opt in'' to nationwide interstate banking at an earlier date if it deems that advisable.

Crozier stated, ''Our board has chosen to take advantage of the opportunities offered by these two new laws to provide additional protection against attempts to force BayBanks into transactions that the board finds are not in the best interests of BayBanks and all its stockholders.

In particularly, the board believes that it is appropriate to allow additional time for the Commonwealth and the company to work through this current period of economic adjustment.''

The company also announced today that the trustees of its pension plan have authorized the purchase of shares of BayBanks Inc. for the employee retirement fund in open market or in privately negotiated transactions from time to time up to a maximum of $7.5 million. At June 30, 1990, the company had 16,018,102 shares of common stock outstanding.

WATERBURY, CT (JULY 26) BUSINESS WIRE - MacDermid Inc., of Waterbury, reported record total sales of $38,381,000 for its first quarter ended June 30, an increase of $691,000 over the same period last year.

Net earnings of $1,804,000, 51 cents per share, compared favorably with the $852,000, 24 cents per share, earned in the first quarter of the previous fiscal year. Net earnings were favorably impacted by cost reductions begun during the previous fiscal year.

A one-time after tax gain of $825,000 resulting from a previously reported exchange of MacDermid's semiconductor photoresist business for Morton International's electroless copper and screen resist business (plus a cash payment) effected during the June quarter 1990, was substantially offset by a write-off of certain intangible assets.

Net sales of the semiconductor photoresist business for fiscal year 1990 were less than 10 percent of consolidated net sales and were not significantly different from the reported net sales of the business acquired in the exchange.

CHICAGO (JULY 26) BUSINESS WIRE - Wells-Gardner Electronics Corp. (AMEX:WGA) Thursday confirmed the previously forecasted sharp increase in earnings and sales for the second quarter and six months ended June 30.

For the quarter, net earnings from continuing operations grew to $511,000 or 13 cents a share, from the $108,000, or 3 cents a share, in the 1989 quarter. Tax loss carryforwards added an additional $298,000, or 8 cents a share, resulting in total earnings of $809,000, or 21 cents a share, for the quarter. In the year-ago quarter, net earnings of $1,000, or nil cents per share, were negatively impacted by a loss of $107,000, or 3 cents a share, on discontinued operations. Sales of $14,526,000 in the 1990 three months were up 61 percent over the $9,009,000 in the second quarter of 1989.

For the six months of 1990, net earnings from continuing operations increased 50 percent, to $572,000 or 15 cents a share, compared to $381,000, or 10 cents per share in the 1989 period. Tax loss carryforwards in the six months added an additional $335,000, or 9 cents a share resulting in total earnings for the 1990 six months of $907,000, or 24 cents a share. The net earnings of $184,000, or 5 cents a share, reported in the year-ago half, included a loss of $197,000, or 5 cents a share, for discontinued operations. Sales of $24,019,000 in the 1990 six months represented a 27 percent increase over the $18,922,000 in the comparable period of 1989.

There were 3,769,461 weighted average common and common equivalent shares outstanding in the 1990 periods and 3,749,539 during the 1989 quarter and half.

SOMERVILLE, NJ (JULY 26) BUSINESS WIRE - Beatrice D'Agostino, president and chief executive officer of Bancorp New Jersey Inc. (OTC, NASDAQ:BCNJ), announced Thursday the approval by the board of directors of a 20 percent increase in the regular quarterly dividend.

Shareholders of record as of Sept. 1, 1990 will receive a cash dividend of 12 cents per share payable on Sept. 15, 1990.

''The company's earnings performance, strong capital position and stock repurchase program has permitted us to once again increase the quarterly dividend, which was first initiated in 1988,'' commented D'Agostino. ''The current dividend yield will be 5.33 percent, with a payout of approximately 39 percent of the trailing 12 month earnings.''

Bancorp New Jersey, located in Somerville, is the parent company of the 119-year-old New Jersey savings bank, a wholly owned subsidiary with six offices in Somerset, Hunterdon, and Mercer counties. New Jersey Savings Bank is a member of the Federal Deposit Insurance Corp. (FDIC)

#90207b0848 07/26/1990 ~Business Wire

CHARLOTTE, N.C. (JULY 26) BUSINESS WIRE - Brad Ragan Inc. (ASE: BRD) recorded improved revenues and net income for the second quarter and six months ended June 30, 1990, W.P. Brophey, president and chief executive officer, announced Thursday.

Net income for the second quarter 1990 increased 37 percent to $886,000, 40 cents per share, compared to net income of $645,000, 29 cents per share for the like period a year earlier. Additionally, revenues were improved $1.6 million to $63,130,000 from $61,512,000.

The second quarter results bolstered six months revenues and net income beyond 1989 levels. For the six month period, total revenues improved to $113,959,000 from $113,623,000. Sales growth was recorded in new tires, retreads, and service more than offsetting a $4 million loss of rubber mixing business for outside new tire manufacturing.

Net income improved 20 percent to $589,000, 27 cents per share from $490,000, 22 cents per share.

W.P Brophey stated that earnings growth for the quarter was recorded in both the commercial and retail business segments. ''We will continue to focus on improved return on sales and investment turnover where successful endeavors will favorably impact earnings, cash flow and interest expense.

''Special attention and analysis of product cost control and operating expense reduction is underway in order to enhance the return on assets, investment and equity,'' said Brophey.

Brad Ragan Inc. is the largest United States producer of retreaded tires for off-highway vehicles. BRI distributes new and retreaded off-the-road and truck tires through a network of 50 commercial outlets in 20 states. The company also operates a chain of 136 retail stores in the Southeast, featuring products and services for the auto and home.

HOUSTON (JULY 26) BUSINESS WIRE - Kirby Corp. (ASE: KEX), formerly Kirby Exploration Company Inc., engaged in marine transportation, diesel repair and property and casualty insurance, reported net earnings for the six months ended June 30, 1990 of $7,752,244, or 34 cents per share, compared with net earnings of $5,497,821, or 24 cents per share, for the same period last year.

For the second quarter of 1990, net earnings totaled $4,122,272, or 18 cents per share, compared with net earnings of $3,404,355, or 15 cents per share, for the second quarter of 1989.

The 1990 and 1989 six-months and second-quarter results include an extraordinary item which represents the utilization of tax benefits of prior years net operating loss carryforwards. Although the company has no established dividend policy, a special cash dividend of 10 cents per share was paid in both September 1989 and 1988.

Because of potential investment opportunities and the company's marine construction program, the board of directors at the July 1990 board meeting elected not to pay a cash dividend on its common stock in 1990.

ARDSLEY, NY (JULY 26) BUSINESS WIRE - CIBA-GEIGY Ltd. announced Thursday that is has completed its sale to Pharos AB of Spectra-Physics, the world's leading producer of lasers, laser systems and chromatography instrumentation.

Terms of the purchase were not disclosed.

CIBA-GEIGY and Pharos had announced the signing of a definitive agreement for Pharos to acquire Spectra-Physics on May 15, 1990.

''The sale of Spectra-Physics will enhance our flexibility to pursue increasingly attractive opportunities in our core businesses of pharmaceuticals, specialty chemicals and vision care products,'' said Dr. Alex Krauer, chairman of CIBA-GEIGY Ltd. ''At the same time, we expect to continue cooperative business relations with Spectra-Physics in the areas of chemistry with laser applications and analytical techniques applied to CIBA-GEIGY research and development efforts.''

CIBA-GEIGY Ltd. is engaged primarily in the discovery, development, manufacture and marketing of a wide variety of pharmaceuticals, agricultural and specialty chemicals, and vision care products.

REDWOOD CITY, CA (JULY 26) BUSINESS WIRE - Personics Corp., developer of The Personics System for in-store production of custom music cassettes, has announced the appointment of Steven C. Boone as chief executive officer and president effective August 6.

Boone, 41, was CEO of Oakland-based Cost Plus Imports Inc. for the past two-and-a-half years, during which time he led the turnaround of the 39-store, $115 million retail chain.

Personics' founder Charles Garvin said, ''Steven was chosen after an extensive search for a seasoned retail executive with experience in rapid growth situations.'' Garvin will continue as a director of the company while developing the Personics technology for related applications.

While at Cost Plus, Boone oversaw a major expansion as well as took the chain aggressively into the discount wine business. During his tenure, he opened 10 new facilities, installing improved information systems and refixturing all stores in the chain.

Prior to his role at Cost Plus, Boone founded Liquor Barn in 1979 while an employee of Safeway Stores. The Liquor Barn retail chain quickly became the country's largest retailer of alcoholic beverages and was profitable after its first year.

By 1985, Liquor Barn operated 105 stores, and Boone had twice been named ''Retail Superstar'' by Market Watch magazine.

He left Liquor Barn in 1986, serving for a year as executive vice president of Chase Hamlin Associates, a San Francisco-based marketing and public relations firm, before moving on to Cost Plus in 1987.

Boone began work at age 14 at Safeway where his father was a career employee. In 1973, following graduation from Pacific University, he began his business career at Safeway.

During his 20 years at the company, he served as a store manager, a buyer and as manager of corporate special projects before creating and developing the Liqor Barn concept.

A native of Seattle, Boone resides in Orinda, Calif. He has been a guest lecturer at the business school at Berkeley and the University of Southern California.

He is a member of the board of directors of Pacific University.

The Personics System allows consumers to select and program music onto a personalized audio cassette in record stores. The revolutionary process is made possible through major advances in digital recording technology.

The Personics System appeared in its first retail outlets in 1988 and is currently in 235 stores in 11 states.

#90207b0856 07/26/1990 ~Business Wire

BURLINGTON, VERMONT (JULY 26) BUSINESS WIRE - John A. Cobb, president and chief executive officer of Eastern Bancorp (NASDAQ:VFBK), announced third quarter earnings Thursday of $755,000, or 30 cents per share as compared to a loss of $1,637,000, or 64 cents per share for the same quarter last year.

Net income for the nine months ended June 30, 1990 was $2,529,000, or $1.00 per share as compared to $83,000, or 3 cents per share for the same period in fiscal 1989.

Cobb stated, ''While we are pleased with the positive results of this fiscal third quarter, we recognize that a substantial portion of the improvement in the 1990 earnings over 1989 earnings results from the $1.8 million loan loss provision taken in the quarter ended June 30, 1989. We do believe, however, that it is important to recognize Eastern's continued upward trend in core earnings.''

Cobb also announced that the company's board of directors voted to increase its regular quarterly dividend to 14 cents per share to be paid on Aug. 21, 1990 to owners of record on Aug. 7, 1990. This is the company's twelfth consecutive quarterly dividend.

Net interest income for the quarter was $5.0 million as compared to $3.7 million for the same quarter last year. Included in the current quarter results are loan loss provisions of $385,000 as compared to $1,788,000 in last year's quarter. The company's total non-performing assets at June 30 1990 were $15.2 million as compared to $12.6 million at March 31, 1990 and $11.4 million at Sept. 30, 1989.

The increase in non-performing assets during the third quarter is attributed to a continued slowdown in the Vermont and New Hampshire economies. The change comes from increases in non-accruing mortgage and commercial loans and foreclosed real estate. The $15.2 million in non-performing assets represent 2.45 percent of total assets. The company's loan loss reserves of $3.0 million represent 19.73 percent of total non-performing assets and 0.61 percent of total loans.

Cobb stated, ''Management believes that the loan loss reserves at June 30, 1990 are adequate and, in view of the continued uncertainties in the local and regional economies, management will continue to closely monitor the quality of the loan portfolio.''

Total assets of the company at June 30, 1990 were $617.9 million, an increase of $4.4 million from Sept. 30, 1989. Shareholders' equity at June 30, 1990 was $53.7 million, or $22.34 per share.

Eastern Bancorp is the holding company of Vermont Federal Bank of Burlington, Vermont and Rockingham Bancorp of Exeter, New Hampshire. Vermont Federal operates 15 offices throughout the state of Vermont, and Rockingham Bancorp six offices through its bank subsidiary, First Savings of New Hampshire.

#90207b0859 07/26/1990 ~Business Wire
NEW YORK (JULY 26) BUSINESS WIRE - The Federal Energy Regulatory Commission (FERC) Wednesday delayed approval of the application of the Iroquois Gas Transmission System to construct a 370-mile underground pipeline from the Canadian border to Long Island.

Approval of the Iroquois pipeline would allow transportation of 576 million cubic feet of natural gas per day to 21 Northeastern local distribution companies and power generators, including Brooklyn Union Gas.

Citing a necessity to explore further the ''limited'' issues of market need and rate structure, FERC established a 45-day period for an ''expedited and narrowly focused'' hearing on the project, and by mid-November, is expected to take a final vote on construction of the pipeline.

Robert B. Catell, president and chief operating officer of Brooklyn Union, said that ''The FERC decision to delay its approval of Iroquois is disappointing because the project has so many positive aspects. Approval will mean reductions of 30 million barrels of imported oil annually.

''Approval will mean reducing sulfur emissions by more than 75,000 tons a year, a significant contribution to a cleaner environment in the Northeast. Approval will mean less chance of possible power shortages and brownouts in the Northeast.

''Approval will mean more diversity and competition in the sources of energy supply available to the Northeast. And approval will mean additional, critically needed pipeline capacity to serve the growing clean-energy needs of this part of the country. The FERC decision to hold further hearings could delay the realization of these benefits and is clearly not in the best interests of the Northeast.''

Catell also said that ''this project was filed with FERC over four years ago and the issues surrounding this project have been hashed and rehashed. We also are concerned that some will view this unusual course of action as a violation of the spirit of the recently negotiated Free Trade Agreement with Canada. We cannot allow a small group of gas producers in the southwest, or other groups with narrow, selfish interests to prevent Iroquois from being part of our energy solution in the Northeast.''

Despite the temporary setback, Catell said that while the ''window of opportunity to meet pipeline construction deadlines is narrow, we are confident, if FERC adheres to its revised hearing and decision-making schedule, that the Iroquois pipeline can still be built so that gas can begin flowing to meet our current operational date of November 1991.''

In the Fall, the National Energy Board of Canada is expected to resolve critical issues regarding the construction of related pipeline facilities in Canada as well as rate design.

Through its subsidiary, North East Transmission Co. Inc., Brooklyn Union has the largest distribution company ownership in the Iroquois project, from which it expects to receive 50 million cubic feet of gas per day for the winter of 1991/1992.

BEAUMONT, TX (JULY 26) BUSINESS WIRE - Gulf States Utilities Co. (NYSE:GSU) Thursday reported an unaudited loss of $1.17 per share of common stock for the second quarter of 1990, which includes an after-tax charge to earnings of $1.25 per share reflecting an agreement in principle for the settlement of litigation with the Southern Co.

Excluding this nonrecurring charge, earnings for the quarter would have been eight cents per share. The company incurred a 12 cents per share loss for the second quarter of 1989. Increased kilowatt-hour sales, reduced costs associated with a purchased power buyback agreement, and reduced interest charges contributed to the improved performance.

Second quarter 1990 kilowatt-hour sales were 7.2 billion, six percent more than the 6.8 billion kilowatt- hours sold in the second quarter of 1989. Sales increased because of the hotter than normal weather experienced during May and June, in addition to a slight increase in the number of customers.

GSU also reported a loss of $1.94 per share of common stock for the 12 months ended June 30, 1990, compared to a loss of six cents per share of common stock for the 12 months ended June 30, 1989. The $1.94 loss resulted primarily from the Southern Co. settlement and three significant accounting charges recorded in the third and fourth quarters of 1989.

The accounting charges resulted from the regulatory environment in the company's wholesale jurisdiction and steam department and the abandonment of lignite leases.

GSU also reported that kilowatt-hour sales totaled 27.7 billion for the 12 months ended June 30, 1990, about one percent greater than the 27.6 billion recorded during the 12 months ended June 30, 1989.

GSU serves 566,000 electric customers in a 28,000-square-mile area spanning the Gulf Coast between Houston and New Orleans.

NEW HYDE PARK, NY (JULY 26) BUSINESS WIRE - A decision handed down July 24 by Justice Kenneth D. Molloy of the Superior Court of New York State for Nassau County continued a temporary restraining order against former Bamberger Polymers Inc. (ASE:BPI) employees until a Bamberger's request for a preliminary injunction is heard on August 20.

The order prohibits 12 former employees, which group recently left the company, from soliciting clients and customers of Bamberger Polymers, and from accepting unsolicited business from customers who have done business with Bamberger within the last six months.

Bamberger Polymers has also filed suit against the former employees, their newly created entity and their financial backers for alleged RICO violations, Breach of Contract, Tortious Interference with Contracts and Business Relationships, Unfair Competition, Breach of Fiduciary Duty, Commercial Piracy and Fraud. The suit seeks preliminary and permanent injunctive relief, compensatory and punitive damages.

Bamberger Polymers is an international plastics merchant involved in compounding, distribution and sales of thermoplastic resins, the raw materials for a broad range of plastic products.

HUDSON, NH (JULY 26) BUSINESS WIRE - Micronetics Inc. (NASDAQ:NOIZ) Thursday announced that it had elected Zygmond Turski to the position of president.

Turski had been acting as the assistant to the chairman of the company since March 1, 1990.

Prior to joining Micronetics, Turski was the CEO of Synergetics International, a management consulting firm that specializes in the business development and marketing of high-tech products. He has also held executive positions with Loral's Advanced Technology Lab, Amecom and General Microwave.

According to Micronetics Chairman Richard S. Kalin, ''Turski has 20 years of experience in the microwave industry -- both in the United States and abroad. He already knows our major customers and our sales reps, and he has an excellent background with systems houses. His arrival creates new possibilities for Micronetics.''

In a separate announcement today, Quantech Electronics Corp. announced a dividend to its stockholders of its 47.5 percent interest in Micronetics, effective August 31. Shareholders of Quantech will not be able to sell these shares until August 31, 1991, one year from the record date.

Micronetics designs and manufactures microwave components used worldwide in sophisticated communications and defense systems.

CHELMSFORD, MA (JULY 26) BUSINESS WIRE - The Optronics division of Intergraph Corp. and its parent company, Intergraph Corp. (NASDAQ:INGR) (Huntsville, Ala.), Thursday announced the filing of an answer and counterclaims on July 19, 1990, directed at Dr. -Ing. Rudolf Hell, GmbH of Kiel, West Germany, in the United States District Court for the District of Massachusetts in Boston.

The answer and counterclaims were filed in response to a civil action Hell filed against Optronics and Intergraph on June 21, 1990, which alleges that the Optronics ColorSetter 2000 color separation recorder incorporates a screen generating technology which infringes U.S. Patent No. 4,084,183, owned by Hell and entitled ''Method for the Electro-optical Reproduction of Halftone Pictures.''

In the papers filed, Optronics and Intergraph ask for a declaration by the court that the '183 patent is invalid and unenforceable, and furthermore, that the ColorSetter 2000 does not infringe this patent. Hell's '183 patent is directed to an older screening technology, known as ''rational'' screening, which is only capable of producing screens rotated at angles having rational tangents.

This is the same technology that was disclosed and claimed in a previous Hell patent, U.S. Patent No. 3,657,472, which expired in April 1989. Optronics alleges that Hell is improperly attempting to extend the life of the '472 patent by asserting the '183 patent.

In addition to the foregoing, the answer filed by Optronics and Intergraph

sets forth additional bases for the invalidity of the '183 patent, including the lack of an enabling description in the patent. Optronics and Intergraph also allege in their answer that Hell misled the Patent and Trademark Office with respect to the '472 patent.

Optronics and Intergraph also allege that Hell and its representatives have engaged in unfair and intentionally deceptive business practices by falsely representing to customers and prospective customers of Optronics and Intergraph that the ColorSetter 2000 infringes the '183 patent.

''It is our firm intention to stand behind our unique technology and our current and future customers,'' commented Bruce Harrison, Optronics general manager. ''We have no recourse but to pursue further legal action in defense of our own business reputation as well as the furthering of innovation in the graphics arts industry.''

The Optronics division of Intergraph Corp. manufactures and markets precision imaging systems, including laser imagesetters, photoplotters, scanners, and film recorders, for computer graphics applicactions in engineering, manufacturing, scientific analysis, and electronic publishing industries.

ATLANTA (JULY 26) BUSINESS WIRE - Teleco Inc. of Greenville, S.C., Thursday announced the signing of a letter of intent to purchase the business telephone operation of Lanier Worldwide Inc.

Terms of the agreement were not disclosed.

The business-telephone operation is part of Lanier's Voice Products Division. ''The agreement represents a good strategic move for both companies,'' said Tony Amason, executive vice president and general manager of the Lanier division.

''Although business telephones are not central to Lanier's future strategy we have established a substantial market presence that offers valuable potential to a telecommunications specialist such as Teleco.''

''This acquisition will further solidify Teleco's strong market position as it moves into the 90s,'' said Bill Rogers, president and founder of the Greenville company.

Amason said Lanier will work closely with Teleco during the transition to

ensure continuity for its dealers and customers in providing quality sales service and support. ''We are committed to maintaining a high level of service and support for our customers,'' he said.

Lanier Voice Products has been a market leader in dictation systems for more than 55 years. The division is part of Lanier Worldwide, a $1 billion, Atlanta-based company that is a wholly-owned subsidiary of Harris Corp. (NYSE:HRS). Lanier serves customers in more than 50 countries through an international network of more than 1,600 sales and service locations.

Teleco, which was founded in Greenville in 1981, is a nationwide supplier of telecommunications systems and long-distance services with more than 80 locations. In December 1989, Teleconnect Magazine rated Teleco number one in America in dealer sales, with volume in excess of $109 million. This follows 1986 and 1987 rankings in Inc. magazine's top 500 list of America's fastest growing privately-held companies.

BURLINGTON, MA (JULY 26) BUSINESS WIRE - M/A-COM, Inc. (NYSE:MAI) Thursday reported income from continuing operations for its third quarter ended June 30, 1990 of $4,278,000 or $.17 per share compared with $2,761,000 or $.11 per share in the comparable prior year period, an increase of 55 percent.

Sales for the third quarter were $96,191,000 compared with $64,722,000 in the prior year, an increase of 49 percent. New orders for the quarter increased 14 percent to $86,032,000 from $75,437,000 in the prior year. The significant increase in both sales and orders result from the acquisition in July 1989 of Adams-Russell, Inc.

M/A-COM is a leading producer of radio frequency, microwave and millimeter wave semiconductors, components and subsystems for applications in telecommunications, radar, navigation, missile guidance, electronic warfare, surveillance and command-control- communications-intelligence (C3I) systems. M/A-COM also supplies surveillance products used in intelligence collection applications.

The company's products are used primarily in defense electronics systems, but also have numerous commercial applications.

NORTH ANDOVER, MA (JULY 26) BUSINESS WIRE - Intrex Financial Services Inc. (NASDAQ: TREX), the parent holding company of Lawrence Savings Bank Thursday announced results for the second quarter ending June 30, 1990.

For the second quarter ended June 30, 1990, Intrex had a net loss of $2,570,000 or 61 cents per share as compared with a net loss of $2,948,000 or 70 cents per share for the same period of 1989. The net loss for the six months ended June 30, 1990 was $4,439,000 or $1.05 per share as compared to a net loss of $4,510,000 or $1.06 per share for the same period of 1989. Because of the operating loss carryforward, there is no tax benefit recorded for either quarter or either six-month period.

The net interest income totaled $2,354,000 for the second quarter 1990 as compared to $2,558,000 for the second quarter 1989. The 1990 second quarter provision for possible loan losses was $1,500,000 as compared to $2,500,000 for the second quarter of 1989. The company also has write-downs and expenses on certain real estate owned and property formerly held in a joint venture of $351,000 and $0 in the second quarter of 1990 and 1989 respectively.

Non-performing assets at June 30, 1990 were $27,777,000 as compared to

$28,942,000 at Dec. 31, 1989.

Total assets were $353,306,000 at June 30, 1990, up from $354,040,000 at Dec. 31, 1989 Net loans decreased to $256,519,000 from $257,222,000 and deposits were $256,500,000 up from $253,830,000 for the same periods.

Intrex's capital-to-asset ratio was 13.42 percent at June 30, 1990 as compared to 14.67 percent at Dec. 31, 1989.

Intrex is headquartered in North Andover, Mass. Intrex common stock is traded over the counter on the NASDAQ National Market system. Lawrence Savings Bank has seven retail offices throughout the Greater Lawrence area.

NEW YORK (JULY 27) BUSINESS WIRE - Welcome to the woman-friendly company.

Business Week reports (Aug. 6 issue) that at a few exceptional companies, women don't just survive - they thrive.

''It's a question of consciously creating an environment where everyone has an equal shot at contributing, participating, and most of all

advancing,'' says Phyllis B. Davis, a senior vice-president of Avon Corp.

To identify major public companies with woman-friendly cultures, Business Week considered several criteria: numbers of women in key executive positions and on the board of directors, for example. A good middle-management pipeline also made up part of the criteria, as did pointed efforts to help women advance and sensitivity on the work and family front.

BW identified as pacesetters Avon, CBS, Dayton-Hudson, Gannett, Kelly Services, and U.S. West.

Up-and-comers: American Express, Baxter International, Corning, Honeywell, IBM, Johnson & Johnson, Merck, Monsanto, Pitney Bowes, Reader's Digest, Security Pacific Bank, and Square D.

Late Bloomers: Digital Equipment, Du Pont, Hewlett-Packard, Olin, 3M, and Xerox.

MINNEAPOLIS (JULY 26) BUSINESS WIRE - Dahlberg Inc. (NASDAQ:DAHL) Thursday announced that second quarter 1990 revenue was $18,160,000, an increase of 7 percent over the 1989 second quarter revenue of $16,955,000.

Net earnings for the quarter were $837,000, or 29 cents per share, an increase of 57 percent over 1989 earnings of $533,000, or 18 cents per share.

For the six months, revenue was $34.9 million up from $32.4 million in 1989. Net earnings increased to $1,410,000, or 49 cents per share from $817,000, or 27 cents per share the previous year.

''Our efforts to increase manufacturing efficiency and improve operating margins in our Miracle-Ear division are major factors contributing to this quarter's dramatic earnings increase,'' commented K. Jeffrey Dahlberg, president and chief executive officer.

Dahlberg Inc. manufactures and distributes hearing products through its 525 franchised Miracle-Ear Centers and 226 company operated concession departments in Sears stores.

OWENSBORO, KY (JULY 26) BUSINESS WIRE - MPD Inc. Thursday announced that it has acquired Lion Laboratories Ltd. of Cardiff, Wales, in the United Kingdom.

Lion Laboratories manufactures electronic breath-testing equipment to detect alcohol levels in individuals. Its equipment is widely used in Australia, New Zealand, parts of Africa, and Europe, including the Soviet Union.

''Alcohol breath-testing equipment has become a significant part of MPD's long-range plans,'' said Buck DeFrance, MPD president. ''Lion provides us with additional technology in breath-testing equipment for markets which are not in law enforcement.

''Most importantly, the purchase of Lion Laboratories, based as it is in an EEC country, furnishes MPD with a European presence prior to 1992, when tariff barriers are scheduled to dismantle.''

Lion Laboratories is well-known in its field, particularly because of the stewardship of its chairman and managing director, Dr. Thomas P. Jones.

''Lion products have a market in the United States which haven't been fully exploited,'' Jones said. ''Our complementary product lines should be an advantage for both of us, making this a good marriage.''

''Lion has a first-rate distribution system in Europe, the Middle East, and Australia which will enhance our own marketing and distribution

efforts, and we're delighted that Dr. Jones will continue in an active role with MPD,'' said DeFrance.

MPD officials say that the Lion purchase will have a negligible short-term effect on employement in Owensboro, but that the long-term portends well because of the company's commitment to a world-wide market.

Based in Barry, Wales, Lion Laboratories has sales of about $5,000,000 in US dollars and has 70 employees. It was incorporated in October 1967 to manufacture and market ''alcolyser'' chemical detector tubes. In 1980, it won the Queen's Award for Technological Achievement.

MPD, a privately held company, manufactures products for a variety of markets, including microwave electronics; analyticl instruments; and ceramics and ceramic-to-metal seals and assemblies.

Its products are supplied to both defense and commercial markets. Based in Owensboro, MPD has annual sales of $50,000,000 and employs more than 650 people.

TORONTO (JULY 26) BUSINESS WIRE - The board of directors of Northern Telecom (NYSE:NT) meeting here Thursday raised the quarterly dividend to 8 cents per common share, payable Sept. 28, 1990, to shareholders of record

at the close of business on Sept. 7, 1990.

This represents an increase of 14 percent over the previous level of 7 cents per common share.

Dr. Paul G. Stern, chairman, president and chief executive officer, said, ''Our commitment to continued growth in revenues and earnings is strong. By increasing the common dividend, we are reflecting our confidence in Northern Telecom's future.''

The board also declared a dividend on the Class A preferred shares Series 4, in the amount of $4,315.07 per share in Canadian funds, payable on Aug. 15, 1990 to shareholders of record at the close of business on Aug. 14, 1990.

The board declared a second dividend on the Class A preferred share Series 4, the amount of which is to be determined in accordance with the terms and conditions attached to such shares and will be payable in Canadian funds on Sept. 12, 1990, to shareholders of record at the close of business on Sept. 11, 1990.

Northern Telecom, the leading global supplier of fully digital telecommunications switching systems, had 1989 revenues of $6.1 billion. Its common shares are listed on the New York, Toronto, Montreal, Vancouver London and Tokyo stock exchanges.
